Article number	<b>6ES7141-4BF00-0AA0</b> ET 200pro, EM 8DI 24V DC	<b>6ES7141-4BF00-0AB0</b> ET 200pro, EM 8DI 24V DC HF	<b>6ES7141-4BH00-0AA0</b> ET 200pro, EM 16DI DC 24V
<b>Interrupts/diagnostics/ status information</b>			
Diagnostics function	Yes	Yes; channel by channel, parameterizable	Yes
<b>Alarms</b>			
• Diagnostic alarm	Yes	Yes	Yes
• Hardware interrupt		Yes	
<b>Diagnoses</b>			
• Diagnostic information readable	Yes	Yes	Yes
• Wire-break		Yes; Monitoring, I < 0.3 mA; per channel	
• Short-circuit	Yes; Sensor supply to M; module by module	Yes; channel by channel	Yes; Sensor supply to M; module by module
<b>Diagnostics indication LED</b>			
• Group error SF (red)	Yes	Yes	Yes
• Status indicator digital input (green)	Yes; Per channel	Yes; Per channel	Yes; Per channel
<b>Potential separation</b>			
between backplane bus and all other circuit components	Yes	Yes	Yes
<b>Potential separation digital inputs</b>			
• between the channels	No	No	No
• between the channels and backplane bus	Yes	Yes	Yes
<b>Dimensions</b>			
Width	45 mm	45 mm	45 mm
Height	130 mm	130 mm	130 mm
Depth	35 mm	35 mm; without terminal module	35 mm
<b>Weights</b>			
Weight, approx.	140 g	140 g	140 g
Article number	<b>6ES7142-4BD00-0AA0</b> ET 200pro, EM 4DO 24V DC/2.0A	<b>6ES7142-4BD00-0AB0</b> ET 200pro, EM 4DO 24VDC/2.0A HF	<b>6ES7142-4BF00-0AA0</b> ET 200pro, EM 8DO DC24V/0.5A
<b>Supply voltage</b>			
<b>Load voltage 2L+</b>			
• Rated value (DC)	24 V	24 V	24 V
• Short-circuit protection	Yes; per channel, electronic	Yes; per channel, electronic	Yes; per channel, electronic
• Reverse polarity protection	Yes; against destruction; load increasing	Yes; against destruction; load increasing	Yes; against destruction; load increasing
<b>Input current</b>			
from load voltage 2L+ (without load), max.	20 mA	40 mA	30 mA
from backplane bus 3.3 V DC, max.	20 mA	30 mA	30 mA
<b>Digital outputs</b>			
Number of digital outputs	4	4	8
output type acc. to IEC 61131, type 0.5			Yes
output type acc. to IEC 61131, type 2	Yes	Yes	
Short-circuit protection	Yes	Yes	Yes
Limitation of inductive shutdown voltage to	2L+ (-47 V)	2L+ (-47 V)	2L+ (-47 V)
Controlling a digital input	Yes	Yes	Yes; Isolation between 1L+ and 2L+ is no longer provided, as 1M and 2M are jumpered
<b>Switching capacity of the outputs</b>			
• on lamp load, max.	10 W	10 W	5 W
<b>Load resistance range</b>			
• lower limit	12 Ω	12 Ω	48 Ω
• upper limit	4 kΩ	4 kΩ	4 kΩ
<b>Output voltage</b>			
• for signal "1", min.	2L+ (-0,8 V)	2L+ (-0,8 V)	2L+ (-0,8 V)
<b>Output current</b>			
• for signal "1" rated value	2 A	2 A	0.5 A
• for signal "0" residual current, max.	0.5 mA	0.5 mA	0.5 mA

**I/O systems**

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

**I/O modules > Analog expansion modules****Overview**

- Expansion modules with analog inputs and outputs for connecting sensors/actuators
- With diagnostics functionality, limit values and substitute values

**Ordering data****Article No.****Article No.****4AI U analog input module****6ES7144-4FF01-0AB0**

High Feature,  $\pm 10$  V;  $\pm 5$  V; 0 to 10 V;  
1 to 5 V, channel-specific  
diagnostics, including bus module.  
Connection module must be  
ordered separately

**4AI I analog input module****6ES7144-4GF01-0AB0**

High Feature,  $\pm 20$  mA; 0 to 20 mA;  
4 to 20 mA, channel-specific  
diagnostics, including bus module.  
Connection module must be  
ordered separately

**4AI RTD analog input module****6ES7144-4JF00-0AB0**

High Feature; resistances:  
150, 300, 600 and 3000 Ohm;  
resistance thermometer: Pt100,  
200, 500, 1000, Ni100, 120, 200,  
500 and 1000; channel-specific  
diagnostics, incl. bus module.  
Connection module must be  
ordered separately

**4AI TC analog input module****6ES7144-4PF00-0AB0**

High Feature; thermocouples:  
Type B, E, J, K, L, N, R, S, T;  
voltage measurement  $\pm 80$  mV;  
channel diagnostics, including bus  
module. Connection module must  
be ordered separately

**4AO U analog output module****6ES7145-4FF00-0AB0**

High Feature,  $\pm 10$  V; 0 to 10 V;  
1 to 5 V, channel-specific  
diagnostics, including bus module.  
Connection module must be  
ordered separately

**4AO I analog output module****6ES7145-4GF00-0AB0**

High Feature,  $\pm 20$  mA; 0 to 20 mA;  
4 to 20 mA, channel-specific  
diagnostics, including bus module.  
Connection module must be  
ordered separately

**Accessories****CM IO 4 x M12 connection module****6ES7194-4CA00-0AA0**

4 M12 sockets for connecting  
digital or analog sensors or  
actuators to ET 200pro

**M12 compensation connectors****6ES7194-4AB00-0AA0**

With integral Pt100 for cold junction  
compensation when connecting  
thermocouples

**Module identification labels****6ES7194-4HA00-0AA0**

For color coding of the CM IOs in  
the colors of white, red, blue and  
green; pack with 100 units each

**M12 sealing cap****3RX9802-0AA00**

For protection of unused M12  
connections with ET 200pro

**I/O systems**

SIMATIC ET 200 systems without control cabinet

SIMATIC ET 200pro

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

### I/O modules > Technology modules > EM 2 SSI electronic module

#### Overview

- 2-channel position detection module for ET 200pro, incl. bus module
- For connecting gray and dual-coded SSI absolute encoders to ET 200pro
- SSI interface with clock and data for RS422 differential signals
- 24 V encoder supply, short-circuit-proof
- Parameterizable input filters for suppressing interferences at encoder inputs
- Supports SSI absolute encoder with a frame length of 10 to 40 bits, of which up to 25 bits position value
- Width 45 mm

Rated value (DC)	24 V
Reverse polarity protection	Yes
<b>Load voltage 2L+</b>	
• Rated value (DC)	24 V
• Short-circuit protection	Yes
• Reverse polarity protection	Yes; against destruction; load increasing

Article number	<b>6ES7147-4JD00-0AB0</b> ET200pro, EM 4 IO-Link HF
<b>Input current</b>	
from supply voltage 1L+, max.	40 mA
from load voltage 2L+ (without load), max.	20 mA
from backplane bus 3.3 V DC, max.	20 mA
<b>Encoder supply</b>	
Number of outputs	4
Short-circuit protection	Yes; per module, electronic
<b>Output current</b>	
• up to 55 °C, max.	2 A
<b>IO-Link</b>	
Number of ports	4
• of which simultaneously controllable	4
IO-Link protocol 1.0	Yes
IO-Link protocol 1.1	Yes
Transmission rate	4.8 kBaud (COM1); 38.4 kBaud (COM2), 230.4 kBaud (COM3)
Size of process data, input per port	32 byte
Size of process data, input per module	32 byte
Size of process data, output per port	32 byte
Size of process data, output per module	32 byte
Memory size for device parameter	2 kbyte; for each port
Master backup	possible with LIOLink_Master function block
Configuration without S7-PCT	Possible; autostart/manual function
Cable length unshielded, max.	20 m
<b>Connection of IO-Link devices</b>	
• Port type A	Yes; via 3-core cable
• Port type B	Yes; Additional device supply: for X1 and X2 max. 2 A in total, for X3 and X4 max. 2 A in total
<b>Interrupts/diagnostics/status information</b>	
Diagnostics function	Yes
<b>Alarms</b>	
• Diagnostic alarm	Yes
<b>Diagnoses</b>	
• Diagnostic information readable	Yes
• Wire-break	Yes; channel by channel
• Short-circuit	Yes; channel by channel
<b>Diagnostics indication LED</b>	
• Channel status display	Yes; One green LED for channel status Qn (SIO mode) and port status IO-Ln (IO-Link mode)
• Group error SF (red)	Yes
• Channel fault indicator F (red)	Yes; combined with the IO-Link port status
<b>Potential separation</b>	
between the load voltages	Yes
between backplane bus and all other circuit components	Yes
<b>Potential separation channels</b>	
• between the channels	No
<b>Degree and class of protection</b>	
IP degree of protection	IP65/67
<b>Standards, approvals, certificates</b>	
Suitable for safety-related tripping of standard modules	No
<b>Dimensions</b>	
Width	45 mm
Height	130 mm
Depth	35 mm
<b>Weights</b>	
Weight, approx.	150 g

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

I/O modules > Fail-safe expansion modules > Fail-safe digital expansion modules

### Overview

Fail-safe digital inputs/outputs with IP65/66/67 degree of protection for cabinet-free application on the machine level.

#### Fail-safe digital inputs

- For fail-safe reading of sensor information (1 or 2 channels)
- Provide integral discrepancy evaluation for 2-out-of-2 signals
- Internal sensor supplies (incl. test function) available

#### Fail-safe digital outputs

- Fail-safe 2-channel activation (switching to P/M potential) of actuators
- Actuators can be controlled up to 2 A

All modules are certified up to SIL 3 (IEC 61508) and feature detailed diagnostics.

The modules support PROFIsafe in both PROFIBUS and PROFINET configurations. They can be used with IM151-7 F-CPU, CPU31xF-2 DP, CPU31xF-2 PN/DP and CPU416F-2.

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

### I/O modules > RF170C

#### Overview

The SIMATIC RF170C is a communications module for connecting the SIMATIC identification systems to the ET 200pro distributed I/O system. The readers of all RFID systems as well as the MV400 optical readers and MV300 optical handheld readers can be operated on the RF170C. In addition, the RF170C provides a universal RS232/RS422 interface for connecting devices using the Freeprotocol.

Thanks to the high degree of protection and ruggedness, ET 200pro is particularly suitable for machine-level use. The modular structure with PROFIBUS and PROFINET connection systems allows it to be used in all applications. The uniform plug-in connection system ensures rapid commissioning.

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

Power supplies > 3-phase, 24 V DC (ET200pro PS, IP67)

### Overview

#### Power supply for ET200pro:

- 3-phase, 24 V DC/8 A

The SIMATIC ET200pro PS power supply unit with IP67 degree of protection is used as the electronics/encoder supply and load voltage supply of the new SIMATIC ET 200pro distributed I/O system for use close to the machine without a cabinet. With a second connector for looping the input voltage.

#### Product highlights

- 3-phase, 24 V DC/8 A
- Wide-range input, input voltage 340 ... 550 V
- Up to 88% efficiency
- With signaling contact for "24 V OK" and "Overtemperature"
- Status indicator on the device by means of LED (green = "24 V OK")
- Temperature range from -25 °C to +55 °C

### Ordering data

#### SIMATIC ET 200pro PS

Stabilized power supply in distributed I/O system design, permitting the loop-through of energy to further modules; with degree of protection IP67; Input: 400–480 V 3 AC Output: 24 V DC/8 A

#### Accessories

##### Power connector

For connecting to the distributed I/O system

- For X1 (6 mm<sup>2</sup>)
- For X2 (4 mm<sup>2</sup>)

#### Article No.

6ES7148-4PC00-0HA0

3RK1911-2BE30  
3RK1911-2BF10

#### Article No.

#### National Fire Protection Association compatible

These devices are only approved for installation in industrial machinery according to the NFPA79 Electrical Standard for Industrial Machinery.

- For X1 SIMATIC ET 200pro PS 61 88 201 1003.xx (AWG10)\*
- For X1 SITOP PSU300P 61 88 201 1000.xx / 61 88 201 1002.xx (AWG14)\*
- For X2 SIMATIC ET 200pro PS 61 88 202 1010.xx (AWG10)\*  
supplied blanking cap for X2
- For X3 Phoenix-Contact SAC-5P-M12-M12FS  
supplied blanking cap for X3

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

ET 200pro motor starters > General data

### Overview

#### ET 200pro motor starters in ET 200pro I/O system

SIMATIC ET 200pro is the modular I/O system with high degree of protection IP65/IP66/IP67 for cabinet-free use near the machine. The ET 200pro motor starters with the high degree of protection IP65 are an integral part of ET 200pro.

ET 200pro motor starter: Isolator module, Standard starter and High Feature starter mounted on a wide module rack

#### ET 200pro motor starters (see pages 3/428 and 3/429)

- Only two variants up to 5.5 kW
- All settings can be configured by bus
- Comprehensive diagnostic messages
- Support for PROFlenergy
- Overload can be acknowledged by remote RESET
- Current asymmetry monitoring
- Stall protection
- EMERGENCY START function on overload
- Current value transmission by bus
- Current limit monitoring
- Full support of acyclic services
- Direct-on-line or reversing starters
- Power bus connection can be plugged in using Han Q4/2 plug-in connectors
- Motor feeder with Han Q8/0 connector
- Conductor cross-section up to 6 x 4 mm<sup>2</sup>
- 25 A per segment (power looped through using jumper plug)
- In the Standard and High Feature versions (with 4 DI on-board)
- Electromechanical switching and electronic switching
- Electronic direct-on-line starter or with integrated soft starter function
- Supplied with 400 V AC brake contact as an option
- Temperature sensor can be connected (Thermoclick or PTC type A)
- Provision of the motor current in PROFlenergy format to higher-level systems, motor current shutdown in dead times using PROFlenergy

#### More information

Homepage see <https://www.siemens.com/sirius-motor-starter-et200pro>  
SiePortal see [https://www.siemens.com/product\\_catalog\\_siep?ET200pro](https://www.siemens.com/product_catalog_siep?ET200pro)

Decision support for motor start – Starting and operating three-phase asynchronous motors efficiently, see <https://www.siemens.com/motorstart-guide>

Further components in the ET 200pro distributed I/O system:

- Interface modules, central processing units, I/O modules, ET 200pro PS, see from page 10/386 onwards
  - ET 200pro FC-2 frequency converter see page 3/438
- Catalog IC 10 see <https://www.siemens.com/ic10>

#### ET 200pro isolator modules (see page 3/430)

The isolator module with switch disconnecter function is used for safe disconnection of the 400 V operational voltage during repair work in the plant and provides an integrated group fusing function (i.e. additional group short-circuit protection for all subsequently supplied motor starters).

Depending on the power distribution concept, all stations can be equipped with an isolator module as an option.

#### Safety applications

PROFlsafe Safety Solution (see page 3/431)

With the PROFlsafe Safety modules

- F-Switch and
  - 400 V disconnecting module
- with an appropriate connection, safety levels SIL 3 (according to IEC 62061) and PL e (according to ISO 13849-1) can also be reached.

#### Functionality

With the ET 200pro motor starters, any three-phase loads can be protected and switched.

The ET 200pro motor starters are available with mechanical and also electronic contacts.

The ET 200pro electromechanical starters are offered as direct-on-line starters (DSe) and reversing starters (RSe) as **Standard** and **High Feature** versions. There are device versions with or without control for externally supplied brakes with 400 V AC.

Compared with the Standard motor starters, the **High Feature, mechanical** motor starter also has:

- Four digital inputs
- Advanced parameterization options

The ET 200pro electronic starters are offered as direct-on-line starters (sDSSSte/sDSte) and reversing starters (sRSSSte/sRSte) in the High Feature version.

Compared with the High Feature mechanical motor starters, the **High Feature, electronic** motor starter also has:

- Soft starting and smooth ramp-down function
- Deactivated soft start function as an electronic starter for applications with a high switching frequency
- Advanced parameterization options

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

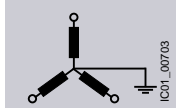

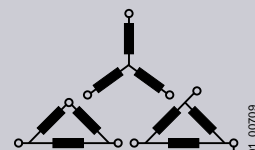

### ET 200pro motor starters > General data

As a result of the protection concept with solid-state overload evaluation and the use of SIRIUS switching devices, size S00, additional advantages are realized with the Standard and High Feature motor starters – advantages that soon make themselves positively felt particularly in manufacturing processes with high plant stoppage costs:

- Plant configuration is made easier and flexibility is increased by the fine modular structure with ET 200pro. When using the ET 200pro motor starters, the bill of materials per load feeder is reduced to two main items: the bus module and the motor starter. This makes the ET 200pro ideal for modular machine concepts or solutions for conveyor systems and in machine-tool construction.
- Expansions are easily possible through the subsequent adding of modules. The innovative plug-in technology also does away with the wiring needed up to now. Through the hot swapping function (disconnection and connection during operation), a motor starter can be replaced within seconds if necessary, without having to shut down the ET 200pro station and with it the process in the plant. The motor starters are therefore recommendable in particular for applications with special demands on availability. Storage costs are also optimized by the low level of variance (two units up to 5.5 kW).
- With four locally acting inputs available on the High Feature motor starter, autonomous special functions can be implemented that operate independently of the bus and the higher-level control system, e.g. as a quick stop on slide valve controls or end position disconnections. In parallel with this, the states of these inputs are signaled to the control system.

### Voltage Data

The data for 3-phase systems according to IEC 60947-4-1 apply for the following line system configurations:

Voltage $U_e$	Line system configurations	
	Three-phase four-wire systems	Three-phase three-wire systems
		
V	V	V
230	--	230
400	230/400	400
440	260/440	440
500	--	500

-- Not specified

## I/O systems

SIMATIC ET 200 systems without control cabinet

SIMATIC ET 200pro

### ET 200pro motor starters > General data

#### Benefits

ET 200pro motor starters provide the following advantages:

- High flexibility thanks to a modular and compact design
- Low level of variance among all motor starter versions (two devices up to 5.5 kW)
- Extensive parameterization using STEP 7 HW Config
- Increase of plant availability through fast replacement of units (easy mounting and plug-in technology)
- Extensive diagnostics and information for preventive maintenance
- Configurable inputs for local control functions (High Feature)
- Cabinet-free design thanks to high degree of protection IP65

#### Application

The SIMATIC ET 200pro motor starters are ideal for the use of several spatially concentrated distributed drive solutions in which several motors, or digital or analog sensors and actuators are addressed from a distributed station. They are perfectly suited for protecting and switching any three-phase loads.

#### **Application areas**

The SIMATIC ET 200pro motor starters are suitable for numerous sectors of industry, e.g. machinery and plant engineering or conveying applications.

### ET 200pro Solution PROFIsafe Safety motor starters > PROFIsafe Safety modules

#### Overview

##### PROFIsafe Safety Solution

With the PROFIsafe Safety modules

- F-Switch and
  - 400 V disconnecting module
- with an appropriate connection, safety levels SIL 3 (according to IEC 62061) and PL e (according to ISO 13849-1) can be reached.

##### PROFIsafe F-Switch

Fail-safe digital inputs/outputs in degrees of protection IP65 to IP67 for cabinet-free use near the machine.

##### Fail-safe digital inputs

- For the fail-safe reading in of sensor information (1-/2-channel)
- Including integrated discrepancy evaluation for 2V2 signals
- Internal sensor supplies (including testing) available

##### Fail-safe digital outputs

- Three fail-safe PP-switching outputs for safe switching of the backplane busbars

The F-Switch is certified up to SIL 3/PL e and has detailed diagnostics. It supports PROFIsafe in PROFIBUS configurations as well as in PROFINET configurations.

##### Note:

Safety characteristics, [see https://support.industry.siemens.com/cs/ww/en/view/109739348](https://support.industry.siemens.com/cs/ww/en/view/109739348).

##### Functionality

The PROFIsafe F-Switch is a fail-safe solid-state module for PROFIsafe safety applications. It has two fail-safe inputs and outputs for safe switching of the 24 V supply over backplane busbars. In combination with the 400 V disconnecting module, fail-safe shutdown of ET 200pro motor starters is possible in PROFIsafe applications up to SIL 3/PL e.

##### 400 V disconnecting module

The 400 V disconnecting module enables the safe disconnection of an operational voltage of 400 V up to SIL 3/PL e. For operation in a PROFIsafe Safety application it functions only in combination with the F-Switch.

##### Functionality

The 400 V disconnecting module can be used together with the F-Switch for PROFIsafe Safety applications. It contains two contactors connected in series for safety-related disconnection of the main circuit. The auxiliary circuit supply of the device is provided via a safety power rail in the backplane bus module. The 400 V disconnecting module can be used in conjunction with the F-Switch for safety applications up to SIL 3/PL e.

#### Technical specifications

Type	400 V disconnecting module	
<b>General data</b>		
<b>Mounting dimensions (W x H x D)</b>		
• Direct-on-line starters and reversing starters	mm	110 x 230 x 150
<b>Permissible ambient temperature</b>		
• During operation	°C	-25 ... +55
• During storage	°C	-40 ... +70
<b>Permissible mounting position</b>		Any
<b>Vibration resistance according to IEC 60068-2-6</b>	<i>g</i>	2
<b>Shock resistance according to IEC 60068-2-27</b>	<i>g/ms</i>	Half-sine 15/11
<b>Power consumption</b>		
• From auxiliary circuit L+/M (U1)	mA	Approx. 20
• From auxiliary circuit A1/A2 (U2)		--
<b>Rated operational current <math>I_e</math> for power bus</b>	A	25
<b>Rated operational voltage <math>U_e</math></b>	V	400 (50/60 Hz)
<b>Approval DIN VDE 0106, Part 101</b>	V	Up to 500
<b>CSA and UL approval</b>	V	Up to 600
<b>Conductor cross-sections</b>		
Incoming power supply	mm <sup>2</sup>	Max. 6 x 4
<b>Degree of protection</b>		IP65
<b>Touch protection</b>		Finger-safe
<b>Pollution degree</b>		3, IEC 60664 (IEC 61131)

Type	400 V disconnecting module	
<b>Rated impulse withstand voltage <math>U_{imp}</math></b>	kV	6
<b>Rated insulation voltage <math>U_i</math></b>	V	400
<b>Rated operational current <math>I_e</math> for starters</b>		
• AC-1, AC-2, AC-3 at 40 °C		
- At 400 V	A	25
- At 500 V	A	25
<b>Rated short-circuit breaking capacity</b>	kA	50 at 400 V
<b>Type of coordination according to IEC 60947-4-1</b>		2
<b>Protective separation between main and auxiliary circuits</b>	V	400, according to DIN VDE 0106, Part 101
<b>Operating times at 0.85 ... 1.1 x <math>U_s</math></b>		
• Closing delay	ms	25 ... 100
• Opening delay	ms	7 ... 10
<b>Device functions</b>		
• Group diagnostics		Yes, configurable
<b>Device indications</b>		
• Group fault		SF LED (red)

SIMATIC ET 200pro

### Accessories for ET 200pro motor starters

#### Power bus

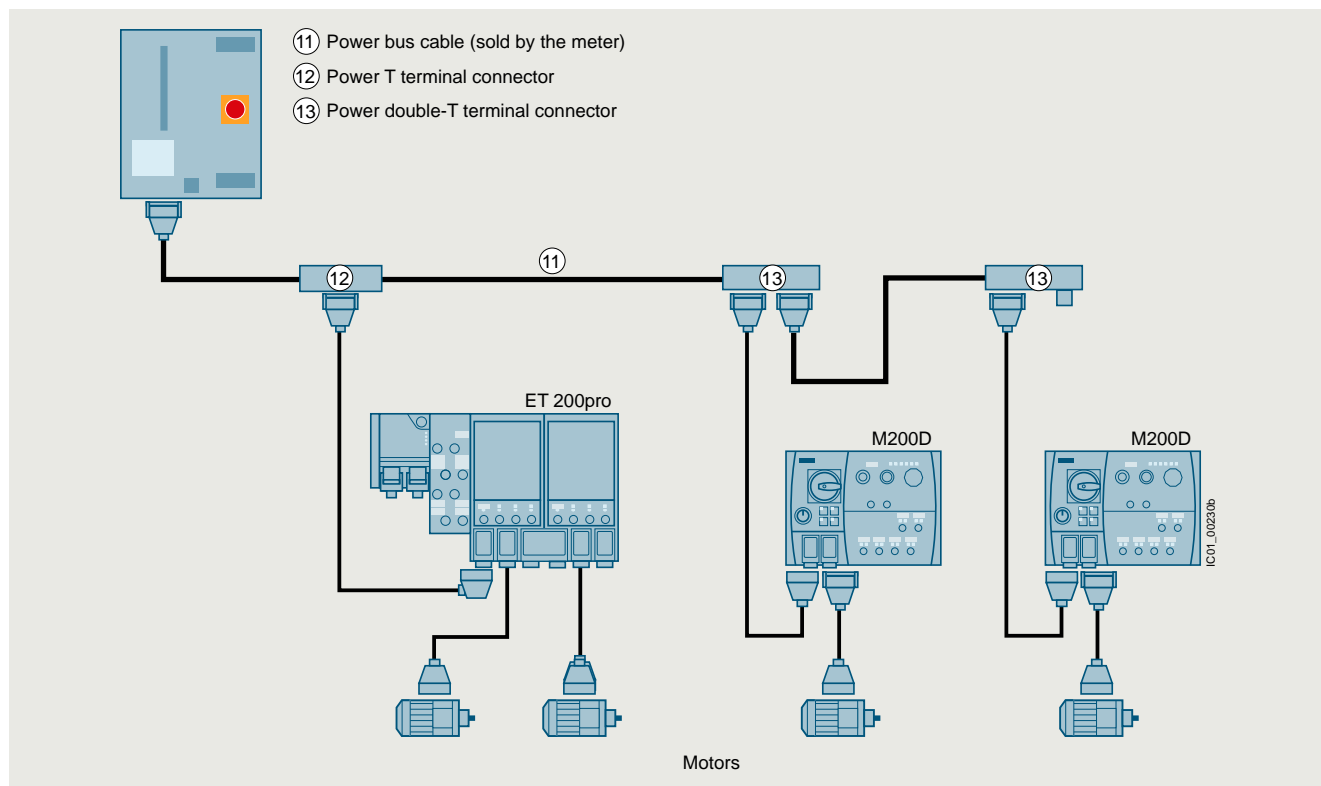

The power supply to the field devices (ET 200pro motor starters, M200D motor starters) is provided via the power bus, in which the power T terminal connectors or power double-T terminal connectors are connected by power bus cables.

#### Feeders

From the terminal connectors, spur lines with Han Q4/2 plugs lead to the field devices, from which the motors are supplied with power via motor connection cables.

#### Interruption-free thanks to power terminal connectors

In finger-safe connection technology the power T terminal connectors and power double-T terminal connectors connect the components of a feeder to the power bus. They ensure interruption-free operation, i.e. the power bus is not interrupted when the components are plugged in.

Power supply to the motors via the power bus with power T and double-T terminal connectors linked by power bus cables, spur lines to the field devices (motor starters), and power loop-through connections to the motors via motor connection cables

#### Motor control via PROFIBUS

The interface modules (IM) for PROFIBUS can be combined with two different connection modules for connecting PROFIBUS DP and the power supply:

- Direct connection with cable gland
- M12, 7/8" connection
  - with M12 connecting cable and M12 plugs for data transmission with PROFIBUS DP
  - with 7/8" connecting cable and 7/8" plugs for the power supply

For the connection modules with the relevant accessories, see [Accessories for ET 200pro interface modules, page 10/386](#) or SiePortal: <https://www.siemens.com/sieportal>.

#### Motor control via PROFINET

For the connection modules with the relevant accessories, see [Accessories for ET 200pro interface modules, page 10/386](#) or SiePortal: <https://www.siemens.com/sieportal>.

<sup>2)</sup> The backplane bus module is a prerequisite for operation of the ET 200pro motor starters and the optional modules.

For more connection technology products, see <https://support.industry.siemens.com/cs/ww/en/view/65355810>.

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

### SIMATIC ET 200pro FC-2 frequency converters

#### Overview

SIMATIC ET 200pro FC-2 frequency converter

The SIMATIC ET 200pro FC-2 frequency converter has the design of a SIMATIC ET 200pro module. It supplements the SIMATIC ET 200pro system range with distributed, speed-controlled drives. It is suitable for the open-loop and closed-loop control of asynchronous (induction) motors in a wide range of industrial applications. It is predestined for conveyor technology applications using drives networked via PROFIBUS and PROFINET, in particular in distributed designs without control cabinet with high degree of protection (IP65), when combining several drives. The modular, service-friendly concept is ideally suited to manufacturing processes with high plant standstill costs.

#### Reasons for using distributed drive systems

- Modular drive solutions – therefore standardized mechatronic elements that can be individually tested
- A control cabinet is not required, resulting in a smaller space requirement and lower cooling requirements
- Long motor cables between converter and motor are not required
  - Less power losses
  - Reduced noise radiation
  - Reduced costs for shielded cables
  - No additional filters
- Distributed configurations offer considerable benefits for conveyor systems with their extensive coverage (e.g. in the automotive and logistics sectors)

#### Siemens family of distributed drives

Siemens offers an innovative portfolio of frequency converters to optimally implement distributed drive solutions. The strengths of the individual members of the drive family permit simple adaptation to the widest range of application demands:

- Identical connection systems
- User-friendly commissioning and configuration tools

Products from the family of distributed drives:

- SINAMICS G115D distributed converters
- SINAMICS G120D frequency converters
- SIMATIC ET 200pro FC-2 frequency converters
- SIRIUS M200D motor starters

#### Safety Integrated

The distributed SIMATIC ET 200pro FC-2 frequency converters are already equipped with the integrated STO (Safe Torque Off) safety function, certified in accordance with IEC 61508 SIL 2 as well as ISO 13849-1 PL d and Category 3. It can be activated locally via the F-RSM or by means of PROFIsafe.

#### STARTER commissioning tool

The STARTER commissioning tool (V4.4 and higher) plus the corresponding SINAMICS Support Package (SSP) supports the commissioning and maintenance of SIMATIC ET 200pro FC-2 frequency converters.

The operator guidance combined with comprehensive, user-friendly functions for the relevant drive solution allow you to commission the device quickly and easily.

#### Engineering Framework STEP7 classic (V5.5 and higher)

Hardware Support Packages (HSP) are available to integrate SIMATIC ET 200pro FC-2 in STEP7 classic.

#### Engineering Framework TIA Portal (as from V13 SP1)

TIA Portal is a powerful engineering framework providing full access to the whole digitized automation.

Hardware Support Packages (HSP) are available to integrate SIMATIC ET 200pro FC-2 in TIA Portal.

Weight, approx.	4 kg (8.8 lb)																		
Standards																			
Certificates of suitability	UL508C, cUL, CE, UKCA, Low Voltage Directive 2014/35/EU, EMC Directive 2014/30/EU																		

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

ET 200pro software > Motor Starter ES

### Overview

Motor Starter ES for parameterization, monitoring, diagnostics and testing of motor starters

#### More information

SiePortal see [https://www.siemens.com/product\\_catalog\\_siep?3ZS1](https://www.siemens.com/product_catalog_siep?3ZS1)

Technical specifications and system requirements, see <https://support.industry.siemens.com/cs/ww/en/ps/16713/td>

Catalog IC 10 see <https://www.siemens.com/ic10>

Motor Starter ES is used for the commissioning, parameterization, diagnostics, documentation and preventive maintenance of SIMATIC ET 200S, ET 200pro, ECOFAST and M200D motor starters.

Interfacing is performed

- Via the local interface on the device
- With PROFIBUS DP-V1-capable motor starters from any point in PROFIBUS (applies to ET 200S DP V1/ET 200pro/ECOFAST/M200D)
- With PROFINET-capable motor starters from any point in PROFINET (applies to ET 200S DP V1/ET 200pro/M200D).

Using Motor Starter ES, the communication-capable motor starters are easily parameterized during commissioning, monitored during normal operation and successfully diagnosed for service purposes. Preventative maintenance is supported by a function for reading out diverse statistical data (e.g. operating hours, operating cycles, cut-off currents, etc.). The user is supported during these procedures with comprehensive Help functions and plain text displays.

Motor Starter ES can either be used as a stand-alone program or it can be integrated into STEP 7 via an Object Manager.

#### Note:

The Motor Starter ES functionalities in relation to commissioning, parameterization and diagnostics are integrated directly in the TIA Portal from V18 and are accessible online for the SIMATIC ET 200pro, ET 200SP and M200D motor starters.

### Efficient engineering with three program versions

The Motor Starter ES software program is available in three versions which differ in their user-friendliness, scope of functions and price.

Motor Starter ES	Basic	Standard	Premium
ET 200S High Feature PROFIBUS IM	✓	✓	✓
ET 200S High Feature PROFINET IM	✓	✓	✓
ECOFAST AS-Interface High Feature	✓	✓	--
ECOFAST PROFIBUS	✓	✓	✓

✓ Function available

-- Function not available

<sup>1)</sup> Only for STEP 7 V5.x

### Additional functions

#### Standard-compliant printouts

The software tool greatly simplifies machine documentation. It enables parameterization printouts according to EN ISO 7200. The elements to be printed are easy to select and group as required.

#### Easy creation of templates

Templates can be created for devices and applications with only minimum differences in their parameters. These templates contain all the parameters which are needed for the parameterization. In addition it is possible to specify which of these parameters are fixed and which can be adapted, e.g. by the commissioning engineer.

#### Teleservice via MPI

The Motor Starter ES Premium version supports the use of MPI Teleservice (comprising the Teleservice software and various Teleservice adapters) for remote diagnostics of the devices. This facilitates diagnostics and maintenance, and it shortens response times for service purposes.

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

### ET 200pro software > Motor Starter ES

#### Benefits

- Fast, error-free configuration and commissioning of motor starters even without extensive previous knowledge
- Transparent setting of the device functions and their parameters – online and offline
- Effective diagnostics functions on the soft starter and display of the most important measured values
- Trace function (oscilloscope function) for recording measured values and events (included in the Motor Starter ES Standard and Premium software version for M200D PROFIBUS and PROFINET).

#### Selection and ordering data

### SIMATIC ET 200 systems without control cabinet

#### SIMATIC ET 200AL

##### Overview

SIMATIC ET 200AL video

[https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c\\_default/index.html?videoId=6141316253001](https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c_default/index.html?videoId=6141316253001)

- Modular, distributed I/O system with compact I/O modules in IP65/67.
- Especially easy and flexible installation, even in extremely confined spaces.
- Easy wiring
- Easy commissioning
- SIMATIC ET 200AL consists of the following components:
  - Interface module for communication with IO controllers using the Ethernet-based protocols PROFINET, EtherNet/IP and Modbus TCP (MultiFieldbus).
  - Interface module for communication with IO controllers on PROFINET.
  - Interface module for communication with all masters on the PROFIBUS.
  - BusAdapter for connection to the ET 200SP I/O system.
  - Various I/O modules, 30 mm and 45 mm wide.
  - IO-Link I/O modules for connection to IO-Link Master
- Maximum configuration of an ET 200AL station:
  - Up to 32 I/O modules with PROFINET or PROFIBUS in any combination
  - Up to 16 I/O modules at the ET 200SP I/O system in any combination
- Connection of the modules via an internal backplane bus established using bus cables (ET connection).

##### Highlights

- Compact dimensions
- Low weight
- Safety-related collective shutdown of the outputs
- High degree of user-friendliness due to the following design features:
  - Flexible mounting in all positions possible due to screw fastening through the front or side
  - Direct installation on even surfaces or aluminum DIN rails
  - Labels for the identification of channels, modules and slots
  - Integrated cable tie opening
  - Clear and CAx-compliant interface designations
  - Uniform coloring of the system interfaces and system cables
  - 1:1 assignment of channel status LED, I/O socket and labeling strip
  - Pin assignment on the side
- I/O module portfolio comprising digital and analog modules, digital fail-safe module, IO-Link communications module and IO-Link I/O modules
- Ambient temperature range from -30 °C/-25 °C to +55 °C
- Extensive system functions
  - All interface and I/O modules support firmware update
  - Configuration control (option handling) via user software
  - System support of PROFlenergy for power saving purposes
  - Consistent use of identification and maintenance data IM0 to IM3/4 (electronic rating plate) for fast electronic and unambiguous identification of individual modules (Article No., serial number, etc.).

**I/O systems**

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200AL

**Interface modules > IM 157-1 MF****Overview**

- Multi-protocol capability:  
Operation of the ET 200AL interface module on Ethernet controllers via the PROFINET, EtherNet/IP and Modbus TCP protocols
- Max. 32 I/O modules can be connected
- Max. data volume of 1440 bytes, for input and output data respectively (depends on protocol)
- Shortest bus cycle time 250 µs (depends on protocol)
- Automatic start-up by means of topology discovery (depends on protocol)
- Shared device:

Simultaneous access from different controllers via different Ethernet protocols PROFINET, EtherNet/IP and Modbus TCP

- Local data links:

Deterministic, easy-to-configure data exchange between controllers, also via different Ethernet protocols PROFINET, EtherNet/IP and Modbus TCP

- S2 system redundancy
- Support for the MRP (media redundancy protocol) and MRPD (media redundancy with planned duplication) functions
- Identification and maintenance data IMO ... IM4
- Autocrossover
- Firmware update
- Configuration management (option handling)
- PROFlenergy
- Security functions

• MS LED	Yes; green/red LED
• IO LED	Yes; red/green/yellow LEDs
• Connection display LINK TX/RX	Yes; 2x green LED

Article number	<b>6ES7157-1MA00-0AB0</b> ET 200AL, IM 157-1 MF
<b>Potential separation</b>	
between the load voltages	Yes
between PROFINET and all other circuits	Yes
<b>Degree and class of protection</b>	
IP degree of protection	IP65/67
<b>Standards, approvals, certificates</b>	
Suitable for safety-related tripping of standard modules	Yes; from FS01
<b>Highest safety class achievable for safety-related tripping of standard modules</b>	
• Performance level according to ISO 13849-1	PL d
• Category according to ISO 13849-1	Cat. 3
• SIL acc. to IEC 62061	SIL 2
<b>Product functions / security</b>	
PROFINET Security Class	1
signed firmware update	Yes
Secure Boot	Yes
safely removing data	Yes
data integrity	Yes
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• min.	-30 °C
• max.	55 °C
<b>Altitude during operation relating to sea level</b>	
• Ambient air temperature-barometric pressure-altitude	Up to max. 5 000 m, at installation height > 2 000 m additional restrictions
<b>connection method</b>	
Design of electrical connection for supply voltage	M8, 4-pole
<b>ET-Connection</b>	
• ET-Connection	M8, 4-pin, shielded
<b>Dimensions</b>	
Width	45 mm
Height	159 mm
Depth	40 mm
<b>Weights</b>	
Weight, approx.	215 g

**I/O systems**SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200AL**Interface modules > IM 157-1 PN****Overview**

- Interface module for connecting ET 200AL to PROFINET
- Handles data exchange with the PROFINET I/O controller in the PLC
- Max. 32 I/O modules can be connected
- Max. data volume of 1430 bytes, for input and output data respectively
- Shortest bus cycle 250 µs
- Automatic power-up by means of topology recognition
- Autocrossover
- Shared device on up to 4 IO controllers
- Support for the MRP (media redundancy protocol) and MRPD (media redundancy with planned duplication) functions
- Identification and maintenance data IM0 ... IM4
- Firmware update
- Configuration management (option handling)
- PROFIenergy

Article number	<b>6ES7141-5BF00-0BA0</b> ET 200AL, DI 8x24VDC, 8xM8	<b>6ES7141-5AF00-0BA0</b> ET 200AL, DI 8x24VDC, 4xM12	<b>6ES7141-5AH00-0BA0</b> ET 200AL, DI 16x24VDC, 8xM12
<b>General information</b>			
Product type designation	DI 8x24VDC	DI 8x24VDC	DI 16x24VDC
<b>Product function</b>			
• I&M data	Yes; I&M0 to I&M3	Yes; I&M0 to I&M3	Yes; I&M0 to I&M3
<b>Engineering with</b>			
• STEP 7 TIA Portal configurable/ integrated from version	STEP 7 V13 SP1 or higher	STEP 7 V13 SP1 or higher	STEP 7 V13 SP1 or higher
• STEP 7 configurable/ integrated from version	From V5.5 SP4 Hotfix 3	V5.5 SP4 Hotfix 7 or higher	V5.5 SP4 Hotfix 7 or higher
• PROFIBUS from GSD version/ GSD revision	GSD as of Revision 5	GSD as of Revision 5	GSD as of Revision 5
• PROFINET from GSD version/ GSD revision	GSDML V2.3.1	GSDML V2.3.1	GSDML V2.3.1
<b>Supply voltage</b>			
<b>Load voltage 1L+</b>			
• Rated value (DC)	24 V	24 V	24 V
• Reverse polarity protection	Yes; Against destruction; encoder power supply outputs applied with reversed polarity	Yes; Against destruction; encoder power supply outputs applied with reversed polarity	Yes; Against destruction; encoder power supply outputs applied with reversed polarity
<b>Input current</b>			
Current consumption (rated value) from load voltage 1L+ (unswitched voltage)	25 mA; without load 4 A; Maximum value	25 mA; without load 4 A; Maximum value	30 mA; without load 4 A; Maximum value
from load voltage 2L+, max.	4 A; Maximum value	4 A; Maximum value	4 A; Maximum value
<b>Encoder supply</b>			
Number of outputs	8	4	8
<b>Digital inputs</b>			
Number of digital inputs	8	8	16
Input characteristic curve in accordance with IEC 61131, type 3	Yes	Yes	Yes
<b>Number of simultaneously controllable inputs</b>			
<b>all mounting positions</b>			
- up to 55 °C, max.	8	8	16
<b>Input voltage</b>			
• Rated value (DC)	24 V	24 V	24 V
• for signal "0"	-30 to +5 V	-30 to +5 V	-30 to +5 V
• for signal "1"	+11 to +30V	+11 to +30V	+11 to +30V
<b>Input current</b>			
• for signal "1", typ.	3.2 mA	3.2 mA	3.2 mA
<b>Encoder</b>			
<b>Connectable encoders</b>			
• 2-wire sensor	Yes	Yes	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA	1.5 mA	1.5 mA
<b>Interrupts/diagnostics/ status information</b>			
<b>Alarms</b>			
• Diagnostic alarm	Yes; Parameterizable	Yes; Parameterizable	Yes; Parameterizable
<b>Diagnoses</b>			
• Short-circuit	Yes; Sensor supply to M; module by module	Yes; Sensor supply to M; module by module	Yes; Sensor supply to M; module by module
<b>Diagnostics indication LED</b>			
• Channel status display	Yes; green LED	Yes; green LED	Yes; green LED
• for module diagnostics	Yes; green/red LED	Yes; green/red LED	Yes; green/red LED

#### Technical specifications

Article number	<b>6ES7142-5AF00-0BA0</b> ET 200AL, DQ 8x24VDC/2A, 8xM12
<b>General information</b>	
Product type designation	DQ 8x24VDC/2A
<b>Product function</b>	
• I&M data	Yes; I&M0 to I&M3
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	STEP 7 V13 SP1 or higher
• STEP 7 configurable/ integrated from version	V5.5 SP4 Hotfix 7 or higher
• PROFIBUS from GSD version/ GSD revision	GSD as of Revision 5
• PROFINET from GSD version/ GSD revision	GSDML V2.3.1
<b>Supply voltage</b>	
<b>Load voltage 1L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction; load increasing
<b>Load voltage 2L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction; load increasing
<b>Input current</b>	
Current consumption (rated value)	40 mA; 40 mA (1L+) / 35 mA (2L+); without load
from load voltage 1L+ (unswitched voltage)	4 A; Maximum value
from load voltage 2L+, max.	4 A; Maximum value
<b>Digital outputs</b>	
Number of digital outputs	8
• in groups of	4; 2 load groups for 4 outputs each
output type acc. to IEC 61131, type 2	Yes
Short-circuit protection	Yes; per channel, electronic
Limitation of inductive shutdown voltage to	2L+ (-47 V)
<b>Switching capacity of the outputs</b>	
• on lamp load, max.	10 W
<b>Load resistance range</b>	
• lower limit	12 Ω
• upper limit	4 kΩ
<b>Output voltage</b>	
• for signal "1", min.	L+ (-0.8 V)
<b>Output current</b>	
• for signal "1" rated value	2 A
• for signal "0" residual current, max.	0.5 mA
<b>Switching frequency</b>	
• with resistive load, max.	100 Hz
• with inductive load, max.	0.1 Hz; 0.25 Hz at 25 °C
• on lamp load, max.	1 Hz
<b>Total current of the outputs</b>	
• Current per group, max.	4 A; For inductive load max. 2 channels per group

Article number	<b>6ES7142-5AF00-0BA0</b> ET 200AL, DQ 8x24VDC/2A, 8xM12
<b>Interrupts/diagnostics/ status information</b>	
Substitute values connectable	Yes; channel by channel, parameterizable
<b>Alarms</b>	
• Diagnostic alarm	Yes; Parameterizable
<b>Diagnoses</b>	
• Short-circuit	Yes; Outputs to ground; module by module
<b>Diagnostics indication LED</b>	
• Channel status display	Yes; green LED
• for module diagnostics	Yes; green/red LED
• For load voltage monitoring	Yes; green LED
<b>Potential separation</b>	
between the load voltages	Yes
<b>Potential separation channels</b>	
• between the channels, in groups of	4
• between the channels and backplane bus	Yes
• between the channels and the power supply of the electronics	No; 4 channels are non-isolated and 4 channels are isolated from supply voltage 1L+
<b>Degree and class of protection</b>	
IP degree of protection	IP65/67
<b>Standards, approvals, certificates</b>	
Suitable for safety-related tripping of standard modules	Yes; from FS01
<b>Highest safety class achievable for safety-related tripping of standard modules</b>	
• Performance level according to ISO 13849-1	PL d
• Category according to ISO 13849-1	Cat. 3
• SIL acc. to IEC 62061	SIL 2
<b>Product functions / security</b>	
signed firmware update	Yes
data integrity	Yes
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• min.	-30 °C
• max.	55 °C
<b>Altitude during operation relating to sea level</b>	
• Ambient air temperature-barometric pressure-altitude	Up to max. 5 000 m, at installation height > 2 000 m additional restrictions
<b>connection method</b>	
Design of electrical connection for the inputs and outputs	M12, 5-pole
Design of electrical connection for supply voltage	M8, 4-pole
<b>ET-Connection</b>	
• ET-Connection	M8, 4-pin, shielded

<b>General information</b>		
Product type designation	AI 4xU/I/RTD	AI 4xRTD/TC
<b>Product function</b>		
• I&M data	Yes; I&M0 to I&M3	Yes; I&M0 to I&M3
<b>Engineering with</b>		
• STEP 7 TIA Portal configurable/ integrated from version	STEP 7 V13 SP1 or higher	STEP 7 V16 or higher
• STEP 7 configurable/ integrated from version	From V5.5 SP4 Hotfix 3	V5.5 SP4 and higher
• PROFIBUS from GSD version/ GSD revision	GSD as of Revision 5	GSD as of Revision 5
• PROFINET from GSD version/ GSD revision	GSDML V2.3.1	GSDML V2.34
<b>Supply voltage</b>		
<b>Load voltage 1L+</b>		
• Rated value (DC)	24 V	24 V
• Reverse polarity protection	Yes; against destruction	Yes; against destruction
<b>Input current</b>		
Current consumption (rated value) from load voltage 1L+ (unswitched voltage)	35 mA; without load 4 A; Maximum value	30 mA; without load 4 A; Maximum value
from load voltage 2L+, max.	4 A; Maximum value	4 A; Maximum value
<b>Encoder supply</b>		
Number of outputs	4	
<b>Analog inputs</b>		
Number of analog inputs	4	4
• For current measurement	4	
• For voltage measurement	4	4
• For resistance/resistance thermometer measurement	4	4
• For thermocouple measurement		4
permissible input voltage for voltage input (destruction limit), max.	30 V	15 V
permissible input current for current input (destruction limit), max.	50 mA	
Constant measurement current for resistance-type transmitter, typ.		230 ... 300 µA
Cycle time (all channels), min.	8 ms	90 ms
Technical unit for temperature measurement adjustable	Yes; Degrees Celsius / degrees Fahrenheit / Kelvin	Yes; Degrees Celsius / degrees Fahrenheit / Kelvin
<b>Input ranges (rated values), voltages</b>		
• 0 to +10 V	Yes	
• 1 V to 5 V	Yes	
• -80 mV to +80 mV		Yes; 16 bit incl. sign
<b>Input ranges (rated values), currents</b>		
• 0 to 20 mA	Yes	
• 4 mA to 20 mA	Yes

• Pt 1000		Yes; Standard/climate
<b>Input ranges (rated values), resistors</b>		
• 0 to 150 ohms	Yes	Yes
• 0 to 300 ohms	Yes	Yes
<b>Thermocouple (TC)</b>		
<b>Temperature compensation</b> - parameterizable		Yes
<b>Cable length</b>		
• shielded, max.	30 m	30 m
<b>Analog value generation for the inputs</b>		
<b>Integration and conversion time/resolution per channel</b>		
• Resolution with overrange (bit including sign), max.	16 bit	16 bit
• Integration time, parameterizable	Yes; channel by channel	Yes; channel by channel
• Integration time (ms)	0,3 / 16,7 / 20 / 60	16,7 / 20 / 60
• Basic conversion time, including integration time (ms)		18 / 21 / 61 ms
• Interference voltage suppression for interference frequency f1 in Hz	3 600 / 60 / 50 / 16.7	60 / 50 / 16.7
• Conversion time (per channel)	2 / 18 / 21 / 61 ms	
<b>Smoothing of measured values</b>		
• parameterizable	Yes	Yes
<b>Encoder</b>		
<b>Connection of signal encoders</b>		
• for voltage measurement	Yes	
• for current measurement as 2-wire transducer	Yes	
• for current measurement as 4-wire transducer	Yes	
• for resistance measurement with two-wire connection	Yes	Yes
• for resistance measurement with three-wire connection	Yes	Yes
• for resistance measurement with four-wire connection		Yes

**I/O systems**SIMATIC ET 200 systems without control cabinet

<b>Errors/accuracies</b>		
Temperature error of internal compensation		±4 °C
<b>Basic error limit (operational limit at 25 °C)</b>		
• Voltage, relative to input range, (+/-)	0.25 %	0.25 %
• Current, relative to input range, (+/-)	0.25 %	
• Resistance, relative to input range, (+/-)	0.15 %	0.15 %
• Resistance thermometer, relative to input range, (+/-)	0.15 %	0.15 %
• Thermocouple, relative to input range, (+/-)		0.25 %
<b>Interference voltage suppression for <math>f = n \times (f_1 \pm 0.5 \%)</math>, <math>f_1 =</math> interference frequency</b>		
• Series mode interference (peak value of interference < rated value of input range), min.	40 dB	40 dB
<b>Interrupts/diagnostics/status information</b>		
<b>Alarms</b>		
• Diagnostic alarm	Yes; Parameterizable	Yes; Parameterizable
• Limit value alarm	Yes; Parameterizable	Yes; Parameterizable
<b>Diagnoses</b>		
• Wire-break	Yes; at 4 mA to 20 mA and 1 V to 5 V	Yes; Not for ±80 mV
• Short-circuit	Yes; Encoder supply to M, channel by channel	
• Overflow/underflow	Yes	Yes
<b>Diagnostics indication LED</b>		
• Channel status display	Yes; green LED	Yes; green LED
• for module diagnostics	Yes; green/red LED	Yes; green/red LED
<b>Potential separation</b>		
between the load voltages	Yes	Yes
<b>Potential separation channels</b>		
• between the channels	No	No
• between the channels and backplane bus	Yes	Yes
• between the channels and the power supply of the electronics	No	No
<b>Degree and class of protection</b>		
IP degree of protection	IP65/67	IP65/67
<b>Standards, approvals, certificates</b>		
Suitable for safety-related tripping of standard modules	Yes; From FS02	Yes; from FS01
Suitable for applications according to AMS 2750		Yes; Declaration of Conformity, see online support entry 109757262
Suitable for applications according to CQI-9		Yes; Based on AMS 2750 E

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200AL

### I/O modules > Fail-safe I/O modules

#### Overview

The ET 200AL fail-safe I/O module expands the ET 200AL PN system family. It is incorporated seamlessly into the Safety Integrated concept of SIMATIC. It also supports safety-related communication via PROFIsafe. The functional safety is certified in accordance with IEC 61508. It is designed for safety-related use up to SIL 3 according to IEC 62061 and PL e according to ISO 13849. The following fail-safe I/O module with 4x digital inputs and 2x digital outputs with 45 mm width is available:

- F-DI 4+F-DQ 2x24VDC/2A, 4xM12 PROFIsafe

#### Technical specifications

Article number	<b>6ES7146-5FF00-0BA0</b> ET 200AL, F-DI 4+F-DQ 2x24VDC/2A, 4xM12
<b>General information</b>	
Product type designation	F-DI 4+F-DQ 2x24VDC/2A, 4xM12
<b>Product function</b>	
• I&M data	Yes; I&M0 to I&M3
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	STEP 7 V17 or higher
<b>Operating mode</b>	
• DI	Yes
• DQ	Yes
<b>Supply voltage</b>	
Rated value (DC)	24 V
<b>Load voltage 1L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction
<b>Load voltage 2L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction; outputs applied with reversed polarity for loads connected between M-switch and 2L+ will conduct
<b>Input current</b>	
Current consumption (rated value)	55 mA (1L+) / 40 mA (2L+); without load
from load voltage 1L+ (unswitched voltage)	4 A; Maximum value
from load voltage 2L+, max.	4 A; Maximum value
<b>Encoder supply</b>	
Number of outputs	2
<b>Digital inputs</b>	
Number of digital inputs	4
Input characteristic according to IEC 61131	Type 1
<b>Number of simultaneously controllable inputs</b>	
<b>all mounting positions</b>	
- up to 55 °C, max.	4
<b>Input voltage</b>	
• Rated value (DC)	24 V
• for signal "0"	-30 to +5 V
• for signal "1"	+15 to +30 V
<b>Input current</b>	
• for signal "1", typ.	4.85 mA
<b>Input delay (for rated value of input voltage)</b>	
<b>for standard inputs</b>	
- parameterizable	Yes
<b>Digital outputs</b>	
Number of digital outputs	2
• in groups of	2
Short-circuit protection	Yes; per channel, electronic
Open-circuit detection	Yes; per channel, only detects when output is off
Overload protection	Yes
Limitation of inductive shutdown voltage to	P-switch: -26 V DC referenced to 2M, M-switch: +48 V DC referenced to 2M

Article number	<b>6ES7146-5FF00-0BA0</b> ET 200AL, F-DI 4+F-DQ 2x24VDC/2A, 4xM12
<b>Switching capacity of the outputs</b>	
• on lamp load, max.	10 W
<b>Load resistance range</b>	
• lower limit	12 Ω
• upper limit	2 kΩ
<b>Output voltage</b>	
• for signal "1", min.	L+ (-2.0 V), P-switch is L+ (-1.5 V), M-switch is 0.5 V
<b>Output current</b>	
• for signal "1" rated value	2 A
• for signal "0" residual current, max.	0.5 mA
<b>Switching frequency</b>	
• with resistive load, max.	30 Hz
• with inductive load, max.	0.1 Hz
• on lamp load, max.	10 Hz
<b>Total current of the outputs</b>	
• Current per group, max.	4 A
<b>Encoder</b>	
<b>Connectable encoders</b>	
• 2-wire sensor	No
- permissible quiescent current (2-wire sensor), max.	0.5 mA
<b>Interrupts/diagnostics/ status information</b>	
Substitute values connectable	No
<b>Alarms</b>	
• Diagnostic alarm	Yes; Parameterizable
<b>Diagnoses</b>	
• Monitoring the supply voltage	Yes
• Wire-break	Yes; outputs when off
• Short-circuit	Yes; inputs, outputs, encoder supply
<b>Diagnostics indication LED</b>	
• Channel status display	Yes; green LED
• for channel diagnostics	Yes; red LED
• for module diagnostics	Yes; green/red LED
• For load voltage monitoring	Yes; green LED
<b>Potential separation</b>	
between the load voltages	Yes
<b>Potential separation channels</b>	
• between the channels, in groups of	4 DI channels are isolated from 2 DQ channels
• between the channels and backplane bus	Yes
• between the channels and the power supply of the electronics	DI channels are non-isolated from supply voltage 1L+ and DQ channels are isolated from the supply voltage 1L+
<b>Degree and class of protection</b>	
IP degree of protection	IP65/67

#### Technical specifications

Article number	<b>6ES7147-5JD00-0BA0</b> ET 200AL, cm 4x IO-Link, 4xM12
<b>General information</b>	
Product type designation	CM 4x IO-Link
<b>Product function</b>	
• I&M data	Yes; I&M0 to I&M3
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	STEP 7 V13 SP1 or higher
• STEP 7 configurable/ integrated from version	From V5.5 SP4 Hotfix 3
• PROFIBUS from GSD version/ GSD revision	GSD as of Revision 5
• PROFINET from GSD version/ GSD revision	GSDML V2.3.1
<b>Operating mode</b>	
• IO-Link	Yes
• DI	Yes
• DQ	Yes; max. 100 mA
<b>Supply voltage</b>	
<b>Load voltage 1L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes
<b>Load voltage 2L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction; load increasing
<b>Input current</b>	
Current consumption (rated value)	40 mA; without load
from load voltage 1L+ (unswitched voltage)	4 A; Maximum value
from load voltage 2L+, max.	4 A; Maximum value
<b>Encoder supply</b>	
Number of outputs	4
<b>IO-Link</b>	
Number of ports	4
• of which simultaneously controllable	4
IO-Link protocol 1.0	Yes
IO-Link protocol 1.1	Yes
Transmission rate	4.8 kBaud (COM1); 38.4 kBaud (COM2), 230 kBaud (COM3)
Size of process data, input per port	32 byte
Size of process data, input per module	132 byte
Size of process data, output per port	32 byte
Size of process data, output per module	128 byte
Memory size for device parameter Master backup	2 kbyte; for each port Possible with function block IO_LINK_MASTER
Configuration without S7-PCT	Possible; autostart/manual function
Cable length unshielded, max.	20 m
<b>Connection of IO-Link devices</b>	
• Port type A	Yes; via 3-core cable
• Port type B	Yes; Additional device supply: 1.6 A total current of all ports

Article number	<b>6ES7147-5JD00-0BA0</b> ET 200AL, cm 4x IO-Link, 4xM12
<b>Interrupts/diagnostics/ status information</b>	
<b>Alarms</b>	
• Diagnostic alarm	Yes; Parameterizable
<b>Diagnoses</b>	
• Monitoring the supply voltage	Yes
• Wire-break	Yes
• Short-circuit	Yes
<b>Diagnostics indication LED</b>	
• Channel status display	Yes; green LED
• for module diagnostics	Yes; green/red LED
• For load voltage monitoring	Yes; green LED
<b>Potential separation</b>	
between the load voltages	Yes
<b>Potential separation channels</b>	
• between the channels	No
• between the channels and backplane bus	Yes
• between the channels and the power supply of the electronics	No
<b>Degree and class of protection</b>	
IP degree of protection	IP65/67
<b>Standards, approvals, certificates</b>	
Suitable for safety-related tripping of standard modules	Yes; from FS01
<b>Highest safety class achievable for safety-related tripping of standard modules</b>	
• Performance level according to ISO 13849-1	PL d
• Category according to ISO 13849-1	Cat. 3
• SILCL according to IEC 62061	SILCL 2
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• min.	-30 °C
• max.	55 °C
<b>connection method</b>	
Design of electrical connection for the inputs and outputs	M12, 5-pole
Design of electrical connection for supply voltage	M8, 4-pole
<b>ET-Connection</b>	
• ET-Connection	M8, 4-pin, shielded
<b>Dimensions</b>	
Width	30 mm
Height	159 mm
Depth	40 mm
<b>Weights</b>	
Weight, approx.	145 g

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200AL

### IO-Link I/O modules

#### Overview

The IO-Link communication standard enables and standardizes communication between machine and plant PLCs, on the one hand, and sensors, actuators and other field devices, on the other hand.

The IO-Link I/O modules enable the simple connection of binary standard sensors and actuators, whereby the signals and energy supply are transferred via IO-Link (IO-Link master).

The IO-Link I/O modules can be connected to any IO-Link masters and, in this way, fieldbus-independent and distributed I/O units can be formed. The universal usage of the IO-Link DIQ I/O modules enables additional flexibility here.

With the ET 200AL IO-Link I/O modules, a comprehensive portfolio of digital input, output and input/output modules with the design and system features of the ET 200AL is available.

#### Ordering data

##### IO-Link digital input modules

- Degree of protection IP67
- DI 8x 24VDC, 8x M8
  - DI 16x 24VDC, 8x M12

**6ES7141-5BF00-0BL0**  
**6ES7141-5AH00-0BL0**

##### IO-Link digital output modules

- Degree of protection IP67
- DQ 8x 24VDC/2A, 8x M12

**6ES7142-5AF00-0BL0**

##### IO-Link digital input/output modules

- Degree of protection IP67
- DIQ 4+DQ 4x 24VDC/0.5A, 8x M8
  - DIQ 16x24VDC/0.5A, 8x M12

**6ES7143-5BF00-0BL0**  
**6ES7143-5AH00-0BL0**

##### Accessories

##### Control connecting cable 5 x 0.25

Flexible IO-Link cable with 5 copper cores (0.25 mm<sup>2</sup>) for connecting IO-Link sensors/actuators (IO-Link port class B); sold by the meter; max. delivery unit 1 000 m minimum order quantity 20 m

**6XV1801-2C**

##### M12 circular connector

Can be assembled, for connecting actuators or sensors, 5-pin, screw terminal, max. 0.75 mm<sup>2</sup>, A-coded, max. 4 A

- Straight
- Angled

**3RK1902-4BA00-5AA0**  
**3RK1902-4DA00-5AA0**

##### Control line

Preassembled on one side with 1 x M12 plug angled, 5-pin, 5 x 0.34 mm<sup>2</sup>, A-coded, max. 4 A, PUR casing, black

- 1.5 m
- 5 m
- 10 m

**3RK1902-4HB15-5AA0**  
**3RK1902-4HB50-5AA0**  
**3RK1902-4HC01-5AA0**

#### Article No.

##### M12-180/M12-180 control connecting cable

Flexible 5-core cable, preassembled with A-coded, 5-pin M12 plug and A-coded, 5-pin M12 socket, both ends with a straight cable outlet, for connection of IO-Link sensors/actuators

- 0.5 m
- 1.0 m
- 1.5 m
- 2.0 m
- 3.0 m
- 5.0 m
- 10 m
- 15 m

**6XV1801-2CH50**  
**6XV1801-2CN10**  
**6XV1801-2CN15**

##### Power M12 cable connector PRO

Connection socket for 24 V DC supply voltage, 4-pin, L-coded, with installation instructions, 1 unit

**6GK1906-0EB00**

##### M12 sealing cap

For protection of unused M12 connections with ET 200pro

**3RX9802-0AA00**

##### M12 sealing cap for IP67 modules

15 mm outer diameter, with O-ring, 10 units

**3RK1901-1KA00**

##### M8 sealing cap

For IP67 modules

**3RK1901-1PN00**

##### M12 Y-cable

For double connection of I/O by means of a single cable to ET 200, 5-pin

**6ES7194-6KA00-0XA0**

##### Energy cable 4 x 1.5

Trailable power cable, with 4 copper cores (1.5 mm<sup>2</sup>) for connecting to M12 plug-in connector; sold by the meter; max. delivery unit 1000 m, minimum order quantity 20 m

**6XV1801-2B**

- Compact block I/O for processing digital, fail-safe digital, analog and IO-Link signals for connecting to bus systems with Ethernet-based protocols PROFINET, EtherNet/IP and Modbus TCP
- Cabinet-free installation in degree of protection IP65/67/69K with M12 connection system
- Extremely rugged and resistant metal enclosure
- Housing type of the I/O devices with 2x M12 L-coded power connectors
  - 45 mm x 200 mm x 48 mm (W x H x D) with 8 x M12 for digital signals and IO-Link
- Housing type of the I/O devices with 2x M12 A-coded power connectors
  - 30 mm x 200 mm x 37 mm (W x H x D) with 4 x M12 for digital signals and IO-Link
  - 60 mm x 175 mm x 37 mm (W x H x D) with 8 x M12 for digital and fail-safe digital signals as well as IO-Link
  - 60 mm x 175 mm x 37 mm (W x H x D) with 4 x M12 or 8 x M12 for analog signals
- Fieldbus connection: 2 x M12 D-coded and automatic PROFINET addressing
- Data transfer rate 100 Mbps
- LLDP neighborhood discovery for topological configuration
- Fast startup (run-up within approx. 0.5 seconds)
- Channel-specific diagnostics, identification and maintenance data IM0 ... IM3
- Firmware update
- Ambient temperature range -40 °C to 60 °C
- Can be used in hazardous areas in zones 2 and 22
- Can be used outdoors
- Increase in communication availability due to Media Redundancy Protocol (MRP) on PROFINET as well as operation on S7-1500 R/H or S7-400H by means of S2 redundancy
- Variants of the I/O devices with M12 L-coded power connectors:
  - DI 8
  - DI 16
  - DQ 8 (0.5 A)
  - DQ 8 (2 A)
  - DIQ 16 (0.5A/2A)
  - 8 IO-Link + DI 4
  - 8 IO-Link + DIQ 8
  - 4 IO-Link + DIQ 12
  - AI 8 (TC, RTD)
  - AIQ 8 (U, I)
  - TM PosInput 2
- Variants of the I/O devices with M12 A-coded power connectors:
  - 8 DI
  - 16 DI
  - 8 DQ (2 A)
  - 8 DQ (1.3 A)
  - 8 DQ (0.5 A)
  - 16 DQ (1.3 A)
  - 8 DI/DQ (1.3 A)
  - 8 F-DI/3 F-DO (2 A)
  - 8 AI (U, I, TC, RTD)
  - 8 AI (TC, RTD)
  - 4 AO (U, I)
  - 4 IO-Link
  - 4 IO-Link + 8 DI + 4 DQ (1.3 A)

### I/O devices > Digital I/O devices

#### Overview

- Digital I/O devices with 2x M12 L-coded power connectors and 45 mm width
  - 8 digital input signals with 8xM12 connection
  - 16 digital input signals with 8xM12 connection
  - 8 digital output signals 8-channel digital output module 0.5A with 8xM12 connection
  - 8 digital output signals 2A with 8xM12 connection
  - 16 digital input/output signals 0.5A/2A with 8xM12 connection

- Digital I/O devices with 2x M12 A-coded power connectors and 60 mm width
  - 8 digital input signals with 8xM12 connection
  - 16 digital input signals with 8xM12 connection
  - 8 digital output signals 1.3 A with 8xM12 connection
  - 8 digital output signals 2 A with 8xM12 connection
  - 16 digital output signals 1.3 A with 8xM12 connection
  - 8 digital input/output signals 1.3 A with 8xM12 connection

- Digital I/O devices with 2x M12 A-coded power connectors and 30 mm width
  - 8 digital input signals with 4xM12 connection
  - 8 digital output signals 0.5 A with 4xM12 connection
  - 8 digital output signals 1.3 A with 4xM12 connection

<b>General information</b>		
<b>Product function</b>		
• Isochronous mode	Yes	Yes
• IRT	Yes	Yes
• Prioritized startup	Yes	Yes
<b>Engineering with</b>		
• STEP 7 TIA Portal configurable/ integrated from version	STEP 7 V17 or higher with HSP 0363	STEP 7 V17 or higher with HSP 0363
• PROFINET from GSD version/ GSD revision	GSDML V2.3.x	GSDML V2.3.x
• Multi Fieldbus Configuration Tool (MFCT)	from V1.3 SP1	from V1.3 SP1
<b>Operating mode</b>		
• DI	Yes	Yes
• Counter	No	No
• MSI	Yes	Yes
<b>Supply voltage</b>		
<b>Load voltage 1L+</b>		
• Rated value (DC)	24 V	24 V
• Reverse polarity protection	Yes; Against destruction; encoder power supply outputs applied with reversed polarity	Yes; Against destruction; encoder power supply outputs applied with reversed polarity
<b>Input current</b>		
Current consumption (rated value)	85 mA; without load	90 mA; without load
from load voltage 1L+ (unswitched voltage)	12 A; Maximum value	12 A; Maximum value
from load voltage 2L+, max.	12 A; Maximum value	12 A; Maximum value
<b>Encoder supply</b>		
Number of outputs	8	8
<b>Hardware configuration</b>		
<b>Submodules</b>		
• Number of configurable submodules, max.	2	2
<b>Digital inputs</b>		
Number of digital inputs	8	16
Digital inputs, parameterizable	Yes	Yes
Source/sink input	P-reading	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes	Yes
<b>Number of simultaneously controllable inputs</b>		
<b>all mounting positions</b>		
- up to 60 °C, max.	8	16
<b>Input voltage</b>		
• Rated value (DC)	24 V	24 V
• for signal *0*	-30 to +5 V	-30 to +5 V
• for signal *1*	+11 to +30V	+11 to +30V
<b>Input current</b>		
• for signal *1*, typ.	2.4 mA	2.4 mA
<b>Input delay (for rated value of input voltage) for standard inputs</b>		
- parameterizable	Yes; 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms	Yes; 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms
<b>Cable length</b>		
• unshielded, max.	30 m	30 m
<b>Encoder</b>		
<b>Connectable encoders</b>		
• 2-wire sensor	Yes	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA	1.5 mA
<b>Interfaces</b>		
Number of PROFINET interfaces	1	1

**I/O systems**SIMATIC ET 200 systems without control cabinet

Article number	<b>6ES7141-6BG00-0BB0</b> ET 200eco PN, DI 8x24VDC, M12-L	<b>6ES7141-6BH00-0BB0</b> ET 200eco PN, DI 16x24VDC, M12-L
<b>1. Interface</b>		
Interface type	PROFINET with 100 Mbit/s full duplex (100BASE-TX)	PROFINET with 100 Mbit/s full duplex (100BASE-TX)
<b>Interface types</b>		
• M12 port	Yes; 2x M12, 4-pin, D-coded	Yes; 2x M12, 4-pin, D-coded
• Number of ports	2	2
• integrated switch	Yes	Yes
<b>Protocols</b>		
• PROFINET IO Device	Yes	Yes
• Open IE communication	Yes	Yes
<b>Interface types</b>		
<b>M12 port</b>		
• Autonegotiation	Yes	Yes
• Autocrossing	Yes	Yes
• Transmission rate, max.	100 Mbit/s	100 Mbit/s
<b>Protocols</b>		
Supports protocol for PROFINET IO	Yes	Yes
PROFIsafe	No	No
EtherNet/IP	Yes	Yes
Modbus TCP	Yes	Yes
<b>PROFINET IO Device</b>		
<b>Services</b>		
- IRT	Yes; 250 µs to 4 ms in 125 µs frame	Yes; 250 µs to 4 ms in 125 µs frame
- Prioritized startup	Yes	Yes
<b>Redundancy mode</b>		
• PROFINET system redundancy (S2)	Yes	Yes
• PROFINET system redundancy (R1)	No	No
• H-Sync forwarding	Yes	Yes
<b>Media redundancy</b>		
- MRP	Yes	Yes
<b>EtherNet/IP</b>		
<b>Services</b>		
- CIP Implicit Messaging	Yes	Yes
- CIP Explicit Messaging	Yes	Yes
- CIP Safety	No	No
- Shared device	Yes; 2x EtherNet/IP Scanner	Yes; 2x EtherNet/IP Scanner
- Number of scanners with shared device, max.	2	2
<b>Updating times</b>		
- Requested Packet Interval (RPI)	2 ms	2 ms
<b>Redundancy mode</b>		
- DLR (Device Level Ring)	No	No
<b>Address area</b>		
- Address space per module, max.	20 byte	20 byte
- LargeForwardOpen (Class3)	No	No
<b>Modbus TCP</b>		
<b>Services</b>		
- read coils (code=1)	Yes	Yes
- read discrete inputs (code=2)	Yes	Yes
- Read Holding Registers (Code=3)	Yes	Yes
- write single coil (code=5)	Yes	Yes
- write multiple coils (code=15)	Yes	Yes
- Write Multiple Registers (Code=16)	Yes	Yes
- Parameter change by master	No	No
- Modbus TCP Security Protocol	No	No
<b>Address space per station</b>		
- Address space per station, max.	20 byte	20 byte
- Access-consistent address space	2 byte	2 byte

<b>Updating time</b>		
- I/O request interval	2 ms	2 ms
<b>Connections</b>		
- number of connections per device	12	12
<b>Open IE communication</b>		
• TCP/IP	Yes; (only EtherNet/IP or Modbus TCP)	Yes; (only EtherNet/IP or Modbus TCP)
• SNMP	Yes	Yes
• LLDP	Yes	Yes
• ARP	Yes	Yes
<b>Isochronous mode</b>		
Equidistance	Yes	Yes
shortest clock pulse	250 µs	250 µs
max. cycle	4 ms	4 ms
<b>Interrupts/diagnostics/ status information</b>		
<b>Alarms</b>		
• Diagnostic alarm	Yes; Parameterizable	Yes; Parameterizable
• Maintenance interrupt	Yes; Parameterizable	Yes; Parameterizable
• Hardware interrupt	Yes; Parameterizable	Yes; Parameterizable
<b>Diagnoses</b>		
• Diagnostic information readable	Yes	Yes
• Monitoring the supply voltage	Yes	Yes
- parameterizable	Yes	Yes
• Wire-break	Yes; DI, input current < 0.3 mA, per channel	Yes; DI, input current < 0.3 mA, per channel
• Short-circuit encoder supply	Yes; Per channel group	Yes; Per channel group
<b>Diagnostics indication LED</b>		
• RUN LED	Yes; green LED	Yes; green LED
• ERROR LED	Yes; red LED	Yes; red LED
• MAINT LED	Yes; Yellow LED	Yes; Yellow LED
• NS LED	Yes; green/red LED	Yes; green/red LED
• MS LED	Yes; green/red LED	Yes; green/red LED
• IO LED	Yes; red/green/yellow LEDs	Yes; red/green/yellow LEDs
• Channel status display	Yes; green LED	Yes; green LED
• for channel diagnostics	Yes; red LED	Yes; red LED
• Connection display LINK TX/RX	Yes; green LED, only link	Yes; green LED, only link
<b>Potential separation</b>		
between the load voltages	Yes	Yes
between Ethernet and electronics	Yes	Yes
<b>Potential separation channels</b>		
• between the channels	No	No
• between the channels and the power supply of the electronics	No	No
<b>Degree and class of protection</b>		
IP degree of protection	IP65/67/69K	IP65/67/69K
<b>Standards, approvals, certificates</b>		
Suitable for safety-related tripping of standard modules	Yes; from FS01	Yes; from FS01
<b>Highest safety class achievable for safety-related tripping of standard modules</b>		
• Performance level according to ISO 13849-1	PL d	PL d
• Category according to ISO 13849-1	Cat. 3	Cat. 3
• SIL acc. to IEC 62061	SIL 2	SIL 2
<b>Use in hazardous areas</b>		
• Explosion protection category for gas	ATEX, UKEX, IECEx, CCCEX for Zone 2	ATEX, UKEX, IECEx, CCCEX for Zone 2
• Explosion protection category for dust	ATEX, UKEX, IECEx, CCCEX for Zone 22	ATEX, UKEX, IECEx, CCCEX for Zone 22

• Rated value (DC)	24 V	24 V
• Reverse polarity protection	Yes	Yes
<b>Load voltage 2L+</b>		
• Rated value (DC)	24 V	24 V
• Reverse polarity protection	Yes; against destruction; load increasing	Yes; against destruction
<b>Input current</b>		
Current consumption (rated value) from load voltage 1L+ (unswitched voltage)	65 mA; without load 12 A; Maximum value	65 mA; without load 12 A; Maximum value
from load voltage 2L+, max.	12 A; Maximum value	12 A; Maximum value
<b>Hardware configuration</b>		
<b>Submodules</b>		
• Number of configurable submodules, max.	2	2
<b>Digital outputs</b>		
Number of digital outputs	8	8
Current-sourcing	Yes	Yes
output type acc. to IEC 61131, type 0.5	Yes	Yes
output type acc. to IEC 61131, type 2	Yes	Yes
Short-circuit protection	Yes; per channel, electronic	Yes; per channel, electronic
Limitation of inductive shutdown voltage to	Typ. 2L+ (-52 V)	Type -14 V
Controlling a digital input	Yes	Yes
<b>Switching capacity of the outputs</b>		
• with resistive load, max.	0.5 A	2 A
• with inductive load, max.	0.5 A	2 A
• on lamp load, max.	5 W	10 W
<b>Load resistance range</b>		
• lower limit	48 Ω	12 Ω
• upper limit	4 kΩ	4 kΩ
<b>Output voltage</b>		
• for signal "1", min.	2L+ (-0,8 V)	2L+ (-0,8 V)
<b>Output current</b>		
• for signal "1" rated value	0.5 A	2 A
• for signal "0" residual current, max.	0.1 mA	0.2 mA
<b>Parallel switching of two outputs</b>		
• for uprating	No	No
• for redundant control of a load	Yes	Yes
<b>Switching frequency</b>		
• with resistive load, max.	100 Hz	100 Hz
• with inductive load, max.	0.5 Hz	0.5 Hz
• on lamp load, max.	1 Hz	1 Hz
<b>Total current of the outputs</b>		
• Current per module, max.	4 A	8 A
<b>Cable length</b>		
• unshielded, max.	30 m	30 m

#### Technical specifications

Article number	<b>6ES7143-6BH00-0BB0</b> ET 200eco PN, DIQ 16x24VDC/2A, M12-L
<b>Encoder supply</b>	
Number of outputs	8
<b>Hardware configuration</b>	
<b>Submodules</b>	
• Number of configurable submodules, max.	2
<b>Digital inputs</b>	
Number of digital inputs	16; Parameterizable as DIQ
• in groups of	8
Digital inputs, parameterizable	Yes
Source/sink input	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes
<b>Number of simultaneously controllable inputs</b>	
<b>all mounting positions</b>	
- up to 60 °C, max.	16
<b>Input voltage</b>	
• Rated value (DC)	24 V
• for signal *0*	-3 to +5V
• for signal *1*	+11 to +30V
<b>Input current</b>	
• for signal *1*, typ.	2.4 mA
<b>Input delay (for rated value of input voltage) for standard inputs</b>	
- parameterizable	Yes; 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms
<b>Cable length</b>	
• unshielded, max.	30 m
<b>Digital outputs</b>	
Number of digital outputs	16; Parameterizable as DIQ
• in groups of	8; 2 load groups for 8 outputs each
Current-sourcing	Yes
output type acc. to IEC 61131, type 0.5	Yes
output type acc. to IEC 61131, type 2	Yes
Short-circuit protection	Yes; per channel, electronic
Limitation of inductive shutdown voltage to	0.5 A: Type 1L+ (-70 V) / 2 A: Type (-18 V)
Controlling a digital input	Yes
<b>Switching capacity of the outputs</b>	
• with resistive load, max.	0.5 A / 2 A
• with inductive load, max.	0.5 A / 2 A
• on lamp load, max.	0.5 A: 5 W / 2 A 10 W
<b>Load resistance range</b>	
• lower limit	0.5 A: 48 ohms / 2 A: 12 ohms
• upper limit	4 kΩ
<b>Output voltage</b>	
• for signal *1*, min.	1L+ (-0.8 V) / 2L+ (-0.8 V)
<b>Output current</b>	
• for signal *1* rated value	0.5 A / 2 A
• for signal *0* residual current, max.	0.1 mA
<b>Parallel switching of two outputs</b>	
• for uprating	No
• for redundant control of a load	Yes

Article number	<b>6ES7143-6BH00-0BB0</b> ET 200eco PN, DIQ 16x24VDC/2A, M12-L
<b>Switching frequency</b>	
• with resistive load, max.	0.5 A: 100 Hz / 2 A: 40 Hz
• with inductive load, max.	0.5 Hz
• on lamp load, max.	1 Hz
<b>Total current of the outputs</b>	
• Current per group, max.	1L+: 2 A / 2L+: 6 A
• Current per module, max.	8 A
<b>Cable length</b>	
• unshielded, max.	30 m
<b>Encoder</b>	
<b>Connectable encoders</b>	
• 2-wire sensor	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA
<b>Interfaces</b>	
Number of PROFINET interfaces	1
<b>1. Interface</b>	
Interface type	PROFINET with 100 Mbit/s full duplex (100BASE-TX)
<b>Interface types</b>	
• M12 port	Yes; 2x M12, 4-pin, D-coded
• Number of ports	2
• integrated switch	Yes
<b>Protocols</b>	
• PROFINET IO Device	Yes
• Open IE communication	Yes
<b>Interface types</b>	
<b>M12 port</b>	
• Autonegotiation	Yes
• Autocrossing	Yes
• Transmission rate, max.	100 Mbit/s
<b>Protocols</b>	
Supports protocol for PROFINET IO	Yes
PROFIsafe	No
EtherNet/IP	Yes
Modbus TCP	Yes
<b>PROFINET IO Device</b>	
<b>Services</b>	
- IRT	Yes; 250 μs to 4 ms in 125 μs frame
- Prioritized startup	Yes
- Shared device	Yes
- Number of IO Controllers with shared device, max.	2
<b>Redundancy mode</b>	
• PROFINET system redundancy (S2)	Yes
• PROFINET system redundancy (R1)	No
• H-Sync forwarding	Yes
<b>Media redundancy</b>	
- MRP	Yes

Depth	49 mm
<b>Weights</b>	
Weight, approx.	910 g

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200eco PN

### I/O devices > Analog I/O devices

#### Overview

Analog distributed I/O devices with 2x M12 L-coded power connectors and 45 mm width

- 8 analog input signals RTD/TC with 8xM12 connection
- 6 analog input signals U/I and 2 analog input or output signals U/I with 8xM12 connection

Analog I/O devices with 2x M12 A-coded power connectors and 60 mm width

- 8 analog input signals U/I/RTD/TC with 8xM12 connection
- 8 analog input signals RTD/TC with 8xM12 connection
- 4 analog output signals U/I with 4xM12 connection

#### Ordering data

##### ET 200eco PN analog input modules

- 8 AI 4 U/I + 4 RTD/TC; 8 x M12, degree of protection IP67
- 8 AI RTD/TC; 8 x M12, degree of protection IP67
- 8 AI RTD/TC; 8 x M12-L, degree of protection IP67

#### Article No.

6ES7144-6KD00-0AB0

6ES7144-6KD50-0AB0

6ES7144-6JF00-0BB0

##### ET 200eco PN analog output modules

- 4 AQ U/I; 4 x M12, degree of protection IP67

6ES7145-6HD00-0AB0

##### ET 200eco PN analog input/output modules

- 6 AI U/I, 2 AI/AQ U/I, 8 x M12, degree of protection IP67

6ES7146-6HF00-0BB0

#### Accessories

- PD voltage distributor, 24 V DC; 1 X 7/8", 4 X M12
- Terminal block for ET 200eco PN, 10 A insulation displacement terminals
- Spare fuses for terminal block, 10 units
- Mounting rail 0.5 m
- Profile screw for mounting rail, 50 units
- Sealing cap M12 for IP67 modules, 12 mm outer diameter, without O-ring, 10 units
- Sealing cap M12 for IP67 modules, 15 mm outer diameter, with O-ring, 10 units
- Labels 10 mm x 7 mm Ti-grey, for I/O devices with 2x M12 A-coded power connectors; 5 frames with 40 labels each

3RT2900-1SB10

##### PROFINET M12 connection plug, for user assembly

Connector for PROFINET, 4-core, shielded

3RK1902-2DA00

IE M12 plug PRO connector

- 1 unit
- 8 units

6GK1901-0DB10-6AA0

6GK1901-0DB10-6AA8

IE FC M12 plug PRO connector, for user assembly

- 1 unit
- 8 units

6GK1901-0DB20-6AA0

6GK1901-0DB20-6AA8

#### Article No.

##### M12 connection plug for 24 V DC load power supply

Connection socket for 24 V DC infeed; 4-pin, A-coded, 3 units

6GK1907-0DC10-6AA3

Connector for loop-through of 24 V DC; 4-pin, A-coded, 3 units

6GK1907-0DB10-6AA3

##### M12 circular connector

Can be assembled, for connecting actuators or sensors, 5-pin, screw terminal, max. 0.75 mm<sup>2</sup>, A-coded, max. 4 A

- Straight
- Angled

3RK1902-4BA00-5AA0

3RK1902-4DA00-5AA0

##### M12 coupling socket

4-pin, screw terminal, max. 0.75 mm<sup>2</sup>, A-coded, max. 4 A, angled

3RK1902-4CA00-4AA0

##### PROFINET bus cable

Preassembled on one side with 1 x M12, D-coded, 4-wire, shielded

- 3 m
- 5 m
- 10 m

3RK1902-2HB30

3RK1902-2HB50

3RK1902-2HC10

##### IE connecting cable M12-90/M12-90

Preassembled IE FC TP trailing cable GP 2 x 2 (PROFINET type C) with two 4-pin M12 plugs (D-coded) up to 85 m, degree of protection IP65/IP67, 90° cable outlet  
Length:

- 0.3 m
- 0.5 m
- 1.0 m
- 1.5 m
- 2.0 m
- 3.0 m
- 5.0 m
- 10 m
- 15 m

#### Technical specifications

Article number	<b>6ES7146-6HF00-0BB0</b> ET 200eco PN, AI 6xU/I +AIQ 2xU/I, M12-L
<b>General information</b>	
<b>Product function</b>	
• Isochronous mode	No
• IRT	Yes
• Prioritized startup	Yes
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	STEP 7 V18 or higher with HSP 0391
• PROFINET from GSD version/ GSD revision	GSDML V2.4.x
• Multi Fieldbus Configuration Tool (MFCT)	V1.5 or higher
<b>Operating mode</b>	
• MSI	Yes
• MSO	Yes
<b>CiR - Configuration in RUN</b>	
Calibration possible in RUN	Yes
<b>Supply voltage</b>	
<b>Load voltage 1L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction
<b>Input current</b>	
Current consumption (rated value) from load voltage 1L+ (unswitched voltage)	110 mA; without load 12 A; Maximum value
from load voltage 2L+, max.	12 A; Maximum value
<b>Encoder supply</b>	
Number of outputs	8
<b>Actuator supply</b>	
Number of outputs	2
<b>Hardware configuration</b>	
<b>Submodules</b>	
• Number of configurable submodules, max.	2
<b>Analog inputs</b>	
Number of analog inputs	8; 6 AI fixed, 2 AIQ can be parameterized
Cycle time (all channels), min.	sum of the basic conversion times
<b>Input ranges (rated values), voltages</b>	
• 0 to +10 V	Yes
• 1 V to 5 V	Yes
• -10 V to +10 V	Yes
<b>Input ranges (rated values), currents</b>	
• 0 to 20 mA	Yes; 17 V for 2-wire transformers
• -20 mA to +20 mA	Yes; 17 V for 2-wire transformers
• 4 mA to 20 mA	Yes; 17 V for 2-wire transformers
<b>Cable length</b>	
• shielded, max.	30 m
<b>Analog outputs</b>	
Number of analog outputs	2; AIQ can be parameterized
Voltage output, short-circuit protection	Yes
Voltage output, short-circuit current, max.	40 mA
Current output, no-load voltage, max.	19 V
Cycle time (all channels) max.	1 ms
<b>Output ranges, voltage</b>	
• 0 to 10 V	Yes
• 1 V to 5 V	Yes
• -10 V to +10 V	Yes

Article number	<b>6ES7146-6HF00-0BB0</b> ET 200eco PN, AI 6xU/I +AIQ 2xU/I, M12-L
<b>Output ranges, current</b>	
• 0 to 20 mA	Yes
• -20 mA to +20 mA	Yes
• 4 mA to 20 mA	Yes
<b>Connection of actuators</b>	
• for voltage output two-wire connection	Yes
• for voltage output four-wire connection	Yes
• for current output two-wire connection	Yes
• for current output four-wire connection	Yes
<b>Load impedance (in rated range of output)</b>	
• with voltage outputs, min.	1 kΩ
• with voltage outputs, capacitive load, max.	1 μF
• with current outputs, max.	600 Ω
• with current outputs, inductive load, max.	1 mH
<b>Cable length</b>	
• shielded, max.	30 m
<b>Analog value generation for the inputs</b>	
Analog value display	SIMATIC S7 format
Measurement principle	integrating
<b>Integration and conversion time/resolution per channel</b>	
• Resolution with overrange (bit including sign), max.	16 bit
• Integration time, parameterizable	Yes; channel by channel
• Integration time (ms)	0.84 / 16.7 (50) / 20 (60) / 60 (180)
• Basic conversion time, including integration time (ms)	4.50 / 21.5 (54) / 24 (64) / 64 (184)
• Interference voltage suppression for interference frequency f1 in Hz	none / 60 / 50 / 16.7
<b>Smoothing of measured values</b>	
• parameterizable	Yes
<b>Analog value generation for the outputs</b>	
<b>Integration and conversion time/resolution per channel</b>	
• Resolution with overrange (bit including sign), max.	16 bit
<b>Settling time</b>	
• for resistive load	1 ms
• for capacitive load	1 ms
• for inductive load	1 ms
<b>Encoder</b>	
<b>Connection of signal encoders</b>	
• for voltage measurement	Yes
• for current measurement as 2-wire transducer	Yes
• for current measurement as 4-wire transducer	Yes

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200eco PN

### Technology I/O modules > TM PosInput 2 counter and position detection module

#### Overview

#### Technical properties

- Counter and position detection module for ET 200eco PN
- Interfaces:
  - Encoder signals A, B and N for RS-422 differential signals or 24 V signals
  - SSI interface with clock and data for RS-422 differential signals
  - 24 V encoder supply, short-circuit-proof
  - 2 digital inputs for controlling the counting process, for saving or setting the counter or position value
  - 2 digital outputs for fast reactions depending on the counter reading, position value or measured value

- Counting frequency 1 MHz (4 MHz with fourfold evaluation)
- Counting range: +/- 31 bits
- Measurement function
- Parameterizable input filters for suppressing interferences at encoder and digital inputs

#### Supported types of encoders/signals

- Incremental encoders with and without N signal
- Pulse encoders with directional signal
- Pulse encoders without directional signal
- Pulse encoders for forward or reverse pulses
- SSI encoders with a frame length of 10 to 40 bits, of which up to 32 bits position value

#### Supported system functions

- Isochronous mode
- Firmware update
- Identification data I&M

#### Ordering data

### Technology I/O modules > TM PosInput 2 counter and position detection module

#### Technical specifications

Article number	<b>6ES7147-6AB00-0BB0</b> ET 200eco PN, TM PosInput 2, M12-L
<b>General information</b>	
Number of channels	2
<b>Product function</b>	
• Isochronous mode	Yes
• IRT	Yes
• Fast startup	Yes
• Prioritized startup	Yes
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	STEP 7 V18 or higher with HSP
• PROFINET from GSD version/ GSD revision	GSDML V2.42
• Multi Fieldbus Configuration Tool (MFCT)	V1.5 or higher
<b>Supply voltage</b>	
Rated value (DC)	24 V
<b>Load voltage 1L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction; encoder power supply outputs applied with reversed polarity, loads conduct
<b>Load voltage 2L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction
<b>Input current</b>	
Current consumption (rated value)	100 mA; without load
from load voltage 1L+ (unswitched voltage)	12 A; Maximum value
from load voltage 2L+, max.	12 A; Maximum value
<b>Encoder supply</b>	
Number of outputs	4; 1 per encoder connection
<b>Hardware configuration</b>	
<b>Submodules</b>	
• Number of configurable submodules, max.	2
<b>Digital inputs</b>	
Number of digital inputs	4; 2 per channel
Digital inputs, parameterizable	Yes
Source/sink input	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes
<b>Digital input functions, parameterizable</b>	
• Gate start/stop	Yes; only for pulse and incremental encoders
• Capture	Yes
• Synchronization	Yes; only for pulse and incremental encoders
• Freely usable digital input	Yes
<b>Input voltage</b>	
• Type of input voltage	DC
• Rated value (DC)	24 V
• for signal "0"	-5 ... +5 V
• for signal "1"	+11 to +30V
• permissible voltage at input, min.	-30 V; -5 V continuous, -30 V brief reverse polarity protection
• permissible voltage at input, max.	30 V
<b>Input current</b>	
• for signal "1", typ.	2.5 mA

Article number	<b>6ES7147-6AB00-0BB0</b> ET 200eco PN, TM PosInput 2, M12-L
<b>Input delay (for rated value of input voltage) for standard inputs</b>	
- parameterizable	Yes; none / 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms
<b>for technological functions</b>	
- parameterizable	Yes
<b>Cable length</b>	
• shielded, max.	30 m
• unshielded, max.	30 m
<b>Digital outputs</b>	
Type of digital output	Transistor
Number of digital outputs	4; 2 per channel
Digital outputs, parameterizable	Yes
Short-circuit protection	Yes; electronic/thermal
Limitation of inductive shutdown voltage to	2L+ (-39 V)
Controlling a digital input	Yes
<b>Digital output functions, parameterizable</b>	
• Switching tripped by comparison values	Yes
• Freely usable digital output	Yes
<b>Switching capacity of the outputs</b>	
• with resistive load, max.	0.5 A; Per digital output
• with inductive load, max.	0.5 A
<b>Load resistance range</b>	
• lower limit	48 Ω
• upper limit	12 kΩ
<b>Output voltage</b>	
• Type of output voltage	DC
• for signal "1", min.	23.2 V; 2L+ (-0,8 V)
<b>Output current</b>	
• for signal "1" rated value	0.5 A
• for signal "0" residual current, max.	0.5 mA
<b>Output delay with resistive load</b>	
• "0" to "1", max.	50 μs
• "1" to "0", max.	50 μs
<b>Parallel switching of two outputs</b>	
• for uprating	No
<b>Switching frequency</b>	
• with resistive load, max.	10 kHz
• with inductive load, max.	0.5 Hz; According to IEC 60947-5-1, DC-13
<b>Total current of the outputs</b>	
• Current per module, max.	2 A; Supply from 2L+
<b>Cable length</b>	
• shielded, max.	30 m
• unshielded, max.	30 m

#### Technical specifications

Article number	<b>6ES7147-6AB00-0BB0</b> ET 200eco PN, TM PosInput 2, M12-L
<b>Encoder</b>	
<b>Encoder signals, incremental encoder (symmetrical)</b>	
• Input voltage	RS 422
• Input frequency, max.	1 MHz
• Counting frequency, max.	4 MHz; with quadruple evaluation
• Cable length, shielded, max.	30 m
• Signal filter, parameterizable	Yes
• Incremental encoder with A/B tracks, 90° phase offset	Yes
• Incremental encoder with A/B tracks, 90° phase offset and zero track	Yes
• pulse encoder	Yes
• Pulse encoder with direction	Yes
• pulse encoder with one impulse signal per count direction	Yes
<b>Encoder signals, incremental encoder (asymmetrical)</b>	
• Input voltage	24 V
• Input frequency, max.	200 kHz
• Counting frequency, max.	800 kHz; with quadruple evaluation
• Cable length, shielded, max.	30 m
• Signal filter, parameterizable	Yes
• Incremental encoder with A/B tracks, 90° phase offset	Yes
• Incremental encoder with A/B tracks, 90° phase offset and zero track	Yes
• pulse encoder	Yes
• pulse encoder with direction	Yes
• pulse encoder with one impulse signal per count direction	Yes
<b>Encoder signals, absolute encoder (SSI)</b>	
• Input signal	to RS-422
• Telegram length, parameterizable	10 ... 40 bit
• Clock frequency, max.	2 MHz; 125 kHz, 250 kHz, 500 kHz, 1 MHz, 1.5 MHz or 2 MHz
• Binary code	Yes
• Gray code	Yes
• Cable length, shielded, max.	30 m; Up to 500 kHz
• Parity bit, parameterizable	Yes
• Monoflop time	16, 32, 48, 64 µs & automatic
• Multiturn	Yes
• Singleturn	Yes
<b>Interfaces</b>	
Number of PROFINET interfaces	1
<b>1. Interface</b>	
Interface type	PROFINET with 100 Mbit/s full duplex (100BASE-TX)
<b>Interface types</b>	
• M12 port	Yes; 2x M12, 4-pin, D-coded
• Number of ports	2
• integrated switch	Yes
<b>Protocols</b>	
• PROFINET IO Device	Yes
• Open IE communication	Yes
<b>Interface types</b>	
<b>M12 port</b>	
• Autonegotiation	Yes
• Autocrossing	Yes
• Transmission rate, max.	100 Mbit/s

Article number	<b>6ES7147-6AB00-0BB0</b> ET 200eco PN, TM PosInput 2, M12-L
<b>Protocols</b>	
Supports protocol for PROFINET IO	Yes
PROFIsafe	No
EtherNet/IP	Yes
Modbus TCP	Yes
<b>PROFINET IO Device</b>	
<b>Services</b>	
- IRT	Yes; 500 µs to 4 ms at an interval of 125 µs
- Prioritized startup	Yes
- Shared device	Yes
- Number of IO Controllers with shared device, max.	2
<b>Redundancy mode</b>	
• PROFINET system redundancy (S2)	Yes
• PROFINET system redundancy (R1)	No
• H-Sync forwarding	Yes
<b>Media redundancy</b>	
- MRP	Yes
<b>EtherNet/IP</b>	
<b>Services</b>	
- CIP Implicit Messaging	Yes
- CIP Explicit Messaging	Yes
- CIP Safety	No
- Shared device	Yes; 2x EtherNet/IP Scanner
- Number of scanners with shared device, max.	2
<b>Updating times</b>	
- Requested Packet Interval (RPI)	2 ms
<b>Address area</b>	
- Address space per module, max.	32 byte
- LargeForwardOpen (Class3)	No
<b>Modbus TCP</b>	
<b>Services</b>	
- read coils (code=1)	Yes
- read discrete inputs (code=2)	Yes
- Read Holding Registers (Code=3)	Yes
- write single coil (code=5)	Yes
- write multiple coils (code=15)	Yes
- Write Multiple Registers (Code=16)	Yes
- Parameter change by master	No
- Modbus TCP Security Protocol	No
<b>Address space per station</b>	
- Address space per station, max.	32 byte
- Access-consistent address space	2 byte
<b>Updating time</b>	
- I/O request interval	2 ms
<b>Connections</b>	
- number of connections per device	12
<b>Open IE communication</b>	
• TCP/IP	Yes; (only EtherNet/IP or Modbus TCP)
• SNMP	Yes
• LLDP	Yes
• ARP	Yes
<b>Isochronous mode</b>	
Equidistance	Yes
shortest clock pulse	500 µs
max. cycle	4 ms

### Technology I/O modules > TM PosInput 2 counter and position detection module

#### Technical specifications

Article number	<b>6ES7147-6AB00-0BB0</b> ET 200eco PN, TM PosInput 2, M12-L
<b>Interrupts/diagnostics/ status information</b>	
Substitute values connectable	Yes
<b>Alarms</b>	
• Diagnostic alarm	Yes; Parameterizable
• Maintenance interrupt	Yes; Parameterizable
• Hardware interrupt	No
<b>Diagnoses</b>	
• Diagnostic information readable	Yes
• Monitoring the supply voltage	Yes
- parameterizable	Yes
• Wire-break	Yes
• Short-circuit	Yes
• Short-circuit encoder supply	Yes
• A/B transition error at incremental encoder	Yes
• Telegram error at SSI encoder	Yes
<b>Diagnostics indication LED</b>	
• RUN LED	Yes; green LED
• ERROR LED	Yes; red LED
• MAINT LED	Yes; Yellow LED
• NS LED	Yes; green/red LED
• MS LED	Yes; green/red LED
• IO LED	Yes; red/green/yellow LEDs
• Channel status display	Yes; green LED
• for channel diagnostics	Yes; red LED
• For load voltage monitoring	Yes; green LED
• Connection display LINK TX/RX	Yes; green LED, only link
<b>Integrated Functions</b>	
Counter	Yes
• Number of counters	2
• Counting frequency, max.	4 MHz; with quadruple evaluation
Fast mode	No
<b>Counting functions</b>	
• Can be used with TO High_Speed_Counter	Yes; only for pulse and incremental encoders
• Continuous counting	Yes
• Counter response parameterizable	Yes
• Hardware gate via digital input	Yes
• Software gate	Yes
• Event-controlled stop	Yes
• Synchronization via digital input	Yes
• Counting range, parameterizable	Yes
<b>Comparator</b>	
- Number of comparators	2; Per channel
- Direction dependency	Yes
- Can be changed from user program	Yes
<b>Position detection</b>	
• Incremental acquisition	Yes
• Absolute acquisition	Yes
• Suitable for S7-1500 Motion Control	Yes
<b>Measuring functions</b>	
• Measuring time, parameterizable	Yes
• Dynamic measurement period adjustment	Yes
• Number of thresholds, parameterizable	2

Article number	<b>6ES7147-6AB00-0BB0</b> ET 200eco PN, TM PosInput 2, M12-L
<b>Measuring range</b>	
- Frequency measurement, min.	0.04 Hz
- Frequency measurement, max.	4 MHz
- Cycle duration measurement, min.	0.25 µs
- Cycle duration measurement, max.	25 s
<b>Accuracy</b>	
- Frequency measurement	100 ppm; depending on measuring interval and signal evaluation
- Cycle duration measurement	100 ppm; depending on measuring interval and signal evaluation
- Velocity measurement	100 ppm; depending on measuring interval and signal evaluation
<b>Potential separation</b>	
between the load voltages	Yes
between Ethernet and electronics	Yes
<b>Potential separation channels</b>	
• between the channels	Yes; DI channels are isolated from the DQ channels
<b>Degree and class of protection</b>	
IP degree of protection	IP65/67/69K
<b>Standards, approvals, certificates</b>	
Suitable for safety-related tripping of standard modules	Yes
<b>Highest safety class achievable for safety-related tripping of standard modules</b>	
• Performance level according to ISO 13849-1	PL d
• Category according to ISO 13849-1	Cat. 3
• SIL acc. to IEC 62061	SIL 2
<b>Use in hazardous areas</b>	
• Explosion protection category for gas	ATEX, UKEX, IECEx, CCCEX for Zone 2
• Explosion protection category for dust	ATEX, UKEX, IECEx, CCCEX for Zone 22
<b>Product functions / security</b>	
signed firmware update	Yes; V5.1.2 or higher
safely removing data	Yes; V5.1.2 or higher
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• min.	-40 °C
• max.	60 °C
<b>Altitude during operation relating to sea level</b>	
• Ambient air temperature-barometric pressure-altitude	Up to max. 5 000 m, at installation height > 2 000 m additional restrictions
<b>connection method</b>	
Design of electrical connection	4/5/8-pin M12 circular connectors
Design of electrical connection for the inputs and outputs	M12, 5-pin, A-coded
Design of electrical connection for supply voltage	M12, 4-pin, L-coded
<b>Decentralized operation</b>	
to SIMATIC S7-300	Yes
to SIMATIC S7-400	Yes
to SIMATIC S7-1200	Yes
to SIMATIC S7-1500	Yes
to standard PROFIBUS master	No
to standard PROFINET controller	Yes
<b>Dimensions</b>	
Width	45 mm
Height	200 mm
Depth	48 mm
<b>Weights</b>	
Weight, approx.	820 g

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200eco PN

### I/O devices > Fail-safe I/O device

#### Overview

The ET 200eco PN fail-safe I/O device expands the ET 200eco PN system family. It is incorporated seamlessly into the Safety Integrated concept like with ET 200MP / ET 200SP and ET200pro. It also supports safety-related communication via PROFINET. The functional safety is certified in accordance with IEC 61508. It is designed for safety-related use up to SIL 3 according to IEC 62061 and PL e according to ISO 13849.

The following fail-safe I/O device with 2x M12 A-coded power connectors and 60 mm width is available:

- F-DI 8x24V /F-DQ 3x24V 2A with 8xM12 connection

#### Ordering data

##### ET 200eco PN fail-safe digital input/output modules

- 8 F-DI 24 V DC/  
3 F-DQ 24 V DC/2 A;  
PROFINET, certified up to SIL 3  
(IEC 61508), PL e (ISO 13849);  
4 x M12/3 x M12, degree of  
protection IP65/67

#### Article No.

6ES7146-6FF00-0AB0

##### Accessories

- PD voltage distributor, 24 V DC;  
1 X 7/8", 4 X M12
- Terminal block for ET 200eco PN,  
10 A insulation displacement  
terminals
- Spare fuses for terminal block,  
10 units
- Mounting rail 0.5 m
- Profile screw for mounting rail,  
50 units
- Sealing cap M12 for IP67  
modules, 12 mm outer diameter,  
without O-ring, 10 units
- Sealing cap M12 for IP67  
modules, 15 mm outer diameter,  
with O-ring, 10 units
- Labels 10 mm x 7 mm yellow, for  
I/O devices with 2x M12 A-coded  
power connectors; 17 frames with  
48 labels each

Article number	<b>6ES7146-6FF00-0AB0</b> ET 200eco PN, F-DI 8x24V /F-DQ 3x24V 2A
<b>Digital outputs</b>	
Number of digital outputs	3
• in groups of	3
Short-circuit protection	Yes; Electronic
Limitation of inductive shutdown voltage to	PM-switching: Typ. -26 V to (-48 V)
Controlling a digital input	No
<b>Switching capacity of the outputs</b>	
• on lamp load, max.	10 W
<b>Output current</b>	
• for signal "1" rated value	2 A
• for signal "0" residual current, max.	0.5 mA
<b>Parallel switching of two outputs</b>	
• for uprating	No
• for redundant control of a load	No
<b>Switching frequency</b>	
• with resistive load, max.	30 Hz
• with inductive load, max.	0.1 Hz
• on lamp load, max.	10 Hz
<b>Total current of the outputs (per group)</b>	
<b>all mounting positions</b>	
- up to 60 °C, max.	3.9 A
<b>Cable length</b>	
• unshielded, max.	30 m
<b>Encoder</b>	
<b>Connectable encoders</b>	
• 2-wire sensor	No
- permissible quiescent current (2-wire sensor), max.	0.5 mA
<b>Interfaces</b>	
Transmission procedure	100BASE-TX
Number of PROFINET interfaces	1
<b>1. Interface</b>	
<b>Interface types</b>	
• M12 port	Yes
• integrated switch	Yes
<b>Interface types</b>	
<b>M12 port</b>	
• Autonegotiation	Yes
• Autocrossing	Yes
• Transmission rate, max.	100 Mbit/s
<b>Protocols</b>	
Supports protocol for PROFINET IO	Yes
PROFINET CBA	No
PROFIsafe	Yes
<b>PROFINET IO Device</b>	
<b>Services</b>	
- IRT with the option "high flexibility"	No; module will participate within an IRT topology
- Prioritized startup	No
<b>Redundancy mode</b>	
<b>Media redundancy</b>	
- MRP	Yes

Article number	<b>6ES7146-6FF00-0AB0</b> ET 200eco PN, F-DI 8x24V /F-DQ 3x24V 2A
<b>Open IE communication</b>	
• TCP/IP	No
• SNMP	Yes
• DCP	Yes
• LLDP	Yes
• ping	Yes
• ARP	Yes
<b>Interrupts/diagnostics/status information</b>	
Diagnostics function	Yes
<b>Alarms</b>	
• Diagnostic alarm	Yes
<b>Diagnoses</b>	
• Diagnostic information readable	Yes
• Monitoring the supply voltage	Yes; green "ON" LED
• Wire-break in actuator cable	Yes
• Wire-break in signal transmitter cable	Yes
• Short-circuit	Yes
• Short-circuit encoder supply	Yes
• Group error	Yes; Red/yellow "SF/MT" LED
<b>Potential separation</b>	
between the load voltages	Yes
between load voltage and all other switching components	No
between Ethernet and electronics	Yes
<b>Potential separation channels</b>	
• between the channels	No
<b>Degree and class of protection</b>	
IP degree of protection	IP65/67
<b>Standards, approvals, certificates</b>	
Suitable for safety-related tripping of standard modules	No
<b>Highest safety class achievable in safety mode</b>	
• Performance level according to ISO 13849-1	PLe
• SIL acc. to IEC 61508	SIL 2 (single-channel), SIL 3 (two-channel)
• SILCL according to IEC 62061	SIL 3
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• min.	-25 °C
• max.	60 °C
<b>connection method</b>	
Design of electrical connection	4/5-pin M12 circular connectors
<b>Dimensions</b>	
Width	60 mm
Height	175 mm
Depth	49 mm
<b>Weights</b>	
Weight, approx.	940 g

### I/O devices > IO-Link master

#### Overview

IO-Link master with 2x M12 L-coded power connectors and 45 mm width

- IO-Link communication modules for connecting up to 8 IO-Link devices
- Options: IO-Link master
  - with 4x Class A port and 4x Class B port as well as additional 4 digital inputs,
  - with 4x Port Class A and additional 12 digital inputs/outputs or
  - with 8x Port Class A and additional 8 digital inputs/outputs.
- The IO-Link specifications V1.0 and V1.1 are supported

IO-Link master with 2x M12 A-coded power connectors and 60 mm width

- IO-Link communication modules for connecting up to 4 IO-Link devices
- IO-Link master with 4x Class A port and additional 8 digital inputs and 4 digital outputs
- The IO-Link specification V1.0 is supported

IO-Link master with 2x M12 A-coded power connectors and 30 mm width

- IO-Link communication modules for connecting up to 4 IO-Link devices
- IO-Link master with 4x Class B port
- The IO-Link specifications V1.0 and V1.1 are supported

#### Technical specifications

Article number	<b>6ES7148-6JA00-0AB0</b> ET 200eco PN, 4xIO-Link + 8DI/4DO, 8xM12	<b>6ES7148-6JD00-0AB0</b> ET 200eco PN, 4xIO-Link 4xM12	<b>6ES7148-6JG00-0BB0</b> ET 200eco PN, CM 8x IO-Link, M12-L
<b>Digital outputs</b>			
Number of digital outputs	4		
Short-circuit protection	Yes; Electronic		
Limitation of inductive shutdown voltage to	Typ. (L1+, L2+) -47 V		
Controlling a digital input	Yes		
<b>Switching capacity of the outputs</b>			
• on lamp load, max.	5 W		
<b>Output current</b>			
• for signal "1" rated value	1.3 A; Maximum		
• for signal "0" residual current, max.	1.5 mA		
<b>Parallel switching of two outputs</b>			
• for uprating	No		
• for redundant control of a load	Yes		
<b>Switching frequency</b>			
• with resistive load, max.	100 Hz		
• with inductive load, max.	0.5 Hz		
• on lamp load, max.	1 Hz		
<b>Total current of the outputs (per group)</b>			
<b>all mounting positions</b>			
- up to 60 °C, max.	3.9 A		
<b>Cable length</b>			
• unshielded, max.	30 m		
<b>IO-Link</b>			
Number of ports	4	4	8
• of which simultaneously controllable	4	4	8
IO-Link protocol 1.0	Yes	Yes	Yes
IO-Link protocol 1.1	No	Yes	Yes
Transmission rate	4.8 kBd (COM1); 38.4 kBd (COM2)	4.8 kBaud (COM1); 38.4 kBaud (COM2), 230 kBaud (COM3)	4.8 kBaud (COM1); 38.4 kBaud (COM2), 230 kBaud (COM3)
Cycle time, min.			2 ms
Size of process data, input per port	32 byte	32 byte	33 byte
Size of process data, input per module	32 byte	128 bytes + 4 bytes PQI	264 byte
Size of process data, output per port	32 byte	32 byte	32 byte
Size of process data, output per module	32 byte	128 byte	256 byte
Memory size for device parameter		2 kbyte; for each port	2 kbyte; for each port
Master backup		Possible with function block IO_LINK_MASTER	possible with LIOLink_Master function block
Configuration without S7-PCT		Possible; autostart/manual function	Possible; autostart/manual function
Cable length unshielded, max.	20 m	20 m	20 m
<b>Connection of IO-Link devices</b>			
• Port type A	Yes	Yes; via 3-core cable	Yes; via 3-core cable
• Port type B		Yes; Additional device supply: max. 2 A per port, max. 4 A per module	Yes; additional device supply: max. 2 A per port, max. 6 A per module
• via three-wire connection	Yes		Yes
<b>Interfaces</b>			
Transmission procedure	100BASE-TX	100BASE-TX	
Number of PROFINET interfaces	1	1	1
<b>1. Interface</b>			
Interface type			PROFINET with 100 Mbit/s full duplex (100BASE-TX)

<b>Load voltage 2L+</b>		
• Rated value (DC)	24 V	24 V
• Reverse polarity protection	Yes; against destruction	Yes; against destruction
<b>Input current</b>		
Current consumption (rated value)	70 mA; without load	70 mA; without load
from load voltage 1L+ (unswitched voltage)	12 A; Maximum value	12 A; Maximum value
from load voltage 2L+, max.	12 A; Maximum value	12 A; Maximum value
<b>Encoder supply</b>		
Number of outputs	8	4
<b>Hardware configuration</b>		
<b>Submodules</b>		
• Number of configurable submodules, max.	10	6
<b>Digital inputs</b>		
Number of digital inputs	8; Parameterizable as DIQ	12; Parameterizable as DIQ
• in groups of	8	4
Digital inputs, parameterizable	Yes	Yes
Source/sink input	P-reading	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes	Yes
<b>Number of simultaneously controllable inputs</b>		
<b>all mounting positions</b>		
- up to 60 °C, max.	8	12
<b>Input voltage</b>		
• Rated value (DC)	24 V	24 V
• for signal "0"	-3 to +5V	-3 to +5V
• for signal "1"	+11 to +30V	+11 to +30V
<b>Input current</b>		
• for signal "1", typ.	2.5 mA	2.5 mA
<b>Input delay (for rated value of input voltage) for standard inputs</b>		
- parameterizable	Yes; 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms	Yes; 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms
<b>Cable length</b>		
• unshielded, max.	30 m	30 m
<b>Digital outputs</b>		
Number of digital outputs	8; Parameterizable as DIQ	12; Parameterizable as DIQ
• in groups of	8	2 load groups for 4 or 8 outputs each
Current-sourcing	Yes	Yes
output type acc. to IEC 61131, type 0.5	Yes	Yes
Short-circuit protection	Yes; per channel, electronic	Yes; per channel, electronic
Limitation of inductive shutdown voltage to	0.5 A: typ. 1L+ (-70 V)	0.5 A: Type 1L+ (-70 V) / 2 A: Type (-18 V)
Controlling a digital input	Yes	Yes
<b>Switching capacity of the outputs</b>		
• with resistive load, max.	0.5 A	0.5 A / 2 A
• with inductive load, max.	0.5 A	0.5 A / 2 A
• on lamp load, max.	5 W	0.5 A: 5 W / 2 A 10 W
<b>Load resistance range</b>		
• lower limit	48 Ω	0.5 A: 48 ohms / 2 A: 12 ohms
• upper limit	4 kΩ	4 kΩ
<b>Output voltage</b>		
• for signal "1", min.	1L+ (-0.8V)	1L+ (-0.8 V) / 2L+ (-0.8 V)
<b>Output current</b>		
• for signal "1" rated value	0.5 A	0.5 A / 2 A
• for signal "0" residual current, max.	0.1 mA	0.1 mA
<b>Parallel switching of two outputs</b>		
• for uprating	No	No
• for redundant control of a load	Yes	Yes

Article number	<b>6ES7194-6JA00-0BB0</b>
	Connector cover for ET200ecoPN M12-L
<b>General information</b>	
Product description	connector cover for ET200ecoPN M12-L
Suitability for use	accessories for use of the ET200ecoPN M12-L in hazardous area Zone 2/22
<b>Degree and class of protection</b>	
IP degree of protection	IP20
<b>Ambient conditions</b>	
Ambient temperature during assembly, min.	-40 °C
Ambient temperature during assembly, max.	80 °C
<b>Ambient temperature during operation</b>	
• min.	-40 °C
• max.	60 °C
<b>Ambient temperature during storage/transportation</b>	
• min.	-40 °C
• max.	80 °C
<b>Mechanics/material</b>	
Material of housing	stainless steel with plastic edge protection
Material property	
• Silicone-free	Yes
<b>Dimensions</b>	
Width	50 mm
Height	200 mm
Depth	110 mm
<b>Weights</b>	
Weight, approx.	710 g

## I/O systems

### SIMATIC ET 200 systems without control cabinet

#### SIMATIC ET 200clean

##### Overview

- Compact I/O devices in hygienic design for processing digital and IO-Link signals
- For connection to bus systems with Ethernet-based protocols PROFINET, EtherNet/IP, and Modbus TCP
- Very robust and chemically resistant plastic enclosure in hygienic design
- Cabinet-free installation in degree of protection IP65/67/69K with M12 connection system
- Trapezoidal enclosure shape of the I/O devices: 60/80 mm x 204 mm x 54 mm (W x H x D) with 8 x M12 for digital signals and IO-Link
- Ambient temperature range -30 °C to 55 °C
- Operation on high-availability S7-1500 R/H or S7-400H controllers possible
- Channel-specific diagnostics
- Identification and maintenance data
- Firmware update
- Security functions
- QR code identification link (ID-Link) for unambiguous identification of the product
- I/O device variants:
  - DI 16x 24 V DC, 8x M12
  - DIQ 16x 24 V DC/0.5 A, 8x M12
  - CM 8x IO-Link + DIQ 4x 24 V DC, 8x M12

**I/O systems**

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200clean

**I/O devices > Digital I/O devices****Overview**

Digital I/O devices in hygienic design for connecting sensors/actuators:

- 16 digital input signals with 8 x M12 connection
- 16 digital input/output signals 0.5 A with 8 x M12 connection

**Ordering data****Article No.****Digital input modules****SIMATIC ET 200clean,  
DI 16x24 V DC**

8x M12, dual assignment, input type 3 (IEC 61131), sinking input (PNP), input delay 0.05..20 ms, channel diagnostics for: wire break at the input, short-circuit encoder supply, 0.25 ms isochronous mode, MSI, MRP, S2 redundancy, I&M0...4, MultiFieldbus, PN IO, Ethernet IP, Modbus TCP, degree of protection IP69K

Article number	<b>6ES7141-7BH00-0BB0</b> ET 200clean, DI 16x24VDC
<b>General information</b>	
<b>Product function</b>	
• Isochronous mode	Yes
• IRT	Yes
• Prioritized startup	Yes
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	STEP 7 V19 or higher with HSP 0414
• PROFINET from GSD version/ GSD revision	GSDML V2.4.x
• Multi Fieldbus Configuration Tool (MFCT)	V1.5.x or higher
<b>Operating mode</b>	
• DI	Yes
• Counter	No
• MSI	Yes
<b>Supply voltage</b>	
<b>Load voltage 1L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; Against destruction; encoder power supply outputs applied with reversed polarity
<b>Input current</b>	
Current consumption (rated value)	85 mA; without load
from load voltage 1L+ (unswitched voltage)	12 A; Maximum value
from load voltage 2L+, max.	12 A; Maximum value
<b>Encoder supply</b>	
Number of outputs	8
<b>Hardware configuration</b>	
<b>Submodules</b>	
• Number of configurable submodules, max.	2

Article number	<b>6ES7141-7BH00-0BB0</b> ET 200clean, DI 16x24VDC
<b>Digital inputs</b>	
Number of digital inputs	16
Digital inputs, parameterizable	Yes
Source/sink input	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes
<b>Number of simultaneously controllable inputs</b>	
<b>all mounting positions</b>	
- up to 55 °C, max.	16
<b>Input voltage</b>	
• Rated value (DC)	24 V
• for signal "0"	-30 to +5 V
• for signal "1"	+11 to +30V
<b>Input current</b>	
• for signal "1", typ.	2.4 mA
<b>Input delay (for rated value of input voltage) for standard inputs</b>	
- parameterizable	Yes; 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms
<b>Cable length</b>	
• unshielded, max.	30 m
<b>Encoder</b>	
<b>Connectable encoders</b>	
• 2-wire sensor	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA
<b>Interfaces</b>	
Number of PROFINET interfaces	1

#### Technical specifications

Article number	<b>6ES7141-7BH00-0BB0</b> ET 200clean, DI 16x24VDC
<b>1. Interface</b>	
Interface type	PROFINET with 100 Mbit/s full duplex (100BASE-TX)
<b>Interface types</b>	
• M12 port	Yes; 2x M12, 4-pin, D-coded
• Number of ports	2
• integrated switch	Yes
<b>Protocols</b>	
• PROFINET IO Device	Yes
• Open IE communication	Yes
<b>Interface types</b>	
<b>M12 port</b>	
• Autonegotiation	Yes
• Autocrossing	Yes
• Transmission rate, max.	100 Mbit/s
<b>Protocols</b>	
Supports protocol for PROFINET IO	Yes
PROFIsafe	No
EtherNet/IP	Yes
Modbus TCP	Yes
<b>PROFINET IO Device</b>	
<b>Services</b>	
- IRT	Yes; 250 µs to 4 ms in 125 µs frame
- Prioritized startup	Yes
<b>Redundancy mode</b>	
• PROFINET system redundancy (S2)	Yes
• PROFINET system redundancy (R1)	No
• H-Sync forwarding	Yes
<b>Media redundancy</b>	
- MRP	Yes
<b>EtherNet/IP</b>	
<b>Services</b>	
- CIP Implicit Messaging	Yes
- CIP Explicit Messaging	Yes
- CIP Safety	No
- Shared device	Yes; 2x EtherNet/IP Scanner
- Number of scanners with shared device, max.	2
<b>Updating times</b>	
- Requested Packet Interval (RPI)	2 ms
<b>Redundancy mode</b>	
- DLR (Device Level Ring)	No
<b>Address area</b>	
- Address space per module, max.	20 byte
- LargeForwardOpen (Class3)	No
<b>Modbus TCP</b>	
<b>Services</b>	
- read coils (code=1)	Yes
- read discrete inputs (code=2)	Yes
- Read Holding Registers (Code=3)	Yes
- write single coil (code=5)	Yes
- write multiple coils (code=15)	Yes
- Write Multiple Registers (Code=16)	Yes
- Parameter change by master	No
- Modbus TCP Security Protocol	No
<b>Address space per station</b>	
- Address space per station, max.	20 byte
- Access-consistent address space	2 byte

Article number	<b>6ES7141-7BH00-0BB0</b> ET 200clean, DI 16x24VDC
<b>Updating time</b>	
- I/O request interval	2 ms
<b>Connections</b>	
- number of connections per device	12
<b>Open IE communication</b>	
• TCP/IP	Yes; (only EtherNet/IP or Modbus TCP)
• SNMP	Yes
• LLDP	Yes
• ARP	Yes
<b>Isochronous mode</b>	
Equidistance	Yes
shortest clock pulse	250 µs
max. cycle	4 ms
<b>Interrupts/diagnostics/ status information</b>	
<b>Alarms</b>	
• Diagnostic alarm	Yes; Parameterizable
• Maintenance interrupt	Yes; Parameterizable
• Hardware interrupt	Yes; Parameterizable
<b>Diagnoses</b>	
• Diagnostic information readable	Yes
• Monitoring the supply voltage	Yes
- parameterizable	Yes
• Wire-break	Yes; DI, input current < 0.3 mA, per channel
• Short-circuit encoder supply	Yes; Per channel group
<b>Diagnostics indication LED</b>	
• RUN LED	Yes; green LED
• ERROR LED	Yes; red LED
• MAINT LED	Yes; Yellow LED
• NS LED	Yes; green/red LED
• MS LED	Yes; green/red LED
• IO LED	Yes; red/green/yellow LEDs
• Channel status display	Yes; green LED
• for channel diagnostics	Yes; red LED
• Connection display LINK TX/RX	Yes; green LED, only link
<b>Potential separation</b>	
between the load voltages	Yes
between Ethernet and electronics	Yes
<b>Potential separation channels</b>	
• between the channels	No
• between the channels and the power supply of the electronics	No
<b>Degree and class of protection</b>	
IP degree of protection	IP65/67/69K
<b>Standards, approvals, certificates</b>	
Suitable for safety-related tripping of standard modules	Yes; from FS01
<b>Highest safety class achievable for safety-related tripping of standard modules</b>	
• Performance level according to ISO 13849-1	PL d
• Category according to ISO 13849-1	Cat. 3
• SIL acc. to IEC 62061	SIL 2
<b>Product functions / security</b>	
signed firmware update	Yes
safely removing data	Yes

<b>Load resistance range</b>	
• lower limit	48 Ω
• upper limit	4 kΩ
<b>Output voltage</b>	
• for signal "1", min.	1L+ (-0.8V)
<b>Output current</b>	
• for signal "1" rated value	0.5 A
• for signal "0" residual current, max.	0.1 mA
<b>Parallel switching of two outputs</b>	
• for uprating	No
• for redundant control of a load	Yes
<b>Switching frequency</b>	
• with resistive load, max.	100 Hz
• with inductive load, max.	0.5 Hz
• on lamp load, max.	1 Hz

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200clean

### I/O devices > IO-Link master

#### Overview

Article number	<b>6ES7148-7JH00-0BB0</b> ET 200clean, CM 8x IO-Link
<b>Total current of the outputs</b>	
• Current per group, max.	1L+: 2 A
• Current per module, max.	2 A
<b>Cable length</b>	
• unshielded, max.	30 m
<b>Encoder</b>	
<b>Connectable encoders</b>	
• 2-wire sensor	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA
<b>IO-Link</b>	
Number of ports	8
• of which simultaneously controllable	8
IO-Link protocol 1.0	Yes
IO-Link protocol 1.1	Yes
Transmission rate	4.8 kBaud (COM1); 38.4 kBaud (COM2), 230 kBaud (COM3)
Cycle time, min.	2 ms
Size of process data, input per port	33 byte
Size of process data, input per module	264 byte
Size of process data, output per port	32 byte
Size of process data, output per module	256 byte
Memory size for device parameter	2 kbyte; for each port
Master backup	possible with LIOLink_Master function block
Configuration without S7-PCT	Possible; autostart/manual function
Cable length unshielded, max.	20 m
<b>Operating modes</b>	
• IO-Link	Yes
• DI	Yes
• DQ	Yes; max. 100 mA
<b>Connection of IO-Link devices</b>	
• Port type A	Yes; via 3-core cable
• Port type B	Yes; additional device supply: max. 2 A per port, max. 6 A per module
<b>Interfaces</b>	
Number of PROFINET interfaces	1
<b>1. Interface</b>	
Interface type	PROFINET with 100 Mbit/s full duplex (100BASE-TX)
<b>Interface types</b>	
• M12 port	Yes; 2x M12, 4-pin, D-coded
• Number of ports	2
• integrated switch	Yes
<b>Protocols</b>	
• PROFINET IO Device	Yes
• Open IE communication	Yes
<b>Interface types</b>	
<b>M12 port</b>	
• Autonegotiation	Yes
• Autocrossing	Yes
• Transmission rate, max.	100 Mbit/s
<b>Protocols</b>	
Supports protocol for PROFINET IO	Yes
PROFIsafe	No
EtherNet/IP	Yes
Modbus TCP	Yes

Article number	<b>6ES7148-7JH00-0BB0</b> ET 200clean, CM 8x IO-Link
<b>PROFINET IO Device</b>	
<b>Services</b>	
- IRT	Yes; 250 µs to 4 ms in 125 µs frame
- Prioritized startup	Yes
- Shared device	Yes
- Number of IO Controllers with shared device, max.	2
<b>Redundancy mode</b>	
• PROFINET system redundancy (S2)	Yes
• PROFINET system redundancy (R1)	No
• H-Sync forwarding	Yes
<b>Media redundancy</b>	
- MRP	Yes
<b>EtherNet/IP</b>	
<b>Services</b>	
- CIP Implicit Messaging	Yes
- CIP Explicit Messaging	Yes
- CIP Safety	No
- Shared device	Yes; 2x EtherNet/IP Scanner
- Number of scanners with shared device, max.	2
<b>Updating times</b>	
- Requested Packet Interval (RPI)	2 ms
<b>Redundancy mode</b>	
- DLR (Device Level Ring)	No
<b>Address area</b>	
- Address space per module, max.	300 byte
- LargeForwardOpen (Class3)	No
<b>Modbus TCP</b>	
<b>Services</b>	
- read coils (code=1)	Yes
- read discrete inputs (code=2)	Yes
- Read Holding Registers (Code=3)	Yes
- write single coil (code=5)	Yes
- write multiple coils (code=15)	Yes
- Write Multiple Registers (Code=16)	Yes
- Parameter change by master	No
- Modbus TCP Security Protocol	No
<b>Address space per station</b>	
- Address space per station, max.	300 byte
- Access-consistent address space	2 byte
<b>Updating time</b>	
- I/O request interval	2 ms
<b>Connections</b>	
- number of connections per device	12
<b>Open IE communication</b>	
• TCP/IP	Yes; (only EtherNet/IP or Modbus TCP)
• SNMP	Yes
• LLDP	Yes
• ARP	Yes

## I/O systems

SIMATIC ET 200clean

### I/O devices > IO-Link master

#### Overview

Article number	<b>6ES7148-7JH00-0BB0</b> ET 200clean, CM 8x IO-Link
<b>Interrupts/diagnostics/ status information</b>	
Substitute values connectable	Yes
<b>Alarms</b>	
• Diagnostic alarm	Yes; Parameterizable
• Maintenance interrupt	Yes; Parameterizable
• Hardware interrupt	Yes; Parameterizable
<b>Diagnoses</b>	
• Diagnostic information readable	Yes
• Monitoring the supply voltage	Yes
- parameterizable	Yes
• Wire-break	Yes; DI, input current < 0.3 mA, per channel
• Short-circuit	Yes; Outputs to M and P; channel by channel
• Short-circuit encoder supply	Yes; Per channel
<b>Diagnostics indication LED</b>	
• RUN LED	Yes; green LED
• ERROR LED	Yes; red LED
• MAINT LED	Yes; Yellow LED
• NS LED	Yes; green/red LED
• MS LED	Yes; green/red LED
• IO LED	Yes; red/green/yellow LEDs
• Channel status display	Yes; green LED
• for channel diagnostics	Yes; red LED
• For load voltage monitoring	Yes; green LED
• Connection display LINK TX/RX	Yes; green LED, only link
<b>Potential separation</b>	
between the load voltages	Yes
between Ethernet and electronics	Yes
<b>Potential separation channels</b>	
• between the channels	No
• between the channels and the power supply of the electronics	No

Article number	<b>6ES7148-7JH00-0BB0</b> ET 200clean, CM 8x IO-Link
<b>Degree and class of protection</b>	
IP degree of protection	IP65/67/69K
<b>Standards, approvals, certificates</b>	
Suitable for safety-related tripping of standard modules	Yes; from FS01
<b>Highest safety class achievable for safety-related tripping of standard modules</b>	
• Performance level according to ISO 13849-1	PL d
• Category according to ISO 13849-1	Cat. 3
• SIL acc. to IEC 62061	SIL 2
<b>Product functions / security</b>	
signed firmware update	Yes
safely removing data	Yes
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• min.	-30 °C
• max.	55 °C
<b>Altitude during operation relating to sea level</b>	
• Ambient air temperature-barometric pressure-altitude	Up to max. 5 000 m, at installation height > 2 000 m additional restrictions, see manual for details
<b>connection method</b>	
Design of electrical connection	4/5-pin M12 circular connectors
Design of electrical connection for the inputs and outputs	M12, 5-pin, A-coded
Design of electrical connection for supply voltage	M12, 4-pin, L-coded
<b>Mechanics/material</b>	
Material	housing: PBT; seal: MVQ (silicone); bushing / metal parts: 1.4404 (stainless steel)
<b>Dimensions</b>	
Width	80 mm
Height	205 mm
Depth	54 mm
<b>Weights</b>	
Weight, approx.	280 g

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200clean

### Accessories

#### Overview

For use in systems with increased hygienic requirements, specific mounting accessories are available.

Material transitions and contact surfaces of the accessories are provided with a hygienic seal that prevents the accumulation of dirt, bacteria and other microorganisms when installed.

#### Sealing cap

Sealing cap M12 in hygienic design and with degree of protection IP69K, for sealing open M12 sockets of the ET 200clean I/O devices.

#### Fixing screw

Fixing screw M5x50mm as stainless steel version, for mounting the ET 200clean I/O devices on conductive surfaces.

#### Ordering data

#### Article No.

##### **Sealing cap M12 for ET 200clean**

Plastic version, hygienic seal, for degree of protection IP69K, 10 units per packing unit

**6ES7194-7JA00-0AA0**

##### **Fixing screw M5x50mm for ET 200clean**

Stainless steel version, hygienic seal, 10 units per packing unit

**6ES7194-7MA00-0AA0**

With PG interface, grounding via control cabinet cover

- 1 unit

6ES7972-0BB70-0XA0

#### RS 485 bus connector with angled cable outlet (35°)

With screw-type connections, max. transfer rate 12 Mbps

- Without PG interface
- With PG interface

6ES7972-0BA42-0XA0  
6ES7972-0BB42-0XA0

#### PROFIBUS FastConnect RS 485 bus connector with angular cable outlet (35°)

With insulation displacement terminals, max. transfer rate 12 Mbps

- Without PG interface
- With PG interface

6ES7972-0BA61-0XA0  
6ES7972-0BB61-0XA0

#### PROFIBUS FastConnect stripping tool

6GK1905-6AA00

Pre-adjusted stripping tool for fast stripping of PROFIBUS FastConnect bus cables

#### PROFIBUS FC standard cable

6XV1830-0EH10

Standard type with special design for quick mounting, 2-wire, shielded, sold by the meter, max. delivery unit 1000 m, minimum order quantity 20 m

#### SIMATIC Manual Collection DL in 5 languages

6ES7998-8XE01-8YE0

All manuals for S7-1200/1500/200/300/400, LOGO!, SIMATIC DP, PC, PG, STEP 7, Engineering SW, Runtime SW, SIMATIC HMI, SIMATIC NET, SIMATIC IDENT

Consignee email address required for delivery.

#### SIMATIC Manual Collection DL in 5 languages

6ES7998-8XE01-8YE2

Software Update Service (SUS); within the framework of this contract, you will receive all current software versions as a download for one year. The contract is automatically extended by 1 year unless it is canceled 3 months before expiration. Delivery and service period: 1 year from date of invoice. Consignee email address required for delivery.

#### Connecting cable for PROFIBUS

6ES7901-4BD00-0XA0

12 Mbps, for PG connection to PROFIBUS DP, pre-assembled with 2 x 9-pin sub D plug, 3.0 m

## PROFINET components

### ERTEC Enhanced Real-Time Ethernet Controller

#### Overview

#### Innovative and well-proven

As a dedicated PI member, Siemens has been actively advancing the development of PROFINET from the beginning. Siemens technology components benefit from the accumulated know-how. They have been field-proven in countless products, provide maximum performance capability and can be scaled to exact requirements.

And that is not all. Siemens Competence Centers offer advice for choosing the right technology component for the device, training opportunities and support throughout the development process, up to and including successful certification.

#### ERTEC 200P-2 – Your path to the fastest PROFINET

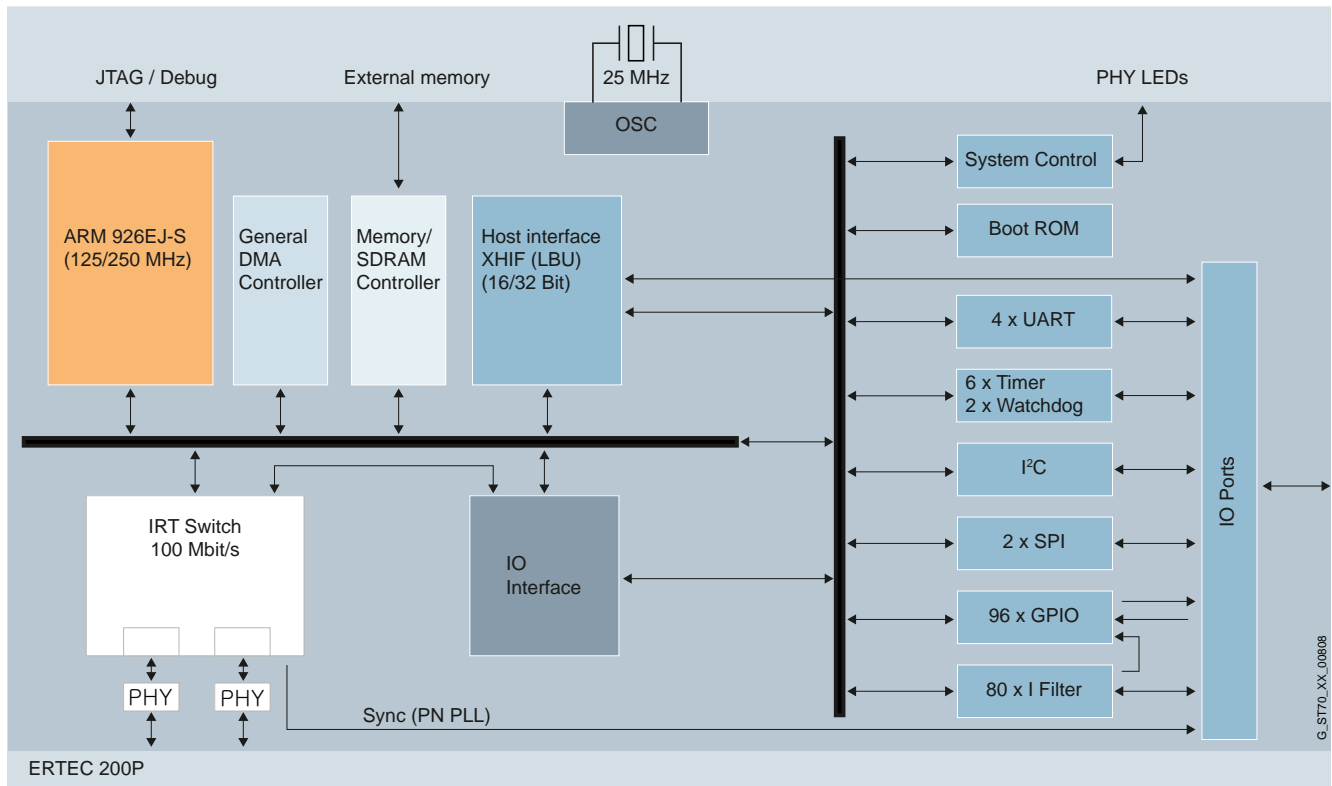

The ERTEC 200P-2 (Enhanced Real-Time Controller) sets new standards for communication. Designed for cycle times as low as 125  $\mu$ s, the performance upgrade for PROFINET has been integrated in the ERTEC 200P-2. With its 250 MHz ARM9 CPU and integrated IRT (isochronous real-time) switch, field devices with demanding performance requirements can be implemented. The reduced chip size simplifies integration into compact field devices. The CPU also allows integration of a user's own applications, which makes an external host CPU unnecessary depending on the application.

#### Development kit for ERTEC 200P-2

The development kit includes an evaluation board with sample applications so that commissioning can be completed in minimum time. The PROFINET stack is delivered as source code and includes the eCos open source real-time operating system and all development tools, analysis programs and documentation. Field devices with RT (real-time) and IRT (isochronous real-time) can be implemented with the ERTEC ASICs. The integrated switch allows the construction of field devices with two ports.

#### Functions:

- Isochronous mode
- Shared device for 4 controllers
- S2 system redundancy
- PROFINET performance upgrade with a minimum cycle time of 125  $\mu$ s.
- MRP/MRPD
- Regular, no-cost updates
- Current technology certificate

Internal structure of ERTEC 200P-2

## I/O systems

### PROFINET components

#### Development kits

##### Overview

With the development kits for PROFINET, compact or modular PROFINET field devices can be developed quickly and with little effort. Depending on the application, different development kits are available.

The development kits for the ASICs of the ERTEC family (Enhanced Real-Time Ethernet Controller) are suitable for the development of field devices with an integrated IRT switch (Isochronous Real-Time). The demand for real-time capability, linear topology capability, and for IT integration is therefore met perfectly.

With the help of the development kit for standard Ethernet controllers, PROFINET devices can be developed on the basis of a standard Ethernet controller. Devices with RT (Real-Time) can be implemented in the field device without special hardware.

The PROFIsafe starter kit permits the implementation of fail-safe devices. In so doing, the PROFIsafe stack applicatively builds on the PROFINET stack.

### PROFINET components

#### PROFINET driver

##### Overview

###### PROFINET driver for controllers

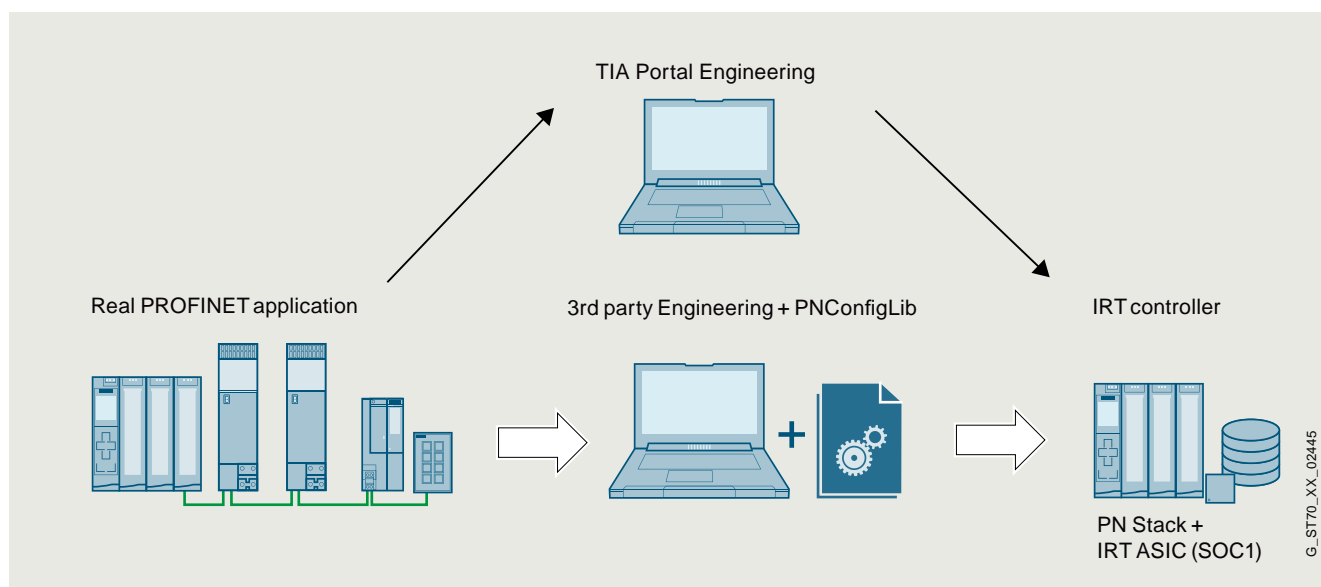

Reasonably priced components are a major competitive advantage, especially in series machine building. Here, users often develop in-house control software. For reasons of performance, flexibility and cost, the individual application is then implemented on standard PCs. The PROFINET driver supports this in-house development and requires no special hardware thanks to its conventional Ethernet interface.

Because the PROFINET driver is delivered as source code, proprietary solutions can be ported into various operating systems and hardware platforms. As a result, the PROFINET driver can also be optimally used in embedded systems for in-house controller solutions. Design and configuration is easy and takes place via an open XML interface without the need for engineering tools. The well-proven PROFINET stack from SIMATIC forms the centerpiece.

The PROFINET driver is suitable for both simple applications, such as individual PROFINET lines, as well as for complex machines. It supports PROFINET RT for cycle times starting from 1 ms via a standard Ethernet interface. Alternatively, PROFINET IRT can also be used for cycle times starting from 500  $\mu$ s, in connection with the CP1625 controller development kit.

###### PROFINET ConfigLib

PROFINET networks must be planned. This can be carried out for the PROFINET driver using the TIA Portal. A license is not required. ConfigLib is a standalone API for generating PROFINET hardware configurations. It can be used to create RT and IRT projects, whereby ConfigLib takes over the planning algorithm.

PNConfigLib – Efficient creation of hardware configurations without the TIA Portal

###### CP1625 Controller Development Kit

Siemens SOC1 gives you the hardware support required to build an IRT controller. The CP1625 Controller Development Kit is suitable for both standalone and host modes.

- Stand-alone mode: PN stack and application run on the CP1625
- Host mode: Application runs on the PC or, for example, ARM. The stack runs on the CP1625

SIMATIC CP1625

## I/O systems

Network components for PROFIBUS  
Electrical networks (RS 485)

### RS 485 repeater for PROFIBUS

#### Overview

- Automatic detection of transfer rates
- Transfer rates from 9.6 kbps to 12 Mbps are possible, incl. 45.45 kbps
- 24 V DC voltage display
- Indication of segment 1 and 2 bus activity
- The separation of segment 1 and segment 2 by means of switches is possible
- Separation of the right segment with an inserted terminating resistor
- Decoupling of segment 1 and segment 2 in the case of static interference

#### Designed for Industry

- For increasing the expansion
- Galvanic isolation of segments
- Commissioning support
  - Switches for separation of segments
  - Bus activity display
  - Segment separation in the case of an incorrectly inserted terminating resistor

In this context, please also note the diagnostic repeater that provides extensive diagnostics functions for physical line diagnostics in addition to the normal repeater functionality.

## I/O systems

### Gateways

#### PN/PN coupler

##### Overview

- Fast deterministic data exchange between CPUs with PROFINET controller, even beyond network boundaries
- Configuration with two PROFINET devices completely independent of the communication technology

Data transmission between two S7-1500 IO controllers beyond a PROFINET limit

- Very simple configuration of the data exchange via virtual IO modules or alternatively via data records for larger amounts of data
  - Simultaneous data transfer to up to 3 CPUs on own network side and/or up to 4 CPUs on opposite network side
  - Easy to integrate into any PROFINET network with 2 ports per network side
  - Fieldbus connection via a SIMATIC BusAdapter; this allows free selection of the connection system (RJ45, FC cable direct connection) and connection hardware (copper, POF, PCF, glass fiber). FO-to-copper media conversion can also be realized economically and without external converters.
- Additional functions
- Quantity structures
    - Cyclic transmission: Up to 1440 bytes each for input and output data
    - Data record transfer: Up to 4096 bytes per slot. Buffering of up to eight data records per slot
    - Maximum 16 input/output areas for data exchange
    - Max. 254 bytes of input and 253 bytes of output data per module
  - Exchange of fail-safe data between two F-CPU's via F-SendDP and F\_ReceiveDP
  - Shared device with up to four IO controllers per network side
  - Module-internal shared input / shared output (MSI/MSO)
  - Device replacement without programming device
    - With topological configuration via proximity detection (LLDP)
    - Without topological configuration via redundant storage of the station name in the BusAdapter. A separate removable memory card is not required.
  - Reset button for restoring the factory settings
  - Redundant power supply
  - Galvanic isolation between the two PROFINET IO subnets
  - Media redundancy (MRP and MRPD)
  - I&M data
  - Firmware update
  - Support for Ethernet services (ping, arp, SNMP, MIP-2, LLDP)
  - Comprehensive diagnostics via LED displays and interrupts
  - Extensive compatibility with the PN/PN coupler up to firmware version V3.0

### PN/PN coupler

#### Technical specifications

Article number	<b>6ES7158-3AD10-0XA0</b> SIMATIC PN/PN Coupler
<b>Power loss</b>	
Power loss, typ.	4 W; For 24 V input voltage and 2 plugged BA 2x RJ45 If BusAdapters with an optical interface are plugged, there is an additional 750 mW per optical interface (3 W with 2 plugged BA 2x LC)
<b>Address area</b>	
<b>Address space per module</b>	
• Address space per module, max.	254 byte; max. 254 bytes of input data and 253 bytes of output data
<b>Address space per station</b>	
• Address space per station, max.	1 440 byte; per input / output
<b>Hardware configuration</b>	
<b>Submodules</b>	
• Number of submodules per station, max.	116
<b>Interfaces</b>	
Number of PROFINET interfaces	2; One PROFINET interface per line side
Optical interface	Yes; Via SIMATIC BusAdapter
Transmission rate, max.	100 Mbit/s
<b>1. Interface</b>	
<b>Interface types</b>	
• Number of ports	2; via BusAdapter
• integrated switch	Yes
• BusAdapter (PROFINET)	Yes; Compatible BusAdapter: BA 2x RJ45, BA 2x FC, BA 2x SCRJ, BA SCRJ / RJ45, BA SCRJ / FC, BA 2x LC, BA LC / RJ45, BA LC / FC
<b>Protocols</b>	
• PROFINET IO Device	Yes
• Open IE communication	Yes
• Media redundancy	Yes; As MRP or MRPD client; max. 50 or 30 devices in the ring
<b>2. Interface</b>	
<b>Interface types</b>	
• Number of ports	2; via BusAdapter
• integrated switch	Yes
• BusAdapter (PROFINET)	Yes; Compatible BusAdapter: BA 2x RJ45, BA 2x FC, BA 2x SCRJ, BA SCRJ / RJ45, BA SCRJ / FC, BA 2x LC, BA LC / RJ45, BA LC / FC
<b>Protocols</b>	
• PROFINET IO Device	Yes
• Open IE communication	Yes
• Media redundancy	Yes; As MRP or MRPD client; max. 50 or 30 devices in the ring
<b>Interface types</b>	
<b>RJ 45 (Ethernet)</b>	
• Transmission procedure	PROFINET with 100 Mbit/s full duplex (100BASE-TX)
• 10 Mbps	No
• 100 Mbps	Yes; PROFINET with 100 Mbit/s full duplex (100BASE-TX)
• Autonegotiation	Yes
• Autocrossing	Yes
<b>Protocols</b>	
Supports protocol for PROFINET IO	Yes
<b>Protocols (Ethernet)</b>	
• TCP/IP	Yes
• SNMP	Yes
• LLDP	Yes
• ping	Yes
• ARP	Yes

Article number	<b>6ES7158-3AD10-0XA0</b> SIMATIC PN/PN Coupler
<b>PROFINET IO Device</b>	
<b>Services</b>	
- IRT	Yes
- PROFIenergy	No
- Prioritized startup	Yes
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4; per line side
<b>Redundancy mode</b>	
• PROFINET system redundancy (S2)	Yes; NAP S2 acc. to IEC
• H-Sync forwarding	Yes
<b>Media redundancy</b>	
- MRP	Yes
- MRPD	Yes
<b>Open IE communication</b>	
• TCP/IP	Yes
• SNMP	Yes
• LLDP	Yes
<b>Interrupts/diagnostics/status information</b>	
Status indicator	Yes
Alarms	Yes
Diagnostics function	Yes; Parameterizable
<b>Diagnostics indication LED</b>	
• RUN LED	Yes; green LED
• ERROR LED	Yes; red LED
• MAINT LED	Yes; Yellow LED
• LINK LED	Yes; 2x green link LEDs on BusAdapter
• Monitoring of the supply voltage (PWR-LED)	Yes; green PWR LED
<b>Potential separation</b>	
between supply voltage and electronics	Yes; to power input 2
between Ethernet and electronics	Yes
<b>Standards, approvals, certificates</b>	
Network loading class	3
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• min.	-30 °C; From FS05
• max.	60 °C; = Tmax for horizontal installation; for vertical installation Tmax = 50 °C
<b>Altitude during operation relating to sea level</b>	
• Installation altitude above sea level, max.	5 000 m; restrictions for installation altitudes > 2 000 m, see section "Climatic and mechanical environmental conditions"
<b>Mechanics/material</b>	
Strain relief	Yes; Optional, for RJ45 and FC BusAdapter only
<b>Dimensions</b>	
Width	100 mm; Minimized with good handling
Height	117 mm
Depth	74 mm; with mounting rail
<b>Weights</b>	
Weight, approx.	200 g; without BusAdapter

#### PN/CAN LINK

##### Overview

- For data exchange between PROFINET and CAN Bus 2.0A/B or CANopen Manager or Slave (according to CiA 301 & 302)
- CANopen features:
  - Node / lifeguarding
  - Heartbeat
  - SYNC (producer / consumer)
- Integrated in TIA via HSP, TIA Portal V14 or higher
- PROFINET switch and 9-pin D-sub plug integrated for CAN
- Up to 126 CAN nodes
- 512 receiver/transmitter PDOs
- Electrical isolation between the two networks
- Diagnostic interrupts
- Supported controllers: S7-1200, S7-1500, ET 200SP, Open Controller
- Optionally with function block SIMATIC ECC CHAdeMO: Realization of digital communication as basis for conductible DC charging of electric vehicles in line with the CHAdeMO standard

<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• horizontal installation, min.	-40 °C; = Tmin (incl. condensation/frost)
• horizontal installation, max.	70 °C; = Tmax
<b>Ambient temperature during storage/transportation</b>	
• min.	-40 °C
• max.	85 °C
<b>Altitude during operation relating to sea level</b>	
• Installation altitude above sea level, max.	5 000 m
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m) // Tmin ... (Tmax - 10 K) at 795 hPa ... 658 hPa (+2 000 m ... +3 500 m) // Tmin ... (Tmax -20 K) at 658 hPa ... 540 hPa (+3 500 m ... +5 000 m)
<b>Relative humidity</b>	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; incl. condensation / frost permitted (no commissioning under condensation conditions)
<b>Resistance</b>	
<b>Coolants and lubricants</b>	
- Resistant to commercially available coolants and lubricants	Yes; Incl. diesel and oil droplets in the air
<b>Use in stationary industrial systems</b>	
- to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
- to chemically active substances according to EN 60721-3-3	Yes; in preparation
- to mechanically active substances according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust, *

Article number	<b>6AG1620-0AA00-7AA0</b>
Based on	<b>6BK1620-0AA00-0AA0</b> SIPLUS PN/CAN LINK
<b>Use on ships/at sea</b>	
- to biologically active substances according to EN 60721-3-6	Yes; Class 6B2 mold and fungal spores (excluding fauna); Class 6B3 on request
- to chemically active substances according to EN 60721-3-6	Yes; Class 6C3 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-6	Yes; Class 6S3 incl. sand, dust; *
<b>Usage in industrial process technology</b>	
- Against chemically active substances acc. to EN 60654-4	Yes; Class 3 (excluding trichlorethylene)
- Environmental conditions for process, measuring and control systems acc. to ANSI/ISA-71.04	Yes; Level GX group A/B (excluding trichlorethylene; harmful gas concentrations up to the limits of EN 60721-3-3 class 3C4 permissible); level LC3 (salt spray) and level LB3 (oil)
<b>Remark</b>	
- Note regarding classification of environmental conditions acc. to EN 60721, EN 60654-4 and ANSI/ISA-71.04	* The supplied plug covers must remain in place over the unused interfaces during operation!
<b>Conformal coating</b>	
• Coatings for printed circuit board assemblies acc. to EN 61086	Yes; Class 2 for high reliability
• Protection against fouling acc. to EN 60664-3	Yes; Type 1 protection
• Military testing according to MIL-I-46058C, Amendment 7	Yes; Discoloration of coating possible during service life
• Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies according to IPC-CC-830A	Yes; Conformal coating, Class A

#### PN/J1939 LINK

##### Overview

- For data exchange between PROFINET and SAE J1939 networks
- J1939 functions:
  - Broadcast Announce Message (BAM)
  - Connection Mode Data Transfer (CMDT)
  - PDU 1 & 2
- Integrated into Totally Integrated Automation via gsdml file in TIA Portal. No separate software required
- Integrated PROFINET switch with 9-pin Sub-D socket for J1939
- Up to 253 logical nodes
- Up to 30 addressable ECUs
- Galvanic isolation between the two networks
- Diagnostic interrupts
- Controllers supported: S7-1200, S7-1500, ET 200SP, Open Controller

### Gateways

#### PN/BACnet LINK

##### Overview

- Gateway between PROFINET and BACnet/IP networks according to EN ISO16484-5 and Addendum ANSI/ASHRAE Standard 135-2012.
- Integrated in Totally Integrated Automation via HSP, TIA Portal V14 or higher
- Integrated PROFINET switch and RJ45 socket for BACnet
- 1 000 BACnet objects/object references
- 1 000 subscribe services
- BACnet features:
  - Client & Server
  - Device profile: B-GW
  - Change of value / cyclic and acyclic data exchange
  - Scan of BACnet/IP network
- Supported BACnet object types:
  - Device
  - Binary input
  - Binary output
  - Analog input
  - Analog output
- Supported BACnet services:
  - DS-COV-A/B
  - DM-DDB-A/B
  - DM-DOB-B
  - DS-RP-A/B
  - DS-WP-A/P
  - GW-EO-B
- Galvanic isolation between the two networks
- Diagnostic interrupts
- Controllers supported: S7-1200, S7-1500, ET 200SP, Open Controller

#### PN/M-Bus LINK

##### Overview

- For data exchange between PROFINET and M-Bus networks
- M-Bus functions:
  - M-Bus master
  - Primary address
  - Secondary address
  - Read-only access to M-Bus slaves
  - Short-circuit detection
- Integrated into Totally Integrated Automation via gsdml file in TIA Portal. No separate software required
- Integrated PROFINET switch with 3-pin screw terminal for M-Bus
- Up to 40 slaves (loads/units)
- Diagnostic interrupts
- Controllers supported: S7-1200, S7-1500, ET 200SP, Open Controller

##### Ordering data

**SIMATIC PN/M-Bus LINK**  
Gateway from PROFINET to  
M-Bus networks, M-Bus Master, IP20

##### Technical specifications

Article number	<b>6BK1622-0AA00-0AA0</b> SIMATIC PN/M-Bus LINK
<b>General information</b>	
Product type designation	PN/M-Bus LINK
<b>Product function</b>	
• I&M data	Yes
• Isochronous mode	No
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	STEP 7 V15 or higher
<b>Installation type/mounting</b>	
Mounting	DIN rail, wall mounting, portrait mounting
Mounting position	any
Recommended mounting position	Horizontal
Rail mounting	Yes
Control cabinet installation	Yes
<b>Supply voltage</b>	
Type of supply voltage	DC
Rated value (DC)	24 V
Reverse polarity protection	Yes
Overvoltage protection	Yes
Short-circuit protection	Yes
<b>Mains buffering</b>	
• Mains/voltage failure stored energy time	10 ms; PN side
<b>Input current</b>	
Current consumption (rated value)	0.11 A; At 24 V and 5 loads
Current consumption, max.	0.4 A; At 20.4 V, 40 loads + 100 mA short-circuit current
<b>Power loss</b>	
Power loss, typ.	2.4 W
<b>Interfaces</b>	
<b>Supports protocol for PROFINET IO</b>	
• automatic detection of transmission rate	No
• Transmission rate, max.	100 Mbit/s
• Number of RJ45 ports	2
• Number of FC (FastConnect) connections	2

#### Overview

#### **Smart Field Distributor – SIMATIC Compact Field Unit**

With the new SIMATIC Compact Field Unit (CFU), we are re-interpreting the conventional approach to field device connection. The smart field distributor is installed at the process level and is connected via PROFINET, the world's leading Industrial Ethernet standard, directly to the automation system to form the foundation for digitalization in the field.

You benefit from greater flexibility and very simple handling coupled with maximum availability. This allows you to efficiently transfer your familiar system concept to the digital world.

#### **Today's challenges for field device connection:**

- High overhead for device integration and replacement
- Complicated, error-prone wiring and routing over multiple levels, making the hardware FAT very complex
- Extremely long copper cables and numerous terminal points in the field
- Multiple individual control cabinets
- Large numbers of different components and protocols necessitate costly spare parts inventories and training sessions
- High planning and documentation costs

## I/O systems

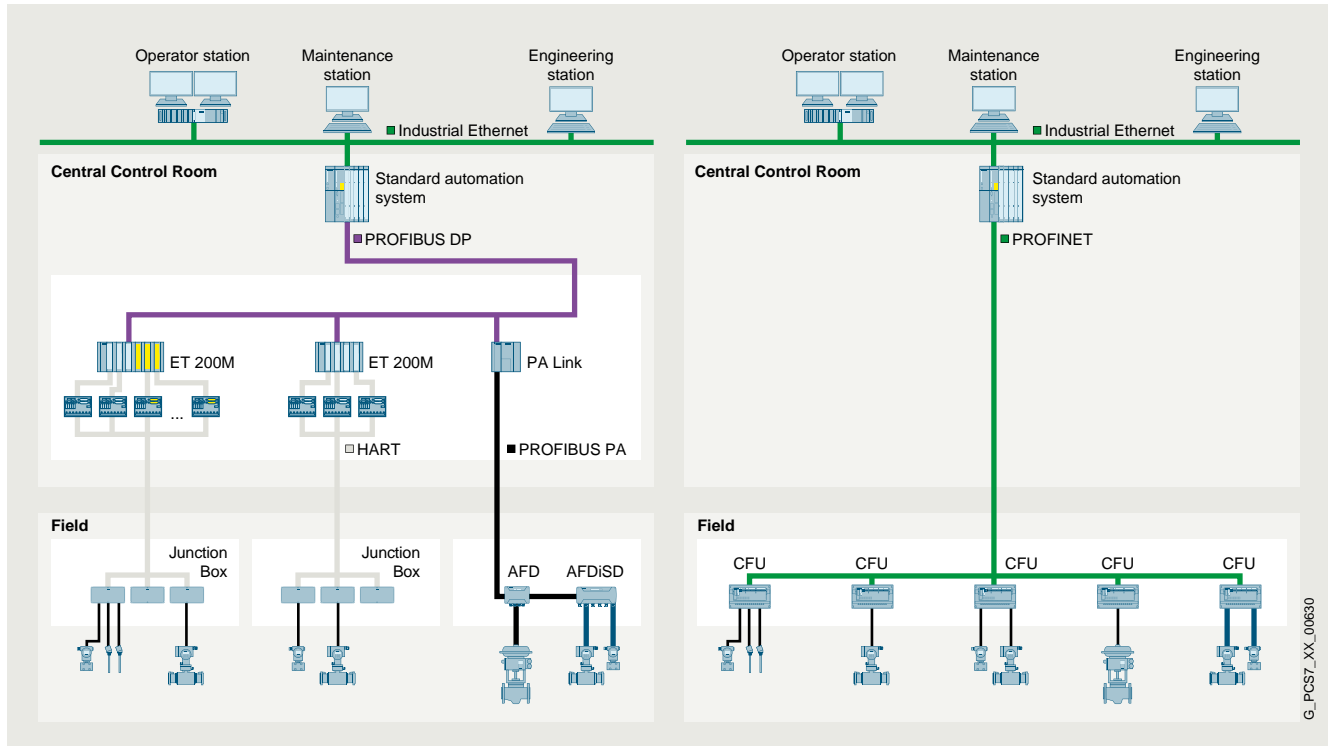

### Gateways

#### SIMATIC CFU

##### Overview

##### *SIMATIC CFU – The answer to these challenges*

##### Mode of operation

Field device connection with previous technology (left) and with SIMATIC CFU (right)

The SIMATIC Compact Field Unit (CFU) is a real game-changer in field device connection and offers you entirely new prospects regarding simplicity, flexibility and standardization. The smart field distributor is installed at the process level and is connected via PROFINET directly to the automation system to form the foundation for digitalization in the field. Utilization of digital fieldbus communication considerably simplifies device interfacing compared to conventional 4 ... 20 mA engineering.

##### Greater flexibility thanks to consistent decentralization

Distributed installation of the SIMATIC CFU means that classic control cabinets are no longer required and you can make considerable savings in cabling and the number of terminal points, as well as reducing planning and documentation overheads. The high granularity (16 I/O per SIMATIC CFU) enables flexible assignment to the higher-level controllers.

### SIMATIC CFU CIO HART edition

#### Overview

SIMATIC CFU CIO HART edition, in this case with BusAdapter, PROFINET bus cable and push-in terminals

#### **SIMATIC CFU CIO HART edition**

##### One device for all signal types

The SIMATIC CFU CIO HART is an innovative PROFINET device and offers the possibility of flexibly connecting all signal types to any channel. It is possible to process analog inputs (optionally with HART), analog outputs (optionally with HART), digital inputs and digital outputs. The corresponding signal types are configured conveniently using drag-and-drop in engineering. The SIMATIC CFU CIO HART thus offers a versatile solution for using the different signal types in your system with just one device.

16 freely configurable IO channels:

- Analog input/analog output:
  - 0-20 mA, 4-20 mA, 4-20 mA with HART
- Digital input/digital output:
  - Multiple modes available: Standard-DI, DI-Namur, DI Open-Collector
  - Counter up to 5 kHz
  - DI 24 V DC; DQ 24 V DC 0.5/2 A

#### Aluminum field enclosure

SIMATIC CFU CIO HART edition, aluminum field enclosure, open

SIMATIC CFU CIO HART edition, aluminum field enclosure, closed

The die-cast aluminum enclosure is suitable for use in zone 2/22 hazardous areas. The following are included in the enclosure scope of supply:

- 22 × M20 plastic cable glands (incl. blanking plugs)
- 35 mm DIN rail
- Rail for strain relief and shield support

The enclosure has an inspection window for LED diagnostics.

#### Ordering data

#### Article No.

##### **SIMATIC CFU CIO HART with aluminum enclosure**

Comprising:

- 1 × SIMATIC CFU CIO HART (6ES7655-5PX41-1XX0)
- 1 × aluminum enclosure with cable glands, shield busbar, shield terminals

pre-assembled and tested

**6ES7655-5PX41-1AX0**

#### Article No.

##### **SIMATIC CFU CIO HART**

- SIMATIC Compact Field Unit CIO HART edition with 16 × freely configurable channels (AI; AQ; HART; DI 24 V DC; DI NAMUR; DQ 24 V DC 0.5/2 A; Counter)
- Installation up to hazardous zone 2
  - Channel diagnostics
  - PROFINET interface
  - Use of PROFINET BusAdapter
  - Configuration in RUN (CiR)
  - Media redundancy (MRP)
  - PROFINET system redundancy (S2)
  - Temperature range -40 ... +70 °C
  - Installation on a 35 mm DIN rail

**6ES7655-5PX41-1XX0**

### SIMATIC CFU PA edition

#### Overview

SIMATIC CFU here with BusAdapter, PROFINET bus cable and push-in terminals

#### **SIMATIC CFU PA edition**

##### Plug-and-produce simplicity

Digitalization requires a digital infrastructure facilitating integrated digital communication right down to the sensors and actuators. You can use the established and proven PROFIBUS PA standard to achieve this. It is integrated into the PA edition of the SIMATIC CFU, thus combining ruggedness and easy handling with all the advantages of the PROFINET standard based on Industrial Ethernet. Connected devices are automatically addressed. The device is integrated via standardized communication profiles.

This innovative new implementation of the PROFIBUS PA concept makes it possible to combine the simplicity of a point-to-point wiring system with the scalability of digital PROFIBUS PA fieldbus communication. As with digital field devices, it is not necessary to know prior to connection whether the discrete field device is a sensor or actuator – This can be easily configured afterwards via software.

##### Combination of digital fieldbus and discrete I/Os

- 8 × digital fieldbus (PROFIBUS PA)
- 8 × digital inputs/outputs, freely configurable ( 1 x counter functionality / frequency measurement)

##### Easy to use

- Automatic addressing of PROFIBUS PA field devices
- System-supported detection and integration of PROFIBUS PA field devices into the process control system
  - Utilization of standardized PA profiles
  - Commissioning, device replacement and maintenance wizards
- Implementation of diagnostic messages according to NAMUR NE107
- Installation on a 35 mm DIN rail

#### Aluminum field enclosure

CFU PA with RJ45 and push-in terminals, aluminum field enclosure, open

SIMATIC CFU aluminum field enclosure, closed

The die-cast aluminum enclosure is suitable for use in zone 2/22 hazardous areas. The following are included in the enclosure scope of supply:

- 22 × M20 plastic cable glands (incl. blanking plugs)
- 35 mm DIN rail
- Rail for strain relief and shield support

The enclosure has an inspection window for LED diagnostics.

#### Ordering data

Article number	6ES7655-5PX11-1XX0 SIMATIC CFU PA	6ES7655-5PX11-1AX0 SIMATIC CFU PA with Alu housing
<b>General information</b>		
Product type designation	PA Bundle	
Number of channels	16	
<b>Product function</b>		
• I&M data	Yes; I&M0 to I&M4	
• Isochronous mode	No	
• The user can configure digital channels as input/output as required	Yes	
• Digital channels can be parameterized	Yes	
<b>Engineering with</b>		
• STEP 7 TIA Portal configurable/integrated from version	V17	
• STEP 7 configurable/integrated from version	V5.6 HF2 and higher	
• PCS 7 configurable/integrated from version	V9.0 SP2 and higher	
• PCS neo can be configured/integrated from version	V3.0	
• PROFIBUS from GSD version/GSD revision	- / -	
• PROFINET from GSD version/GSD revision	GSDML V2.3	
<b>Operating mode</b>		
• Counter	Yes	
<b>Installation type/mounting</b>		
Mounting	on 35 mm DIN rail, 2 spacing units wide	
Mounting position	Horizontal, vertical	Horizontal, vertical
Recommended mounting position		horizontal set up
<b>Supply voltage</b>		
Type of supply voltage	24 V DC	
Rated value (DC)	24 V	
Reverse polarity protection	Yes	
Short-circuit protection	Yes	
Redundant power supply	Yes	
<b>Mains buffering</b>		
• Mains/voltage failure stored energy time	5 ms; Bridging for field devices and communication	
<b>Input current</b>		
Current consumption (rated value)	2.5 A	
Current consumption, max.	2.55 A	
Inrush current, max.	8 A	
I <sup>2</sup> t	0.3 A <sup>2</sup> ·s	
<b>Encoder supply</b>		
Number of outputs	8	
Output voltage, min.	18.2 V	
Short-circuit protection	Yes; Electronic	
<b>Output current</b>		
• up to 60 °C, max.	2 A	
• up to 70 °C, max.	1 A	
<b>Power loss</b>		
Power loss, typ.	8.2 W; Depending on the type of BusAdapter used (typ. RJ45)	
<b>Address area</b>		
<b>Address space per station</b>		
• Address space per station, max.	1 440 byte; Dependent on configuration	
<b>Digital inputs</b>		
Number of digital inputs	8	
Source/sink input	Yes; P-reading	
Input characteristic curve in accordance with IEC 61131, type 1	Yes	
Input characteristic curve in accordance with IEC 61131, type 2	No	
Input characteristic curve in accordance with IEC 61131, type 3	Yes	
Pulse extension	No

SIMATIC CFU

### SIMATIC CFU DIQ edition

#### Overview

#### SIMATIC CFU DIQ edition

Individual, customer-specific solutions and flexible system/plant extensions are requirements that are becoming increasingly important in the process industry due to digitalization. SIMATIC CFU DIQ edition with 16 freely configurable digital IO channels offers a solution for the growing demands of distributed I/O.

SIMATIC CFU also has expansion functions for optional configuration. Two additional operating modes can be activated for selected digital inputs. "Counter" operating mode and "Frequency measurement" operating mode with a cut-off frequency of 1 kHz.

Actuator shutdown can be set for the digital outputs. The actuator shutdown of the SIMATIC CFU uses a monitoring channel (DI channel) to quickly set all digital outputs to a low digital level.

- 16 × digital inputs/outputs, freely configurable (2 x counter functionality / frequency measurement)

#### Aluminum field enclosure

SIMATIC CFU DIQ aluminum field enclosure, open

SIMATIC CFU aluminum field enclosure, closed

The die-cast aluminum enclosure is suitable for use in zone 2/22 hazardous areas. The following are included in the enclosure scope of supply:

- 22 × M20 plastic cable glands (incl. blanking plugs)
- 35 mm DIN rail
- Rail for strain relief and shield support

The enclosure has an inspection window for LED diagnostics.

SIMATIC CFU**BusAdapters****Overview**

BA 2xRJ45, 2xFC and 2xLC BusAdapter

**BusAdapters**

A BusAdapter as a separate component allows a free choice of SIMATIC CFU connection to PROFINET:

- BA 2xRJ45:  
2 electrical connections for bus cables with standard RJ45 connectors
- BA 2xFC:  
2 electrical connections for direct connection of FastConnect bus cable
- BA 2xLC:  
2 optical ports for fiber-optic cables
- BA 1xLC, 1xRJ45:  
Mixed BusAdapter 1 optical connection and 1 electrical connection standard RJ45
- BA 1xLC, 1xFC:  
Mixed BusAdapter 1 optical connection and 1 electrical connection for direct connection of FastConnect bus cable
- BA 2xRJ45 VD:  
2 electrical connections for Ethernet communication via 2-, 4- or 8-wire copper cables and distances up to 500 m

## Data enablers

**FDE Industrial Data Enabler****Overview**

The SIMATIC Field Data Enabler (FDE) portfolio enables access to data from automation and process engineering plants. The acquired data can be transmitted to IT environments for further processing. This makes it possible to make data that was previously only available at the OT level accessible to the IT level as well.

**Ordering data****Article No.****SIMATIC Field Data Enabler PN for Linux****6ES7853-5BE00-0AA0**

OPC UA server for mapping the diagnostic and asset information of a PROFINET network according to the OPC UA 30140 (PROFINET) and OPC UA 30120 (IO-Link) Companion Specifications.  
Runs under Debian 11 (arm64, x86).  
Recommended hardware:  
SIMATIC IoT2050,  
SIMATIC IPC127E;  
single license,  
software for download<sup>1)</sup>;  
email address required for delivery

### SIMATIC TDC multiprocessor control system

#### Introduction, UR6021 rack

##### Overview

SIMATIC TDC (Technology and Drives Control) is a digital automation system featuring very high computing power and the ability to process very large programs. An extensive library with approx. 300 ready-made function blocks is available for fast engineering.

##### Overview UR6021 rack

- UR6021 rack as the base component for SIMATIC TDC
- Integrated system power supply and system fan
- With high-performance 64-bit backplane bus for high-speed data exchange between the inserted modules
- Requirement for operating the CPU555

##### Ordering data

##### Article No.

##### SIMATIC TDC, rack UR6021

21 slots, VMEBUS, 8 P0 slots, replaceable fans, suitable for GDM, 5-row plug-in connector

Spare-part compatible successor of 6DD1682-0CH2

6DD1682-0CH3

##### Accessories

##### SIMATIC TDC slot cover SR51

6DD1682-0DA1

##### Spare parts

##### SIMATIC S7-400, buffer battery 3.6 V/2.3 Ah

For PS 405 4 A/10 A/20 A and PS 407 4 A/10 A/20 A

## SIMATIC TDC multiprocessor control system

**CP50M1 communications module, CP51M1 communications module****Overview CP50M1 communications module**

The CP50M1 communications module provides two PROFIBUS DP/MPI interfaces and an 8 MB interprocessor memory for inter-CPU communication. The interfaces can be used as PROFIBUS DP master, slave, as master and slave simultaneously or as MPI node.

**Overview CP51M1 communications module**

The CP51M1 communications module is an Industrial Ethernet interface module for the SIMATIC TDC automation system.

**Ordering data****Article No.****SIMATIC TDC CP 50M1 communications module****6DD1661-0AD1**

With 8 MB interprocessor memory, up to 1 MPI interface, up to 2 PROFIBUS DP interfaces

**Ordering data****Article No.****SIMATIC TDC CP51M1 communications module****6DD1661-0AE1**

For Industrial Ethernet with TCP/IP and/or UDP

**Technical specifications****Power supply**

Voltage / power supply	+5 V, 1.0 A typical
Power loss, typically	5 W
Required space / width	1 slot
Weight	0.34 kg

**Technical specifications**

Up-to-date technical specifications can be taken from the user documentation provided at the start of delivery

Required space / width	1 slot
Weight	
Connection for Industrial Ethernet	RJ45
Protocols	TCP/IP and/or UDP
Message frame lengths	also larger than 2 KB
Modes of transfer	Refresh, Handshake, Multiple and Select
Autosensing	for 10 Mbit or 100 Mbit network
Default router	adjustable

## SIMATIC control systems

### SIMATIC TDC multiprocessor control system

#### CP53M0 coupling module, SM500 DI/DQ I/O module

##### Overview

The CP53M0 coupling module allows coupling of a SIMATIC TDC system to a SIMADYN D system for fast data exchange, e.g. when expanding existing SIMADYN D systems.

##### Ordering data

##### Article No.

**SIMATIC TDC CP53M0 communications module**  
Rack coupling TDC <--> SIMADYN

**6DD1660-0BJ0**

##### Technical specifications

CP53M0 coupling module	
<b>Memory</b>	
Communication memory	SRAM, 128 KB
Communications buffer	SDRAM, 8 MB
<b>FOC interface</b>	
Number	2 (master mode) 1 (slave mode)
Data transfer rate	96 Mbit/s
Coding	5B/6B
<b>Voltage, currents</b>	
Voltages / currents	+5 V / 0.3 A 3.3 V / 0.5 A
<b>Power loss</b>	
Power loss, typically	3.1 W
<b>Dimensions</b>	
Number of slots required in rack	1
Dimensions W x H x D (in mm)	20 x 233 x 160
Weight	0.6 kg

##### Overview SM500 DI/DQ I/O module

The SM500 DI/DQ I/O module provides digital inputs and outputs.

##### Ordering data

##### Article No.

**SIMATIC TDC SM500 DI/DQ signal module**  
With 16 DQ/16 DI, 6 LEDs

**6DD1640-0AH1**

##### Technical specifications

##### Power supply

Voltage / power supply (at 25 °C)	+5 V typically 0.4 A +3.3 V typically 0.05 A
Typical power loss	3 W
Required space / width	1 slot
Weight	0.6 kg

##### Digital outputs

Number	16
Galvanic isolation	Only through optional interface modules

##### External power supply:

• Nominal voltage	24 V
• Permissible range	20.4 V to 28.8 V
• Short-term	35 V for max. 0.5 s
• Max. current consumption, without load	40mA

##### Output voltage range:

• At 0 signal, max.	3 V
• At 1 signal, min.	ext. supply voltage -2.5 V

##### Output current:

• At 0 signal, min.	- 20 µA
• At 1 signal	
- Rated value	50 mA
- Permissible range, max.	100 mA

##### Delay time

Delay time	100 µs
Max. switching frequency of the outputs with resistive load	6 kHz

##### Short-circuit protection to

• Ground	Yes
• Ext. power supply	No
Max. short-circuit current	250 mA

##### Total current of outputs (up to 60 °C)

Total current of outputs (up to 60 °C)	16 x 50mA
Limiting of inductive cut-off voltage.	External supply voltage +1 V

##### Digital inputs

Number	16
Galvanic isolation	Only through optional interface modules

##### Input voltage:

• Nominal voltage	24 V
• For 0 signal	-1 V to +6 V
• For 1 signal	+13.5 V to +33 V

##### Input current:

• At 0 signal	0 mA
• At 1 signal	3 mA
Delay time	100 µs

## SIMATIC control systems

### SIMATIC TDC multiprocessor control system

#### GlobalDataMemory

##### Overview

##### GlobalDataMemory

Data can be exchanged between all of the CPU modules in the system, over all of the networked subracks, using the memory in the GlobalDataMemory (GDM). Up to 44 subracks can be coupled in synchronism through the central memory. This means that a maximum of 836 CPU modules can be used.

# Software for SIMATIC Controllers

## Introduction

### Information on software licensing, Software Update Service

#### Overview Licensing

##### Software types

Every software subject to a license is assigned to a type. The following software types are defined:

- Engineering software
- Runtime software

For more information, see catalog section 17, page 17/13.

You can download information on license conditions under [https://mall.industry.siemens.com/legal/ww/en/terms\\_of\\_trade\\_en.pdf](https://mall.industry.siemens.com/legal/ww/en/terms_of_trade_en.pdf).

#### Overview Software Update Service

- Service for automatic dispatch of all new software versions during contract lifetime
- Reduced logistics effort thanks to automatic contract extension
- Reduced costs as updates are provided free of charge

##### Ordering

- The Software Update Service is ordered in the same way as any other product. The corresponding order number is given in the ordering information of the software product in question.
- You must own the current version of the software.
- One Software Update Service is ordered for each software license installed.
- The Software Update Service runs for 1 year from date of order.
- It is extended automatically by a further year in each case, as long as it is not canceled 3 months before it expires.
- An annual lump sum is invoiced per license.

#### Application

SIMATIC Software is continuously enhanced and improved. The **Software Update Service** (previously: software maintenance service) is the easiest way to regularly take advantage of these improvements. It ensures automatic delivery of all new software versions that are released after ordering the Software Update Service so that your software is always up to date.

The Software Update Service

- Saves time and effort:  
Once it is ordered, the Software Update Service is automatically renewed every year.
- Lowers costs:  
The service pays for itself after the first update as it costs less than an individually ordered update.
- Makes budgeting easier:  
Software expenditures can be accounted for early in the budgeting process and they are easier to write off.

#### Design

##### Scope of supply

- All new software versions that are released after ordering the Software Update Service (usually several deliveries per year)
- CD-ROM SIMATIC Customer Support Knowledge Base with FAQs, tips & tricks and downloads (several times per year).

# Software for SIMATIC Controllers

## TIA Portal

### TIA Cloud Services

#### Overview

TIA Portal Cloud enables the use of the TIA Portal software in a virtualized cloud environment. No local installation of the software is required. Local projects can be transferred to the cloud via a file share service and also loaded back.

TIA Portal Cloud includes the major versions of TIA Portal and the main option packages of these versions.

#### Licensing

TIA Portal Cloud is offered as a subscription and certificate. This increases flexibility and enables a low-cost entry compared to the classic license model.

- With the pay-per-use variant, the actual usage time is booked on an hourly basis and billed at the end of the month.
- The monthly subscription offers unlimited use within one month. The subscription is automatically renewed for a further month unless it is canceled before the end of the contract period.
- In addition to unlimited use of TIA Portal Cloud, the annual subscription provides free access to "SITRAIN access - the digital learning platform".
- The 365-day certificate is a Certificate of Contract (CoC) with a fixed term of 365 days and is not automatically renewed. A PDF with the information on how to activate the TIA Portal Cloud access is supplied.
- The 100-hour certificate is a Certificate of License (CoL) with a 100-hour credit. A PDF with the information on how to activate the TIA Portal Cloud access is supplied.

#### More information

More information is available on this at <https://support.industry.siemens.com/cs/ww/en/view/109794456>.

#### Ordering data

#### Article No.

##### TIA Cloud Services

TIA Portal software packages for use in a virtual cloud environment without local installation. Can only be ordered via SiePortal. Consignee email address required for delivery

##### TIA Portal Cloud – pay-per-use

Only available via Industry Mall. Consignee email address required for delivery.

For this service, the following T&Cs apply exclusively <https://www.siemens.com/premiumdocs>  
 (i) Documentation and Supplemental Terms for the Subscription to free accessible services of Industry Premium Portal – Basic Services,  
 (ii) Documentation and Supplemental Terms for the Subscription to the TIA Portal Cloud and  
 (iii) Universal Customer Agreement.

6ES7804-0CP41-3YA0

##### TIA Portal Cloud – monthly subscription

Only available via Industry Mall. Consignee email address required for delivery.

For this service, the following T&Cs apply exclusively <https://www.siemens.com/premiumdocs>  
 (i) Documentation and Supplemental Terms for the Subscription to free accessible services of Industry Premium Portal – Basic Services  
 (ii) Documentation and Supplemental Terms for the Subscription to the TIA Portal Cloud and  
 (iii) Universal Customer Agreement.

6ES7804-0CP41-2YA0

##### TIA Portal Cloud – annual subscription incl. SITRAIN access

Your benefit:  
 In addition to use of TIA Portal Cloud, you receive free access to SITRAIN access - the digital learning platform. Your engineering environment and know-how are always up to date, thanks to cloud technology anywhere at any time.

Consignee email address required for delivery.

The specific terms under <https://www.siemens.com/premiumdocs> apply exclusively

6ES7804-0CP41-1YA0

##### TIA Portal Cloud – 365-day certificate

You will receive a Certificate of Contract to unlock TIA Portal Cloud for 365 days, starting from the date of delivery. This subscription ends automatically.

Contents: Certificate of Contract (CoC)

Consignee email address required for delivery.

The specific terms under <https://www.siemens.com/premiumdocs> apply exclusively

# Software for SIMATIC Controllers

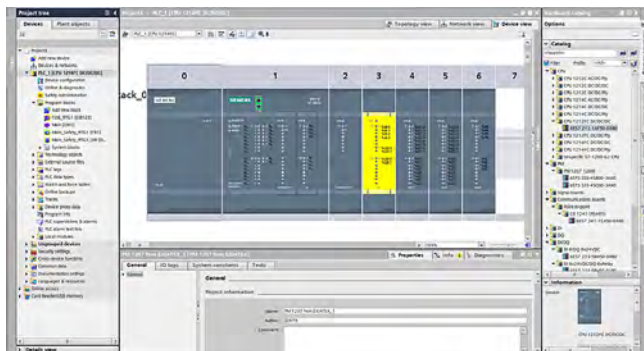

TIA Portal  
PLC programming

## STEP 7 Basic (TIA Portal)

### Overview

STEP 7 Basic V20 (TIA Portal), portal view

STEP 7 Basic V20 (TIA Portal), device view: Configuring and parameterizing in realistic photo-quality representation

### **Intuitive, efficient and future-oriented - the engineering software for programming SIMATIC Controllers**

SIMATIC STEP 7 Basic V20 is the engineering system for the SIMATIC S7-1200.

STEP 7 Basic V20 is based on the Totally Integrated Automation Portal (TIA Portal) central engineering framework which offers users a uniform, efficient and intuitive solution to all automation tasks.

### **New with V20**

- Configuration and programming of the new SIMATIC S7-1200 G2 controller generation.
- STEP 7 Safety Basic V20 for configuration and programming of the fail-safe S7-1200 controllers is integrated.
- SIMATIC source documents: New export format for LAD blocks; LAD blocks, data blocks, and PLC data types (UDT) can be exported in the easy-to-read SIMATIC SD text format. This format has the following advantages, for example: Compatibility and versioning capability, support integration with popular version control systems such as Git, automation of engineering workflows, use of external comparison tools
- Font setting; Setting the font now applies to the general text boxes of the block programming: Block title and comment, and network title, and comment. The font and font size for the program code of SCL blocks can now also be specified. By selecting a monospace font, program code or comments can now be better structured.
- Sorting in the PLC variable table; In the filter view of the PLC variable table, sorting is now performed on the alphanumeric principle. In the normal view of the PLC variable table, the lexicographical principle is retained.

### **Licensing**

- STEP 7 Basic V20 is supplied with a floating license. The floating license allows the software to be used on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- With the STEP 7 Basic V20 license, the following products can also be used:
  - STEP 7 Safety Basic V20 for configuration and programming of the fail-safe S7-1200 controllers
  - S7-PLCSIM V20 for simulation of S7-1200 controllers
  - WinCC Unified Basic V20 for configuration of SIMATIC Unified Basic Panels
- Existing STEP 7 Basic licenses of versions V11-19 can be upgraded to V20. This requires an upgrade license.
- The STEP 7 Basic V20 license can be upgraded to a STEP 7 Professional V20 license with a PowerPack.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under <http://www.siemens.com/simatic-licenses>.

### STEP 7 Basic (TIA Portal)

#### Technical specifications

STEP 7 Basic V20 (TIA Portal)	
Type of license	Floating license
Software class	A
Current version	V20
Target system	SIMATIC S7-1200, S7-1200 G2
Operating systems	Windows 10 (64-bit) <ul style="list-style-type: none"> <li>• Windows 10 Home Version 22H2</li> <li>• Windows 10 Professional Version 22H2</li> <li>• Windows 10 Enterprise Version 22H2</li> <li>• Windows 10 Enterprise 2019 LTSC &amp; 2021 LTSC</li> </ul> Windows 11 (64-bit) <ul style="list-style-type: none"> <li>• Windows 11 Home Version 22H2 &amp; 23H2</li> <li>• Windows 11 Professional Version 22H2 &amp; 23H2</li> <li>• Windows 11 Enterprise 22H2 &amp; 23H2</li> </ul> Windows Server (64-bit) <ul style="list-style-type: none"> <li>• Windows Server 2019 Standard (full installation)</li> <li>• Windows Server 2022 Standard (full installation)</li> </ul>
<b>Recommended PC hardware</b>	
Computer	SIMATIC IPC MD-57A (successor of the Field PG M6) or comparable PC
Processor	Intel® Core™ i5 - 12600HE processor (16 threads, 18 MB cache, up to 4.50 GHz)
RAM	16 GB or more (min. 8 GB, 32 GB for large projects)
Hard disk	SSD with at least 50 GB storage space available
Network	1 Gbit (for multi-user)
Screen	15.6" full HD display (1920 x 1080 or higher)

#### Compatibility with other products and operating systems

STEP 7 V20 can be installed on a PC in parallel with other versions of STEP 7 V13 SP2 to V19, STEP 7 V5.6 or higher. More information on compatibility is available at <https://support.industry.siemens.com/cs/ww/en/view/64847781>

As of TIA Portal project version V13 SP1, projects can be directly upgraded to V20. Upgrading of projects from previous project versions (V11 ... V13) is carried out on the basis of the TIA Portal products (e.g. STEP 7) used in the project in version V13 SP1 or V13 SP2 (latest update recommended).

#### Important note

TIA Portal project versions V13 SP1... V19 are upgraded with TIA Portal V20 to the project version V20. If you need to edit a TIA Portal project version V13 SP1... V19, we recommend an additional installation of the corresponding software to TIA Portal V20. The license purchased for V20 is also valid for all older TIA Portal versions.

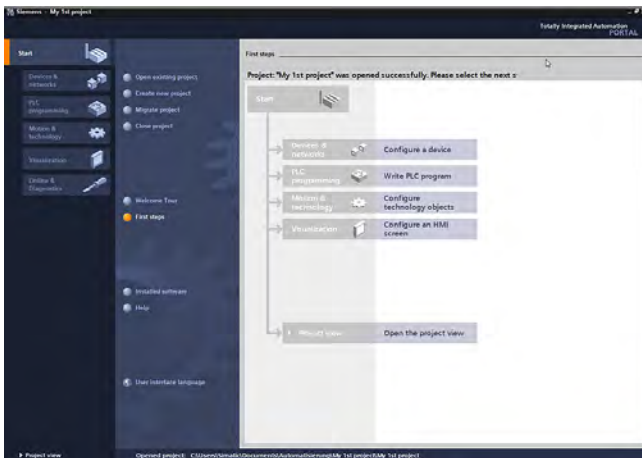

Program code and hardware configuration from STEP 7 V5.4 SP5 or higher can be migrated directly to a TIA Portal V20 project with STEP 7 V20.

# Software for SIMATIC Controllers

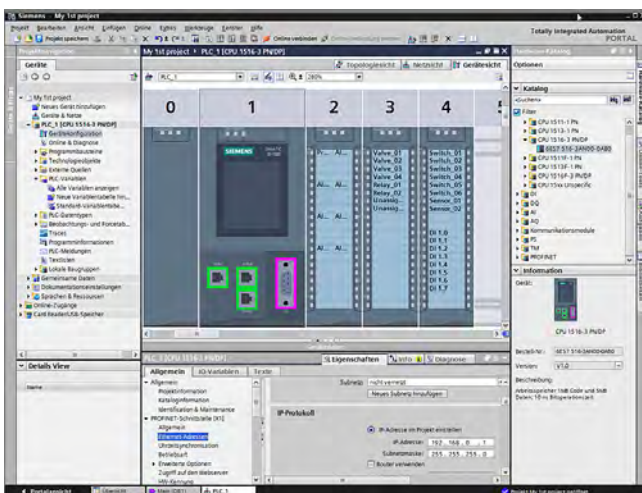

TIA Portal  
PLC programming

## STEP 7 Professional (TIA Portal)

### Overview

STEP 7 Professional V20 (TIA Portal), portal view

STEP 7 Professional V20 (TIA Portal), device view: Configuring and parameterizing in realistic photo-quality representation

### **Intuitive, efficient and future-oriented - the engineering software for programming the SIMATIC Controllers**

SIMATIC STEP 7 Professional V20 is the engineering system for the SIMATIC S7-1200, S7-1500, S7-300, S7-400 Controllers, WinAC and Software Controllers.

STEP 7 V20 is based on the Totally Integrated Automation Portal (TIA Portal) central engineering framework which offers users a uniform, efficient and intuitive solution to all automation tasks.

### **New in V20**

- Configuration and programming of the new SIMATIC S7-1200 G2 controller generation
- STEP 7 Safety Basic V20 for configuration and programming of the fail-safe S7-1200 controllers is integrated
- SIMATIC Source Documents: New export format for LAD blocks, data blocks, and PLC data types (UDT) can be exported in an easy-to-read SIMATIC SD text format. This format has the following advantages, for example: Compatibility and versioning capability, support integration with popular version control systems such as Git, automation of engineering workflows, use of external comparison tools
- Named value data types (S7-1500):
  - Online monitoring: Named value data types can now be monitored ONLINE in code and data blocks, as well as in monitoring and force tables.
  - Use as types in libraries: Named value data types can be used as types in global libraries and project libraries.
  - Transferring namespace to subordinate elements: If the namespace of a software unit is changed, the change can now be transferred to subordinate named value data types. The "Apply namespace to underlying elements" button is available for this purpose.
  - Use in safety programs: The use of named value data types in safety programs is possible. From V20 onward, use in know-how-protected safety programs is also supported.
  - Block interface as text: Named value data types can now be used in the text block interface of an SCL device. Example: `myInt: nvtTrafficLight := nvtTrafficLight#GREEN;`
  - TIA Portal Openness: Named value data types can be exported and imported via the TIA Portal Openness interface.
- Nesting depth for structures (S7-1500): For CPUs of the S7-1500 series with firmware  $\geq$  V4.0, the nesting depth has been extended for the following elements:
  - PLC data types, variables of data type STRUCT, variables of data type ARRAY of STRUCT / ARRAY of UDT. Previously, the maximum nesting depth was 8 elements. Now up to 26 elements can be nested inside each other. An ARRAY of STRUCT/UDT requires 3 hierarchy levels each. If you use these data types, the maximum nesting depth is reduced accordingly.
- Font setting
  - Setting the font now applies to the general text boxes of the block programming: Block title and comment, and network title, and comment. The font and font size for the program code of SCL blocks can now also be specified. By selecting a monospace font, program code or comments can now be better structured.
- System data type ResolvedSymbol available for additional instructions (S7-1500):
  - Various instructions provide an extended range of functions. In addition to the VARIANT data type, the input parameter can also be supplied with a variable of the system data type ResolvedSymbol. The following instructions have been extended:

## Software for SIMATIC Controllers

TIA Portal

PLC programming

### STEP 7 Professional (TIA Portal)

#### Overview

- CountOfElements (LAD, FBD, IL/STL, SCL)
- IS\_ARRAY (LAD, FBD, IL/STL, SCL)
- TypeOfElements (SCL)
- Sorting in the PLC variable table:  
In the filter view of the PLC variable table, sorting is now performed on the alphanumeric principle. In the normal view of the PLC variable table, the lexicographical principle is retained.
- Changed loading behavior for software units:  
The loading behavior of software units has been changed so that individual software units can now be loaded more easily, independently of other software units.
- Loading with synchronization (S7-1500 R/H):  
S7-1500 R/H CPUS (firmware  $\geq$  V2.6) newly added to the project in V20 now offers automatic synchronization during loading. If it is discovered during loading that a project has been modified in the meantime by another user under Team Engineering, synchronization of the data to be loaded is automatically suggested. This ensures consistency within the project being worked on jointly and prevents unwanted overwrites
- Trace:
  - Named value data types in traces:  
Named value data types can now be read directly from the time diagram. When named value data types are used in the recording, the values of the corresponding base data type are displayed.
  - Recording as a binary file for long-term trace and long-term project trace:  
The recording is saved to a DAT file instead of to a CSV file.
  - Recording of events of technology objects in the trace recording:  
Events in the trace recording can now be included that occur on a Motion Control technology object V9.0 or later during recording. The data is stored in a CSV file for analysis.
  - Cross-project trace:  
Values from multiple projects can be recorded using a PN/PN coupler.
- Design of the innovative S7-1500 CPUs (higher performance and more memory).
- Wide range of extensions for Motion Control and T-CPUs, in the areas axis functions, synchronization functions, kinematics functions, and motion interpreters.
- Function extensions for TIA Portal Openness

#### Licenses

- STEP 7 Professional V20 is supplied with a STEP 7 Professional V20 floating license. The floating license allows the software to be used on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- With the STEP 7 Professional V20 license, the following products can also be used:
  - STEP 7 Safety Basic V20 for configuration and programming of the fail-safe S7-1200 controllers
  - S7-PLCSIM V20 for the simulation of S7-1200 and S7-1500 controllers
  - WinCC Unified Basic V20 for configuration of SIMATIC Unified Basic Panels
- Existing STEP 7 Professional licenses of versions V11-19 can be upgraded to V20. This requires an upgrade license.
- The user receives a combo license when upgrading from STEP 7 V5.x. The combo license enables engineering to be performed both on the STEP 7 V5.x and the STEP 7 V20 platform.
- The STEP 7 Basic V20 license can be upgraded to a STEP 7 Professional V20 license with a PowerPack.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under <http://www.siemens.com/simatic-licenses>.

PLC programming

### STEP 7 Professional (TIA Portal)

#### Technical specifications

STEP 7 Professional V20 (TIA Portal)	
Type of license	Floating license
Software class	A
Current version	V20
Target system	SIMATIC S7-1200, S7-1200 G2, S7-1500, S7-300, S7-400, WinAC, Software Controller
Operating systems	Windows 10 (64-bit) <ul style="list-style-type: none"> <li>• Windows 10 Professional Version 22H2</li> <li>• Windows 10 Enterprise Version 22H2</li> <li>• Windows 10 Enterprise 2019 LTSC &amp; 2021 LTSC</li> </ul> Windows 11 (64-bit) <ul style="list-style-type: none"> <li>• Windows 11 Professional Version 22H2 &amp; 23H2</li> <li>• Windows 11 Enterprise Version 22H2 &amp; 23H2</li> </ul> Windows Server (64-bit) <ul style="list-style-type: none"> <li>• Windows Server 2019 Standard (full installation)</li> <li>• Windows Server 2022 Standard (full installation)</li> </ul>
Recommended PC hardware	
Computer	SIMATIC IPC MD-57A (successor of the Field PG M6) or comparable PC
Processor	Intel® Core™ i5 -12600HE processor (16 threads, 18 MB cache, up to 4.50 GHz)
RAM	16 GB or more (min. 8 GB, 32 GB for large projects)
Hard disk	SSD with at least 50 GB storage space available
Network	1 Gbit (for multi-user)
Screen	15.6" full HD display (1920 x 1080 or higher)

#### Compatibility with other products and operating systems

STEP 7 V20 can be installed on a PC in parallel with other versions of STEP 7 V13 SP2 to V19 and STEP 7 V5.6. More information on compatibility is available at <https://www.siemens.com/compatool>

As of TIA Portal project version V13 SP1, projects can be directly upgraded to V20. Upgrading of projects from previous project versions (V11 ... V13) is carried out on the basis of the TIA Portal products (e.g. STEP 7) used in the project in version V13 SP1 or V13 SP2 (latest update recommended).

#### Important note

TIA Portal project versions V13 SP1... V19 are upgraded with TIA Portal V20 to the project version V20. If you need to edit a TIA Portal project version V13 SP1... V19, we recommend an additional installation of the corresponding software to TIA Portal V20. The license purchased for V20 is also valid for all older TIA Portal versions.

Program code and hardware configuration from STEP 7 V5.4 SP5 or higher can be migrated directly to a TIA Portal V20 project with STEP 7 V20.

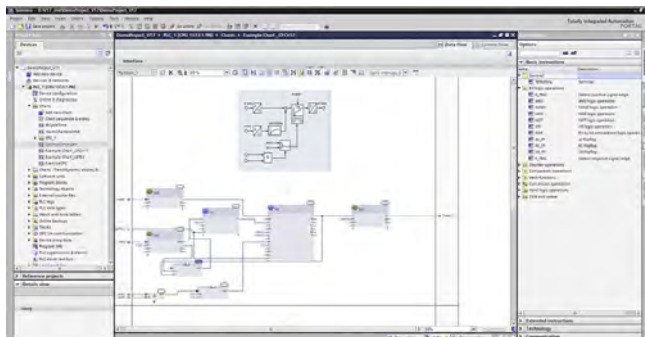

## Software for SIMATIC Controllers

TIA Portal

PLC programming

### STEP 7 (TIA Portal) options > SIMATIC STEP 7 CFC (TIA Portal)

#### Overview

- Creation of automation programs by drawing a technology chart
- Minimized outlay and reduced error susceptibility due to the interconnection of ready-made blocks
- Optimal integration in the TIA Portal automation world
- Released for the standard, T, TF and R/H CPUs of the SIMATIC S7-1500 automation system
- For more information on the supported hardware, see <https://support.industry.siemens.com/cs/ww/en/view/109971773>.

#### Licensing

- SIMATIC STEP 7 CFC requires an engineering license and a runtime license for each CPU.
- Engineering license: For configuration of CFC charts, a license key needs to be installed on the PC.
- Runtime licenses: A license key is required for each PLC. Depending on the number of instance data blocks created during configuration with CFC, a limited or unlimited license is required:
  - A limited license allows a limited number of instance DBs to be created and loaded into the PLC.
  - With an unlimited license, any number of instance DBs can be created and loaded.

Can be used for	Graphical creation, interconnection and parameterization of (preconfigured) blocks and functions
Marketing message	Simply interconnect and configure instead of programming!
Advantages	<ul style="list-style-type: none"> <li>• Can be used to optimum effect even during the design phase</li> <li>• Reduced configuration effort thanks to graphical interconnection</li> <li>• High degree of reusability of charts that have already been created</li> <li>• Quick and easy familiarization</li> <li>• Quick and transparent interconnection of preconfigured functions</li> <li>• Technological creation of the program as a whole</li> <li>• Clear representation of control loop structures</li> <li>• Comment fields with texts and images</li> <li>• Short commissioning time</li> </ul>
Sectors	<ul style="list-style-type: none"> <li>• Automobile engineering</li> <li>• Chemicals industry</li> <li>• Power engineering and supply</li> <li>• Rubber and plastics processing machines</li> <li>• Metalworking machines</li> <li>• Food and beverage machines</li> <li>• Petrochemicals</li> <li>• Rolling mills</li> <li>• Water industry</li> <li>• Coilers</li> </ul>

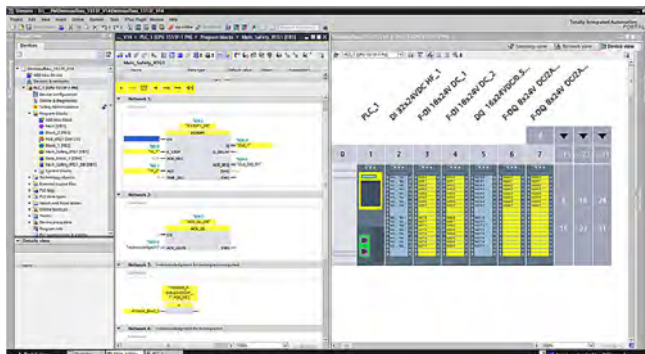

<b>Target systems</b>	
Can be used in	S7-1500
<b>System requirements</b>	
Operating system	Windows 10 (64-bit) <ul style="list-style-type: none"> <li>• Windows 10 Enterprise 2019 LTSC</li> <li>• Windows 11 (64-bit)</li> <li>• Windows 11 Enterprise 23H2</li> </ul> Windows Server (64-bit) <ul style="list-style-type: none"> <li>• Windows Server 2019 Standard (full installation)</li> <li>• Windows Server 2022 Standard (full installation)</li> </ul>
Required software	SIMATIC STEP 7 V20 or higher
<b>Properties</b>	
Monitoring tags	Yes
Controlling tags	Yes
Single-step processing	-
Integration in CFC	Yes
<b>Program runtimes</b>	
With S7-1500 (typical)	Depending on the interconnected blocks
<b>Supported standards</b>	
IEC 61131-3	Based on the IEC standard
Status of PLCopen activities	-
<b>Available versions/licenses</b>	
Floating license	<ul style="list-style-type: none"> <li>• 1 CD</li> <li>• 1 license key memory stick</li> </ul>

## Software for SIMATIC Controllers

TIA Portal  
PLC programming

### STEP 7 (TIA Portal) options > STEP 7 Safety (TIA Portal)

#### Overview

STEP 7 Safety Advanced, configuration and programming

- For creating safety-related programs on the STEP 7 user interface
- For seamless and easy to use integration of safety-related functions into the standard automation
- All the required configuration and programming tools are integrated into the STEP 7 user interface and utilize a common project structure
- STEP 7 Safety Basic for parameter assignment and programming of the fail-safe S7-1200 Basic Controller. Included in STEP 7 license (no separate Safety license required)
- STEP 7 Safety Advanced option package for all fail-safe TIA SIMATIC controller classes (S7-1200, S7-1500, S7-1500 Software Controller, S7-1500V, S7-300, S7-400, WinAC)

#### Licensing

- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- STEP 7 Safety Basic is a subset of STEP 7 Safety Advanced for programming the fail-safe S7-1200 F Basic Controller.
- Combo licenses allow you to choose between programming with the predecessor product S7 Distributed Safety and STEP 7 Safety Advanced.
- An upgrade to a combo license is offered for the latest version of S7 Distributed Safety.
- Software Update Service (SUS) contracts can be concluded for STEP 7 Safety Advanced.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your software licenses with the Automation License Manager under <http://www.siemens.com/simatic-licenses>.

#### Ordering data

#### Article No.

##### STEP 7 Safety Advanced V20

###### Task:

Engineering tool for configuring and programming fail-safe user programs for SIMATIC S7-1200 FC, S7-1500F, S7-1500F Software Controller, S7-300F, S7-400F, WinAC RTX F, ET 200SP F Controller and the fail-safe I/O ET 200SP, ET 200MP, ET 200S, ET 200M, ET 200ISP, ET 200pro and ET 200eco

###### Requirement:

STEP 7 Professional V20

###### Note:

As of TIA Portal V16, the SIMATIC STEP 7 Safety software is an integral component of the SIMATIC STEP 7 product setup. The functionality of SIMATIC STEP 7 Safety is activated by means of the license key supplied in each case.

Floating license for 1 user;  
license key on USB flash drive

**6ES7833-1FA24-0YA5**

Floating license for 1 user,  
license key for download<sup>2)</sup>;  
Email address required for delivery

**6ES7833-1FA24-0YH5**

##### STEP 7 Safety Advanced V20 Combo

Delivery includes STEP 7 Safety Advanced V20 and S7 Distributed Safety V5.4 SP5 Update 2

Floating combo license for 1 user;  
software and documentation on DVD;  
license key on USB flash drive

**6ES7833-1FC24-0YA5**

Floating combo license for 1 user;  
software, documentation and license key for download<sup>2)</sup>;  
Email address required for delivery

**6ES7833-1FC24-0YH5**

##### Software Update Service

Software Update Service (Standard Edition)<sup>1)</sup>

The delivery is implemented according to the number of ordered SUS products (e.g. 10 upgrade packages with 10 DVDs, 10 USB flash drives, etc.). Requires the current software version.

**6ES7833-1FC00-0YX2**

Software Update Service (Compact Edition)<sup>1)</sup>

The delivery items are combined. For several contracts, only 1 package with 1 data storage medium set, 1 USB flash drive with the corresponding number of licenses and the corresponding number of CoLs will be supplied. The deliveries that are to be grouped together must be ordered as a single item. Requires the current software version.

**6ES7833-1FC00-0YM2**

Minimum order quantity: 3 units

Software Update Service (Download)<sup>1)</sup>

Requires the current software version.

**6ES7833-1FC00-0YY0**

Email address required for delivery

<sup>1)</sup> For more information on the Software Update Service, see page 12/ 2.

<sup>2)</sup> Up-to-date information and download availability can be found under <http://www.siemens.com/tia-online-software-delivery>.

## Software for SIMATIC Controllers

TIA Portal  
PLC programming

### STEP 7 (TIA Portal) options > S7-PLCSIM Advanced

#### Overview

With SIMATIC S7-PLCSIM Advanced, digital twins can be used for simulation of S7-1500 and ET 200SP controllers and for extensive function simulation.

The digital twins can also be tested and validated in conjunction with a plant/machine. An extensive API is available for interfacing plant/machine simulations.

#### Highlights of SIMATIC S7-PLCSIM Advanced V7.0

##### New CPU types

- All new S7-1500 PLC article numbers for TIA V20/FW V4.0 are supported.

##### Compatibility

S7-PLCSIM Advanced now supports TIA Portal projects of versions V14 to V20 and CPU firmware versions V1.8 – V4.0.

The user interface of S7-PLCSIM V19 is also intended for use with S7-PLCSIM Advanced V6.0.

##### Licensing

- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license). For each license, the use of two simultaneously started S7-PLCSIM Advanced instances is permitted.
- An upgrade to version 7.0 is offered for users of the previous versions 1.0/2.x/3.0/4.x/5.0/6.0.
- In addition, it is possible to purchase the software as an annual subscription.
- It is possible to conclude Software Update Service (SUS) contracts.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under <http://www.siemens.com/simatic-licenses>.

### STEP 7 (TIA Portal) options > S7-PLCSIM Advanced

#### Technical specifications

##### *Minimum requirements for use*

Hardware / software	Requirements
Processor	<ul style="list-style-type: none"> <li>• One logical Intel Core™ i7 6th generation core for each started instance</li> <li>• At least one additional core for the operating system</li> <li>• At least one additional core for additional active applications</li> </ul>
RAM	<ul style="list-style-type: none"> <li>• 1 GB for each started instance</li> <li>• At least 4 GB for the Windows operating system</li> <li>• Additional RAM work memory according to the requirements of the remaining active applications</li> </ul>
Free hard disk space	5 GB
Operating systems (64-bit version)	As TIA Portal
Screen resolution	min. 1024 x 768

##### Compatibility with other products

- S7-PLCSIM Advanced V7.0 and S7-PLCSIM V20 can be installed and operated on the same PC or the same virtual machine. Communication between the two applications cannot be simulated.
- Compatible with TIA Portal projects from versions V14 to V20
- Support of the CPU firmware versions V1.8 to V4.0

## Software for SIMATIC Controllers

TIA Portal

PLC programming

### STEP 7 (TIA Portal) options > ODK 1500S

#### Overview

- For developing dynamically loadable function libraries for the S7-1500 Software Controllers and S7-1500 Advanced Controllers CPU 1518 MFP and PLCSIM Advanced:
  - Implementation of function libraries for the SIMATIC S7-1500 Software Controllers that are executed under Windows with the high-level languages C/C++, C# and VB
  - Implementation of function libraries for the PLCSIM Advanced that are executed under Windows with the high-level languages C/C++
  - Implementation of function libraries that are executed in real-time in the context of the user program of the CPU with the high-level language C++
  - Implementation of applications for the C++ runtime of the CPU 1518 MFP
- "Eclipse" development environment for real-time function libraries in the CPU user program and applications for the C++ runtime in the scope of delivery.
- Development of library functions under Windows with MS Visual Studio (optional)
- Easy introduction to development by using basic projects via templates
- Automatic creation of function blocks for calling the library functions
- Simple integration of the function blocks into STEP 7 by importing.
- Simple use of the library functions in the PLC without specific high-level language know-how.

#### Licensing

- ODK 1500S is supplied with a floating license. The floating license allows installation of the software on any number of computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously.
- The integrated development environment Eclipse, required for developing real-time libraries, is included in the scope of supply of ODK 1500S as well as templates for Visual Studio.
- SIMATIC ODK 1500S is available as a standalone product or in a bundle with SIMATIC Target 1500S™ for Simulink®.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this <http://www.siemens.com/simatic-licenses>.

Consignee email address required for delivery

<sup>1)</sup> Up-to-date information and download availability can be found at <http://www.siemens.com/tia-online-software-delivery>.

#### Technical specifications

##### System requirements

The SIMATIC ODK 1500S can be used on PC platforms with the following requirements:

- Operating systems Windows 7/8.1/10
- Min. 3 GB hard disk memory
- Min. 4 GB work memory
- Mouse, keyboard, monitor

## Software for SIMATIC Controllers

TIA Portal

PLC programming

### STEP 7 (TIA Portal) options > SIMATIC Target for Simulink

#### Overview

SIMATIC Target™ is an add-on for the Simulink® software from The MathWorks. This makes it possible to also use model-based design with MATLAB® and Simulink for SIMATIC S7-1500 Controllers and Industrial Edge from Siemens. For this purpose, executable code for all ODK-compatible S7-1500 Controllers (S7-1500 Software Controllers, ET 200SP Open Controllers, CPU 1518 ODK/MFP and PLCSIM Advanced as of V3.0) or the LiveTwin Edge app is generated directly from Simulink via SIMATIC Target.

#### New with V6.0

- Support for Simulink External Mode for the LiveTwin Edge app: This allows the model behavior to be observed directly on the runtime. This enables a comparison of model behavior between Simulink simulation and real-time execution on LiveTwin. In addition, External Mode allows module parameters to be adjusted directly in the runtime, thus directly influencing the runtime behavior of the model.
- "Download in RUN" also for Simulink models: The handling of the Load and Unload ODK blocks is directly included in the generated PLC blocks. This eliminates the need for a RUN/STOP transition to run the updated model in an S7-1500.
- The web visualization of the Simulink model is now based on the new PLC Web API: This means that additional DBs are no longer created in the user program for the website. In addition, no special system function calls are required. Web visualization is also possible for up to four different Simulink models simultaneously.
- Support of TIA Portal Multiuser: Code generation from a Simulink model can now be done directly in a Local Session of a TIA Portal Multiuser project.

#### Licensing

- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- SIMATIC Target™ for Simulink® V6.0 is available as a standalone product or in a bundle with the SIMATIC S7-1500 Software Controller Open Development Kit.
- An upgrade to latest versions is available for previous versions

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under <http://www.siemens.com/simatic-licenses>.

PLC programming

### STEP 7 (TIA Portal) options > SIMATIC Target for Simulink

#### Technical specifications

##### Requirements at the MATLAB end

MATLAB 2019b (64-bit) or more recent version	<ul style="list-style-type: none"> <li>• MATLAB 9.13</li> <li>• MATLAB Coder 5.5</li> <li>• Simulink 10.6</li> <li>• Simulink Coder 9.8</li> <li>• Embedded Coder 7.9 (optional)</li> <li>• Stateflow 10.7 (optional)</li> </ul>
--	--

##### Requirements at the SIMATIC end

SIMATIC ODK 1500S V2.0/V2.5	Must be installed together with SIMATIC Target, MATLAB and Simulink on the same PC
STEP 7 Professional as of V15.1	For configuration of the S7-1500 CPUs, not essentially on the same PC as the SIMATIC Target
Supported CPUs	<ul style="list-style-type: none"> <li>• CPU 1507S(F) with firmware V2.0 or higher</li> <li>• CPU 1515SP PC (F) with firmware V2.0 or higher</li> <li>• CPU 1518 (F) ODK/MFP</li> <li>• S7-PLCSIM Advanced as of V3.0</li> </ul>

## Software for SIMATIC Controllers

TIA Portal

PLC programming

### STEP 7 (TIA Portal) options > SIMATIC Safe Kinematics

#### Overview

SIMATIC Safe Kinematics enables safe monitoring of the movement of predefined kinematics with up to 12 interpolating axes in multidimensional space. The following monitoring functions are available:

- **Safe Speed Monitor:**  
Safe speed monitoring can be used to monitor the Cartesian speed of individual points in the kinematics, e.g. at the tool center point or at joints.
- **Safe Zone Monitor:**  
Safe zone monitoring is used to monitor the position of the kinematics in the Cartesian space, e.g. to limit the traversing range of the kinematics or to monitor areas that can be entered by operating personnel.
- **Safe Orientation Monitor:**  
Safe orientation monitoring enables monitoring of the orientation of the flange on user-defined serial kinematics, e.g. a workpiece may only be machined if the tool is perpendicular to the floor.

The following kinematics are supported:

- Cartesian portal
- Roller picker (vertical and horizontal)
- Delta pickers
- SCARA
- Articulated arm
- User-defined serial kinematics

SIMATIC Safe Kinematics includes an engineering option package for the TIA Portal and must be subsequently installed via a setup in TIA Portal V20.

The product contains a fail-safe block library that can be integrated in the STEP 7 Safety Advanced programming environment and can be connected on the input and output side.

SIMATIC Safe Kinematics supports the following control platforms:

- S7-1500 F-CPU
- Open Controller
- SIMATIC Drive Controller
- Software Controller
- SINUMERIK ONE

#### System requirements

- SIMATIC STEP 7 Professional (TIA Portal) V20
- STEP 7 Safety Advanced V20

SIMATIC Safe Kinematics requires as a subordinate drive system SINAMICS S120 with CU320-2 as of firmware V5.1 with Safety Integrated Advanced Functions.

#### Licensing

- The software is supplied with a Single Runtime License. A license is required for each F-CPU on which SIMATIC Safe Kinematics runs.
- The software can only be ordered via Online Software Delivery (OSD). The download contains one license certificate and the TIA Portal installation setup for SIMATIC Safe Kinematics.
- The following additional licenses are required to use SIMATIC Safe Kinematics:
  - SIMATIC STEP 7 Professional (TIA Portal) V20
  - STEP 7 Safety Advanced V20
  - SINAMICS Safety Integrated Advanced Functions (for each monitored axis of the kinematics)

#### Ordering data

#### Article No.

##### SIMATIC Safe Kinematics

##### SIMATIC Safe Kinematics V19 single Runtime license download<sup>1)</sup>

Includes license certificate and installation setup for the block library for safe monitoring of the movement of predefined kinematics with up to 12 interpolating axes. Runs on S7-1500 (T)F-CPU (CPU 1516 FW 4.0 or higher, CPU 1517, CPU 1518) Open Controller, Drive Controller (1507D TF), Software Controller and SINUMERIK ONE with TIA Portal V20 and STEP 7 Safety Advanced V20  
Consignee email address required for delivery

## Software for SIMATIC Controllers

TIA Portal

PLC programming

### STEP 7 (TIA Portal) options > SIMATIC Kinematics Operate

#### Overview

With SIMATIC Kinematics Operate, kinematics can be configured, programmed and operated with up to 6 positioning axes with synchronous point-to-point control (sPTP). The Plug & Play solution comprises a convenient user interface for programming, diagnostics and operation of the kinematics via HMI.

The SIMATIC Kinematics Operate V1.0 software solution consists of a TIA Portal project and an HMI project for TIA Portal as of V15.0.

SIMATIC Kinematics Operate V1.0 contains the following HMI configuration functions:

- Configuration of kinematics and additional axes; 6 axes are available in total for multi-axis positioning with sPTP. The axes not used in the multi-axis group can be created as independent single axes.
- Axis configuration; the dynamic parameters, the axis limits and the homing of the different axes can be configured.
- Tag and I/O configuration; Bool and Real tags can be created. Logical step enabling conditions consisting of multiple inputs and tags can be combined into one Boolean tag. Digital inputs and outputs can be configured via the I/O address.
- Points table; By means of input or teaching of axis positions, path points can be defined that can be used for programming the kinematics.
- Zone configuration; multiple restricted zones can be created in the workspace as protection zones. These are checked cyclically against both the target coordinates and the current axis values. A violation leads to a stop response of the axes

The program editor offers the following functions:

- Synchronous point-to-point commands; all axes are traversed synchronously with multi-axis positioning. The destination is specified either using the points table or by direct input with optional blending.
- Single axis commands; the additional axes can be homed, positioned, torque-limited or speed-controlled.
- Wait functions; Step enabling conditions, based on a digital input, a Bool tag or a wait time, can be programmed.
- Calculate tags and assign values; digital outputs can be set via an input mask. In addition, floating point tags can be calculated, incremented or assigned absolute values.
- Program control structures; labels, branches, loops and parallel sequences allow flexible program design.

SIMATIC Kinematics Operate can be run on SIMATIC S7-1500 CPU S7-1511T-1 PN. Alternatively, SIMATIC S7-1500 CPU S7-1512C-1 PN or a faster CPU can be used. Please refer to the operating instructions for details on scalability and the configuration limits.

#### System requirements

- SIMATIC STEP 7 Professional (TIA Portal) as of V15
- SIMATIC WinCC Advanced ES as of V15

#### Licensing

- SIMATIC Kinematics Operate is available as Runtime option for TIA Portal. A license is required for each CPU on which SIMATIC Kinematics Operate runs.
- The product can only be ordered via Online Software Delivery (OSD). The download contains the license certificate. The software is downloaded via the Siemens Industry Online Support Portal.
- The following additional licenses are required to use SIMATIC Safe Kinematics:
  - SIMATIC STEP 7 Professional (TIA Portal) as of V15
  - SIMATIC WinCC Advanced ES as of V15

## Software for SIMATIC Controllers

TIA Portal

PLC programming

### STEP 7 (TIA Portal) options > SIMATIC Motion Interpreter

#### Overview

The SIMATIC Motion Interpreter of the CPU S7-1500T can be used to create motion tasks for single axes, coordinated axes, and kinematics with up to six interpolating axes. The motion tasks that you want the Interpreter to perform are contained in an Interpreter program, which is part of the Motion Interpreter. The Interpreter program and the cyclic user program of the machine are separate from each other. This means that the technological production process can be implemented without interfering with the cyclical user program of the machine and can be changed during ongoing machine operation.

The Interpreter program can be validated and simulated with an integrated digital twin independently of the user program, enabling parallel development of a customer machine and a fast time-to-market.

#### Requirements

- TIA Portal V19 with STEP 7 Professional
- SIMATIC T-CPU (technology CPU) from FW version V3.1

#### Licenses

The SIMATIC Motion Interpreter is a product subject to licensing. A Runtime license is required for each technology CPU.

#### Ordering data

## Software for SIMATIC Controllers

TIA Portal

PLC programming

### STEP 7 (TIA Portal) options > S7-1500T Motion Control KinPlus

#### Overview

The SIMATIC S7-1500 Technology CPUs support kinematics with up to 4 interpolating axes, e.g. for handling tasks such as pick & place, assembly and palletizing. With the Motion Control package "S7-1500T Motion Control KinPlus", this scope of functions is expanded so that kinematics with up to 6 interpolating axes can be controlled – e.g. for "oriented" handling of products by means of rotary and swivel axes. The following additional kinematics are available with "S7-1500T Motion Control KinPlus":

- Predefined kinematics:
  - Cartesian portal 3D with 2 orientations
  - Delta-Picker 3D with 2 orientations
  - 6-axis articulated arm with central hand
- User-defined kinematics 3D with 3 orientations

#### Prerequisites:

- TIA Portal V18 with STEP 7 Professional
- SIMATIC CPU 1518T-4 PN/DP, CPU 1518TF-4 PN/DP or CPU 1507D TF; FW version V3.0 or higher
- Motion control package "S7-1500T Motion Control KinPlus" with up-to-date Motion Control firmware part
- Special SIMATIC Memory Card of the type "S7-1500T Motion Control KinPlus" (required for each CPU, available as 2 GB and as 32 GB variant)

The Motion Control package "S7-1500T Motion Control KinPlus" contains the complete Motion Control firmware part of a T-CPU and additionally the function extensions for up to 6 interpolating axes. This package must be copied to a SIMATIC Memory Card of the type "S7-1500T Motion Control KinPlus" and is loaded by the controller at runtime.

## Software for SIMATIC Controllers

TIA Portal  
PLC programming

### STEP 7 (TIA Portal) options > PID Professional (TIA Portal)

#### Overview

- PID Professional combines the two option packages Modular PID Control and Standard PID Control in TIA Portal.
- Permits the simple integration of continuous PID Controllers, pulse controllers and step controllers in the application program
- Can be used for simple to complex closed-loop control tasks in SIMATIC S7-300 (CPU 313 or higher), S7-400, and WinAC.
- The engineering software for PID Professional is already included in the STEP 7 package in STEP 7 V13 or higher.
- Tuning functionality by means of PID Self-Tuner (part of STEP 7 as of V11 SP1).
- Reduces engineering costs thanks to time-saving parameterization and optimization of the controller

#### Licensing

- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- The engineering software requires STEP 7 Professional. The software is part of the STEP 7 Professional DVD and/or the program download. A license key is required for activation.
- During runtime, each CPU requires its own runtime license.
- Upgrades to PID Professional (engineering license or Runtime single license) are offered for Standard PID Control/Modular PID Control from V11 onwards.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under <http://www.siemens.com/simatic-licenses>.

##### Easy Motion Control for TIA Portal

###### Requirement:

STEP 7 from V12 SP1;  
software included in STEP 7 V13

Floating license and single license (Runtime)

**6ES7864-2XA02-0XA5**

###### Type of delivery:

CoL for the configuration software, USB flash drive with a license key for the configuration software, CoL for a runtime license; without software or documentation

Floating license download by email, valid for V11 or higher (email address required for delivery<sup>1)</sup>); without software or documentation

**6ES7864-2XA01-0XH5**

##### Easy Motion Control Runtime License

###### Type of delivery:

CoL for one runtime single license (valid for Easy Motion Control V2.x and V11 or higher), without software or documentation

**6ES7864-0AF01-0YX0**

<sup>1)</sup> Up-to-date information and download availability can be found under <http://www.siemens.com/tia-online-software-delivery>.

#### Technical specifications

##### Supported hardware:

Easy Motion Control is runnable on the following CPUs:

- S7-300.
- S7-400.
- WinAC.
- ET 200S.
- ET 200pro.

Supported modules for the measuring of actual values:

- CPU 314C (FW version 2.0 of the CPU or higher).
- ET 200S 1 Count 5V/500 kHz.
- ET 200S 1 Count 24V/100kHz.
- ET 200S 1SSI.
- SM 338.
- FM 350-1, FM 450-1.
- SIMODRIVE Sensor with PROFIBUS DP.
- IM 174.
- Other modules for measuring actual values (using free driver).

Supported modules for setpoint output:

- ET 200S 2AO U.
- SM 332.
- SM 432.
- IM 174.
- Other modules for setpoint output (using free driver).

Supported drives using PROFIBUS DP:

- Micromaster 4.
- SINAMICS G120.
- SINAMICS S120.

##### Storage space requirements

Required work memory in bytes

MC_Simulation	410	64
MC_GearIn	3476	128
Input driver	1416 ... 2654	76 ... 128
Output driver	384 ... 1242	52 ... 68
Axis data block	-	294

## Software for SIMATIC Controllers

TIA Portal

PLC programming

### STEP 7 (TIA Portal) options > SIMATIC TPCamGen technology package

#### Overview

The SIMATIC Software option package, TPCamGen, is used to calculate optimized motion profiles for servo presses where the tool is connected to the drive axle via a connecting rod.

When calculating the profiles, TPCamGen takes into account various constraints, e.g.:

- Maximum eccentric speed
- Maximum ram speed
- Maximum acceleration
- etc.

It minimizes the drive load at the same time.

TPCamGen is the core of the SIMATIC SimaPressServo software package and can only be used suitably in conjunction with this application software.

The SIMATIC Open Controller platform (from TPCamGen V1.1) or a Windows 10 Industrial PC (IPC) with a SIMATIC S7-15xx technology CPU (from TPCamGen V1.2) serves as runtime environment.

#### System requirements:

- SIMATIC STEP 7 (TIA Portal) as of V17.
- ET 200 SP Open Controller: Technology CPU 1515SP PC2 T or 1515SP PC2 TF from V21.9  
or  
any SIMATIC S7-15xx technology CPU from V2.9/V21.9 in connection with Windows 10 Industrial PC.

#### Licensing

- The software can only be obtained as download via Online Software Delivery (OSD). The download includes a license certificate and a ZIP file containing the Windows Installation Setup, TPCamGen function blocks for TIA Portal and the Function Manual (DE/EN).
- The software purchase includes the license for a specific servo press configuration.
- The software is additionally delivered with a Floating Runtime License. It allows the installation of the software on any number of Open Controller CPUs.
- To use the TPCamGen, a signature is additionally required, which is provided in coordination with Siemens. This signature corresponds to a technical license key and is queried each time the software package is generated in the context of the specific press solution. The signature must be stored once in the implemented solution.  
You will find more information in the Siemens Industry Online Support at <https://support.industry.siemens.com/cs/ww/en/view/109804905>.
- Note:  
You may use one software license and the associated signature for any number of presses with identical design.  
For a press with changed design data you need a new license, which has to be ordered separately.

#### Ordering data

##### TPCamGen technology package

Trend tool for servo presses, single license for one press configuration

Requirement:

SIMATIC STEP 7 (TIA Portal) as of V17

Runs on:

as of TPCamGen V1.1:  
ET 200 SP Open Controller  
CPU 1515SP PC2 T or  
TF as of firmware V21.9;  
as of TPCamGen V1.2:  
S7-15xx T-CPU from firmware  
V2.9/V21.9 in connection with  
Windows 10 Industrial PC

Floating License Download<sup>1)</sup>; contains license certificate, Windows Installation Setup, TPCamGen function blocks for TIA Portal and Function Manual (de/en); consignee email address required for delivery

#### Article No.

**6ES7823-0FE30-1AA0**

## Software for SIMATIC Controllers

TIA Portal  
PLC programming

### STEP 7 (TIA Portal) options > OPC UA S7-1200/S7-1500

#### Overview

The vendor- and platform-independent OPC Unified Architecture (UA) is the communication standard for Industry 4.0 and is the standard mechanism for accessing SIMATIC S7-1500 and S7-1200 data from non-Siemens devices.

#### New with V17 and S7-1200 (firmware V4.5)

- OPC UA Server on S7-1200 CPUs with following functionality:
  - Methods for consistent data transfer
  - Structured data types and arrays
  - Additional diagnostic buffer entries for OPC UA Server and OPC UA diagnostics in the TIA Portal

#### New with V17 and S7-1500 (firmware V2.9)

- PC UA Server:
  - Alarms & Conditions on Standard SIMATIC Interface
- Global Discovery Service (GDS) support for certificate management
- Supports further PLC data types for mapping to OPC UA:
  - Localized Text and Byte strings
- Automatic creation of OPC UA instances in the server interface for data types of an OPC UA reference namespace to an FB or UDT
- Improvement of modeling for server interface or companion specifications
- OPC UA Client:
  - New blocks for easy handling

#### Licensing

An OPC UA Server or OPC UA Client is available on the target systems (CPUs) and is activated using runtime licenses. Runtime licenses are offered in three levels for different target systems:

Target system	OPC UA S7-1200 Basic	OPC UA S7-1500 Small	OPC UA S7-1500 Medium	OPC UA S7-1500 Large
S7-1200 CPUs	Yes	No	No	No
ET 200SP CPU 1510SP/1512SP/1515SP (Open Controller) S7-1500 CPU 1511/1513 CPU 1504D Drive Controller	No	Yes	Yes	Yes
ET 200pro CPU 1516pro S7-1500 CPU 1515/1516 PLC 1507S software	No	No	Yes	Yes
S7-1500 CPU 1517/1518/1508S CPU 1507D Drive Controller	No	No	No	Yes

The runtime license includes the certificate for OPC UA (Server and Client) and can be run on the respective target systems including F, C and T/TF as from firmware V2.0 (Client V2.6).

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under

<http://www.siemens.com/simatic-licenses>.

##### Can be used for

SIMATIC OPC UA S7-1200	For all S7-1200 CPUs from firmware V4.4
SIMATIC OPC UA S7-1500	For all S7-1500 CPUs and ET 200SP CPUs with firmware V2.0 or higher (incl. S/F/T versions) and PLCSIM Advanced

## Software for SIMATIC Controllers

TIA Portal

TIA Portal options

### TIA Portal Multiuser Engineering

#### Overview

TIA Portal Multiuser Engineering allows several users to work on the same project simultaneously. This results in a significant reduction in configuration times, and projects can be commissioned faster.

The basic principle:

The project administration is handled by an autonomous server application. This can be installed independent of a TIA Portal.

#### New with V20

- Integration of Kerberos network authentication
- Multiuser commissioning in synchronous mode now also supports working in an exclusive local session and exclusive multiuser mode in a local multiuser session
- Extension of the multiuser openness functions to include marking and unmarking of multiuser objects in connection with project server groups
- Improved performance of project server connections
- Automatic return to online mode after successful check-in and update of a multiuser session
- General performance improvements, e.g. when creating and checking into the multi-user workflows

#### Licensing

- The software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- The software is part of the STEP 7/WinCC (TIA Portal) DVD and/or of the program download; a license key is required for activation.
- An upgrade to version V20 is available for users of the previous versions V14...V19.
- It is possible to conclude Software Update Service (SUS) contracts.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your software licenses with the Automation License Manager under

## Software for SIMATIC Controllers

TIA Portal

TIA Portal options

### TIA Project Server Cloud

#### Overview

**TIA Project Server Cloud** allows multiple users to work simultaneously on a TIA Portal project over the Internet.

The TIA Project Server serves as a central storage location for TIA Portal projects.

Different users work simultaneously in local sessions, based on the projects that you manage with TIA Project Server Cloud.

Project management and administration is located on the TIA Project Server Cloud in the Industry Premium Portal.

#### Licensing

The license concept of the TIA Project Server Cloud is based on a subscription license model. This model offers flexibility and allows for a quick start.

- The monthly subscription with 100 GB of project storage offers unlimited use for the duration of one month. As long as you do not cancel the subscription, it will be extended for another month.
- The annual subscription with 250 GB of project storage offers unlimited use for the duration of one year. As long as you do not cancel the subscription, it will be extended for another year.
- The 365-day subscription is a Certificate of Contract (CoC) with 250 GB of project storage and offers unlimited use for the duration of one year. The subscription ends after one year.
- The 31-day subscription is a Certificate of License (CoL) with a fixed term of 31 days and 100 GB of project storage. The subscription is not automatically renewed.
- 10-hour credit: You receive a Certificate of License (CoL) with a 10-hour credit with 100 GB of project storage. The service is available for 10 hours from the start of use, but interruptions are possible.
- The access information for the license options (365 days/31 days/10 hours) is provided as a PDF document.

#### Multiuser Engineering

To work on TIA Portal projects together, you need a TIA Portal Multiuser Engineering license.

- The provided TIA Project Server Cloud can be used with TIA Portal Multiuser and the associated Engineering option for team engineering. A separately available TIA Portal Multiuser Engineering license is required for this.
- The use in Exclusive Engineering of the TIA Portal does not require a TIA Portal Multiuser Engineering license.
- The TIA Portal Multiuser Engineering license is included when accessed via TIA Portal Cloud.

## Software for SIMATIC Controllers

TIA Portal

TIA Portal options

### TIA Portal Test Suite

#### Overview

Software to support quality assurance of automation programs in the TIA Portal

Contains tools for checking the programming style and for creating test routines for software modules:

- **Styleguide Checker:**  
To ensure a unified programming style, rule sets with programming guidelines in the TIA Portal project can be defined as well as their compliance regularly checked.
- **Application test:**  
To check the correct processing of individual logic blocks or entire S7-1500 applications, test routines with function tests can be created in a TIA Portal project and subsequently executed and validated with help of SIMATIC S7-PLCSIM Advanced V6.0.
- **System test:**  
The system test allows the user to define and execute test cases for a PLC program using OPC UA server interfaces. The system test permits the following tests to be performed:
  - Hardware-in-the-loop tests with S7-1200 and S7-1500
  - Software-in-the-loop tests with PLCSIM Advanced

#### New with V20

##### Styleguide Checker:

- Styleguide Checker now includes an additional rule for block instance variables that contain IEC timers and counters. As a result, common rules can now be set up for block instance variables, for example, that all instance variables must have the prefix "inst".

##### Application test:

- Support for PLCSIM Advanced V7.0, S7-1500 SIPLUS PLCs, variables of data types Date and TOD
- Users can now create test sets to organize test cases and set their sequence of execution. This reduces redundancy by enabling reuse of small, reusable test cases. This improves test coverage and traceability. Multiple test groups can be created based on priority, criticality, functionality, and intended components. This improves the overall testing process.
- Optionally, the application test can now also be started as a background task. This allows the user to simultaneously use watch tables, breakpoints in the SCL/STL code, and trace functions. This makes it much easier to identify programming errors, while at the same time allowing other engineering tasks, such as HMI engineering, to be continued.

##### System test:

- Another parameter can be added to the WAIT statement to control when the next test step will occur. This extension provides more flexibility in defining the conditions for continuing the next step.

#### Licensing

- The software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- The application tests created with the Test Suite can only be executed in conjunction with SIMATIC S7-PLCSIM Advanced V7.0 or higher. An additional SIMATIC S7-PLCSIM Advanced V6.0 license is only required in "ExternallyManagedPLCSIMInstance" mode.
- There is also the option of completing a Software Update Service.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under <http://www.siemens.com/simatic-licenses>.

### TIA Portal Cloud Connector

#### Overview

The TIA Portal Cloud Connector makes it possible to access the local PG/PC interface and the connected SIMATIC hardware from a TIA Portal engineering system in a cloud environment. Access can be made directly from TIA Portal Cloud or a private cloud via Remote Desktop.

#### Licensing

- The TIA Portal Cloud Connector installed locally on the machine requires a license. Exception: no license is required when using TIA Portal Cloud

#### Ordering data

##### TIA Portal Cloud Connector

Single license; software is component of STEP 7 / WinCC V14 and higher. Only the Certificates of License (CoL) are delivered with the license.

### TIA Portal Teamcenter Gateway

#### Overview

The Teamcenter Gateway permits storage and management of TIA Portal projects and global libraries in Teamcenter. Program handling is integrated into the TIA Portal.

#### Licensing

- Please note the compatibility of the installed program versions for the operation of the Teamcenter Gateway.
- The software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- An upgrade to the current version is offered for users of previous versions.
- It is possible to conclude Software Update Service (SUS) contracts.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under

### TIA Portal CAx Publication Tools

#### Overview

The TIA Portal CAx Publication Tools are used to export metadata from TIA Portal that is required for the exchange of Openness attributes using AutomationML. This allows Openness attributes to be exchanged with other tools, e.g. EPLAN P8, via an AutomationML file.

#### Licensing

- Please note the compatibility of the installed program versions for the operation of the CAx Publication Tool.
- The software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under

### SIMATIC Visualization Architect

#### Overview

##### **SIMATIC Visualization Architect (SiVArC)**

##### Challenge:

- To standardize the user interfaces of the visualizations throughout the plant
- Significant reduction of the engineering costs for generating the visualizations
- To make the in-house work standard usable

##### Solution:

- Automatic generation and creation of the visualizations, based on the program code of the PLC and corresponding visualization objects within the framework of system-wide library concepts.

##### Licensing

- The software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- An upgrade to the subsequent version is offered for users of previous versions.
- A rental license is available for temporary use
- The software can be tested in restricted mode without a license.
- It is possible to conclude Software Update Service (SUS) contracts.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under

<http://www.siemens.com/simatic-licenses>.

## Software for SIMATIC Controllers

TIA Portal

TIA Portal options

### SIMATIC ProDiag

#### Overview

The TIA Portal option ProDiag makes it possible to monitor a machine or plant and to intervene in the event of a fault. The monitoring messages which can be generated for the various faults provide specific information on the monitoring mode, location and cause of the fault. Information on troubleshooting can be provided in addition. Plant operators can then not only recognize faults, they can also identify any potential danger in advance and take appropriate countermeasures.

#### Licensing

- The runtime license for controllers includes 250 supervisions or an unlimited number of supervisions per CPU. From FW 2.0 onwards, the software can run on S7-1500/ET 200SP CPUs regardless of the TIA Portal version.
- For the visualization of the messages, the controls are licensed according to the HMI runtime platforms.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under

<http://www.siemens.com/simatic-licenses>.

SIMATIC ProDiag for HMI

For all Comfort and Mobile Panels, WinCC Runtime Advanced and WinCC Runtime Professional as of TIA Portal V14  
For WinCC Unified PC Runtime as of TIA Portal V18

SIMATIC ProDiag for S7-1500

For all S7-1500 CPUs and ET 200SP CPUs with FW V2.0 and higher

## Software for SIMATIC Controllers

TIA Portal

TIA Portal options

### SIMATIC Modular Application Creator

#### Overview

The SIMATIC Modular Application Creator enables the automated generation of TIA Portal projects based on pre-defined software modules. Especially with complex machine configurations, such as a multi-belt control, a printing machine or other applications with many axes, this is very efficient compared to manually creating and parameterizing the associated automation project directly in the TIA Portal.

The software modules provide a technological view of the application and can be used in the TIA Portal without programming knowledge.

They are stored in a separate repository, independent of the tool, which needs to be connected to the tool.

#### Licensing

- The SIMATIC Modular Application Creator and the existing modules are available as a free download via the Siemens Industry Online Support.
- For modules that are charged for, an Engineering license is required that entitles the holder to generate TIA Portal projects for 365 days.

#### Ordering data

##### SIMATIC Modular Application Creator

For automated generation of TIA Portal projects with use of pre-configured software modules

##### SIMATIC Modular Application Creator Equipment modules

Pre-configured software modules for use with the SIMATIC Modular Application Creator

##### SIMATIC Modular Application Creator licenses

The license authorizes generation of TIA Portal projects with the corresponding equipment module for 365 days.

- Multi-Carrier-System / TS 2 Booster
- Converting Toolbox
- Print Standard

<sup>1)</sup> Up-to-date information and download availability can be found at <http://www.siemens.com/tia-online-software-delivery>.

#### Technical specifications

The SIMATIC Modular Application Creator can be used for:

- TIA Portal and StartDrive as of V16.0, with activated Openness interface and
- All SIMATIC S7-1500 CPUs as of FW version 4.8.

## Software for SIMATIC Controllers

TIA Portal

TIA Portal options

### Central user management (UMC)

#### Overview

The User Management Component (UMC) provides the possibility of central user management. Through the connection to the TIA Portal, users and user groups can be defined and managed across projects. Connection to a Microsoft Active Directory is also possible.

#### Licensing

- Central user management (UMC) is part of the scope of delivery of TIA Portal.
- The license model depends on the number of user accounts per UMC domain.
- Up to ten user accounts can be used without a license.
- For additional user accounts, 365-day rental licenses and single licenses are available to add to the required number of centrally managed users.

#### Ordering data

##### Central user management (UMC)

Software component to implement central user management, included in the scope of supply of the respective products (e.g. TIA Portal).

The license model depends on the number of user accounts per UMC domain. Use of max. 10 user accounts possible without a license.

6 languages: de, en, fr, es, it, zh; executable on Windows 10 (21H2 or later), Windows 11 (21H2 or later), Windows Server 2019, Windows Server 2022 (21H2 or later)

- Rental license 365 days with license certificate for 100 user accounts
- Rental license 365 days with license certificate for 4 000 user accounts
- Single license with license certificate for 100 user accounts
- Single license with license certificate for 1000 user accounts
- Single license with license certificate for 4000 user accounts

# Software for SIMATIC Controllers

STEP 7 V5.x

Basic software and editors

## STEP 7

### Overview

- Basic software STEP 7:  
The standard tool for the SIMATIC S7, SIMATIC C7 and SIMATIC WinAC automation systems.
- For fully utilizing the performance capability of the systems.
- With user-friendly functions for all phases of an automation project:
  - Configuration and parameter assignment of the hardware
  - Specifying the communication
  - Programming
  - Testing, commissioning and service
  - Documentation, archiving
  - Operating, diagnostic functions

#### Note

The STEP 7 (TIA Portal) engineering software is required to program the new generation of S7-1200, S7-1500 and ET 200SP CPU PLCs as well as the S7-1500 Software Controller; of course it can also be used for programming the S7-300, S7-400 and SIMATIC WinAC.

Siemens offers a combo license for both platforms which enables you to work using both STEP 7 (TIA Portal) as well as traditional engineering software. See "STEP 7 Professional" for more information.

#### Licensing

- STEP 7 V5.7 can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- A 50 h rental license is available for limited use.
- An upgrade to version V5.7 is offered for users of the previous V5.3...5.6 versions.
- A 5.6 license is also valid for the version V5.7.
- A trial license is available for testing purposes.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under <http://www.siemens.com/simatic-licenses>.

## Software for SIMATIC Controllers

STEP 7 V5.x

Basic software and editors

### STEP 7 Professional

#### Overview

STEP 7 Professional supports all IEC languages.

In addition to the languages familiar from STEP 7:

- LAD
- FBD
- STL

the following are also available:

- "Sequential function chart"
- "Structured text"

An offline simulation of user programs created with these languages is included. STEP 7 Professional thus replaces the combination of the individual packages STEP 7, S7-GRAPH, S7-SCL and S7-PLCSIM.

A PowerPack (conversion package) is available for customers who use STEP 7 already and wish to change. A valid STEP 7 license is required for purchasing the POWERPACK. A separate Software Update Service can be purchased for STEP 7 Professional.

#### Note

The STEP 7 (TIA Portal) engineering software is required to program the new generation of S7-1200, S7-1500 and ET 200SP CPU PLCs as well as the S7-1500 Software Controller; it can also be used for programming the S7-300, S7-400 and SIMATIC WinAC.

Siemens offers a combo license for both platforms which enables you to work using both STEP 7 (TIA Portal) as well as traditional engineering software. See "Licensing" for more information.

#### Licensing

- New installations of STEP 7 Professional 2021 SR3 are only available as combo licenses together with STEP 7 Professional V20 (TIA Portal). The software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license). A 50 h rental license is available for limited use.
- An upgrade to the version V20/2021 SR3 Combo is available for users of the previous versions STEP 7 Professional 2006...2010.
- The license of the version V16/2017 Combo can also be used for STEP 7 V5.7.
- PowerPack and upgrade enable migration from STEP 7 V5.7 to STEP 7 Professional V20/2021 SR3 Combo.
- A trial license is available for testing purposes.
- It is possible to conclude Software Update Service (SUS) contracts.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under

<http://www.siemens.com/simatic-licenses>.

## Software for SIMATIC Controllers

STEP 7 V5.x

Basic software and editors

### S7-SCL

#### Overview

- PASCAL-type high-level language
- Optimized for programming PLCs
- With PLCopen Base Level certificate
- For use in SIMATIC S7-300 (recommended for CPU 314 and CPU 312C), S7-400, C7 and WinAC

#### Licensing

- S7-SCL is an integral part of the STEP 7 Professional software package or is available as a stand-alone software product.
- S7-SCL V5.7 is delivered with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 5.7 is available for users of the previous versions as of V5.3.
- A separate update service can be purchased for S7 SCL.
- A trial license valid for 21 days is available for download via the Industry Online Support under <https://support.industry.siemens.com/cs/ww/en/view/109973519>.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under

<http://www.siemens.com/simatic-licenses>.

## S7-SCL

### Technical specifications

Engineering tool	S7-SCL
Current version	V5.7
Software class	A
<b>Application areas</b>	
Can be used for	Text-based high-level language programming of simple and complex calculations, CASE, loop, jump, and comparison functions
Marketing message	Programming of algorithms and calculations made easy!
Advantages	<ul style="list-style-type: none"> <li>• Clear and easy-to-read programs</li> <li>• Functional, module-based programming</li> <li>• CASE statement replaces a large number of jump and comparison functions</li> <li>• Easily understood by PLC programmers, as the programming philosophy of LAD/FBD/STL is retained</li> <li>• Easy switchover to PLC programming for PC programmers</li> <li>• Exchangeability (porting) of subroutines in accordance with IEC 61131-3</li> <li>• Less time required for engineering compared to LAD/FBD/STL: Up to 20% for simple programs; at least 50% for demanding program structures</li> </ul>
Sectors	<ul style="list-style-type: none"> <li>• Labeling machines</li> <li>• Chemical plants (e.g. oxygen extraction, evaluation of measured values)</li> <li>• Rubber and plastics processing machines</li> <li>• Woodworking machines</li> <li>• Storage and logistics systems</li> <li>• Paper and printing machinery</li> <li>• Punching and cutting machines</li> <li>• Water industry</li> <li>• Coilers</li> </ul>
<b>Target systems</b>	
Can be used in	S7-300 (CPU 313 or higher and CPU 312C or higher recommended) S7-400 C7 (C7-626 or higher recommended) WinAC
<b>System requirements</b>	
Operating system	Windows 10/11 Windows Server 2016/2019/2022
Required hard drive memory in the PG/PC	50 MB
Required software	STEP 7 V5.7

Engineering tool	S7-SCL
<b>Properties</b>	
Monitoring tags	Yes

## Software for SIMATIC Controllers

STEP 7 V5.x

Basic software and editors

### S7-GRAPH

#### Overview

- For configuring and programming sequential processes using sequencers
- Standardized representation to EN 1131-3
- Clearly comprehensible program thanks to structuring of the process into separate steps
- With extensive diagnostic functions, integrated in the SIMATIC diagnostics concept
- With PLCopen Base Level certificate
- For use in SIMATIC S7-300 (recommended for CPU 315 and CPU 312C or higher), S7-400, C7 and WinAC

#### Licensing

- S7 GRAPH is an integral part of the STEP 7 Professional software package or is available as a stand-alone software product.
- S7-Graph V5.7 is supplied with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 5.7 is available for users of previous versions as of V5.3.
- A separate update service can be purchased for S7-GRAPH.

Basic software and editors

## S7-GRAPH

### Technical specifications

Engineering tool	S7-GRAPH
Current version	V5.7
Software class	A
<b>Application areas</b>	
Can be used for	Graphical programming of sequential controls and sequencers
Marketing message	Fast, elegant way to program sequential processes easily and transparently!
Advantages	<ul style="list-style-type: none"> <li>• Can be used to optimum effect even during the design phase</li> <li>• Less configuration effort thanks to graphical structuring and programming</li> <li>• Quick and easy familiarization</li> <li>• Precise fault localization thanks to integrated diagnostics in combination with ProAgent for ProTool/Pro and WinCC</li> <li>• Less time required for engineering compared to LAD/FBD/STL: approx. 40 to 70%</li> </ul>
Sectors	<ul style="list-style-type: none"> <li>• Automotive industry (e.g. body-in-white, final assembly)</li> <li>• Electrical equipment manufacture</li> <li>• Rubber and plastics processing machines</li> <li>• Pick-and-place machines</li> <li>• Woodworking machines</li> <li>• Metalworking machines</li> <li>• Paper and printing machinery</li> <li>• Testing machines</li> <li>• Rolling mills</li> <li>• Coilers</li> <li>• Leisure and entertainment facilities</li> </ul>
<b>Target systems</b>	
Can be used in	S7-300 (CPU 314 or higher and CPU 312C or higher recommended) S7-400 C7 (C7-626 or higher recommended) WinAC
<b>System requirements</b>	
Operating system	Windows 10/11 Windows Server 2016/2019/2022
Required hard drive memory in the PG/PC	50 MB
Required software	STEP 7 V5.7

Engineering tool	S7-GRAPH
<b>Properties</b>	
Monitoring tags	Yes
Controlling tags	Yes
Single-step processing	Yes
Integration in CFC	-
<b>Program runtimes</b>	
with S7-300 (typical)	3 ms per block + 1 ms per active step
with S7-400 (typical)	0.4 ms per block + 0.06 ms per active step
<b>Diagnostics</b>	
Integration of diagnostic data in ProAgent	Yes
Integration of diagnostic data in ProTool/Pro	Via ProAgent
Integration of diagnostic data in WinCC	Via ProAgent
<b>Supported standards</b>	
IEC 61131-3	PLCopen certification • Base Level SFC available
Status of PLCopen activities	-
<b>Available versions/licenses</b>	
Floating license	CD-ROM with <ul style="list-style-type: none"> <li>• Tool</li> <li>• Electronic manual</li> <li>• Getting Started guide</li> <li>• Examples</li> </ul> License key on USB flash drive Certificate of License Product information

# Software for SIMATIC Controllers

STEP 7 V5.x

Basic software and editors

## S7-PLCSIM

### Overview

- For functional testing of the generated SIMATIC S7 user blocks on a programming device or PC, independent of the availability of the target hardware
- Shifts the detection and correction of programming errors to an early stage of development
- Enables an accelerated and cost-effective initial commissioning and enhances the program quality
- Can be used for LAD, FBD, STL, S7-GRAPH, S7-HiGraph, S7-SCL, CFC, S7-PDIAG, WinCC (local installation)

### Licensing

- S7-PLCSIM is an integral part of the STEP 7 Professional software package or is available as a stand-alone software product
- S7-PLCSIM V5.4 is delivered with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 5.4 is offered for users of the previous versions.
- A separate update service can be purchased for S7-PLCSIM.
- A trial license valid for 14 days is available for download via the Industry Online Support under <https://support.industry.siemens.com/cs/ww/en/view/109750064>.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under

<http://www.siemens.com/simatic-licenses>.

### Ordering data

#### S7-PLCSIM, Version 5.4

Task:  
Functional testing of SIMATIC S7 user blocks on programming device/PC  
Target system:  
SIMATIC S7-300, SIMATIC S7-400, SIMATIC C7  
Requirement:  
STEP 7 V5.4 or higher incl. SP4/SP5 or STEP 7 > V5.5  
Type of delivery:  
on CD; English, German, French, Spanish, Italian;  
license key on USB flash drive, with electronic documentation

Floating license

Software Update Service (requires current software version)<sup>1)</sup>

Floating license upgrade to V5.4

#### SIMATIC Manual Collection DL in 5 languages

All manuals for S7-1200/1500/200/300/400, LOGO!, SIMATIC DP, PC, PG, STEP 7, Engineering SW, Runtime SW, SIMATIC HMI, SIMATIC NET, SIMATIC IDENT

Consignee email address required for delivery.

#### SIMATIC Manual Collection DL in 5 languages

Software Update Service (SUS); within the framework of this contract, you will receive all current software versions as a download for one year. The contract is automatically extended by 1 year unless it is canceled 3 months before expiration.  
Period of delivery and service:  
1 year from date of invoice  
Consignee email address required for delivery.

<sup>1)</sup> For more information on the Software Update Service, see page 12/ 2.

# Software for SIMATIC Controllers

STEP 7 V5.x

Options for programming and design

## CFC

### Overview

- For the generation of automation programs by drawing a technology chart
- With extensive libraries of ready-made software blocks to which user-created blocks can be added
- Minimized outlay and reduced error susceptibility due to the interconnection of ready-made blocks
- Optimized integration in the world of automation, for example, through guaranteed compatibility with all STEP 7 tools
- Can be used for SIMATIC S7-300 (recommended for CPU 316 or CPU 314C or higher), SIMATIC S7-400, SIMATIC WinAC and D7-SYS

### Licensing

- SIMATIC CFC V9.0 is supplied with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 9.0 is available for users of the previous 8.x versions.
- For SIMATIC CFC, the Software Update Service is available with the Standard, Compact and Download types of delivery.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under

<http://www.siemens.com/simatic-licenses>.

### Ordering data

#### SIMATIC CFC, Version 9.0

Task:

Graphic configuring and programming of automation applications in the form of technology charts

Target system:

SIMATIC S7-300/400,  
SIMATIC WinAC, D7-SYS

Requirements:

STEP 7 V5.6 or higher

Type of delivery:

Engineering software and electronic documentation on CD-ROM, license key on USB flash drive, Certificate of License

## Software for SIMATIC Controllers

STEP 7 V5.x

Options for programming and design

### S7 Distributed Safety

#### Overview

- For creating safety-related automation applications with SIMATIC S7 in LAD or FBD (STEP 7 required)
- Implementation of safety functions by simply connecting function blocks
- With prefabricated block library
- Custom block creation possible
- Optimal embedding in the automation world thanks to total integration in the STEP 7 tools
- Scope of supply:
  - Distributed Safety Editor
  - Code generator
  - Debugger
  - Standard block libraries

#### Licensing

- SIMATIC S7 Distributed Safety is delivered with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 5.4 is offered for users of the previous versions 5.x.
- A trial license valid for 14 days is available for download via the Industry Online Support under <https://support.industry.siemens.com/cs/document/109749360>.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under this

# Software for SIMATIC Controllers

STEP 7 V5.x

Options for programming and design

## Safety Integrated for Process Automation

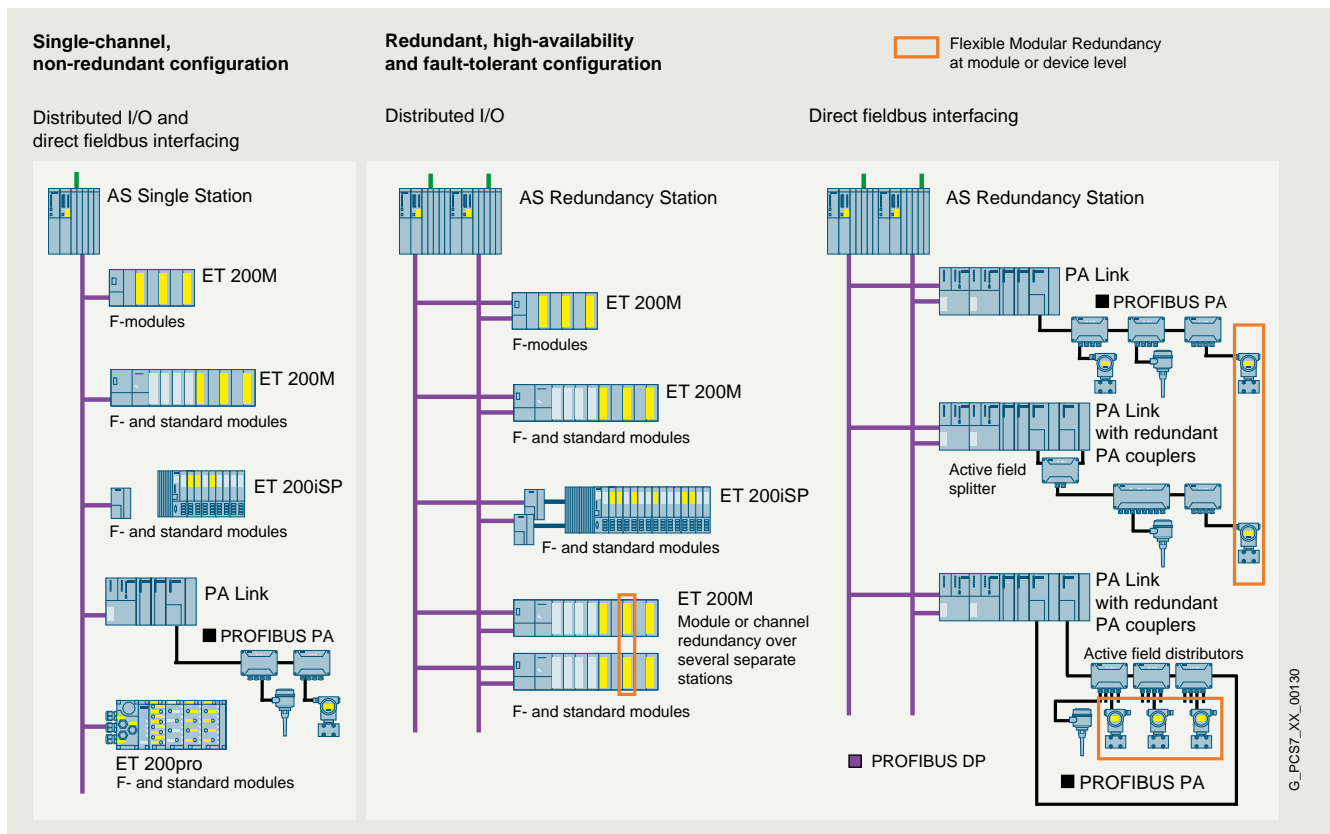

### Overview

Safety Integrated for Process Automation is the comprehensive range of products and services from Siemens for safe, fault-tolerant applications in the process industry. This is characterized by:

- Safety-related F/FH automation systems of the S7-400 series (see "Automation Systems" section)
- Safe communication with the PROFIsafe profile via PROFIBUS (see section "Industrial Communication, PROFIBUS") or PROFINET (see section "Industrial Communication, PROFINET")
- Fail-safe transmitters (SITRANS P DS III) on the PROFIBUS PA with PROFIsafe (see Catalog FI 01, Field devices for process automation)
- ET 200SP HA, ET 200iSP, ET 200M, ET 200S and ET 200pro distributed I/O systems with safety-oriented F-I/O modules/submodules (see "Process I/O" section)
- Fail-safe process instruments/devices for connection to ET 200 distributed I/O systems (see Catalog FI 01, Field Instruments for Process Automation)
- SIMATIC Safety Integrated software for implementation and operation of safety applications, with additional components for the Engineering System and the operator stations: SIMATIC S7 F-systems, SIMATIC S7 Safety Matrix
- Special applications, for example, Partial Stroke Test
- Safety lifecycle management with support by highly qualified solution partners: services for all phases in the lifecycle of a safety instrumented system (analysis, implementation, and operation)

### Design

Safety-related design versions with PROFIBUS

## Software for SIMATIC Controllers

STEP 7 V5.x

Options for programming and design

### Safety Integrated for Process Automation

#### Design

The PROFIsafe profile allows safety-related communication between the automation system (controller) and the process I/O via either PROFIBUS or PROFINET. The decision for choosing either PROFINET IO or the PROFIBUS DP/PA fieldbuses has a significant influence on the architecture of the safety-related system.

#### Safety-related design versions with PROFIBUS

In the case of a safety-related system with PROFIBUS communication integrated into SIMATIC PCS 7, a distinction is made across all architecture levels between two design versions:

- Single-channel, non-redundant design
- Redundant, fault-tolerant design

Both design versions are extremely variable, and offer a large scope for different customer requirements. Standard automation (basic process control) and safety-related functions can be combined flexibly, not only in the area of distributed I/O. Even at the controller level, they can be combined in one system or separated. In addition, there are numerous possibilities arising from the use of flexible modular redundancy.

At the individual architectural levels (controller, fieldbus, I/O), you have the configuration alternatives shown in the figure in line with the I/O used (ET 200SP HA, ET 200iSP, ET 200M and ET 200pro remote I/O stations or PROFIBUS PA devices with PA profile 3.0 or higher).

#### Safety-related design versions with PROFINET

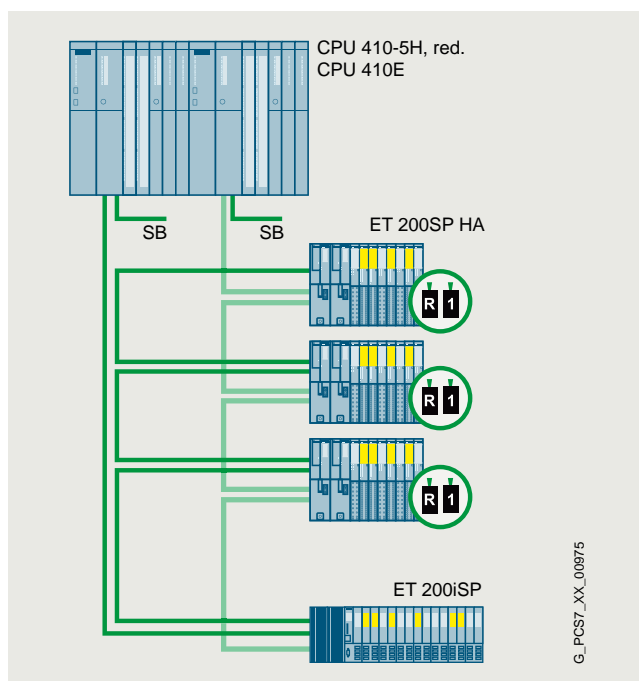

Safety-related AS single stations (F systems) and AS redundancy stations (FH systems) from the S7-400 range can be networked simply and effectively with ET 200M remote I/O stations via PROFINET IO. For this purpose, the PN/IE interface integrated in the CPU and the corresponding PROFINET interface module in the remote I/O stations (e.g. IM 155-6 PN HA for ET 200SP HA) are available on the automation system side.

The availability of the I/O devices on an AS Single Station (F-system) can be increased by a ring topology with media redundancy. If the transmission link in the ring is interrupted at one point, for example, due to a break in the ring cable or the failure of a station, the redundancy manager then immediately activates the alternative communication path.

Safety-related PROFINET IO communication with media redundancy

The maximum availability with minimum error handling times is achieved by the AS Redundancy Station (FH system) in conjunction with the redundant PROFINET configuration R1. From the CPUs of the H system onwards, the R1 devices are connected via two separate line structures. In order to increase availability, we recommend reverse cabling (as shown in the blueprint). In contrast to the single-sided I/O device connection to only one CPU, failure of a CPU in this case does not automatically lead to failure of the connected I/O devices.

Safety-related PROFINET IO communication with system redundancy

### Safety Integrated for Process Automation > SIMATIC S7 F Systems

#### Overview

The SIMATIC S7 F Systems engineering tool for configuration of safety-related SIMATIC PCS 7 automation systems and safety-related F-modules from the ET 200 range is integrated in the SIMATIC Manager. SIMATIC S7 F Systems are based on pre-configured and German Technical Inspectorate certified blocks. The following functions are then available:

- Parameterization of CPU and F signal modules
- Creation of safety-related applications in the CFC

### Safety Integrated for Process Automation > SIMATIC S7 Safety Matrix

#### Overview

Process image of an operator station with the SIMATIC S7 Safety Matrix Viewer displayed

The SIMATIC S7 Safety Matrix, which can be used in addition to the CFC, is an innovative safety lifecycle tool from Siemens that can be used not only for user-friendly configuration of safety applications, but also for their operation and service. The tool, which is based on the proven principle of a cause & effect matrix, is ideally suited to processes where defined states require specific safety reactions.

The SIMATIC S7 Safety Matrix means that programming of the safety logic is not only significantly simpler and more convenient, but also much faster than conventional processes. During the risk analysis of a plant, the configuration engineer can assign precisely defined reactions (effects) to events (causes) which may occur during a process.

Options for programming and design

### Software redundancy

#### Overview

- Software package for assembling fault-tolerant control systems based on software
- Designed for control systems with single-channel distributed I/O
- For use in applications with low demands on changeover speed, such as the control of hydroelectric power plants, cooling circuits, traffic flows, level control, measured data acquisition
- Inexpensive thanks to the use of standard S7-300 and S7-400 components
- I/O linking with PROFIBUS DP in redundant configuration
- Optional control via WinCC operator station

##### Program package software redundancy V1.2

Task:  
Configuring a redundant control.  
Target system: SIMATIC S7-300, S7-400

Requirement:  
STEP 7 V5.2, NCM S7 for PROFIBUS

Type of delivery:  
incl. electronic documentation (English, German, French, Spanish, Italian), 4 application examples and faceplate for WinCC on CD-ROM

Single license (for 2 CPUs)

**6ES7862-0AC01-0YA0**

Single license, without software and documentation

**6ES7862-0AC01-0YA1**

##### SIMATIC Manual Collection DL in 5 languages

**6ES7998-8XE01-8YE0**

All manuals for S7-1200/1500/200/300/400, LOGO!, SIMATIC DP, PC, PG, STEP 7, Engineering SW, Runtime SW, SIMATIC HMI, SIMATIC NET, SIMATIC IDENT

Consignee email address required for delivery.

##### SIMATIC Manual Collection DL in 5 languages

**6ES7998-8XE01-8YE2**

Software Update Service (SUS); within the framework of this contract, you will receive all current software versions as a download for one year. The contract is automatically extended by 1 year unless it is canceled 3 months before expiration.

Period of delivery and service:  
1 year from date of invoice

Consignee email address required for delivery.

#### Technical specifications

Technical specifications	
<b>Hardware requirements</b>	
CPU	S7-300: CPU 313C-2 DP, 314C-2 DP, 315-2 DP, 316-2 DP, 318-2 DP S7-400: all CPUs
Redundancy link of the CPUs	MPI, PROFIBUS, Industrial Ethernet; existing connections can also be used
Usable modules for ET 200M	IM 153-2; all DI/O, AI/O for ET 200M; FM 350-1 counter module; CP 341
<b>Software requirements</b>	
Configuration/programming	STEP 7 V4.0
Communication configuration for redundant PROFIBUS DP	NCM S7 for PROFIBUS

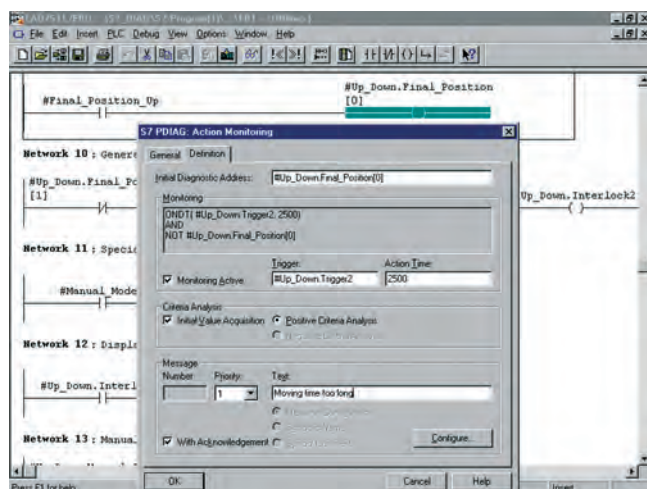

# Software for SIMATIC Controllers

STEP 7 V5.x

Options for diagnostics and service

## S7-PDIAG

### Overview

- For configuration of process diagnostics with SIMATIC S7
- Increases the availability of machines and production plants and provides supports with fault analysis and elimination on-site
- For use on the SIMATIC S7-300, S7-400

### Licensing

- S7-PDIAG V5.7 is delivered with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 5.7 is available for users of previous versions.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under

<http://www.siemens.com/simatic-licenses>.

### Ordering data

#### S7-PDIAG, Version 5.7

Task:  
Configuring of process diagnostics for LAD/FBD/STL

Target system:  
SIMATIC S7-300 (CPU 314 and higher); SIMATIC S7-400

Requirement:  
From STEP 7 V5.7;  
Windows Server 2016/2019/2022,  
Windows 10/11 Professional,  
Windows 10/11 Enterprise

Type of delivery:  
on CD; German, English, French,  
Spanish, Italian;  
incl. authorization diskette,  
with electronic documentation

Floating license

Target system (recommended)	SIMATIC S7-300 (CPU 314 or higher) SIMATIC S7-400
Operating system	Windows Server 2016/2019/2022, Windows 10/11 Professional, Windows 10/11 Enterprise
Required software packages	STEP 7 V5.7 or higher
Disk space required in programming device/PC	26 MB

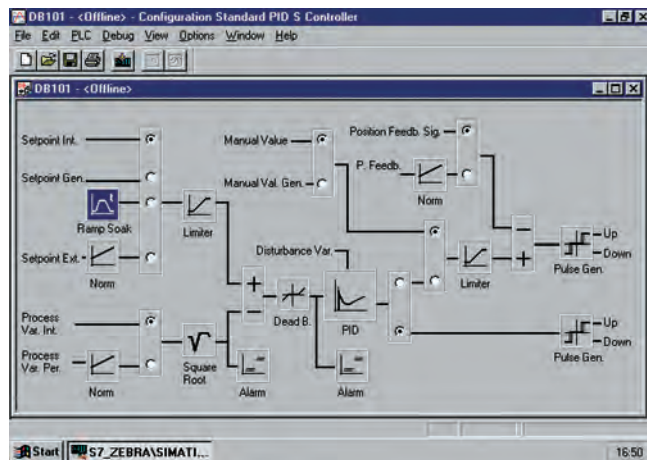

## Software for SIMATIC Controllers

STEP 7 V5.x

Options for technology and drive systems

### Loadable function blocks > Standard PID Control

#### Overview

- For integrating continuous PID controllers, pulse controllers and step controllers in the application program
- Reduces engineering costs thanks to time-saving parameterization and optimization of the controller
- For use in SIMATIC S7-300 (CPU 313 or higher), S7-400 and WinAC

#### Licensing

- The Standard PID Control consists of a parameterization tool (engineering software) and function blocks (runtime software).
- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- Function blocks may be copied as often as required onto any programming devices/PCs. However, one license is always required for each CPU on which they are used.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under

<http://www.siemens.com/simatic-licenses>.

1) Depending on the CPU

2) With 5 control loops

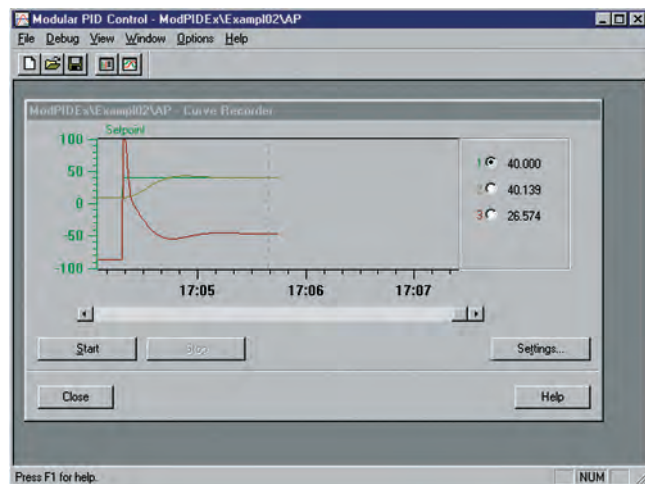

## Software for SIMATIC Controllers

STEP 7 V5.x

Options for technology and drive systems

### Loadable function blocks > Modular PID Control

#### Overview

- For creating complex closed-loop control structures
- Preferred for implementation in closed-loop control equipment in mid-range and high-end applications and in process engineering
- For use in SIMATIC S7-300 (CPU 313 or higher), S7-400 and WinAC

#### Licensing

- The Modular PID Control consists of a parameterization tool (engineering software) and function blocks (runtime software).
- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- Function blocks may be copied as often as required onto any programming devices/PCs. However, one license is always required for each CPU on which they are used.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under

## Software for SIMATIC Controllers

STEP 7 V5.x

Options for technology and drive systems

### Loadable function blocks > PID Self-Tuner

#### Overview

- PID Self-Tuner: For expanding existing PID controllers to create self-tuning PI or PID controllers.
- Optimization of PI or PID controllers with 3-step action (HEATING – OFF – COOLING)
- Convenient online initial setting and online adaptation during operation
- Ideally applicable to temperature controllers, but also suitable for level and flow controllers
- Can be used with SIMATIC S7-300 (CPU 313 or higher), SIMATIC S7-400 and WinAC; in combination with PID Control (integrated in STEP 7), Standard PID Control, Modular PID Control, FM 355, FM 455 as well as with any PID algorithm

#### Licensing

- The PID Self-Tuner complements the Standard PID Control or Modular PID Control software packages.
- Function blocks may be copied as often as required onto any programming devices/PCs. However, one license is always required for each CPU on which they are used.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your software licenses with the Automation License Manager here:

<http://www.siemens.com/simatic-licenses>.

STEP 7 V5.x

Options for technology and drive systems

### S7-Technology

#### Overview

- Option package for creating Motion Control applications for CPU 31xT and CPU 317TF
- Optimal embedding in the automation world thanks to total integration in the STEP 7 tools
- Programming in the standard SIMATIC programming languages LAD, FBD and STL
- Additional engineering tools such as S7-SCL or S7-GRAPH can be used

#### Licensing

- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under

<http://www.siemens.com/simatic-licenses>.

## Software for SIMATIC Controllers

STEP 7 V5.x

Options for technology and drive systems

### Easy Motion Control

#### Overview

- Low-priced package for simple, controlled positioning and simple geared synchronous motion
- For use with any standard variable-speed drive, such as frequency converter or servo drive
- For incremental and absolute encoders

#### Licensing

- The engineering interface for STEP 7 up to V5.5 is included in Easy Motion Control V2.1 and can be installed without license.
- The function blocks of Easy Motion Control require one runtime license for each CPU onto which they are loaded. Easy Motion Control V2.1 includes a Runtime single license; other licenses can be ordered separately.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under <http://www.siemens.com/simatic-licenses>.

#### Note of product versions

Easy Motion Control is an option for STEP 7 V5.x or STEP 7 Professional 2010/17 for controllers of the SIMATIC S7-300/S7-400 series and WinAC. When using STEP 7 (TIA Portal) to program these controllers, you require the optional package Easy Motion Control (TIA Portal).

#### Ordering data

#### Article No.

##### Easy Motion Control V2.1

Requirement:  
STEP 7 V5.3 SP2 up to V5.5  
Type of delivery:  
Software and documentation in  
2 languages (English, German)  
on CD and CoL for one runtime  
single license

**6ES7864-0AC01-0YX0**

##### Easy Motion Control Runtime License

Type of delivery:  
CoL for one runtime single  
license (valid for Easy Motion  
Control V2.x and V11 or higher),  
without software or documentation

**6ES7864-0AF01-0YX0**

#### Technical specifications

##### Supported hardware:

Easy Motion Control is runnable on the following CPUs:

- S7-300.
- S7-400.
- WinAC.
- ET 200S.
- ET 200pro.

Supported modules for the measuring of actual values:

- CPU 314C (FW version 2.0 of the CPU or higher).
- ET 200S 1 Count 5V/500 kHz.
- ET 200S 1 Count 24V/100kHz.
- ET 200S 1SSI.
- SM 338.
- FM 350-1, FM 450-1.
- SIMODRIVE Sensor with PROFIBUS DP.
- IM 174.
- Other modules for measuring actual values (using free driver).

Supported modules for setpoint output:

- ET 200S 2AO U.
- SM 332.
- SM 432.
- IM 174.
- Other modules for setpoint output (using free driver).

Supported drives using PROFIBUS DP:

- Micromaster 4.
- SINAMICS G120.
- SINAMICS S120.

#### Storage space requirements

Required work memory in bytes		
Block	Required work memory per block	Additional work memory required per instance
MC_Init	1086	-
MC_MoveAbsolute	3924	112
MC_MoveRelative	2982	110
MC_MoveJog	3110	110
MC_Home	2886	104
MC_StopMotion	1114	70
MC_Control	1756	58
MC_Simulation	410	64

Input driver	1416 ... 2654	76 ... 128
Output driver	384 ... 1242	52 ... 68
Axis data block	-	294

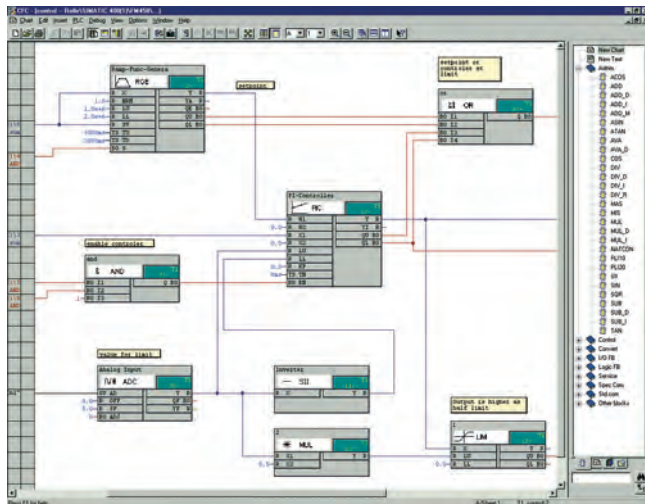

## Software for SIMATIC Controllers

STEP 7 V5.x

Options for technology and drive systems

### D7-SYS

#### Overview

- Optional package for STEP 7 V5.7 SP2 for configuring closed-loop control and automation tasks with SIMATIC TDC
- Extensive block library
- Generation of user libraries in ANSI C with D7-FB-GEN function block generator

#### Licensing

- D7-SYS is delivered with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 10.0 is offered for users of previous versions V9.1 or higher.
- A separate Software Update Service can be purchased for D7-SYS.
- As of version 8.1, the D7-FB-GEN block generator that was previously sold separately is included in the D7-SYS scope of delivery.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your software licenses with the Automation License Manager under

<http://www.siemens.com/simatic-licenses>.

# Software for SIMATIC Controllers

STEP 7 V5.x

Options for technology and drive systems

## Drive ES engineering software

### Overview

Drive ES/STARTER is the engineering system used to integrate the communication, configuration and data management functions of Siemens drive technology into the SIMATIC automation world easily, efficiently and cost-effectively.

The following software packages are available for selection:

- STARTER
- Drive ES PCS 7 / Drive ES PCS neo Add-On

The Drive ES (**Drive Engineering Software**) fully integrates drives from Siemens into the world of Totally Integrated Automation (STEP 7 V5.x).

## Software for SIMATIC Controllers

Software for robotics

### SIMATIC Robot Library

#### Overview

With the SIMATIC Robot Library, robot arms of different robot manufacturers can be programmed consistently in the Totally Integrated Automation Portal (TIA Portal).

The SIMATIC Robot Library concept moves the command sets of a robot control to the TIA Portal, thus enabling manufacturer-independent and consistent programming of industry robots (incl. cobots) in the TIA Portal for the first time. The programs can be run on a SIMATIC S7-1500 Controllers. Additional programming on the robot control is not necessary.

#### Note:

The SIMATIC Robot Library can be supplemented by the free application example SIMATIC Robot Integrator. This offers a comprehensive user interface for industry robots incl. configuration, teaching, jog mode and diagnostics for SIMATIC HMI.

#### System requirements

- SIMATIC STEP 7 (TIA Portal) as of V16.
- Interpreter software from the respective robot manufacturer on the robot control required.
- Executable on SIMATIC S7-1500 as of firmware V2.8 and on SIMATIC S7-1500S as of firmware V20.8.

#### Licensing

- A Single Runtime License is required for each controlled robot arm.
- The licenses can only be obtained via Online Software Delivery (OSD). The download contains the software and a license certificate for a robot arm. For information on activating the license, please read the Readme file included in the download.
- The SIMATIC Robot Library V1.1 can also be requested as trial version via the Siemens Industry Online Support or Technical Support and can then be used free of charge for 8 hours.
- The Interpreter software for the respective robot control is made available by the respective robot manufacturer. Siemens has no influence on the Interpreter license model of the robot manufacturer. Therefore, please contact the relevant robot manufacturer directly (if you wish, Siemens can assist you with finding a contact person).

#### Ordering data

##### SIMATIC Robot Library V1.1

STEP 7 (TIA Portal) runtime option for consistent programming of robot arms of various robot manufacturers in the Totally Integrated Automation Portal (TIA Portal).

Requirement:  
SIMATIC STEP 7 (TIA Portal) as of V16;  
Interpreter software from the respective robot manufacturer on the robot control required.

Executable on:  
SIMATIC S7-1500 Controller family as of firmware V2.8  
SIMATIC S7-1500S Controller family as of firmware V20.8

Single Runtime License Download<sup>1)</sup> contains license certificate for 1 robot alarm

## Software for SIMATIC Controllers

Software for robotics

### SIMATIC Robot Simulator

#### Overview

The Windows application SIMATIC Robot Simulator provides an SRCI-based universal virtual robot controller (VRC). It can be used to simulate SRCI-supporting robot arms from different manufacturers. The SIMATIC Robot Library is also required for this purpose.

The SIMATIC Robot Library concept shifts robot programming to the Totally Integrated Automation Portal (TIA Portal) and thus the program of industrial robots (including cobots) to a SIMATIC S7-1500 controller.

This makes the robot program also executable in SIMATIC S7-PLCSIM Advanced, which makes it possible to simulate robot applications with the SIMATIC Robot Simulator.

#### Note

The SIMATIC Robot Simulator can be supplemented by the free application example SIMATIC Robot Integrator. This offers a comprehensive user interface for industrial robots incl. configuration, teaching, jog mode and diagnostics with SIMATIC HMI.

#### System requirements

- Processor: Intel Core i7™ - 6820EQ (or equivalent); one core is required for each robot arm instance running at the same time
- RAM: 6 GB
- Hard disk: 5 GB
- Minimum screen resolution: 1024 x 1024
- SIMATIC S7-PLCSIM Advanced V6.0 or higher

#### Licensing

- For each robot arm instance running at the same time, a floating license is required.
- Licenses are valid for 365, 180, or 90 days, depending on the type.
- The licenses can only be obtained via Online Software Delivery (OSD).
- The SIMATIC Robot Simulator V1.0.0.0 can also be requested as a trial version via Siemens Industry Online Support or Technical Support and can then be used with limited functionality.
- To use the SIMATIC Robot Simulator, the SIMATIC Robot Library is required as a trial or licensed.

#### Ordering data

#### Article No.

##### SIMATIC Robot Simulator V1.0.0.0

SRCI-based universal, virtual robot controller (Windows application) for simulating robot arms from different manufacturers that support SRCI with the aid of the SIMATIC Robot Library.

##### Prerequisite:

SIMATIC Robot Library ≥ V1.0.0.2  
 SIMATIC S7-PLCSIM Advanced ≥ V6.0  
 Processor: Intel Core i7™ -6820EQ (or equivalent), one core is required for each robot arm instance running at the same time  
 RAM: 6 GB  
 Hard disk space: 5 GB  
 Minimum screen resolution: 1024 x 1024  
 Runs on:  
 Windows 10

##### Floating license download for 365 days<sup>1)</sup>

6ES7825-1AE00-0YA8

Contains license certificate for 1 simultaneously running robot arm instance

Consignee email address required for delivery.

##### Floating license download for 180 days<sup>1)</sup>

6ES7825-1AE00-0YA7

Contains license certificate for 1 simultaneously running robot arm instance

Consignee email address required for delivery.

##### Floating license download for 90 days<sup>1)</sup>

6ES7825-1AE00-0YA3

Contains license certificate for 1 simultaneously running robot arm instance

Consignee email address required for delivery.

<sup>1)</sup> Up-to-date information and download availability can be found at: <https://www.siemens.com/tia-online-software-delivery>

## Software for SIMATIC Controllers

Software for robotics

### SIMATIC Cartesian Portal

#### Overview

With the SIMATIC Cartesian Portal, kinematics can be configured, programmed and operated with up to 6 positioning axes with synchronous point-to-point control (sPTP). The Plug & Play solution comprises a convenient user interface for programming, diagnostics and operation of the kinematics via the HMI.

The SIMATIC Cartesian Portal V1.0 software solution consists of a TIA Portal project and a library project for the TIA Portal V17 and V18.

SIMATIC Cartesian Portal V1.0 contains the following HMI configuration functions:

- Channel-granular configuration of the kinematics and additional axes;  
Per channel, up to 6 axes and additionally up to 25 further axes are available for multi-axis positioning with sPTP. The number of channels is only limited by the performance and the memory of the PLC.
- Axis configuration;  
The dynamic parameters, the axis limits and the homing of the different axes can be configured.
- Tag and I/O configuration;  
Bool and Real tags can be created. Logical step enabling conditions consisting of multiple inputs and tags can be combined into one Boolean tag. Digital inputs and outputs can be configured via the I/O address.
- Points table;  
By means of input or teaching of axis positions, path points can be defined that can be used for programming the kinematics.
- Zone configuration;  
Multiple restricted zones can be created in the workspace as protection zones. These are checked cyclically against both the target coordinates and the current axis values. A violation leads to a stop response of the axes.

The program editor offers the following functions:

- Synchronous point-to-point commands;  
All axes are traversed synchronously with multi-axis positioning. The destination is specified either using the points table or by direct input with optional blending.
- Single axis commands;  
The additional axes can be homed, positioned, torque-limited or speed-controlled.
- Wait functions;  
Step enabling conditions, based on a digital input, a Bool tag or a wait time, can be programmed.
- Calculate tags and assign values;  
Digital outputs can be set via an input mask. In addition, floating point tags can be calculated, incremented or assigned absolute values.
- Program control structures;  
Labels, branches, loops and parallel sequences allow flexible program design.

SIMATIC Cartesian Portal V1.0 is executable on SIMATIC S7-1511T for V17 and SIMATIC S7-1511 for V18. Details on scalability and quantity structures can be found in the [https://support.industry.siemens.com/cs/attachments/109815631/109815631\\_SIMATIC\\_Cartesian\\_Portal\\_V1.0\\_en.pdf](https://support.industry.siemens.com/cs/attachments/109815631/109815631_SIMATIC_Cartesian_Portal_V1.0_en.pdf).

#### System requirements

- SIMATIC STEP 7 Professional (TIA Portal) as of V17
- SIMATIC WinCC Advanced ES as of V17

#### Licensing

- SIMATIC Cartesian Portal is available as Runtime option for TIA Portal. A license is required for each CPU on which SIMATIC Cartesian Portal runs.
- The product can only be ordered via Online Software Delivery (OSD). The download contains the license certificate and the software.
- The following additional licenses are required to use SIMATIC Cartesian Portal:
  - SIMATIC STEP 7 Professional (TIA Portal) as of V17
  - SIMATIC WinCC Advanced ES as of V17

## Software for SIMATIC Controllers

Software for robotics

### SIMATIC Robot Pick AI

#### Overview

SIMATIC Robot Pick AI (robot capability) is a pre-trained, Deep Learning-based image processing software for advanced robotics applications that provides out-of-the-box cognitive performance for selecting rugged pick points (6-DOF gripping poses) for arbitrary "unknown" items in boxes at runtime. It is a generic capability for arbitrary objects. Specific training through CAD models is not required. Suitable, for example, for robotic solutions for unit load removal in intralogistics.

#### Ordering data

##### SIMATIC Robot Pick AI V1.1

AI vision software for pick-by-robot applications with TIA Portal integration, single license, product download includes: Certificate of License (CoL), AI vision software package, STEP 7 (TIA Portal) FBs and documentation<sup>1)</sup>.  
 Tested industrial PCs: SIMATIC IPC BX-39A, SIMATIC S7-1500 TM MFP.  
 Supported 3D cameras: IDS Ensenso N-series, Zivid 2 L100, Intel RealSense D400.  
 License is activated via the responsible sales contact.

### PROFINET Asset Management PRONETA Professional

#### Overview

PRONETA Professional

#### **Asset management and diagnostics with PRONETA Professional**

With PRONETA Professional, the network can be scanned automatically at regular intervals and the real plant configuration can thereby be documented transparently. This allows for new opportunities and for better planning of maintenance and servicing which, in turn, optimizes plant operation. This prevents undesired situations, such as a missing, compatible spare part, during maintenance and service. This increases production availability.

In addition, with PROFlenergy diagnostics, device statuses can be recognized or the mode can be changed. The measured values can also be displayed for devices with the PROFlenergy metering function. Furthermore, the data record wizard provides the option of sending PROFINET data records to PROFINET devices via acyclic communication.

#### **Licenses**

- The software can be installed on one computer (single license).

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under

<https://www.siemens.com/simatic-licenses>.

#### Ordering data

## Software for SIMATIC Controllers

Software for common tasks

For maintenance

### SIMATIC Automation Tool

#### Overview

- To support commissioning and service activities independent of the engineering framework
- For configuration, operation, maintenance and documentation of automation networks
- Rapid overview of the status of the SIMATIC automation system
- Time savings thanks to parallel operations (license required)
- Optimum upgrade support for the devices used and their versions through the display of article numbers, firmware versions and HW versions
- Simple traceability of performed operations and resulting changes in the system through the optional, automatic storage of event log entries in a file
- Automated processes for optimum API-based workflows (license required)

Supported products:

- SIMATIC ET 200
  - ET 200AL IM
  - ET 200AL SM and IO-Link
  - ET 200eco
  - ET 200M IM
  - ET 200MP IM
  - ET 200S IM
  - ET 200pro IM
  - ET 200pro IO-Link and RFID
  - ET 200SP CPU
  - ET 200SP IM and server modules
  - ET 200SP SM, AS-i, CM, CP, TM, IO-Link, motor starters
- SIMATIC S7-1200
  - S7-1200 CPU
  - S7-1200 SM and CM
- SIMATIC S7-1500
  - S7-1500 CPU
  - S7-1500 SM and other modules
- SIMATIC HMI
  - HMI Basic 2nd Generation
  - HMI Comfort
  - HMI Mobile
- SITOP power supplies
- RFID and MOBY
- SCALANCE

#### Licenses

- The software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- The following license types are provided:
  - 21-day trial license (without license key); download as a registered customer from <https://support.industry.siemens.com/cs/ww/en/view/98161300>.
  - SIMATIC Automation Tool – Basic scope of functions
  - SIMATIC Automation Tool Advanced – extended scope of functions, including:
    - Scheduler for planning device operations at a specific time and with selectable frequency
    - Card browser for working with files and folders on SIMATIC Memory Cards in CPUs
    - Extended options for handling SIMATIC Automation Tool projects - Archiving of SAT projects and associated file data
    - Support of devices downstream from a NAT router
    - Possibility to insert multiple devices in one operation
    - Support of CPUs connected via a CM (communications module) or CP (communications processor)
    - Firmware installation in 2 sequences - Option to download the firmware update files to devices and activate the new firmware at a later time.
- SIMATIC Automation Tool Advanced PowerPack V3/V4 upgrade to Advanced V4 - License key upgrade for activating the extended V4 functions based on an available V3/V4 license key.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager under

<http://www.siemens.com/simatic-licenses>.

### SIMATIC PDM

#### Overview

Configuration options with SIMATIC PDM

SIMATIC PDM (Process Device Manager) is a universal, vendor-independent tool for the configuration, parameter assignment, commissioning, diagnostics and servicing of intelligent field devices (sensors and actuators) and field components (remote I/Os, multiplexers, control room devices, compact controllers, compact modules), which in the following sections will be referred to simply as devices.

With *one* software product, SIMATIC PDM enables users to work with over 4 500 devices and device variants of Siemens and over 200 other manufacturers worldwide on a *single* homogeneous user interface.

The user interface satisfies the requirements of the VDI/VDE GMA 2187 and IEC 65/349/CD directives. Parameters and functions for all supported devices are displayed in a consistent and uniform fashion independent of their communications interface. Even complex devices with several hundred parameters can be represented clearly and processed quickly. Using SIMATIC PDM it is very easy to navigate in highly complex stations such as remote I/Os and even connected field devices.

From the viewpoint of device integration, SIMATIC PDM is the most powerful open process device manager on the global market. Devices not previously supported can be integrated in SIMATIC PDM by importing their device description packages (either EDD or FDI). This provides security for your investment and saves you investment costs, training expenses and follow-up costs.

SIMATIC PDM supports the operative system management in particular through:

- Uniform representation and operation of devices
- Uniform representation of diagnostics information
- Indicators for preventive maintenance and servicing
- Detection of changes in the project and device
- Increasing the operational reliability
- Reducing the investment, operating and maintenance costs
- Quantity options for
  - Transfer of parameters between devices
  - Transfer of parameter sets to the devices
  - Export and import functions
  - Diagnostics update

SIMATIC PDM can be used extremely flexibly and tailored to a specific task for field device service:

- Single-point station for point-to-point connection to field devices
- Local service and parameter assignment station with connection to fieldbus segments
- Central service and parameter assignment station with connection to plant bus
- Central HART service and parameter assignment station for HART multiplexers and WirelessHART field devices
- Integrated into the stand-alone SIMATIC PDM Maintenance Station
- Integrated into the SIMATIC PCS 7 process control system

## Software for SIMATIC Controllers

Software for common tasks

For maintenance

### SIMATIC PDM

#### Overview

Maintenance personnel can assign field device parameters at mobile and stationary workstations with SIMATIC PDM. Practically every workstation integrated in the production plant can be used for configuration. Service personnel are thus able to work directly at the location of the field device, while data is stored centrally in the engineering station or maintenance station. This leads to a significant shortening of maintenance and travel times. Additional device-independent system functions support higher-level maintenance stations for creating progress lists for work and servicing.

When a maintenance station is configured in the SIMATIC PCS 7 process control system, SIMATIC PDM is integrated into it and transmits parameter data, diagnostic information and processing information. You can switch directly to the SIMATIC PDM views from the diagnostics faceplates in the maintenance station to perform diagnostics and work on the device in more detail.

A SIMATIC PDM user administration system based on SIMATIC Logon is used to assign various roles with defined function privileges to users. These function privileges refer to SIMATIC PDM system functions, e.g. writing to the device.

For all devices integrated with device description packages, SIMATIC PDM provides a range of information for display and further processing on the maintenance station, for example:

- Device type information (electronic rating plate)
- Detailed diagnostics information (manufacturer information, information on error diagnostics and troubleshooting, further documentation)
- Results of internal condition monitoring functions
- Status information (for example local configuration changes, device test completed)
- Information on changes (Audit Trail report)
- Parameter information

### Central user management (UMC)

#### Overview

The User Management Component (UMC) provides the possibility of central user management. Through the connection to the TIA Portal, users and user groups can be defined and managed across projects. Connection to a Microsoft Active Directory is also possible.

#### Licensing

- Central user management (UMC) is part of the scope of delivery of TIA Portal.
- The license model depends on the number of user accounts per UMC domain.
- Up to ten user accounts can be used without a license.
- For additional user accounts, 365-day rental licenses and single licenses are available to add to the required number of centrally managed users.

#### Ordering data

##### Central user management (UMC)

Software component to implement central user management, included in the scope of supply of the respective products (e.g. TIA Portal).

The license model depends on the number of user accounts per UMC domain. Use of max. 10 user accounts possible without a license.

6 languages:

de, en, fr, es, it, zh; executable on Windows 10 (21H2 or later), Windows 11 (21H2 or later), Windows Server 2019, Windows Server 2022 (21H2 or later)

- Rental license 365 days with license certificate for 100 user accounts
- Rental license 365 days with license certificate for 4 000 user accounts
- Single license with license certificate for 100 user accounts
- Single license with license certificate for 1000 user accounts
- Single license with license certificate for 4000 user accounts

### SIMATIC Version Cross Manager

#### Overview

The SIMATIC Version Cross Manager is a user-friendly tool for determining the differences between various versions of individual projects or multiprojects by:

- Tracing missing, additional or differing objects by comparing hardware configuration, communication, plant hierarchy, CFC/SFC charts, SFC details, block types, messages, global tags, signals and run sequences
- Graphic display of comparison results in a combination of tree and tabular formats
- Clear hierarchical structuring according to the technological hierarchy of the plant
- Color-coded identification of the differences

#### Note:

As the function "Control module adjustment" is based on a basic functionality of the Version Cross Manager (VXM), you need a VXM license to use this function. In the absence of a license, a message appears telling you to install Version Cross Manager. This is not actually necessary, all you need to install is a valid VXM license that will enable the relevant functionality on the engineering station.

# Software for SIMATIC Controllers

## Industrial AI

### Introduction

#### Overview

Siemens offers industry-standard AI solutions for supporting employees and improving machine performance in critical planning and production processes. This enables customers to make quick and confident decisions and to increase their productivity significantly.

In detail, the following offer is available:

- **Applications**  
Vertical and application-specific software (bundles) and related services for solving a specific customer problem
- **Consultation**  
Various offers regarding AI enablement, co-creation and guidance
- **Engineering**  
Software tools and software-as-a-service (SaaS) offers on every aspect of data, creation, provision and operation of your AI

## Software for SIMATIC Controllers

Industrial AI  
Applications

### SIMATIC Robot Pick AI

#### Overview

SIMATIC Robot Pick AI (robot capability) is a pre-trained, Deep Learning-based image processing software for advanced robotics applications that provides out-of-the-box cognitive performance for selecting rugged pick points (6-DOF gripping poses) for arbitrary "unknown" items in boxes at runtime. It is a generic capability for arbitrary objects. Specific training through CAD models is not required. Suitable, for example, for robotic solutions for unit load removal in intralogistics.

#### Ordering data

##### SIMATIC Robot Pick AI V1.1

AI vision software for pick-by-robot applications with TIA Portal integration, single license, product download includes: Certificate of License (CoL), AI vision software package, STEP 7 (TIA Portal) FBs and documentation<sup>1)</sup>.

Tested industrial PCs:  
SIMATIC IPC BX-39A,  
SIMATIC S7-1500 TM MFP.  
Supported 3D cameras:  
IDS Ensenso N-series,  
Zivid 2 L100, Intel RealSense D400.  
License is activated via the responsible sales contact.

### AI Model Deployer

#### Overview

With the AI Model Deployer software application, AI models can be easily deployed on the shopfloor. For this purpose, the tool provides a simple interface which enables trained machine learning models to be provided on target hardware from Siemens.

The AI Deployer is a Windows application and supports the following systems:

- S7-1500 automation system with TM NPU or ET 200MP distributed IO with TM NPU
- Automation system with Industrial Edge device

#### Application

- To create projects based on application templates (image processing for TM NPU, time sequences/image processing for Edge) and to track projects
- To import image processing models or time sequence pipeline package for the application
- To convert and optimize trained neural networks for target inference hardware
- To set up application configuration, e.g. set up hardware, network and camera configurations.
- To create an application package for target inference device (SD card image for TM NPU or Edge deployment package).

### Inspekto

#### Overview

Inspekto – AI-Driven Visual Quality Inspection System Provides dynamic AI guided optimization – no special expertise required. Self-contained system designed to be installed quick and easily to enhancing your production quality faster than any other product.

Our system is designed with end user independence in mind using a do-it-yourself approach. No dedicated vision or AI know-how required.

Visual Inspection

### Visual Inspection Cockpit

#### Overview

The Visual Inspection Cockpit is an Industrial Edge application that enables AI-powered visual inspection without requiring advanced AI expertise. It combines flexible AI and robust computer vision algorithms to solve complex visual inspection challenges in production environments. The application allows users to integrate multiple inspection tasks into a single system, using only a small number of training images.

The application can be ordered from this

[https://www.dex.siemens.com/edge/build-your-solution/visual-inspection-cockpit-engineering-tool?cclcl=en\\_EN](https://www.dex.siemens.com/edge/build-your-solution/visual-inspection-cockpit-engineering-tool?cclcl=en_EN).

### SIMATIC IPC MD-57A

#### Technical specifications

Article number	<b>6ES7730-.....-....</b> SIMATIC IPC MD-57A
<b>General information</b>	
Design of the programming device	Mobile computer
<b>Display</b>	
Design of display	15.6" full HD display in 16:9 format
Screen diagonal	15.6 in
<b>Resolution (pixels)</b>	
• Horizontal image resolution	1 920 pixel
• Vertical image resolution	1 080 pixel
<b>General features</b>	
• Non-reflecting	Yes
• Luminance	300 cd/m <sup>2</sup>
<b>Backlighting</b>	
• Type of backlighting	LED
<b>Control elements</b>	
<b>Keyboard fonts</b>	
• Design	QWERTZ, QWERTY or AZERTY
<b>Touch operation</b>	
• Integrated touch pad	Yes; Touch pad
<b>Supply voltage</b>	
Design of the power supply	External wide-range power supply, lithium ion battery
Rated value (DC)	19 V
<b>Line frequency</b>	
• permissible range, lower limit	47 Hz
• permissible range, upper limit	63 Hz
<b>Processor</b>	
Processor type	i7-12800HE (2.4 to 4.6 GHz; 14 cores (6 performance cores; 8 efficient cores); 24 MB Smart Cache) or i5-12600HE (2.5 to 4.5 GHz; 12 cores (4 performance cores; 8 efficient cores); 18 MB Smart Cache)
Chipset	integrated at CPU
Hyper-threading	Yes
Turbo Boost Technology 2.0	Yes
<b>Graphic</b>	
Graphics controller	Intel® Iris® X? Integrated Graphics Controller
<b>Drives</b>	
CD-RW	No
DVD-ROM	No
DVD-RW	No
Hard disk	No
SSD	Yes; M.2
• Memory capacity	512 Gbyte; Up to 2 TB SSD
TPM Security Chip	Yes; 2.0_
<b>Memory</b>	
Type of memory	DDR5 SO-DIMM
<b>Work memory</b>	
• Number of slots	2; max. 2x 32 GB
<b>Accumulator</b>	
Replaceable	Yes; lithium polymer
Capacity	8 A-h

Article number	<b>6ES7730-.....-....</b> SIMATIC IPC MD-57A
<b>Interfaces</b>	
Number of interfaces PROFIBUS DP	1; 1x PROFIBUS DP / MPI; 9-pin Sub-D socket; 9.6 kBaud to 12 Mbaud
Number of RS 232 interfaces	1; 1x COM
Number of USB interfaces	6
• Type A	4; 2x USB-A 3.2 Gen1 and 2x USB-A 3.2 Gen2x1
• Type C	2; USB-C 4.0
Number of chip-card readers	1; Smart Card Reader (ISO/IEC 7816)
MPI	Yes
Bluetooth radio standard	Yes; V5.3
Multimedia card/SD card slot	2 in 1 (SDHC UHS-II, MMC)
Card reader for SIMATIC memory cards	SIMATIC memory cards (for S7-300/400), SMC (for S7-1x00), SIMATIC micro memory card (for S7-300/C7/ET 200) - including programming interfaces
Universal Audio Jack	No
<b>Video interfaces</b>	
• analog video signal (VGA)	Yes; via adapter from HDMI to VGA
• DVI-I	Yes; via adapter from HDMI to DVI
• DisplayPort	Yes; via adapter from HDMI to DisplayPort
<b>Industrial Ethernet</b>	
• Industrial Ethernet interface	2x Ethernet (RJ45)
- 100 Mbps	Yes
- 1000 Mbps	Yes; Gigabit Ethernet; 2x RJ45 with 2 independent MAC/IP addresses
• Wake on LAN	Yes
• IAMT (Intel Active Management Technology)	Yes
<b>WLAN</b>	
• Type	IEEE802. a/b/g/n/ac R2/ax R2(PreStandard)
<b>Interrupts/diagnostics/status information</b>	
LED status display	4 status LEDs
<b>EMC</b>	
<b>Interference immunity against discharge of static electricity</b>	
• Interference immunity against discharge of static electricity acc. to IEC 61000-4-2	Yes; ±4 kV contact discharge acc. to IEC 61000-4-2, ESD; ±8 kV air discharge acc. to IEC 61000-4-2, ESD
<b>Interference immunity to cable-borne interference</b>	
• Interference immunity on supply cables	±2 kV (according to IEC 61000-4-4, burst); ±1 kV (according to IEC 61000-4-5, surge pulse/line to line); ±2 kV (according to IEC 61000-4-5, surge pulse/line to ground)
• Interference immunity on signal cables	±1 kV (according to IEC 61000-4-4, burst, length < 30 m); ±2 kV (according to IEC 61000-4-4, burst, length > 30 m); ±2 kV (according to IEC 61000-4-5, surge sym./line to ground, length > 30 m)
<b>Degree and class of protection</b>	
IP degree of protection	IP30

### SIMATIC IPC MD-57A

#### Technical specifications

Article number	<b>6ES7730-.....-....</b> SIMATIC IPC MD-57A
<b>Standards, approvals, certificates</b>	
CE mark	Yes
CSA approval	Yes
UL approval	Yes
DIN/ISO 9001	Yes
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• min.	5 °C; Max. 10 °C/h (no condensation)
• max.	40 °C; Max. 10 °C/h (no condensation)
<b>Operating systems</b>	
Local language of operating system	Multi-Language User Interface (MUI): 6 languages (English, German, French, Spanish, Italian, Chinese)
<b>pre-installed operating system</b>	
• Windows 11	Yes; Windows 11 IoT Enterprise (version 22H2)
<b>Software</b>	
<b>Preinstalled</b>	
• STEP 7 Professional (TIA Portal)	Yes; software version: V19
• STEP 7	Yes; Professional 2021 SR2
• WinCC flexible Advanced 2008	No
• WinCC Advanced (TIA Portal)	Yes; software version: V19
• STEP 5	No
<b>Mechanics/material</b>	
Material of housing	metal
Handle	Yes; retractable
Socket for Kensington lock	Yes
rubber corner guards	Yes

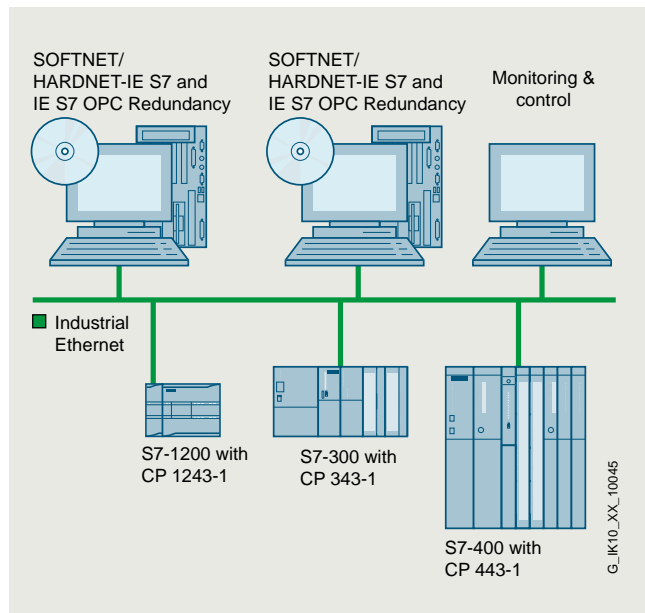

Article number	<b>6ES7730-.....-....</b> SIMATIC IPC MD-57A
<b>Dimensions</b>	
Width	386 mm
Height	41 mm
Depth	281 mm
<b>Weights</b>	
Weight, approx.	2.8 kg; incl. rechargeable battery
<b>Scope of supply</b>	
Accumulator	Yes
Power supply	Yes
Backpack	Yes
SIMATIC Software	Yes
Recovery media	Yes; Restore & Recovery

## SOFTNET-IE S7 incl. REDCONNECT

### Overview

System configuration SOFTNET for Industrial Ethernet

ISO	TCP/UDP	PN	MRP	OPC	PG/OP	S7/S5	IT
●	●			●	●	●	

G\_IK10\_XX\_10185

- Software for coupling PGs/PCs/workstations to automation systems
- Communications services:
  - PG/OP communication
  - S7 communication
  - Open communication (SEND/RECEIVE)
- Can be used with
  - Layer 2 Ethernet card (PCI/PCIe)
  - Integrated Industrial Ethernet interface
  - Modem/ISDN (Remote Access Service RAS)
- Complete protocol stack as a software package

### Ordering data

## Products for specific requirements

### Telecontrol systems for comprehensive applications

#### Introduction

#### Overview

Telecontrol systems for controlling and monitoring widely distributed plants usually consist of a supervisory control system (telecontrol center) and one or more outstations connected over large distances for the automation of distributed plant sections.

SIPLUS RIC is a versatile telecontrol system that uses the internationally standardized telecontrol protocols:

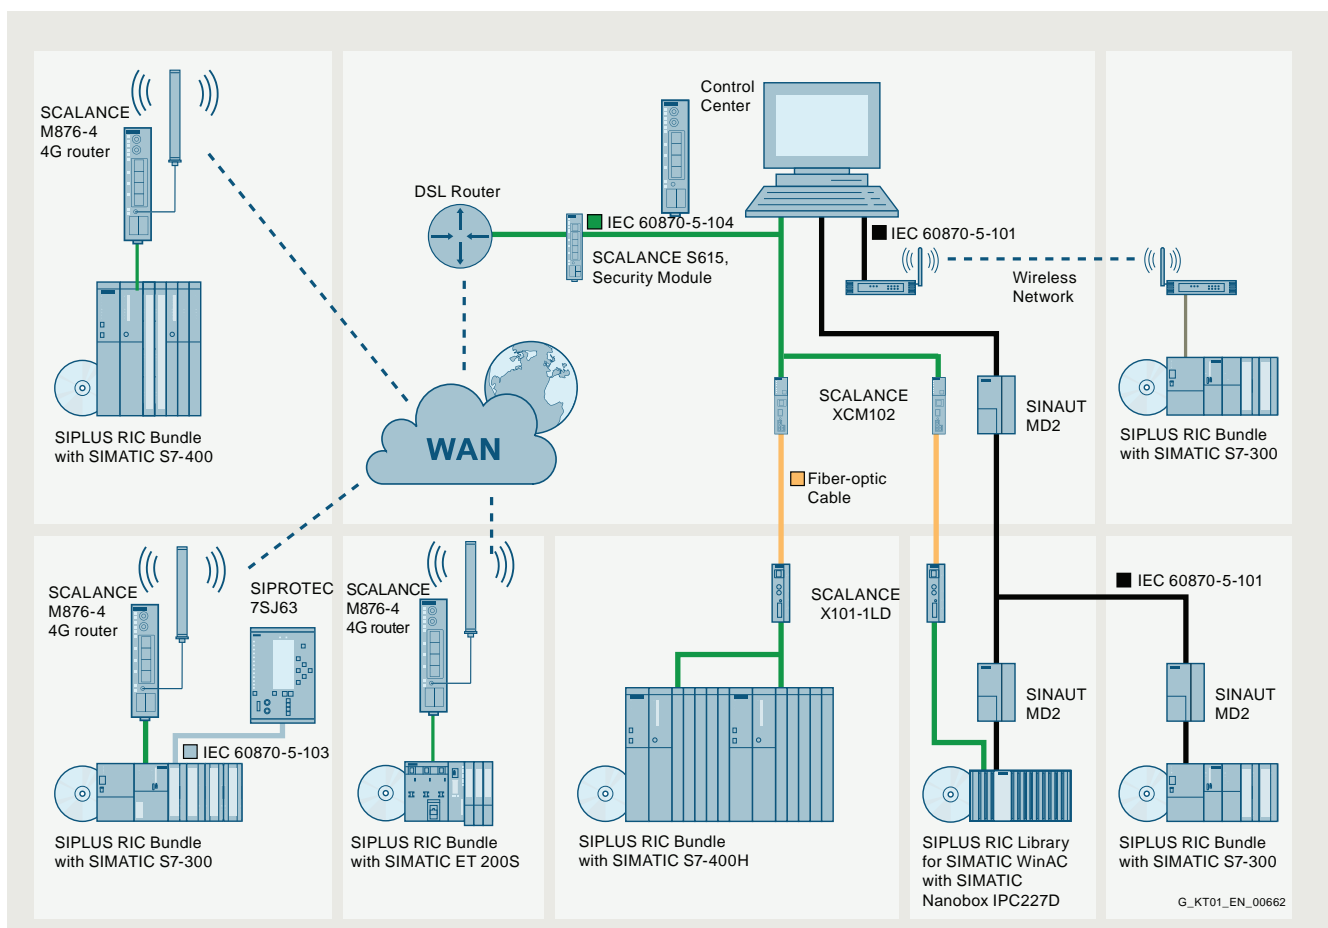

- Serial transmission IEC 60870-5-101
- Ethernet (TCP/IP) IEC 60870-5-104
- Connection of protection devices IEC 60870-5-103

It provides secure communication with reduced data volume for reliable operation in the Wide Area Network (WAN) thanks to event-driven, time-stamped transmission and monitored output of commands.

#### Application

SIPLUS RIC offers maximum functionality and modularity to meet the requirements made upon the monitoring and control of spatially distributed systems, even under extreme environmental

conditions. It is therefore suitable for sectors such as Oil, Gas, Water, Wastewater, Power Generation/Distribution, and Transportation.

## Products for specific requirements

### Telecontrol systems for comprehensive applications

#### SIPLUS RIC for IEC protocol

##### Overview

IEC 60870-5-101, -103, -104 are standardized, vendor-independent protocols. With SIPLUS RIC, they can be parameterized with the SIMATIC Manager or TIA Portal without the need for additional installations.

The IEC 60870-5-101 protocol supports classical WAN connections via dedicated lines,

The coupling is made

- directly
- via media converters (e.g. modems) or
- via the serial interfaces (RS232 or RS485) of the communications modules, e.g. 1SI, CP 341, CP 441 or CM PtP/PTP

The IEC 60870-5-103 protocol permits serial communication with protection devices, e.g. SIPROTEC. The link is made similar to IEC 60870-5-101 via serial communications modules.

The IEC 60870-5-104 protocol supports TCP/IP-based WAN connections such as internet/DSL or GPRS/UMTS/LTE. Either the PN interfaces of the CPUs or the Industrial Ethernet communications modules, e.g. CP 343, CP 443 and CM/CP 154x, are used as interfaces. Redundancy groups and substitute routes (combinations of serial and Ethernet transmission paths) are both possible and enabled via the interfaces.

Security requirements for IEC 104 communication can be achieved with:

- external components (firewall/VPN gateways such as SCALANCE S)
- integrated security features (e.g. firewall/VPN of Advanced CPs)

TLS can be used within the mechanisms (and limitations) provided by SIMATIC for the encryption of IEC 60870-5-104 communication.

The libraries for the IEC 60870-5-101 and -104 protocols are supplied as master (SCADA/Control Center/Controlling Station (control system)) and slave (substation/RTU/Controlled Station) including activation for PN-CPU and CP interface. The IEC 60870-5-103 library is only available as master.

SIMATIC Controllers can also communicate with third-party products by means of the IEC protocols and exchange data from the SIMATIC Controller.

By combining the different library variants (within a CPU), information from lower-level stations and also protection devices can be forwarded to the control stations (node or gateway functionality). Reversed direction signal paths are also supported.

The modular concept in connection with presets enables a fast configuration of stations with basic functionality. Specific requirements (e.g. individual addresses, transfer of external time stamps) can also be parameterized and programmed individually. Example projects are available to make starting easier. They can be used as a basis for one's own projects or initial tests.

Libraries including the example projects and documentation can be downloaded from Siemens Online Support as trial versions and used without a valid license (activation code) in demo mode (15 minutes of full functionality after each CPU restart).

SIPLUS RIC for IEC protocol

### SIPLUS RIC libraries for S7-1500 (R/H), ET 200SP and Software Controllers

#### Overview

If a system based on SIMATIC S7-1500, S7-1500R/H, ET 200SP or Software Controller is to communicate with a Siemens control center, e.g. SIMATIC PCS 7 TeleControl, WinCC TeleControl, WinCC OA, or a control center of a third-party supplier using the IEC 60870-5 telecontrol standard, the IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) telecontrol protocols can be used in the SIMATIC automation systems.

SIPLUS RIC libraries offer an integrated, scalable system based on SIMATIC S7-1500/ET 200SP functionalities for the following data volumes:

- 200 data points, for use with CPU 1510SP-1 PN<sup>1)</sup>, CPU 1511-1 PN and CPU 1511C-1 PN
- 800 data points, for use with CPU 1512SP-1 PN and CPU 1512C-1 PN
- 1000 data points, for use with CPU 1513-1 PN
- 2000 data points, for use with CPU 1515-2 PN
- 4000 data points, for use with CPU 1516-3 PN/DP
- 5000 data points, for use with CPU 1517-3 PN/DP and with CPU 1518-4 PN/DP

The work memory for data is used for buffering the message frames. Longer communication failure times can thus be bridged. The SIPLUS RIC software libraries are based on the standard TIA Portal and can be used on various, mutually compatible types of SIMATIC S7 devices, thus saving hardware costs and programming overhead.

The libraries and licenses are delivered digitally or as a download (OSD, Online Software Delivery). Three variants are available for selection:

- 50 data points ("tags")
- 500 data points
- Unlimited number of data points

Only information objects in monitoring direction (e.g. messages, measured values) are counted.

A license certificate is supplied with the order, which can be used to request activation codes for permanent use of the purchased protocols on the employed hardware (linked to serial number). For more information on this, see <https://support.industry.siemens.com/cs/ww/en/view/109803457>.

The license certificate required for the activation of all telecontrol protocols IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) is available for download in SiePortal after purchase.

<sup>1)</sup> CPU 1510SP-1 PN is only suitable for small installations due to the small amount of work memory. If the CPU is used for other tasks besides the IEC protocol, it is absolutely necessary to check the work memory load beforehand.

Telecontrol systems for comprehensive applications  
SIPLUS RIC for IEC protocol

### SIPLUS RIC libraries for ET 200S

#### Overview

If a SIMATIC ET 200S-based system is to communicate with a Siemens control center, e.g. SIMATIC PCS 7 TeleControl, WinCC TeleControl, WinCC OA, or a control center of a third-party supplier using the IEC 60870-5 telecontrol standard, the IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) telecontrol protocols can be used in the SIMATIC automation systems.

SIPLUS RIC libraries offer an integrated, scalable system based on SIMATIC ET 200S functionalities, for data volumes up to 200 information points.

The non-retain memory can also be used for buffering message frames. Longer communication failure times can thus be bridged. The SIPLUS RIC software libraries are based on the standard SIMATIC Manager or TIA Portal and can be used on various, mutually compatible types of SIMATIC S7 devices – this saves hardware costs and programming overhead.

The libraries and licenses are delivered digitally or as a download (OSD, Online Software Delivery). A license certificate is supplied with the order, which can be used to request activation codes for permanent use of the purchased protocols on the employed hardware (linked to serial number). For more information on this, see <https://support.industry.siemens.com/cs/ww/en/view/109803457>.

The license certificate required for the activation of all telecontrol protocols IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) is available for download in SiePortal after purchase.

### SIPLUS RIC libraries for S7-300

#### Overview

If a SIMATIC S7-300-based system is to communicate with a Siemens control center, e.g. SIMATIC PCS 7 TeleControl, WinCC TeleControl, WinCC OA, or a control center of a third-party supplier using the IEC 60870-5 telecontrol standard, the IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) telecontrol protocols can be used in the SIMATIC automation systems.

SIPLUS RIC libraries offer an integrated, scalable system based on SIMATIC S7-300 functionalities, for the following data volumes:

- 200 information points, for use with CPU 314
- 1000 information points, for use with CPU 315
- 2000 information points, for use with CPU 317
- 5000 information points, for use with CPU 319

The non-retain memory can also be used for buffering message frames. Longer communication failure times can thus be bridged. The SIPLUS RIC software libraries are based on the standard SIMATIC Manager or TIA Portal and can be used on various, mutually compatible types of SIMATIC S7 devices – this saves hardware costs and programming overhead.

The libraries and licenses are delivered digitally or as a download (OSD, Online Software Delivery). A license certificate is supplied with the order, which can be used to request activation codes for permanent use of the purchased protocols on the employed hardware (linked to serial number). For more information on this, see <https://support.industry.siemens.com/cs/ww/en/view/109803457>.

### SIPLUS RIC libraries for S7-400/S7-400H

#### Overview

If a SIMATIC S7-400/S7-400H-based system is to communicate with a Siemens control center, e.g. SIMATIC PCS 7 TeleControl, WinCC TeleControl, WinCC OA, or a control center of a third-party supplier using the IEC 60870-5 telecontrol standard, the IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) telecontrol protocols can be used in the SIMATIC automation systems.

SIPLUS RIC libraries offer an integrated, scalable system based on SIMATIC S7-400/S7-400H functionalities for the following data volumes:

- 1000 information points, for use with CPU 412 or CPU 412H
- 2000 information points, for use with CPU 414 or CPU 414H
- 5000 information points, for use with CPU 410H, CPU 416/CPU 416H or CPU 417/CPU 417H

The data memory, which is limited to 256 MB in the CPU 410H for data blocks generated online, is used for buffering the frames. Longer communication failure times can thus be bridged. The SIPLUS RIC software libraries are based on the standard SIMATIC Manager or TIA Portal and can be used on various, mutually compatible types of SIMATIC S7 devices – this saves hardware costs and programming overhead.

The libraries and licenses are delivered digitally or as a download (OSD, Online Software Delivery). A license certificate is supplied with the order, which can be used to request activation codes for permanent use of the purchased protocols on the employed hardware (linked to serial number). For more information on this, see <https://support.industry.siemens.com/cs/ww/en/view/109803457>.

## Products for specific requirements

### Automatic door controls

#### SIDOOR automatic door controls

##### Design

SIDOOR automatic door control systems

Door control system is the general term for a controller of an access system.

The SIDOOR product family is primarily intended for the operation of sliding doors, whereby these doors can be operated both horizontally and vertically.

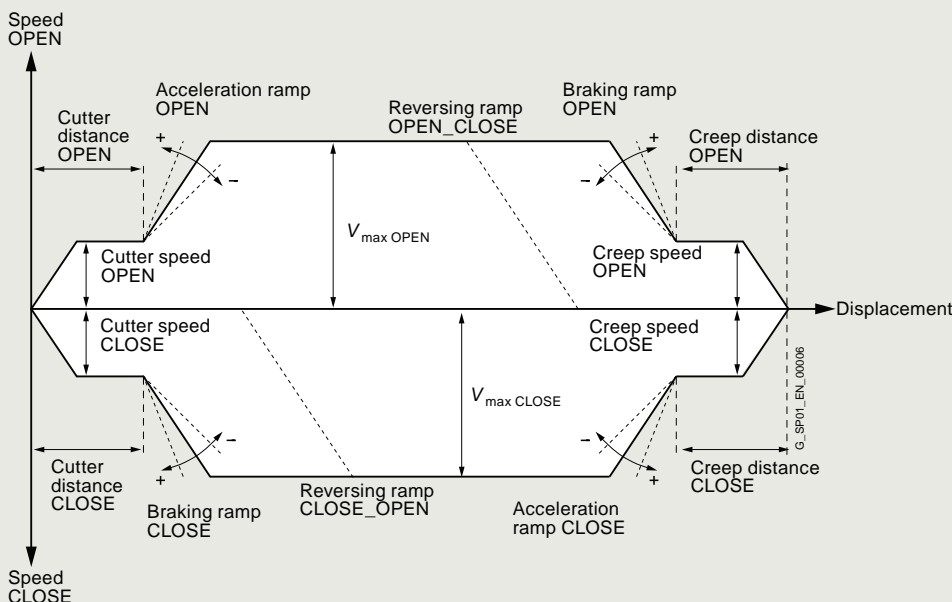

Door control systems are characterized by the fact that there are always two defined states for the open and closed position of the door.

The door is always controlled, regulated and moved between these two positions in accordance with the guidelines of the respective application.

In a defined learn run via "single-button operation", the door system independently determines the values for the door width, the dynamic door weight and the drive direction of the geared motor and stores these data in a non-volatile memory.

The optimum drive characteristics at the door are automatically calculated and are consistently adhered to.

The travel curve transitions are rounded off so that the door movement is smooth and jerk-free.

Creep speed	Reduced speed in the vicinity of the OPEN position of the elevator door (creep distance)
Cutter speed	Reduced speed in the vicinity of the CLOSED position of the elevator door (cutter distance)
Creep distance	Range of door travel in the vicinity of the OPEN position
Cutter distance	Range of door travel in the vicinity of the CLOSED position
$V_{max}$	Maximum permissible door speed

Reversing ramp OPEN_CLOSE	Travel reverses from the OPEN to the CLOSE direction
Reversing ramp CLOSE_OPEN	Travel reverses from the CLOSE to the OPEN direction

##### Note:

When reversing from the open to the close direction, the door is braked with the reversing ramp OPEN\_CLOSE, and starts the closing movement with the acceleration ramp CLOSE.

Travel curve

## Products for specific requirements

### Automatic door controls

#### for elevators

#### Application

The elevator door drive is comprised of a controller and the maintenance-free drive unit, geared motor or gearless EC technology direct drive motor.

Control devices are electronic controllers connected to the power supply via an external power supply unit (SIDOOR NT40 or SIDOOR Transformer). They are generally connected to the higher-level controller via digital or fieldbus interfaces, and can be configured via a user interface.

The SIDOOR AT40 and SIDOOR ATE500E control devices can be used to operate horizontally operated cabin and shaft doors as well as vertical doors for lifting or rolling doors at adjustable speeds and accelerations.

Geared motors form the maintenance-free drive unit in the door drive. The geared motors feature DC motors with non-self-locking gearing, and are speed-controlled. The set force and speed limits are not exceeded. The gearless motor (direct drive) is the maintenance-free drive unit of the door drive.

Operation of the named door drives does not require limit switches. The door width and the "OPEN"/"CLOSE" positions are determined automatically.

The power is transmitted by a toothed belt. The toothed belt passes over a deflector pulley and can be fitted with 2 door clutch holders. This enables it to drive both one-sided and centrally-opening doors. The accessories are not included in the scope of supply, see "Accessories", page 14/25.

#### Design

The product-specific property of the elevator door controllers is based on the fact that the closing weights/closing springs integrated in the shaft doors are also taken into account.

These weights/springs are integrated in the shaft doors so that open doors close automatically if the cabin is not at the relevant floor.

They must also be moved by the elevator door drive in their opening direction and support it in the closing movement.

#### Complete motor mounting

- ① Geared motor
- ② 4 x locking hexagonal safety bolts M5 x 10
- ③ Rubber-metal anti-vibration mount
- ④ 10 x locking hexagonal safety bolts M6 x 16
- ⑤ Mounting bracket for the motor mounting

#### Mounting material for door clutch holder

- ⑥ 2 x locking hexagonal safety bolts M6 x 12
- ⑦ Door clutch holder
- ⑧ Clamping plate

#### Deflector unit and clamping device

- ⑨ Deflector unit
- ⑩ 2 x locking hexagonal safety bolts M6 x 12
- ⑪ Mounting bracket for the deflector unit and tensioning device
- ⑫ Tensioning lug for the deflector unit and tensioning device
- ⑬ Tensioning screw M6 x 30
- ⑭ 10 x locking hexagonal safety bolts M6 x 16
- ⑮ Toothed belt (length 4 m)

① Optional: additional input signal

② CAN or relay module version

③ Terminal module

④ Connection for 24 V DC/400 mA output voltage

⑤ Connection  
- Software Kit

⑥ Input signal connection

⑦ Control panel

⑧ Connector  
- NT40 switched-mode power supply or  
- Mains transformer

⑨ Motor connection

SIDOOR AT40 elevator door drive (relay module version)

SIDOOR AT40 – SIDOOR enables the quick, easy and versatile installation, configuration and operation of a wide range of elevator door systems.

#### Version:

- RELAY (including relay and terminal module)
- CAN (including CAN and terminal module), two controllers are available: SIDOOR AT40 CAN and CAN ADV.
  - Certified by CiA (CiA 301 / CiA 417).
  - The door system can be visualized and parameterized by the elevator controller using the "Virtual Terminal" function.
  - With the SIDOOR AT40 CAN ADV controller, parameters for evaluating mechanical wear can be provided at the door. These parameters can be accessed from the CAN-BUS via the elevator controller or other bus nodes and can be evaluated floor-dependently by an external evaluation logic. It includes, e.g. event counters, maximum current values in the slow end distance of the door, traversing times and energy values of the opening and closing cycles, as well as other performance values.
  - The evaluation can affect the maintenance cycles of the elevator system.

- For dynamic door weights up to 600 kg, depending on motor variant
- Automatic door weight detection
- 4 to 8 kg maximum counterweight (depending on motor version)
- Operating temperature -20 to +50 °C
- Flexible motor management (four different motor types), automatic detection
- Opening width 0.3 to 5 m
- Auxiliary power output 24 V DC  $\pm$  15 %; 0.4 A (short-circuit-proof)
- Output stage short-circuit-proof
- Supports power-optimized operation in the elevator cabin
- Vandal-proof
- IP54 degree of protection for 180 to 600 kg motor versions, gear unit IP40 (SIDOOR M5: entirely IP54)
- The current operating states are indicated via a 7-segment display or a terminal module directly in the elevator door drive or externally. The SIDOOR SOFTWARE KIT or the SIDOOR LINK with the SIDOOR SUPPORT App are used for this, see [Additional units](#), page 14/20.

Control devices > SIDOOR ATE500E elevator door drive

### Overview

SIDOOR ATE500E elevator door drive

The SIDOOR ATE500E elevator door drive enables the quick, easy and versatile installation, configuration and operation of EC technology gearless elevator door systems.

- Design:
  - Relay module
  - CAN module
- For dynamic door weights up to 280 kg
- High control performance and optimized drive characteristic transitions
- Automatic door weight detection (single-button commissioning)
- 6 kg maximum counterweight of the coupled floor door
- Operating temperature -25 to +50 °C without restrictions

- Automatic identification of the connected motor
- Opening width 0.3 to 5 m
- Auxiliary voltage output 24 V DC ± 15%; 0.4 A (short-circuit-proof)
- Output stage short-circuit-proof
- Optimized energy consumption during cabin operation (DCPS)
- Vandal-proof
- IP20 degree of protection
- The current operating states are indicated via a 7-segment display directly in the elevator door drive or externally using the Software Kit, [see Additional units, page 14/20](#).

#### Overview

SIDOOR Transformer

The SIDOOR TRANSFORMER and SIDOOR TRANSFORMER UL are standard power supply units operated with 220-240 V AC, 50/60 Hz, from the SIDOOR product range. They can be used for controllers capable of controlling masses of up to 400 kg.

### Power supplies > Switched-mode power supply

#### Overview

The SIDOOR NT40 switched-mode power supply unit is operated with 230 V AC ( $\pm 15\%$ ), 50/60 Hz, to power the elevator door controllers.

It is especially suitable for door systems with high door weights.

On the output side, the power supply unit delivers a voltage of 36 V DC ( $\pm 3\%$ ) SELV at a rated output power of < 100 W.

In order to enable fast acceleration/deceleration of the doors by the controller, the device can briefly (< 2 s) deliver a current of 15 A (corresponds to a short-time power output of 540 W).

Additional units > Software kit

### Overview

SIDOOR Software Kit

The scope of delivery of the SDOOR Software Kit includes an installation CD.

The CD includes the following functionalities:

SIDOOR User Software	The component that enables the door control system to be configured, parameters to be assigned, and analyzed.
Siemens HCS12 Firmware Loader	This component is used to update the operating software of the door controller.
SIDOOR USB to UART Bridge Driver	This driver is essential for operation of the USB adapter.

#### Note:

Some firmware updates are offered as free downloads in the Siemens Industry Online Support. For information on the availability and acquisition of more firmware, please contact Technical Support.

Additional units > SIDOOR LINK and SIDOOR SUPPORT App

### Overview

SIDOOR LINK

SIDOOR SUPPORT App

A Bluetooth LE 5.0 connection can be established via the SIDOOR LINK to a smartphone or tablet with the SIDOOR SUPPORT app installed.

The SIDOOR SUPPORT app enables easy commissioning and maintenance of a door system with a SIDOOR controller, is suitable for smartphones or tablets as of Android version 9 and is available from the Google Play store.

The SIDOOR LINK is connected to the SIDOOR controller via the respective cable.

You do not need to open the cover of the controller to do this.

#### Note:

If the SIDOOR SUPPORT (app) is in the "Quick adjustment" or "Total adjustment" menu, the drive commands of the controller are blocked via the command inputs.

### Geared motors

#### Overview

SIDOOR geared motors are a combination of gear unit, motor and sensor. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning.

The maintenance-free, variable speed drive unit comprises a DC motor with non-self-locking gearing.

The geared motors must be selected according to the mass to be moved. Two different versions are available for each of the SIDOOR M2 to SIDOOR M5 geared motors, with gear output on the left or on the right: The gear outlet direction is defined as left or right when viewing the gear unit from the front.

- SIDOOR M2 geared motors (max. door weight 120 kg)
  - SIDOOR M2 L (pinion left) 6FB1103-0AT10-5MA0
  - SIDOOR M2 R (pinion right) 6FB1103-0AT11-5MA0
- SIDOOR M3 geared motors (max. door weight 180 kg)
  - SIDOOR M3 L (pinion left) 6FB1103-0AT10-4MB0
  - SIDOOR M3 R (pinion right) 6FB1103-0AT11-4MB0

### Direct drives

#### Overview

SIDOOR MED280 direct drive

SIDOOR direct drives are a combination of motor and sensor. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning.

The maintenance-free drive unit consists of a gearless, speed-controlled, electronically commutated motor with non-self-locking gearing.

Direct drives are designed for certain masses and can control both drive directions.

- SIDOOR MED280 direct drive for max. 280 kg (6FB1203-0AT12-7DA0)

### Accessories

#### Overview

#### **A range of accessories is available for SIDOOR elevator door drive systems with geared motors:**

This is necessary to ensure low-noise operation of the door leaves by the controller. The geared motors can be optimally integrated into the respective door drive system.

#### Rubber-metal anti-vibration mounts for geared motors

To ensure low-noise door operation, SIDOOR geared motors are integrated in the door system using rubber-metal anti-vibration mounts.

- Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0 for SIDOOR M2 and SIDOOR M3 geared motors.
- Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0 for SIDOOR M4 and SIDOOR M5 geared motors.

Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0

Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0

#### Mounting brackets

Two different mounting brackets are available with elongated holes:

- Mounting bracket 6FB1104-0AT01-0AS0 for the geared motors for flexible accommodation of the rubber-bonded metal
- Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit. For setting the toothed belt to the required belt tension.

Mounting bracket 6FB1104-0AT01-0AS0 for mounting the geared motor

Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit

#### Door clutch holder

The door clutch holder serves to connect the respective door leaf by means of a toothed belt while also functioning as a toothed-belt lock. One door clutch holder per door leaf is required. The toothed-belt lock can accommodate both open ends of the toothed belt.

A door clutch holder is available for each toothed belt width:

- Width 12 mm: 6FB1104-0AT01-0CP0
- Width 14 mm: 6FB1104-0AT02-0CP0

Door clutch holder 6FB1104-0AT01-0CP0 (packaging size = 1 unit)

#### Deflector unit

The deflector unit 6FB1104-0AT03-0AS0 contains an embedded belt pulley which can be mounted on the door system.

The STS toothed belt is redirected via this deflector unit (toothed belt width 12 mm or 14 mm).

Deflector unit 6FB1104-0AT03-0AS0

## Products for specific requirements

## Products for specific requirements

### Automatic door controls

#### for industrial applications

##### Application

The door drive system consists of a controller and a maintenance-free drive unit, the geared motors.

Control devices are electronic controllers connected to the power supply via an external power supply unit. They are generally connected to the higher-level controller via digital or fieldbus interfaces, and can be configured via a user interface.

These controllers are available for selection for industrial applications:

- SIDOOR ATD401W, digital I/O, masses of up to 700 kg
- SIDOOR ATD420W, connected to the higher-level controller via PROFIBUS interface, masses of up to 700 kg
- SIDOOR ATD430W, connected to the higher-level controller via PROFINET interface, masses of up to 700 kg

The safe functions – force limitation, energy limitation and end position detection – fulfill the requirements according to EN ISO 13849-1 for Category 2 and Performance Level d. The drives are suitable for power-operated guards according to EN ISO 14120

Geared motors form the maintenance-free drive unit in the door drive. The geared motors are DC motors with non-self-locking gearing, and are speed-controlled. The set force and speed limits are not exceeded.

Operation of the named door drives does not require limit switches. The door width and the "OPEN"/"CLOSE" positions are determined automatically.

The power is transmitted by a toothed belt. The toothed belt passes over a deflector pulley and can be fitted with 2 door clutch holders. This enables it to drive both one-sided and centrally-opening doors. The accessories are not included in the scope of supply, see "Accessories", page 14/45.

### Overview

#### SIDOOR ATD401W

The SIDOOR ATD401W enables the quick, easy and versatile installation, configuration and operation of a wide range of industrial door drive systems.

- Relay module design
- Masses of up to 700 kg
- Automatic determination of the door weight and friction during the learn run
- Digital inputs, for example for direct connection of a light barrier as type 2 ESPE (electro-sensitive protective equipment) according to EN 61496-1
- 3 relay outputs for position feedback and reversing feedback

- Operating temperature -20 to +50 °C
- Flexible motor management, automatic recognition of the geared motor
- Opening width 0.3 to 5 m
- Auxiliary voltage output 24 V DC  $\pm$  15%; 0.4 A (short-circuit-proof)
- Output stage for the motor control is short-circuit-proof
- Indicates the current operating states on a 7-segment display directly on the controller or using the Software Kit or the SIDOOR LINK with the SIDOOR SUPPORT App

Control devices > SIDOOR ATD420W

### Overview

SIDOOR ATD420W

The SIDOOR ATD420W can be used to operate horizontal sliding doors. The drive system has been specially designed for use in a very wide range of machine tools. The communication-capable ATD420W controller offers complete flexibility for integration with a machine tool via PROFIBUS

- Masses of up to 700 kg
- Integrated PROFIBUS interface
- 5 freely parameterizable digital inputs for signal acquisition, of which one input is optionally parameterizable for:
  - Connection of a light barrier as type 2 ESPE (electro-sensitive protective equipment) according to EN 61496-1
  - Connection of a pressure-sensitive edge according to ISO 13856-2
- 2 relay contacts for additional position signals
- Automatic determination of the door weight and friction during the learn run
- Parameter assignment and analysis of the door parameters via PROFIdrive

- Operating temperature -20 to +50 °C
- Flexible motor management, i.e. automatic recognition of the geared motor
- Assisted drive (motor-assisted movement of the door)
- Impulse stop (door stopped automatically by applying light force)
- Impulse drive (automatic door movement after applying light force)
- Opening width 0.3 to 5 m
- Auxiliary power output 24 V DC  $\pm 15\%$  and 0.4 A (short-circuit-proof)
- Output stage for the motor control is short-circuit proof

### Overview

SIDOOR ATD430W

The SIDOOR ATD430W machine tool door drive can be used to operate horizontal sliding doors. The drive system has been specially designed for use in a very wide range of machine tools. The communication-capable ATD430W controller offers complete flexibility for integration into a machine tool via PROFINET.

- Masses of up to 700 kg
- Integrated PROFINET interface (2 RJ45 ports)
- 5 freely parameterizable digital inputs for signal acquisition, of which one input is optionally parameterizable for:
  - Connection of a light barrier as type 2 ESPE (electro-sensitive protective equipment) according to EN 61496-1
  - Connecting a pressure-sensitive edge according to ISO 13856-22, relay contacts for additional position signals
- 2 relay contacts for additional position signals
- Automatic determination of the door weight and friction during the learn run

- Parameter assignment and analysis of the door parameters
- Operating temperature -20 to +50 °C
- Flexible motor management, i.e. automatic recognition of the geared motor
- Assisted drive (motor-assisted movement of the door)

### Power supplies

#### Overview

The power supplies can be used for the various SIDOOR controllers:

SIDOOR Transformer and Transformer UL power supply units:  
For masses of up to 400 kg and moderate performance.

- SIDOOR AT40 and ATE500E elevator door drives
- SIDOOR ATD4xxW machine tool door drives
- SIDOOR ATE53xS platform screen door drives

SIDOOR NT40 switched mode power supply:  
For masses of up to 600 kg and maximum performance.

- SIDOOR AT40 and ATE500E elevator door drives
- SIDOOR ATD4xxW machine tool door drives

SITOP PSU8200 3-phase stabilized power supply,  
36 V DC/13 A:

For masses of up to 700 kg and maximum performance.

- SIDOOR ATD4xxW machine tool door drives

#### Overview Power supply unit

SIDOOR Transformer

The SIDOOR TRANSFORMER and SIDOOR TRANSFORMER UL are standard power supply units operated with 220-240 V AC, 50/60 Hz, from the SIDOOR product range. They can be used for controllers capable of controlling masses of up to 400 kg.

For further information [see](#) page 14/17.

#### Overview Switched-mode power supply

The SIDOOR NT40 switched-mode power supply unit is operated with 230 V AC ( $\pm 15\%$ ), 50/60 Hz, to power the elevator door controllers.

It is especially suitable for door systems with high door weights.

On the output side, the power supply unit delivers a voltage of 36 V DC ( $\pm 3\%$ ) SELV at a rated output power of < 100 W.

In order to enable fast acceleration/deceleration of the doors by the controller, the device can briefly (< 2 s) deliver a current of 15 A (corresponds to a short-time power output of 540 W).

For further information [see](#) page 14/19.

### Power supplies > 3-phase, 36 V DC

#### Overview

The 3-phase SITOP PSU8200 are technology power supplies for challenging solutions. The wide-range input allows a connection to almost any electricity supply network worldwide and ensures a high degree of safety even if there are large voltage fluctuations.

To further increase 36 V availability, SITOP power supplies can be combined with redundancy modules.

#### Product highlights

- 3-phase, 36 V DC / 13 A
- Input voltage 320 ... 575 V AC
- Up to 94% efficiency
- cULus, cCSAus, ABS and DNV GL certifications

Article number	<b>6EP3446-8SB10-0AY0</b>
product brand name	SITOP PSU8200
type of current supply	36 V/13 A
<b>input</b>	
type of the power supply network	3-phase AC
supply voltage at AC	
• minimum rated value	400 V
• maximum rated value	500 V
• initial value	320 V
• full-scale value	575 V
wide range input	Yes
buffering time for rated value of the output current in the event of power failure minimum	15 ms
operating condition of the mains buffering	at Vin = 400 V
line frequency	50 Hz/60 Hz
line frequency	47 ... 63 Hz
input current	
• at rated input voltage 400 V	1.2 A
• at rated input voltage 500 V	1 A
current limitation of inrush current at 25 °C maximum	16 A
I2t value maximum	0.8 A <sup>2</sup> ·s
fuse protection type	none
fuse protection type in the feeder	Required: 3-pole connected miniature circuit breaker 6 ... 16 A characteristic C or circuit breaker 3RV2011-1DA10 (setting 3 A) or 3RV2711-1DD10 (UL 489)
<b>output</b>	
voltage curve at output	Controlled, isolated DC voltage
output voltage at DC rated value	36 V
output voltage	
• at output 1 at DC rated value	36 V 36 V
output voltage adjustable	Yes; via potentiometer
adjustable output voltage	36 ... 42 V; max. 480 W
relative overall tolerance of the voltage	3 %
relative control precision of the output voltage	
• on slow fluctuation of input voltage	0.1 %
• on slow fluctuation of ohm loading	0.2 %
residual ripple	
• maximum	100 mV
voltage peak	
• maximum	200 mV
display version for normal operation	Green LED for 36 V OK
type of signal at output	Relay contact (NO contact, rating 60 V DC/ 0.3 A) for 36 V OK
behavior of the output voltage when switching on	No overshoot of Vout (soft start)
response delay maximum	2.5 s

### Overview

SIDOOR Software Kit

The scope of delivery of the SIDOOR Software Kit includes an installation CD.

The CD includes the following functionalities:

SIDOOR User Software	The component that enables the door control system to be configured, parameters to be assigned, and analyzed.
Siemens HCS12 Firmware Loader	This component is used to update the operating software of the door controller.
SIDOOR USB to UART Bridge Driver	This driver is essential for operation of the USB adapter.

#### Note:

Some firmware updates are offered as free downloads in the Siemens Industry Online Support. For information on the availability and acquisition of more firmware, please contact Technical Support.

### Additional units > SIDOOR LINK and SIDOOR SUPPORT App

#### Overview

SIDOOR LINK

SIDOOR SUPPORT App

A Bluetooth LE 5.0 connection can be established via the SIDOOR LINK to a smartphone or tablet with the SIDOOR SUPPORT app installed.

The SIDOOR SUPPORT app enables easy commissioning and maintenance of a door system with a SIDOOR controller, is suitable for smartphones or tablets as of Android version 9 and is available from the Google Play store.

The SIDOOR LINK is connected to the SIDOOR controller via the respective cable.

You do not need to open the cover of the controller to do this.

#### Note:

If the SIDOOR SUPPORT (app) is in the "Quick adjustment" or "Total adjustment" menu, the drive commands of the controller are blocked via the command inputs.

### Geared motors

#### Overview

The SIDOOR geared motor is a combination of a gear unit, motor and incremental encoder matched to the complete system. It is easy to connect to the controller via the interface provided, and is automatically detected during commissioning.

The maintenance-free, variable speed drive unit comprises a DC motor with non-self-locking gearing. All geared motors are available with the output shaft on the left or right. The view is toward the front of the gear unit.

The "mass to be moved" has to be taken into account when selecting the geared motor:

The weight to be moved is calculated from the sum of the mass equivalent of the moment of inertia of the motor rotor, the moved door weight and the moved door mechanism weight. The weight of the door to be moved and the moved weight of the door mechanism depend on the application. You can find additional information in the system manual.

The **output shaft** is appropriately prepared for the mechanical coupling of the door.

- SIDOOR M3, M4 and M5 Basic motors: Output gear with 56 mm effective diameter for the use of a S8M toothed belt (see Accessories).
- Advanced motors: Gearbox output shaft with groove and feather key A 5x5 according to DIN 6885; the output gear design and effective diameter can be freely configured between 28 mm and 122 mm. Advanced motors are recommended, among other things, for a mechanical coupling to the door via gear rack or chain.

## Products for specific requirements

Automatic door controls  
for industrial applications

### Accessories

#### Overview

An extensive range of accessories is available for the door control drives.

This is necessary to ensure low-noise operation of the door leaves by the motor. The geared motors can be optimally integrated into the respective door drive system.

#### Accessories for all controllers for industrial applications

##### Rubber-metal anti-vibration mounts for geared motors

To ensure low-noise door operation, SIDOOR geared motors are integrated in the door system using rubber-metal anti-vibration mounts.

- Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0 for SIDOOR M3 and SIDOOR MDG3 geared motors
- Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0 for SIDOOR M4 and MDG4 as well as SIDOOR M5 and MDG5 geared motors

Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0 for geared motors with masses to be moved of up to 180 kg

Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0 for geared motors with masses of up to 700 kg

#### Mounting bracket

Two different mounting brackets are available with elongated holes:

- Mounting bracket 6FB1104-0AT01-0AS0 for mounting SIDOOR geared motors, for flexible accommodation of the rubber-bonded metal
- Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit. For setting the toothed belt to the required belt tension.

Mounting bracket 6FB1104-0AT01-0AS0 for mounting the geared motor

Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit

#### Mounting rail holder

The standard mounting rail holder 6FB1144-0AT00-3SA0 is available for mounting controllers on the TH 35 standard mounting rail according to IEC 60715.

#### Door clutch holder

The door clutch holder serves to connect the respective door leaf by means of a toothed belt while also functioning as a toothed-belt lock. One door clutch holder per door leaf is required. The toothed-belt lock can accommodate both open ends of the toothed belt.

A door clutch holder is available for each toothed belt width:

- Width 12 mm: 6FB1104-0AT01-0CP0
- Width 14 mm: 6FB1104-0AT02-0CP0

Door clutch holder 6FB1104-0AT01-0CP0 (packaging size = 1 unit)

#### Deflector unit

The deflector unit 6FB1104-0AT03-0AS0 contains an embedded belt pulley which can be mounted on the door system. The STS toothed belt is redirected via this deflector unit.

Deflector unit 6FB1104-0AT03-0AS0

## Products for specific requirements

Automatic door controls  
for industrial applications

### Accessories

#### Overview

##### STS toothed belt

The door system is moved between the end positions of the door using the STS toothed belts. Two different toothed belt lengths can be ordered for each toothed belt width.

- Toothed belt width 12 mm:
  - Length 4 m: 6FB1104-0AT01-0AB0
  - Length 45 m: 6FB1104-0AT02-0AB0
- Toothed belt width 14 mm:
  - Length 4 m: 6FB1104-0AT03-0AB0
  - Length 55 m: 6FB1104-0AT04-0AB0

Toothed belt 6FB1104-0AT01-0AB0 (width 12 mm, length 4 m)

Toothed belt 6FB1104-0AT02-0AB0 (width 12 mm, length 45 m)

##### MDG-PULLEY belt pulley

This belt pulley is used for DC geared motors with the S8M toothed belt with an effective diameter of 56 mm.

- for SIDOOR MDG4, MDG5 DC geared motors: 6FB1104-0AT14-0AS1
- for SIDOOR MDG3 DC geared motors: 6FB1104-0AT10-0AS1

SIDOOR MDG-PULLEY 14-S8M-56, 6FB1104-0AT14-0AS1

SIDOOR MDG-PULLEY 10-S8M-56, 6FB1104-0AT10-0AS1

##### Accessories for machine tool door drives only

##### SIDOOR MDG-CABLE cable set

This cable set connects the ATD4xxW door controller to the SIDOOR MDG3, MDG 4 and MDG 5 geared motors. Various lengths are available.

- Length 5 m: 6FB1104-0AT05-0CB2
- Length 10 m: 6FB1104-0AT10-0CB2
- Length 15 m: 6FB1104-0AT15-0CB2
- Length 20 m: 6FB1104-0AT20-0CB2

## Products for specific requirements

### Automatic door controls

#### for railway applications

##### Overview

The product-specific application/requirement lies in complying with the special railway requirements concerning functional safety.

Interior railway doors have a closing spring which must always bring the door into the "CLOSED" position. This applies to either side, even when a train car is inclined at 10°.

These specific operating states are handled by the door controller.

## Products for specific requirements

Automatic door controls  
for railway applications

Control devices > Platform screen door drive

### Overview

SIDOOR ATE530S/531S wiring diagram

The SIDOOR ATE53xS door controller is an “intelligent” door drive which can be used for safety-oriented operation of platform screen doors (PSD) according to individual requirements. Siemens has once again shown just how easy integration can be with the innovative SIDOOR ATE53xS platform screen door drive in conjunction with SIDOOR MED280 or MEG251 motors. The PROFINET module integrated in the SIDOOR ATE53xS enables standardized, certified connection to PROFINET IO systems.

- Use of standard automation components
- Full integration into TIA Portal and STEP 7 thanks to PROFINET connection
- Parameter assignment and monitoring of door control parameters via the PROFINET interface (function blocks available as example applications in SIOS).

- Application example: Synchronization of two-panel and independent platform screen doors with SIDOOR ATE530S PROFINET EC door drive and S7-1500 CPU via TIA Portal <https://support.industry.siemens.com/cs/ww/en/view/109480495>
- Application example: Safety-oriented automation of platform screen doors with SIDOOR ATE530S PROFINET EC door drive and S7-1500 CPU via TIA Portal <https://support.industry.siemens.com/cs/ww/en/view/109477186>
- Read-in of two safe signals (two-channel, antivalent)
- High level of system safety thanks to safe torque off (e.g. self-release in the event of a fault)
- Firmware update for all SIDOOR controllers on an entire platform possible centrally via TCP/IP
- SIL 2 according to IEC 62061

Control devices > Control device for gap fillers

### Overview

①a ①b 24 V digital input, isolated

② Motor connection

③ Power supply input, 36 V DC

④ Digital output (relay)

⑤ Serial service interface, Software Kit connection

⑥ 24 V DC/0.4 A output, for external components

#### SIDOOR ATE530G

The SIDOOR ATE530G drive control is designed for controlling gap fillers between external train doors and the platform edge. The gap filler facilitates easy access for passengers.

The innovative SIDOOR ATE530G drive solution enables operation of a gap filler with adjustable speed, acceleration and motor currents.

A project-specific motor is used depending on the application. The SIDOOR ATE530G controller is activated by digital signals from a higher-level door control, and reports information about its current state via digital signals back to the door control.

The following drive functions are supported:

- System start-up after power failure
- "Extend", "Retract" command
- Gap filler is moved by a travel curve profile
- Obstruction detection
- Ice-breaker function  
Icing can be shifted broken by repeated extension and retraction of the gap filler with increased force.
- Reversing at the platform edge

The SIDOOR ATE530G controller fulfills Basic Integrity in accordance with EN 50657:2017

## Products for specific requirements

Automatic door controls  
for railway applications

Control devices > Interior railway door drives

### Overview

SIDOOR ATD400T interior railway door drive

The SIDOOR ATD400T interior railway door drive is an "intelligent" door drive which enables interior and gangway doors to be opened and closed at adjustable speeds and accelerations.

- Relay module design
- For dynamic door weights up to 180 kg
- Automatic door weight detection
- Operating temperature -20 to +70 °C <sup>1)</sup>
- Flexible motor management (two different motor types), automatic detection
- Opening width 0.25 to 4 m
- Door can be operated with and without closing springs (60 to 80 N)
- With two identical door leaves, can be used up to a train inclination of 0 to 10%
- Forces and energies are limited in accordance with EN 14752
- EMC according to EN 50121-3-2
- Fulfills HL3 according to fire protection standard EN 45545-2 (Railway applications – Fire protection on rail vehicles)
- Vandal-proof

#### 1) Note:

- Maximum output current at 24 V DC:
  - 0.4 A at ≤ 55 °C ambient temperature during operation
  - 0.1 A from 55 °C to 70 °C ambient temperature during operation, with restrictions at operating temperatures > 55 °C
- Maximum ambient temperature during operation:
  - 55 °C
  - 70 °C with restrictions at operating temperatures > 55 °C
- Restrictions at operating temperatures > 55 °C:
  - Use the 24 V output voltage only for operating the control inputs (max. 0.1 A)
  - Use a sufficiently large (at least 350 x 350 mm), unpainted metal mounting plate
  - The maximum drive parameters are restricted to the default values
  - If temperature class T3 according to EN 50155 is used, the maximum air temperature of 85 °C must not be exceeded near the printed-circuit board

Additional units > Software kit

### Overview

#### SIDOOR Software Kit

The scope of delivery of the SIDOOR Software Kit includes an installation CD.

The CD includes the following functionalities:

SIDOOR User Software	The component that enables the door control system to be configured, parameters to be assigned, and analyzed.
Siemens HCS12 Firmware Loader	This component is used to update the operating software of the door controller.
SIDOOR USB to UART Bridge Driver	This driver is essential for operation of the USB adapter.

#### Note:

Some firmware updates are offered as free downloads in the Siemens Industry Online Support. For information on the availability and acquisition of more firmware, please contact Technical Support.

### Geared motors

#### Overview

SIDOOR motors are speed controlled, taking set force and speed limits into account. The gear outlet direction is defined as left or right when viewing the gear unit from the front. The power is transmitted by a toothed belt. The toothed belt passes over a deflector pulley and can be fitted with 2 door clutch holders. This enables it to drive both one-sided and centrally-opening doors.

SIDOOR geared motors are available in two technological versions.

- 1. DC technology in version  
(area of application: interior railway doors)
  - DC geared motor  
SIDOOR geared motors are a combination of gear unit, motor, and encoder. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning. The variable speed drive unit comprises a speed-controlled DC motor with non-self-locking gearing.
- 2. EC technology in version  
(area of application: platform screen doors)
  - EC direct drive  
SIDOOR direct drives are a combination of motor and sensor. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning. The maintenance-free drive unit consists of a gearless, speed-controlled, electronically commutated motor. The EC direct drive can be fitted in various mounting orientations, facilitating reduced inventory management and minimizing assets.
  - EC geared motors  
EC geared motors are electronically commutated DC motors with non-self-locking gearing and are speed-controlled. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning. Due to the brushless drive technology, EC geared motors are subject to less abrasion compared with DC geared motors and thus have a longer service life. On account of the brushless drive technology, no commutation noises come from this motor, so it generates less noise than the DC geared motors.

#### Motors for interior railway door drives

The following **DC geared motors** are available for interior railway door drives. They should be selected according to the dynamic door weight.

- SIDOOR MDG180 geared motors, compliance with fire protection standard EN 45545-2 (max. door weight 180 kg)
  - SIDOOR MDG180 L EN 45545-2 (pinion left) 6FB1103-0AT16-4MB0
  - SIDOOR MDG180 R EN 45545-2 (pinion right) 6FB1103-0AT15-4MB0
- SIDOOR M3 geared motors (max. door weight 180 kg)
  - SIDOOR M3 L (pinion left) 6FB1103-0AT10-4MB0
  - SIDOOR M3 R (pinion right) 6FB1103-0AT11-4MB0

#### Motors for platform screen door drives

##### EC technology:

- SIDOOR MEG251 geared motors (max. door weight 250 kg)
  - SIDOOR MEG251 L (pinion left), 6FB1203-5AT00-7MP0
  - SIDOOR MEG251 R (pinion right), 6FB1203-5AT01-7MP0

### Direct drives

#### Overview

SIDOOR MED280 direct drive

SIDOOR direct drives are a combination of motor and sensor. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning.

The maintenance-free drive unit consists of a gearless, speed-controlled, electronically commutated motor with non-self-locking gearing.

Direct drives are designed for certain masses and can control both drive directions.

- SIDOOR MED280 direct drive for max. 280 kg (6FB1203-0AT12-7DA0)

### Accessories

#### Overview

A comprehensive range of accessories is available for the SIDOOR systems. This is necessary to ensure low-noise operation of the door leaves by the controller.

#### Accessories for SIDOOR DC and EC geared motors

##### Rubber-metal anti-vibration mount

To ensure low-noise door operation, the SIDOOR geared motors are integrated in the door system using rubber-metal anti-vibration mounts.

- Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0 for SIDOOR M3 and SIDOOR MDG180 DC geared motors (also for EN 45545-2) and SIDOOR MEG251 EC geared motors (door weights up to 250 kg)
- Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0 for SIDOOR M4 DC geared motors (door weights up to 400 kg)

Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0

Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0

##### Mounting bracket

Two different mounting brackets are available with elongated holes:

- Mounting bracket 6FB1104-0AT01-0AS0 for SIDOOR M3 and SIDOOR MDG180 DC geared motors (also for EN 45545-2) and SIDOOR MEG251 EC geared motors for flexible accommodation of the rubber-bonded metal.
- Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit, this enables the toothed belt to be set to the required belt tension.

Mounting bracket 6FB1104-0AT01-0AS0 for mounting the geared motor

Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit

##### Door clutch holder

The door clutch holder 6FB1104-0AT01-0CP0 serves to connect the respective door leaf by means of a toothed belt while also functioning as a toothed-belt lock. One door clutch holder per door leaf is required. The toothed-belt lock can accommodate both open ends of the toothed belt.

Door clutch holder 6FB1104-0AT01-0CP0 (packaging size = 1 unit)

##### Deflector unit

The deflector unit 6FB1104-0AT03-0AS0 contains an embedded belt pulley which can be mounted on the door system.

The STS toothed belt is redirected via this deflector unit.

Deflector unit 6FB1104-0AT03-0AS0

##### STS toothed belt

The door system is moved between the end positions of the door using the STS toothed belt 6FB1104-0AT0.-0AB0. Two different toothed belt lengths are available.

Toothed belt 6FB1104-0AT01-0AB0, length 4 m

Toothed belt 6FB1104-0AT02-0AB0, length 45 m

## Products for specific requirements

### Condition monitoring systems

#### Condition monitoring systems, SIPLUS CMS1200 Condition Monitoring System

##### Introduction

With the Condition Monitoring System from Siemens you can constantly monitor your machines and plants. Maintenance procedures can be planned better and only performed when they are actually necessary – predictive maintenance.

##### Overview SIPLUS CMS1200 Condition Monitoring System

The SIPLUS CMS1200 Condition Monitoring System is part of SIMATIC S7-1200 and is designed for the early detection of mechanical damage.

It provides the following benefits:

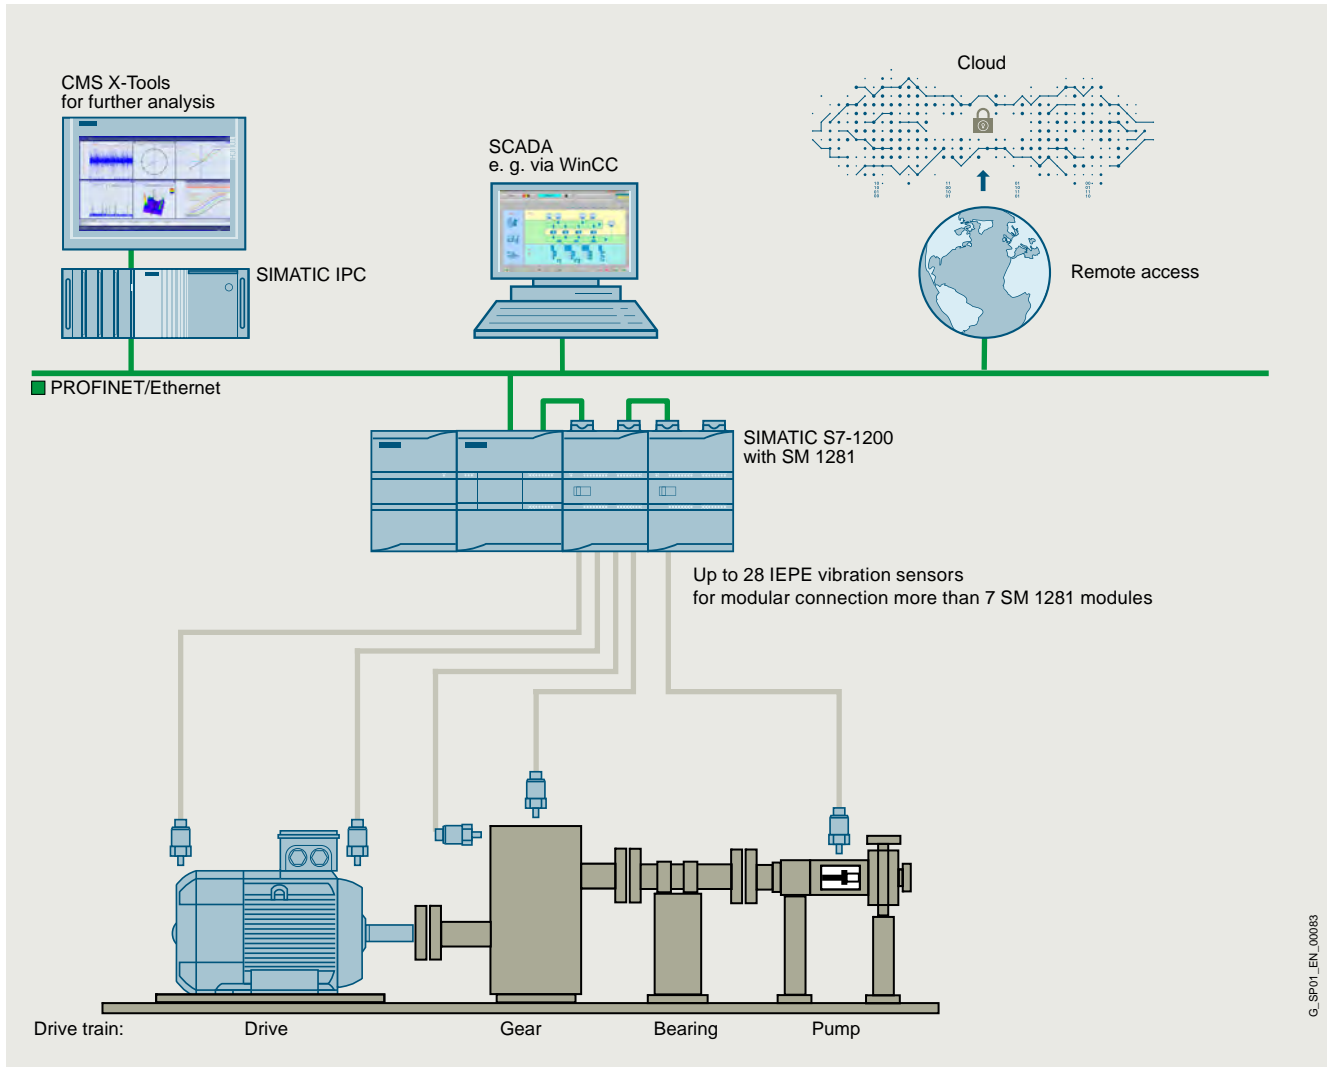

- vRMS machine monitoring in acc. with ISO 10816-3
- aRMS machine monitoring
- Detailed identification of damage with frequency-selective diagnostics
- Raw data recording and export for Drivetrain Analyzer X-Tools
- Trend recording and analysis
- Signaling of limit violations
- Permanent monitoring to protect the machines
- Effective monitoring of important processes and systems
- Early detection of damage
- Scheduled maintenance instead of spontaneous repair
- Reduction in maintenance costs
- Increase in system availability
- Optimum utilization of the service life of the units

## Products for specific requirements

### Condition monitoring systems

#### SIPLUS CMS1200 Condition Monitoring System

#### Design

SIPLUS CMS1200 Condition Monitoring System

SIPLUS CMS1200 forms part of SIMATIC S7-1200 and is made up of a maximum of 7 SM 1281 Condition Monitoring modules.

<b>Application range:</b>	
Mechanical components	Motors, generators, fans, pumps, wind mills, etc.
Damage analysis	Unbalance, misalignment, roller bearings, etc.
<b>Analytical procedures:</b>	
Characteristic values	<ul style="list-style-type: none"> <li>Bearing monitoring: aRMS</li> <li>Vibration monitoring: vRMS based on ISO 10816-3</li> <li>Diagnostic characteristic value: DKW</li> </ul>
Vibration analysis	FFT, envelope curve, fingerprint comparison, trend analysis parameterizable

<b>Monitoring function:</b>	
Characteristic values	Adjustable limiting value for aRMS, vRMS and DKW: Warning, alarm
Frequency spectra	Adjustable warning and alarm bands
<b>Recording function</b>	
Saving	Raw data logging: Manually or event-triggered, FFT snapshot, characteristic values, long-term trend recording
<b>Output</b>	
Parameterization and visualization	TIA Portal and web browser

<b>Weights</b>	
Weight, approx.	260 g

## Products for specific requirements

Condition monitoring systems

SIPLUS CMS1200 Condition Monitoring System

### Accessories

#### Overview

##### SIPLUS CMS1200 SM 1281 shield clamp set

CMS1200 accessories

SIPLUS CMS1200 SM 1281 shield clamp set,  
6AT8007-1AA20-0AA0

An additional shield clamp set must be ordered for the EMC-compliant connection of cables to the SIPLUS CMS1200 SM 1281 Condition Monitoring.

The shield clamp set comprises two shield clamps and five terminal clamps. One shield clamp is screwed on above and one below the module. The sensor cable shields are connected to the shield clamps by means of the terminal clamps.

##### VIB-SENSOR vibration sensors

VIB-SENSOR S01 vibration sensor

- VIB-SENSOR S01 vibration sensor, 6AT8002-4AB00
- VIB-SENSOR S02 vibration sensor, 6AT8008-2AA00-0AA0
- VIB-SENSOR S03 vibration sensor, 6AT8008-2AA02-0AA0

The VIB-SENSOR vibration sensor with IEPE (integrated electronics piezo-electric) interface can be directly connected to the CMS1200 SM1281 Condition Monitoring module.

The sensor detects vibration accelerations.

A threaded screw with an M8 male thread for mounting to the measuring point is included in the scope of delivery. The connecting cable is connected to the vibration sensor via the MIL connector.

##### SIPLUS CABLE-MIL connecting cables

SIPLUS CABLE-MIL connecting cables

- SIPLUS CABLE-MIL connecting cables 6AT8002-4AC03, 6AT8002-4AC10 and 6AT8008-2BA12-0AA0

The VIB-SENSOR vibration sensor is connected to the SIPLUS CMS1200 SM1281 Condition Monitoring module by means of the SIPLUS CMS CABLE-MIL connecting cable.

This high-quality industrial cable is made of black polyurethane and is pre-assembled on one end with a MIL connector (MIL-C5015). The open cable end of the shielded two-wire cable is connected directly to the screw terminals of the basic unit.

The connecting cable is available in lengths of 3 m, 10 m and 30 m.

#### **SIMATIC HMI operator control and monitoring systems – efficient machine-level operator control and monitoring**

Equipment for monitoring and operator control is needed wherever people have to work with or on machinery and plants performing diverse tasks from cylinder driers to waste compactors. It is not difficult to find the right device for your specific task. The challenge is to find a solution that is future-proof and flexible, that can be integrated into higher-level networks, and that can also meet the ever-increasing demands for transparency and data provision. SIMATIC HMI Panels have proven their value in a variety of different applications in all industrial sectors over many years. The range of the systems in use is just as wide as that of the applications and technologies in the respective plants.

SIMATIC HMI stands for highly efficient machine-level operator control and monitoring and has some unique advantages:

- Efficient engineering  
Visualization can be created more quickly and easily than ever before.
- Innovative design and operation  
Visualization becomes the outstanding feature of the machine.
- Brilliant HMI devices  
The right HMI device for every application.
- Backup – with security  
Protection for investments and know-how, secure operation.
- Commissioning in the fast lane  
Lose no time with testing and servicing.
- Openness with PC-based  
For flexible, independent applications

More information is available at  
<http://www.siemens.com/hmi>

#### **SIMATIC WinCC Unified system – unlimited visualization for every application**

SIMATIC WinCC Unified is a totally new visualization system for meeting the challenges of digitalization in machine and plant construction.

State-of-the-art hardware and software technologies make this possible now and in the future. Tried and tested engineering in the TIA Portal, the latest web technology and great reserves of performance for the coming years combined with the freedom to implement your ideas as you imagine them.

More information is available at  
<http://www.siemens.com/wincc-unified>

#### **SIMATIC HMI software – a lot more than just visualization software**

With the SIMATIC WinCC (TIA Portal), SIMATIC WinCC and SIMATIC WinCC Open Architecture product families, SIMATIC HMI covers the entire engineering and visualization software spectrum for the human machine interface.

- Almost the entire range of SIMATIC HMI devices can be configured with SIMATIC WinCC (TIA Portal), the successor to SIMATIC WinCC flexible.  
The functionality covers both visualization tasks at machine level and SCADA applications on PC-based multi-user systems.
- The current version 7.5 of SIMATIC WinCC is available for extremely complex process visualization tasks and SCADA applications, e.g. taking account of redundant solutions and vertical integration all the way to plant intelligence solutions.
- Ultimately, SIMATIC WinCC Open Architecture addresses applications that require extensive customer-specific adaptations or manage large and/or complex applications, as well as projects that demand special system requirements and functions.

More information is available at  
<http://www.siemens.com/hmi-software>

#### **SIMATIC WinCC Unified visualization software**

SIMATIC WinCC Unified software enables access to open interfaces, modern web technologies and consistent integration in order to implement modern visualization concepts simply and easily in the TIA Portal.

More information is available at  
<http://www.siemens.com/wincc-unified-software>

#### **SIMATIC HMI – brilliant and rugged HMI devices**

##### Basic HMI – for the entry level

- Key Panels  
Preassembled and ready for installation, for conventional operator panels. No configuration required with WinCC!

More information is available at  
<http://www.siemens.com/key-panels>

- Basic Panels  
The entry level series for simple HMI applications.

More information is available at  
<http://www.siemens.com/basic-panels>

##### Advanced HMI Panel-based - for higher requirements

- New: SIMATIC HMI Unified Comfort Panels  
High-end performance and state-of-the-art technology for the future of visualization.

More information is available at  
<http://www.siemens.com/wincc-unified-hardware>

- Comfort Panels  
High-end functionality for demanding indoor and outdoor HMI applications.

More information is available at  
<http://www.siemens.com/comfort-panels>

- Mobile Panels  
Portable HMI devices for mobile deployment on site.

More information is available at  
<http://www.siemens.com/mobile-panels>

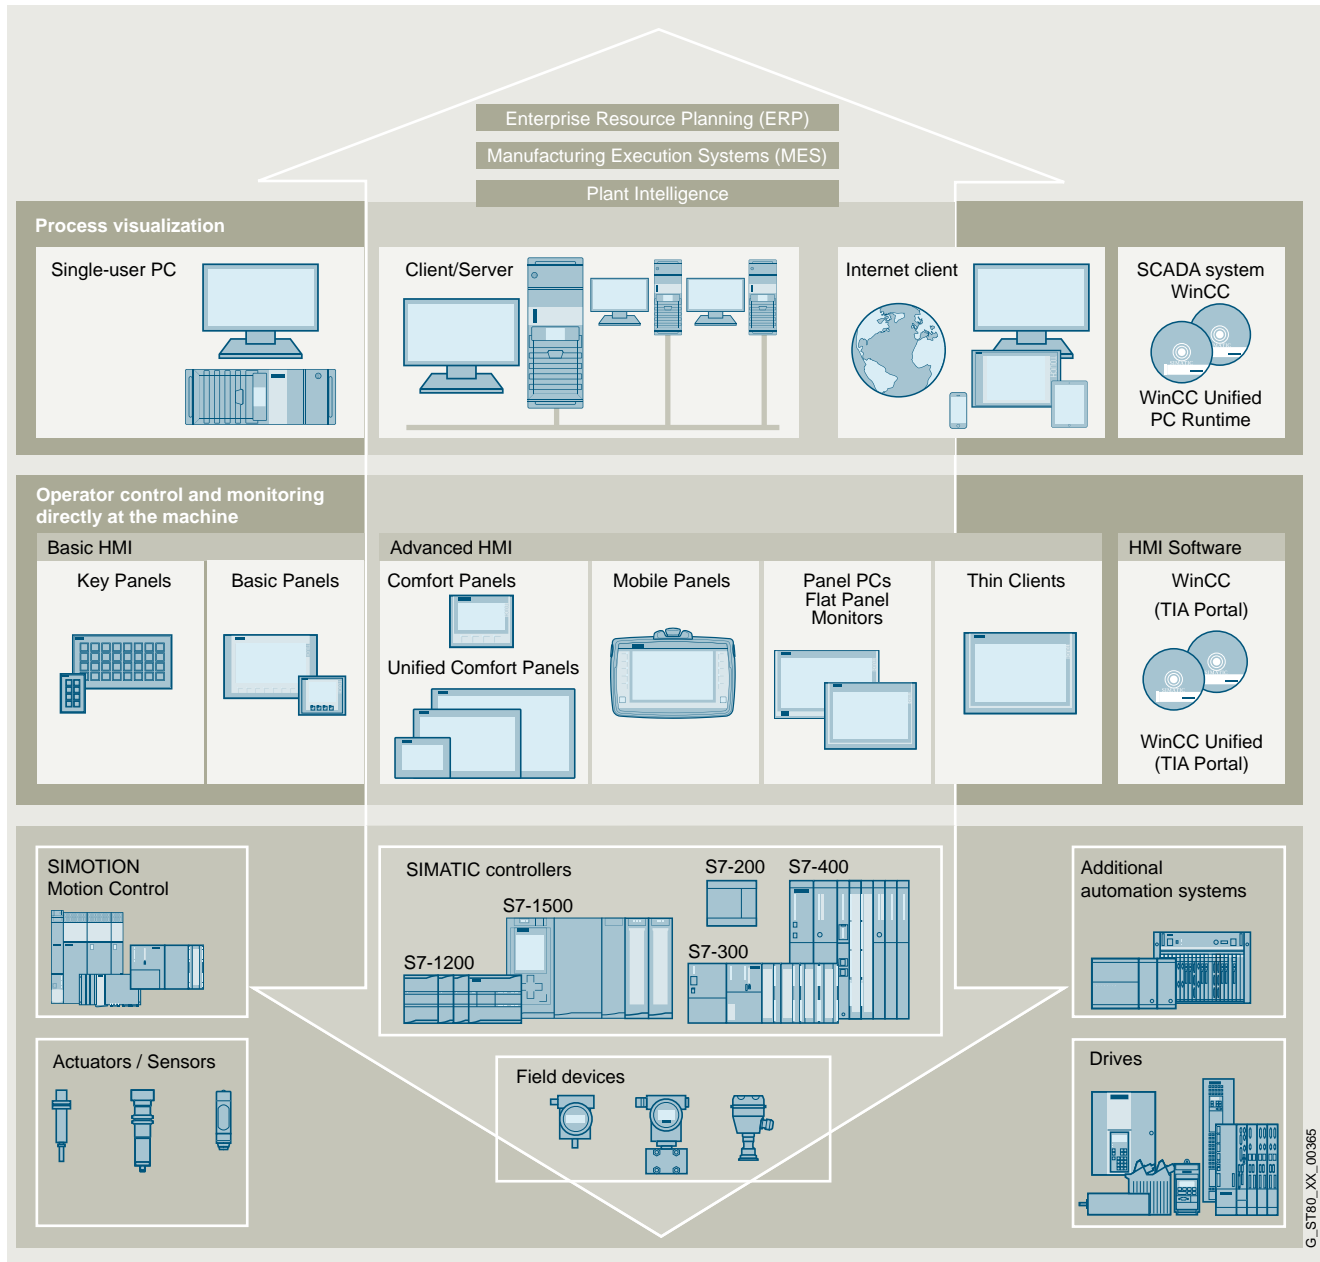

#### **Individual HMI devices in customized versions**

More information is available at  
<http://www.siemens.com/customized-automation>

### Industrial Computing

#### Introduction

#### Overview

#### **SIMATIC Industrial PC**

Due to their scalable portfolio, SIMATIC Industrial PCs can be used in a wide range of industrial applications.

##### Rack PC

Rack PCs are flexible, high-availability industrial PC systems for powerful yet compact applications using 19" technology.

##### Box PC

SIMATIC Box PCs provide mechanical engineers, plant engineers and control cabinet builders with particularly rugged industrial PC systems for use in powerful yet compact applications.

##### Panel PC

SIMATIC Panel PCs are suitable thanks to their high industrial compatibility for use in control cabinets, consoles and control panels, as well as directly on the machine. Typical areas of application can be found in both factory and process automation.

##### Mobile devices

SIMATIC industrial mobile devices open up new areas of application in the context of Industry 4.0. Designed for industrial use, they can impress with their many functions in everyday work. Typical areas of application are in maintenance/service, production, measurement and testing technology, and in local engineering and commissioning.

##### Industrial monitors

Flexible operating concepts can be implemented with SIMATIC industrial monitors. They are industrial-grade LCD monitors with brilliant displays set apart from the PC.

##### Devices for special requirements

Selected SIMATIC IPCs are available as fully-enclosed devices (PRO devices) and are ideal for industrial applications in harsh environments due to their extremely rugged design. They are, for example, specially designed for mounting on a support arm/pedestal. As industry-specific versions, selected SIMATIC IPCs also offer variants with stainless steel fronts (HYG devices), e.g. for the food, beverages and tobacco industries.

##### SIMATIC IPC Software

A graded concept is available for effective early detection of potential failures and minimization of actual downtimes. It consists of hardware and software components especially developed for SIMATIC IPC, which can be used to increase availability on a system-specific basis, depending on safety requirements. In addition, software packages are offered for many SIMATIC IPCs that, when ordered, produce genuine price advantages.

## Overviews

### SIMATIC PCS 7

#### Introduction

#### Overview

SIMATIC PCS 7

#### **Distributed Control System SIMATIC PCS 7: Room for new perspectives**

In process engineering plants, the process control system is the starting point for optimal value added: All procedures and processes can be operated, monitored and influenced with the process control system.

The more powerful the process control system, the more effectively this potential can be used. For this reason, performance is in the foreground with SIMATIC PCS 7, alongside scalability, flexibility, and integration. Starting with planning and engineering, the process control system offers powerful tools, functions and features for cost-effective and efficient plant operation through all phases of the plant life cycle.

#### **Performance through integration**

Integration is one of the special strengths of SIMATIC PCS 7. This has many aspects:

- Horizontal integration into TIA
- Vertical integration into hierarchical communication
- System-integrated tools for engineering tasks
- Integration of the field level, including drives, switchgear, etc.
- Integrated functions, e.g. for batch process automation, route control, process safety, energy management, telecontrol tasks, etc.

#### Horizontal integration

A system for integrated automation of the entire process chain, from incoming raw materials to outgoing goods – this is one of the decisive advantages resulting from the seamless integration of SIMATIC PCS 7 into Totally Integrated Automation.

The process control system is mainly responsible for automating the primary processes here, but it can do much more: All auxiliary facilities, as well as the electrical infrastructure in the form of low-voltage or medium-voltage switchgear and the building management system, can also be integrated into the system.

Integration of selected SIMATIC standard components – automation systems, industrial PCs, network components, or distributed process I/O – into the process control system guarantees optimum interaction of individual components, and secures economic benefits such as simple selection, reduced stock keeping, and global support.

#### Vertical integration

The hierarchical communication of a company encompasses the field level, the control level, and the process level, up to management and enterprise resource planning (ERP). Thanks to standardized interfaces – based on international industry standards as well as internal interfaces – SIMATIC PCS 7 is able to provide process data for analysis, planning, coordination, and optimization of plant sequences or production and business processes – in real time, and at any location in the company.

## Overviews

### SIMATIC PCS 7

#### Introduction

#### Overview

##### Central engineering

SIMATIC PCS 7 convinces with graded functional diversity, consistent operator control philosophy, and uniformly structured engineering and management tools. A central engineering system with a coordinated range of tools for integrated system engineering and configuring of batch automation, safety functions, material transport or telecontrol systems creates value added over the entire life cycle. Reductions in configuring and training costs result in minimization of total cost of ownership (TCO) over the entire plant life cycle.

##### Functional diversity

Depending on the typical process automation or customer-specific requirements, SIMATIC PCS 7 can be functionally expanded for the following, for example:

- Batch process automation (SIMATIC BATCH)
- Functional safety and protection functions (Safety Integrated for Process Automation)
- Route control for material transport (SIMATIC Route Control)
- Telecontrol of remote units (SIMATIC PCS 7 TeleControl)
- Automation of electrical switchgear (SIMATIC PCS 7 PowerControl)

##### **Custom automation**

The unique scalable system architecture makes SIMATIC PCS 7 the ideal basis for cost-effective implementation of individual automation solutions and a cost effective operation of process plants.

SIMATIC PCS 7 users receive sustainable benefits from the modular system platform, based on SIMATIC standard components. Its uniformity enables flexible scaling of hardware and software, as well as perfect interaction, both within the system and beyond system limits. The architecture of the process control system SIMATIC PCS 7 is designed in such a way that the control technology can be used for the project planning according to the customer's requirements, optimally adapted to the dimensions of the plant. The control technology allows retrofit

or reconfiguration for capacity expansion or technological changes at any time. If the plant grows, then SIMATIC PCS 7 simply grows along with it – making expensive reserve capacities unnecessary!

Use the opportunities offered by the object-oriented type and instance concept of SIMATIC PCS 7. The technological connections, variant formation and bidirectional comparison of the types with the instances make the control module types (CMT) even more powerful compared to the original function block templates. The technological connections of a Control Module such as parameters, signals or messages can be provided with attributes and used via drag and drop, e.g. on an SFC plan. In turn, options and variants can be used to extend the core function of the CMT with specific modules or functions, which can be activated individually for each instance. This minimizes the number of types required and thus reduces the effort for maintenance and service. For the technological content of the CM types, the future-oriented Advanced Process Library (APL) is included in the standard of SIMATIC PCS 7. Another major advantage resulting from the comprehensive type and instance concept is the seamless integration into other tools like SIMATIC PCS 7 Plant Automation Accelerator or SIMIT.

##### **Flexibility and performance in engineering**

The workflow in the engineering of process plants is and remains a challenge: Numerous participants, many different data formats and multiple interfaces frequently result in transmission errors and system discontinuity and thus in greater time input and costs. Information generally gets lost or needs to be corrected manually when data is exchanged between multiple disciplines.

For the first time, a fully integrated solution is now available for planning and documenting plant projects: the SIMATIC PCS 7 Plant Automation Accelerator. Customers benefit in particular from consistent engineering without system discontinuities between automation planning and the control system.

The object-oriented approach of the SIMATIC PCS 7 Plant Automation Accelerator makes it possible to work on a central data platform, thus ensuring completely integrated planning – from plant engineering through to automation – based on an electronic workflow. This workflow ranges from planning, the preparation of bids – including bills of material – and the automatic generation of control data from the electrical plans of the SIMATIC PCS 7 process control system, through to controlled mass data engineering and direct as-is documentation of the plant.

This modular engineering approach enhances overall project efficiency and minimizes risks. A high level of standardization and simple configuration additionally save engineering time and costs during the implementation phase. Simple synchronization between planning and engineering avoids duplicate input and interface losses and reduces project runtimes.

##### **Flexibility in operation**

Process control also becomes more complex due to the multi-layer nature of automation engineering and the increased merging with information technology. Intuitive and fault-free operation is therefore more important than ever with regard to efficient working and the minimization of downtimes and servicing requirements. Using effective Advanced Process Control (APC) functions and an excellent operator system, SIMATIC PCS 7 supports optimization as well as user-friendly and safe control of the process. Monitoring of product quality and performance indicators additionally allows the process to be operated more economically. At the same time, SIMATIC PCS 7 convinces with high flexibility, plant availability, and investment security.

##### Process control and maintenance

SIMATIC PCS 7's operator system is used to monitor process operation using various views, and permits interventions when necessary. Its architecture is flexible and scalable – from single-user systems up to multi-user systems with a redundant client/server architecture. The operator interface takes account of the current specifications of NAMUR (user association of automation technology in the process industries) and PI (Profibus International) and offers a high level of user-friendliness for simple, intuitive interaction with the plant. Ergonomic symbols, task-oriented faceplates, uniform representation of status information, and optimized alarm functions allow safe process control.

## Overviews

### SIMATIC PCS 7

#### Introduction

#### Overview

The alarm management function integrated in SIMATIC PCS 7 is able to focus on essential alarms and to specifically guide the operator in exceptional circumstances. In this way, it systematically reduces the workload of operating staff.

Preventive and predictive maintenance strategies reduce total cost of ownership. With the SIMATIC PCS 7 Maintenance Station, maintenance personnel always have a watchful eye on critical production equipment such as pumps, valves, distillation columns or motors, and can carry out the relevant maintenance measures in good time before servicing is required – independent of the maintenance plan and without the risk of an unplanned plant standstill.

#### Process optimization

SIMATIC PCS 7 supports process optimization in many different manners, including:

- Control Performance Monitoring
- Advanced Process Control
- Process Historian

The Control Performance Monitoring function monitors and signals the control quality of the closed-loop control block. If the performance declines, the controller can be optimized in good time or specific maintenance measures can be initiated.

The integrated I&C libraries of SIMATIC PCS 7 also provide higher quality closed-loop control functions with which cost-effective Advanced Process Control applications can be implemented: multi-variable control, predictive control, or override control. It is thus possible to effectively improve profitability, product quality, safety, and environmental protection in small and medium-sized plants.

Current and historic process data form the basis of all optimization. Secure and user-friendly real-time data storage and analysis is handled using the Process Historian. The process values, messages, and batch data managed in the database of the Process Historian can be called extremely rapidly. User-specific processing and visualization of this historic data are supported by the information server, which is a reporting system based on the Microsoft Reporting Services.

#### **SIMATIC PCS 7 system and technology components**

With the rugged, high-performance SIMATIC PCS 7 system components from Catalog ST PCS 7, you already have a versatile platform for cost-effective implementation and economical operation of your process control systems. Perfect interplay of these system components makes it possible for you to sustain high-quality production and to establish new products significantly faster on the market.

With SIMATIC PCS 7 technology components from Catalog ST PCS 7 T that can be seamlessly integrated into the process control system, you can expand the functional scope of the system components in a carefully targeted manner for specific automation tasks.

This covers a wide spectrum, for example:

- Telecontrol for monitoring and controlling remote plant units
- Automation technology for electrical low-voltage or medium-voltage switchgear
- Industry-specific automation systems for the cement and mining industries, as well as for laboratory and training facilities
- Graphical objects for task-oriented optimization of process visualization
- Block libraries for technological functions, package unit and panel integration, monitoring and analyzing mechanical assets, as well as for building automation systems (heating, ventilation, air-conditioning – FMCS/HVAC)
- Editors and function blocks for the efficient configuration of small or medium-sized automation systems with simple parameter control and materials management
- Process analytical technology for quality assurance through optimization of development and production processes based on up-to-date measurements, and critical quality and performance attributes
- Simulation system for testing and commissioning of plant-specific application software
- Flexible, high-performance Manufacturing Execution System (MES)
- System expansion for operator systems for the integration of third-party controllers, programmable logic controllers and package units
- Products for migration of the process control systems TELEPERM M, APACS+/QUADLOG or Bailey INFI 90/NET 90 with SIMATIC PCS 7

#### **Additional functionality can be integrated using add-on products**

Modularity, flexibility, scalability, and the openness of SIMATIC PCS 7 offer optimal prerequisites for integrating supplementary components and solutions in the process control system in an applicative manner and thus extend and round off its functionality.

Many supplementary add-on products for SIMATIC PCS 7 have been developed by Siemens as well as by external partners (see Catalog ST PCS 7 AO, Add-ons for the SIMATIC PCS 7 Process Control System). These software packages and hardware components authorized by the system manufacturer enable cost-effective implementation of SIMATIC PCS 7 for special automation tasks.

## Industrial communication

### Introduction

#### Overview

#### Industrial communication – the backbone of automation

Powerful and open communication systems ensure trouble-free communication for automation systems, covering

- data communication or
- process or field communication.

Openness and flexibility of the individual communication systems in different topologies enable linking of a wide variety of systems and their subsequent expansions. By using standardized communication systems, it is possible to connect standardized components from different suppliers without any problems. This ensures maximum protection of investment, as existing networks can be extended without any adverse effects.

## Overviews

### Industrial communication

#### Introduction

#### Overview

In the area of industrial communication, Siemens provides components for an integrated overall solution beyond the network's limits.

These include:

- Passive network components, e.g. FastConnect cabling systems
- Active network components, e.g. SCALANCE X Industrial Ethernet switches as well as RUGGEDCOM devices for harsh ambient conditions.
- Interfaces for connecting programmable controllers to the communication systems:
  - Integrated interfaces
  - Communications processors
- Components for wireless networks, e.g. Industrial Wireless LAN, SCALANCE W Access Points, and Client Modules (incl. latest Wi-Fi 6 devices) as well as first 5G components
- Components for industrial security, e.g. network security with Industrial Security Appliances SCALANCE S
- Remote monitoring and control with solutions for both telecontrol systems and units.
- Simple remote access for TeleService and remote maintenance with SCALANCE M and SINEMA Remote Connect
- Network transitions, e.g. IE/PB LINK PN IO
- Components for AS interface
- SINEC software family for efficient network management

### Industrial Identification and Locating

#### Introduction

#### Overview

#### ***SIMATIC Ident and SIMATIC RTLS for cross-company data intelligence***

Industrial processes in the digital enterprise require full transparency and a high degree of customization. Our solutions close the gap between the real and the digital world – and thus open up new added value potential throughout the production and supply chain. Today, we already offer the industry of tomorrow a unique, comprehensive and integrated range of identification and locating systems for customized applications. The connection to TIA enables products to be seamlessly integrated into automation solutions in the process. The connection to cloud applications ensures maximum flexibility and makes manufacturing future-proof. Plant availability, the degree of utilization and energy saving potential become transparent. For competitiveness and a flexible future.

### Industrial Identification and Locating

#### SIMATIC Ident

##### Overview

**Let the data journey begin.**

**SIMATIC Ident: Industrial Identification for company-wide data intelligence**

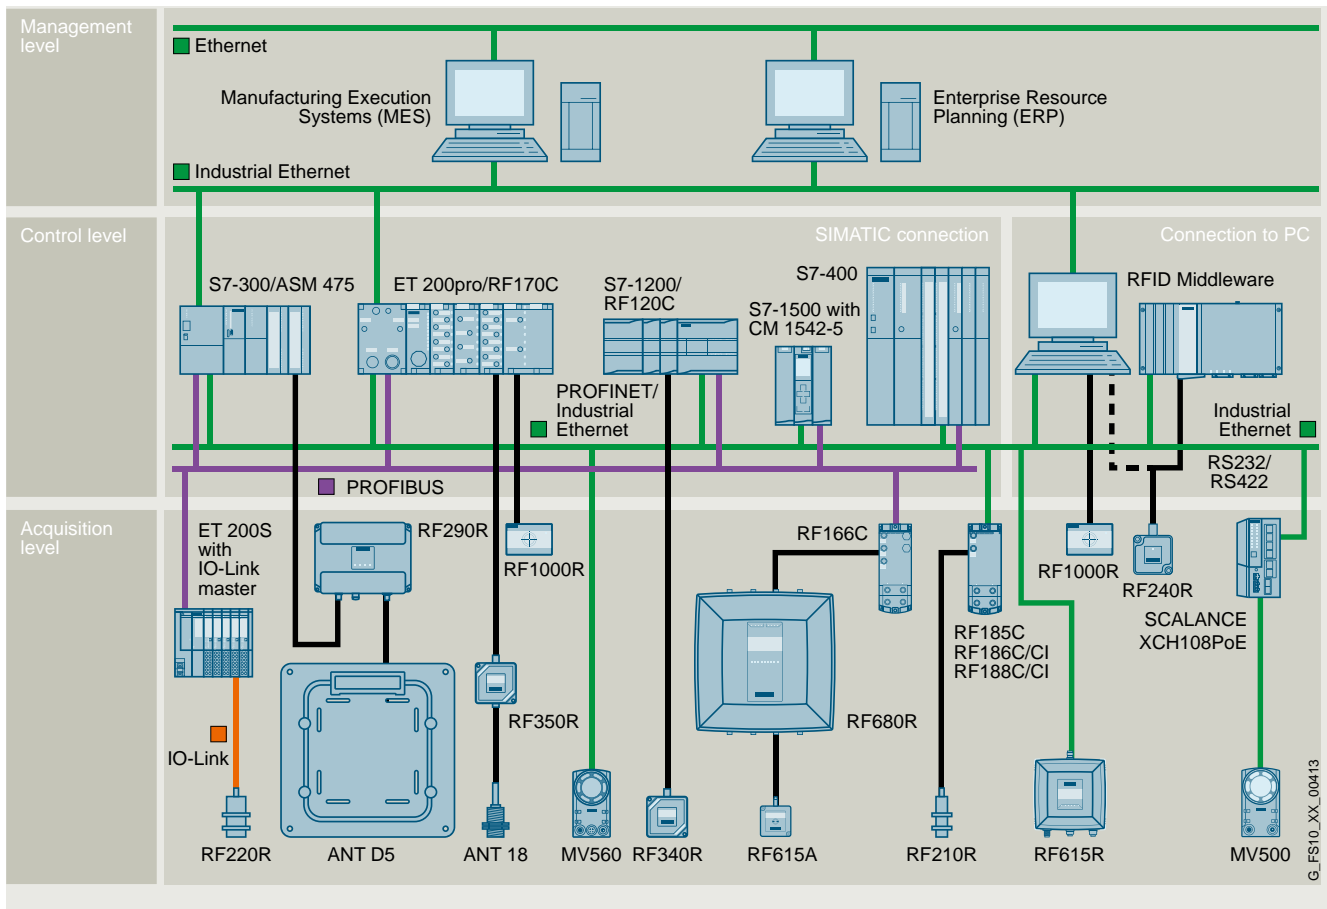

Small batch sizes, a wide range of increasingly complex products, an extremely high degree of customization and complicated processes present major challenges for industry.

For all these challenges Siemens offers SIMATIC Ident, a unique integrated and scalable range of RFID and optical identification systems. These enable virtual data flows from IT systems to be synchronized with the actual flow of goods – throughout the value chain. This provides the necessary clarity and answers the question: When is which product in which location and what is its status? Because data transparency is becoming an increasingly central factor of success, especially in the industrial environment.

With SIMATIC Ident, quality requirements can be reliably met, production can be more flexibly structured, the number of manual operations reduced, and potential sources of faults identified and removed immediately. This means greater efficiency in logistics, material management, production, and service. For competitiveness and for a flexible future.

In addition, SIMATIC Ident supplies production data to cloud applications, e.g. MindSphere – the cloud-based, open IoT operating system from Siemens.

This makes SIMATIC Ident a key technology for the digital enterprise. Our solutions close the gap between the real and the digital world – and open up new added value potential for our customers.

##### Overview

##### RFID systems

Openness and flexibility of the individual communication systems in different topologies enable linking of a wide variety of systems and their subsequent expansions. By using standardized communication systems, it is possible to connect standardized components from different suppliers without any problems. This ensures maximum protection of investment, as existing networks can be extended without any adverse effects.

Line of sight between the write/read device and the transponder is not necessary. Rugged, compact readers in a high degree of protection with either integrated or external antennas are available for interference-free data communication. Cost-efficient, maintenance-free, passive labels and passive transponders in various designs and with various memory capacities are likewise available, as are powerful antennas.

##### Optical identification systems

The SIMATIC MV optical readers are powerful, intelligent reading devices for both standard, high-contrast 1D/2D codes as well as difficult-to-read DPM codes applied straight onto the different product surfaces. The optical readers also permit text recognition, object recognition, and inspection of marking quality. The readers of the SIMATIC MV family boast powerful image acquisition capabilities for different resolutions and integrated lighting, allowing them to be used in a range of applications. device configuration via web-based management and system integration via the TIA Portal ensure easy handling.

## Industrial Identification and Locating

### SIMATIC RTLS

#### Overview

#### Precision for automation. Driven by data.

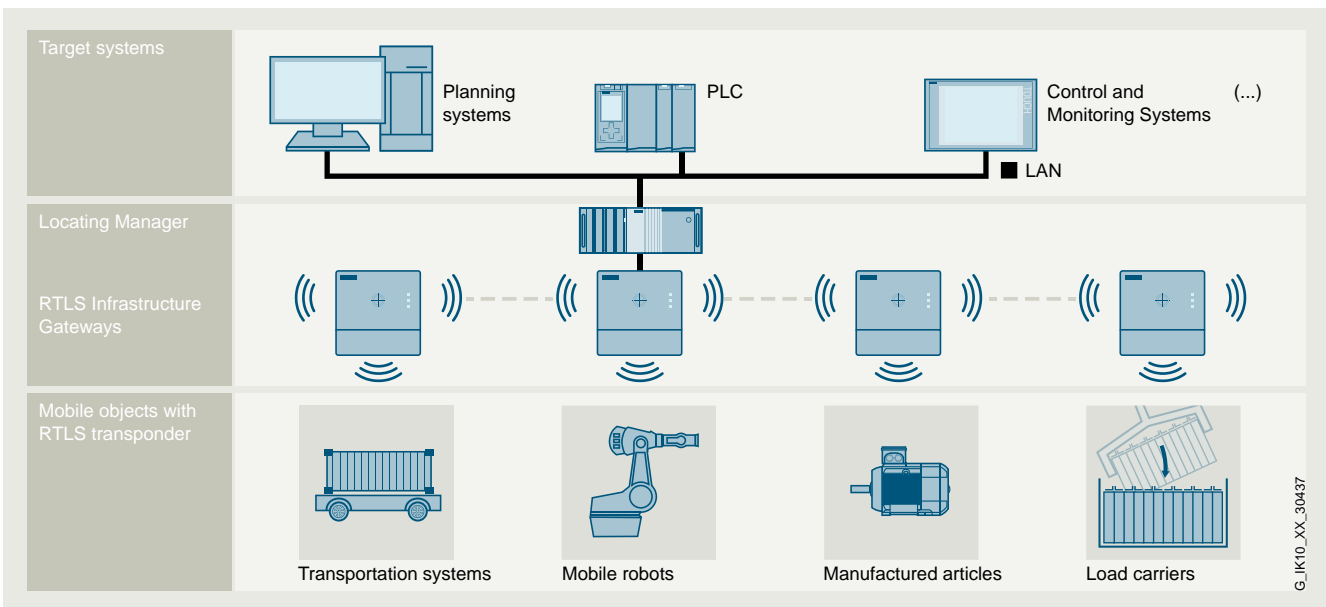

Knowing what is located where at all times: SIMATIC RTLS enables optimized and transparent processes for production and logistics thanks to data-based, real-time locating to the nearest centimeter of all relevant objects. Material flows can be navigated, mobile transport systems controlled, the use of components monitored and the assembly of the end product documented in full. This makes SIMATIC RTLS an essential component of the digital infrastructure of the factory of tomorrow.

The scalable RTLS system supplements the digital twin of all production processes – from supply all the way through further processing to the final assembly. To do this, all relevant objects in the factory or warehouse (workpieces, containers, transport units, persons, etc.) are equipped with a transponder. Gateways bundle the transponder signals and make them available to the higher-level System Locating Manager. The positions calculated here are then forwarded to intelligent automation systems and production units.

Ultra-wide band technology (UWB) ensures the utmost accuracy and reliability: A large frequency range (3-7 GHz) with a bandwidth of at least 500 MHz is used for close range radio communication to transmit relatively weak radio signals. This prevents other systems from being disrupted. The result is accurate and safe locating of objects to within a few centimeters. Search times are reduced, material flows optimized, and bottlenecks are detected in time. More transparency, fact-based decision-making and increased quality can be established thanks to digital processes which are optimally matched to each other.

### SINAMICS drive system

#### Overview

#### SINAMICS frequency converters

SINAMICS frequency converters are the ultimate solution for all drive applications. From low voltage to medium voltage to direct current (DC), our frequency converters meet your needs. With increased efficiency and versatility, take your drive applications to the next generation for a digital and sustainable future. <https://www.siemens.com/sinamics>

#### SINAMICS drive system

##### Overview

##### **SINAMICS V20 – the perfect solution for basic applications**

- Power range from 0.12 kW to 30 kW
- Voltage:
  - 230 V 1 AC: 200 V to 240 V 1 AC (-15 % to +10 %)
  - 400 V 3 AC: 380 V to 480 V 3 AC (-15 % to +10 %)
- Integrated USS and Modbus RTU interfaces
- Integrated braking module for all 400 V 3 AC versions
- Parameter readout and cloning without power supply
- Integrated connection and application macros
- ECO mode for  $U/f$ ,  $U^2/f$
- Integrated hibernation mode in idle state
- Wireless commissioning, operation and diagnostics via mobile device or laptop thanks to optional SINAMICS V20 Smart Access web server module
- Expansion of 400 V converters with two digital inputs and two digital outputs (relay outputs) thanks to optional SINAMICS V20 I/O Extension Module

##### **SINAMICS V90 – the performance-optimized, easy-to-operate basic servo drive system**

- SINAMICS V90 and SIMOTICS S-1FL6 form an optimized servo drive system for positioning as well as speed and torque control. Thanks to the optimized design, the system permits enhanced servo performance combined with a high level of ruggedness in a simple, low-cost way.
- SINAMICS V90 is designed for all-purpose servo applications while taking into consideration the challenges for machine builders and system integrators in terms of costs and time-to-market.
- The SINAMICS V90 system can essentially be commissioned effortlessly by means of a simple plug-and-play procedure. The SINAMICS V90 drive offers optimum servo performance, can be integrated quickly into SIMATIC PLCs and provides a high level of reliability. The connection can be made via PROFINET, by means of a pulse-direction interface or via analog inputs/outputs. A seamless drive system can be created by combining the SINAMICS V90 servo drive with our SIMOTICS S-1FL6 servomotor.
- SINAMICS V90 offers internal positioning, positioning with pulse sequence, and speed and torque control.
- With integral auto-tuning in real time and automatic suppression of machine resonances, the system automatically optimizes itself to achieve a highly dynamic performance and smooth operation. In addition, it makes it easier for the pulse sequence input to achieve excellent positioning accuracy on the basis of its high frequency limit of up to 1 MHz.

### SINAMICS drive system

#### Overview

**SINAMICS G220 –  
the variable frequency converter for all industries**

SINAMICS G220 is the new high-performance variable frequency converter designed to meet current and future challenges in every industry. Thanks to improved hardware and software, SINAMICS G220 takes digital drive technology to a new level, making applications more efficient, secure and future-proof.

[sieportal.siemens.com](http://sieportal.siemens.com)

**SINAMICS G120X –  
the infrastructure converter for HVAC/water/wastewater**

- Power range from 0.75 kW to 630 kW
- The specialist for pump, fan and compressor applications
- Thanks to the integrated DC link reactor with a maximum output of 250 kW and optional resistance to harmful gases up to environmental class 3C3, the rugged and dependable design ensures reliable, stable and largely robust operation.
- Variety of functions relevant for pumps, fans and compressors, e.g. deragging or pipe fill mode, automatic restart, flying restart, flux reduction, cascade connection, hibernation mode and real-time clock
- Functions especially for building technology as well as heating/air conditioning/ventilation applications, e.g. four integrated PID controllers, essential service mode, bypass mode and programmable time switches
- Communication: PROFINET, EtherNet/IP, PROFIBUS DP, USS, Modbus RTU, BACnet MS/TP
- Innovative hardware and software functions for saving energy, e.g. for controlling synchronous reluctance drive systems

### Drive systems

#### SINAMICS drive system

##### Overview

**SINAMICS G120C –**  
the compact and versatile frequency converter with optimum functionality

- Compact unit
- Highest power density in its class
- Power range from 0.55 kW to 132 kW
- Easy commissioning and maintenance
- With BOP-2 or IOP-2 operator panel
- Safety Integrated: STO
- Available communication: PROFIBUS DP, USS, Modbus RTU, PROFINET, EtherNet/IP
- Wireless commissioning, operation and diagnostics via mobile device or laptop thanks to optional SINAMICS G120 Smart Access web server module
- Integrated in the TIA Portal with SINAMICS Startdrive

**SINAMICS G120 –**  
the modular single-motor drive for low to medium power ratings

- Power range from 0.37 kW to 250 kW
- Safety Integrated: STO, SS1, SBC, SLS, SDI and SSM encoderless
- Communication via PROFIBUS, PROFINET, EtherNet/IP, RS485, USS, Modbus RTU, CANopen, BACnet MS/TP
- Energy efficient thanks to regenerative feedback and low line harmonic distortion
- Parameter copy function for standard commissioning
- Wireless commissioning, operation and diagnostics via mobile device or laptop thanks to optional SINAMICS G120 Smart Access web server module
- Integrated in the TIA Portal with SINAMICS Startdrive

### Drive systems

#### SINAMICS drive system

##### Overview

#### **SINAMICS G115D – the distributed drive system**

The SINAMICS G115D distributed drive system meets all the requirements that system manufacturers place on drives for applications in conveyor technology with a focus on the intralogistics and airport industries as well as for simple, horizontal applications in the automotive and food and beverage industries. The converter is supplied with degree of protection up to IP66 and sets standards in terms of efficiency – from the installation phase to commissioning and all the way to handling. The SINAMICS G115D drive system is the first choice for users who want to move conveyed material quickly and efficiently.

Integration via PROFINET communication with PROFIsafe, AS-Interface, EtherNet/IP into a higher-level control system is very easy thanks to full TIA Portal integration, which provides a tool as well as an operating and data management concept. In addition, an optional web server module is available with the web server module SINAMICS G120 Smart Access (SAM) – a WLAN-based web server solution for simple and fast wireless setup with tablets or smartphones during commissioning and for diagnostics.

#### **SINAMICS G120D – the distributed single drive for high-performance solutions**

- Positioning capability
- Power range from 0.75 kW to 7.5 kW
- Energy-efficient due to regenerative feedback and low line harmonic distortion
- Safety Integrated: STO, SS1, SDI, SSM and SLS encoderless
- Thanks to the modular design, electronics stocks are minimal
- Interchangeable memory card
- Communication via PROFIBUS DP, PROFINET, EtherNet/IP
- Integrated in the TIA Portal with SINAMICS Startdrive

### Drive systems

#### SINAMICS drive system

##### Overview

**SINAMICS G130/SINAMICS G150 –  
the universal frequency converters for high-performance  
single drives**

- Available as a standardized control cabinet or built-in units
- Output range from 75 kW to 800 kW or 2700 kW with parallel switching
- Specially for drives with quadratic and constant load characteristics, medium performance requirements, but no regenerative feedback capability
- Service-friendly thanks to easy-to-access device modules
- Communication via PROFIBUS DP, PROFINET, EtherNet/IP
- Energy-efficient due to variable-speed operation
- Sensorless vector control
- Safety Integrated: STO, SBC, SS1 with SBR/SAM, SS2, SLS, SOS, SSM, SDI, SLA, SBT
- Simple commissioning and parameterization via the AOP30 Advanced Operator Panel or PC-supported using the STARTER and SINAMICS Startdrive commissioning tools

### Drive systems

#### SINAMICS drive system

##### Overview

### **SINAMICS G180 – the specific converter for the oil & gas, chemical and process industries**

The LOHER DYNAVERT T frequency converter integrated as SINAMICS G180 into the SINAMICS range has been deployed for over forty years for applications where maximum reliability and availability of the drive are of paramount importance.

SINAMICS G180 converters can be supplied for standard voltages 400, 500 and 690 V in the power range up to 6.6 MW. They are available as a compact unit, a cabinet system or a cabinet unit, with air cooling, for operation with synchronous and asynchronous motors.

- A wide range of add-on electrical components allow the drive system to be optimized for specific requirements
- Simplified configuring and shortened commissioning due to predefined interfaces and pre-parameterized factory settings
- Sensorless vector control without additional speed actual value encoder (encoder evaluation units are available if required)
- Can be flexibly integrated in all automation concepts
- Communication: Apart from the standard converter interface (compliant with Namur NE37), PROFINET, PROFIBUS DP, Modbus RTU, Modbus TCP, CANopen can also be used optionally

Optionally available peripheral boards can be selected to add the following inputs/outputs to the converter:

- Digital and analog inputs and outputs
- 2 PTC thermistor inputs for ATEX-certified motor temperature monitoring for motors in hazardous zones (prewarning/trip)

## Supplementary components

### Drive systems

#### SINAMICS drive system

##### Overview

##### **SINAMICS S200 – the single axis AC/AC servo drive system in standard servo motion market**

Example: SINAMICS S200 servo drive system consisting of a SINAMICS S200 servo converter, 200 ... 240 V 1 AC / 3 AC, PROFINET, frame size FSB, a SIMOTICS S-1FL2 servomotor, shaft height 30, metal hybrid connector, outlet direction drive end (DE) and MOTION-CONNECT 350 dual cables for power and communication

The SINAMICS S200 servo drive system is a single axis AC/AC servo drive system with compact design, high dynamic performance, ease of use and high reliability for motion control applications in standard servo motion market. It comprises SINAMICS S200 servo converters, SIMOTICS S-1FL2 servomotors, MOTION-CONNECT 350 and 380 connection systems and engineering tools.

##### System components

##### SINAMICS S200 servo converters

The SINAMICS S200 servo converters consist of a basic version and a standard version with pulse train input position control (PTI) or PROFINET RT/IRT (PN) to meet various needs of applications and work perfectly together with SIMATIC controllers.

- SINAMICS S200 Basic servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC
- SINAMICS S200 servo converters, power range 0.1 to 1 kW at 200 ... 240 V 1 AC / 3 AC and 0.2 to 7 kW at 380 ... 480 V 3 AC

##### SIMOTICS S-1FL2 servomotors

With flexible encoder options, including absolute encoders 17-bit singleturn, 21-bit singleturn and 21-bit singleturn + 12-bit multiturn, the system provides precise and accurate performance. The encoders can be used without a battery, making it easy to operate and maintenance.

- Low Inertia for high dynamic performance
- Medium Inertia for dynamic and smooth operational performance
- High Inertia for smooth operational performance

##### MOTION-CONNECT 350 and 380 connection systems

The cables are available in lengths of up to 30 m and one step further optimized in easy and secure installation with "one-push-lock" motor connecting solution for motor shaft heights 20, 30 and 40.

- MOTION-CONNECT 350 cables, which provide a connection solution for fixed installation applications
- MOTION-CONNECT 380 cables, which provide a connection solution for drag chain installation applications that require a high number of bending cycles

## Supplementary components

### Drive systems

#### SINAMICS drive system

##### Overview

#### **SINAMICS S210 – the single-axis servo drive for highly dynamic applications**

The servo drive system comprises a SINAMICS S210 servo converter, a SIMOTICS S-1FK2, S-1FT2 or S-1FS2 servomotor and a matching One Cable Connection (OCC) for connecting the motor to the converter. SINAMICS S210 is a single-axis AC/AC servo converter system with high performance and dynamic response for mid-range Motion Control applications.

SINAMICS S210 servo converters are available for the following line voltages:

- 200 V to 240 V 1 AC (1 AC series)
- 200 V to 480 V 3 AC (3 AC series)

The high performance of the SINAMICS S210 servo drive system in conjunction with the SIMOTICS S-1FK2, S-1FT2 or S-1FS2 servomotor derives from the following features:

- Low moment of inertia and high overload capability of the motor
- High-resolution encoder with fast scanning
- Current controller clock cycle of 62.5  $\mu$ s and a pulse frequency of 8 kHz of the servo converter

This enables short cycle times on the machine even with complex motion control.

## Supplementary components

### Drive systems

#### SINAMICS drive system

##### Overview

**SINAMICS S120 – the flexible, modular drive system for demanding single-axis and multi-axis applications from the low-end to the high-end performance range**

- Modular drive system for single-axis and multi-axis applications in all areas of machine and plant manufacturing
- Servo/vector control, U/f control
- Power range from 0.12 kW to 5700 kW
- Various types of construction for different application areas
- Highly flexible due to, for example, modular system architecture, different cooling methods, support for a wide range of motors/encoders, easy expansion
- High degree of scalability with regard to performance, number of axes, functionality
- Integrated safety functions
- Comprehensive motion control functionality
- High availability and efficiency, even in unstable networks
- Automatic parameterization and easy drive commissioning/optimization

## Supplementary components

### Drive systems

#### SINAMICS drive system

##### Overview

**SINAMICS S150 –**  
*the sophisticated drive solution for single drives in the medium to top performance ranges*

- Particularly suitable for applications with high requirements regarding precision and dynamic response in the mid to upper performance range, as well as for frequent braking cycles with high braking energies and four-quadrant operation
- Ready-to-operate control cabinet
- Power range from 75 kW to 1200 kW
- Straightforward configuring and commissioning provided by the SIZER for Siemens Drives, SINAMICS Startdrive and STARTER engineering tools
- High availability and efficiency, even in unstable networks
- Efficient operation through standard energy recovery
- Line-friendly operation thanks to Clean Power Filter (line feedback < 1 %)
- Reactive power compensation possible
- Equipped as standard with PROFINET or PROFIBUS DP interface for connection to higher-level controls

**SINAMICS DCP –**  
*the compact DC-DC Converter for industrial applications*

With the SINAMICS DCP (DC Power Converter), Siemens extends its portfolio of Compact DC-DC Converters.

In these, Siemens is combining its expertise in DC technology with the advantages of the well-proven SINAMICS family. SINAMICS DCP is setting new standards when it comes to quality, reliability and technical functionality.

The SINAMICS DCP is suitable for industrial drive train applications. As a bidirectional boost and buck converter on both sides with scalable power rating, it combines multiple functions in one single device. With variable voltage levels, current can flow in both directions. This makes the SINAMICS DCP ideal for charging and discharging batteries and supercapacitors.

The high internal switching frequency makes a compact design and low weight possible. As a result, it can be installed in electrical cabinets in a space-saving way.

PROFIBUS is used as the standard communications interface. Optionally, either PROFINET, EtherNet/IP or Modbus TCP can be retrofitted as an additional interface via the CBE20 interface card. The BOP20 Basic Operator Panel is available for status displays and local operator control.

## Supplementary components

### Drive systems

#### SINAMICS drive system

##### Overview

##### Special features

- Bidirectional boost and buck converter in one unit (on both sides of the device)
- High efficiency
- High switching frequency
- Compact: The reactor, power unit and control station form one unit
- Temperature-controlled fans (only for DCP 120 kW/DCP 250 kW)
- Incorporated MPPT (Maximum Power Point Tracker)
- No-load voltage limitation of a PV field
- Battery charging characteristic
- Communications interfaces: PROFIBUS (standard), optional EtherNet/IP or Modbus TCP

The functionality can be expanded with other SINAMICS components such as Active Line Modules.

##### Software feature

- Voltage and current regulation
- 3 overload profiles
- Stable voltage in the DC link

##### Power rating

The SINAMICS DCP is available with a power rating of 30 kW, 120 kW and 250 kW.

##### More information

- Internet:  
[www.siemens.com/dc-dc-converter](http://www.siemens.com/dc-dc-converter)  
[sieportal.siemens.com](http://sieportal.siemens.com)

##### **SINAMICS DCM – the scalable drive system for basic and sophisticated DC drive applications**

- Power range 6 kW to 30 MW
- For machinery and plants in industry
  - Steel/aluminum
  - Plastic
  - Printing
  - Paper
  - Hoisting gear
  - Mining
  - Oil and gas
  - Static excitation units
  - Heating applications
  - Magnet applications
- New systems and retrofit business
- Communication as standard via PROFIBUS DP, RS485 or USS, and optionally via PROFINET, EtherNet/IP or Modbus RTU
- Safety Integrated: STO, SS1 acc. to IEC 61508 SIL 3 as well as EN ISO 13849-1 PL e
- Control unit variance
- Field power supply in line with requirements
- Electronics power supply for connection to 24 V DC
- Power unit isolated to ground (isolated voltage sensing)
- Free function blocks and Drive Control Chart (DCC)
- Expandable functionality using SINAMICS components
- Single-phase operation possible
- Coated modules and nickel-plated copper busbars
- Wide temperature range
- High overload capability
- Low torque ripple at low speeds
- Very compact design

## Supplementary components

### Drive systems

#### SIMATIC MICRO-DRIVE drive system

##### Overview

The SIMATIC MICRO-DRIVE servo drive system is comprised of the main components

- PDC Drives
- TM Drives
- Motor or geared motor
- Plug-in cables

In addition, other system components are also available, e.g. a brake control module (available soon) or shielding bracket sets.

Component selection and dimensioning of the right components based on physical key data, travel profiles and/or load profiles can be done directly in the "download" file of the TIA Selection Tool:

[www.siemens.com/tst](http://www.siemens.com/tst)

##### Properties

- DC supply voltage for logic (24 V DC) and power (up to 48 V DC)
- Different performance classes from 100 W to 1000 W for servo converters/PDC drive controllers, and 280 W for F-TM ServoDrive
- Communication via PROFINET with PROFIdrive profiles
- Failsafe communication via PROFIsafe for the failsafe variants (e.g. PDC100F)
- Extended Safety drive functions (e.g. SLS or SLT <sup>1)</sup>) for the failsafe variants already possible with the encoders integrated in the motors)
- 24/48 V DC EC motors/geared motors (brushless) from multiple Siemens Product Partners, can also be partially ordered directly via Siemens
- 24/48 V DC DC motors (with brushes) can also be operated with PDC100 and PDC100F
- Pre-assembled plug-in cables from multiple Siemens Product Partners, can also be partially ordered directly via Siemens

<sup>1)</sup> Only for PDC100F.

## Supplementary components

### Overvoltage protection

#### SICROWBAR overvoltage protection

##### Overview

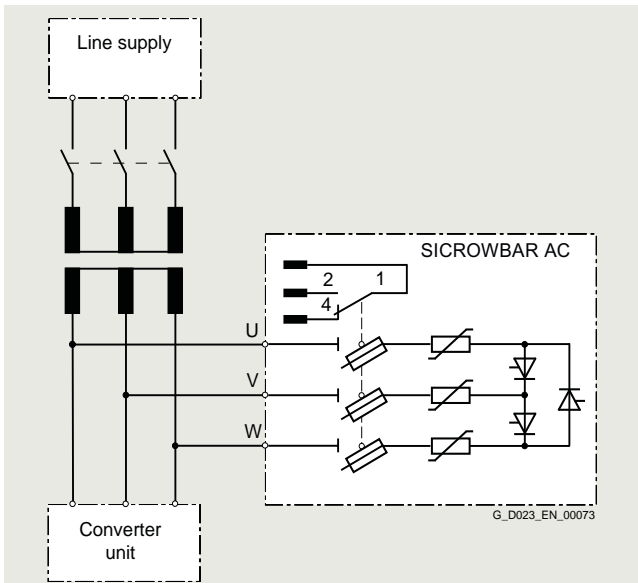

##### SICROWBAR AC

**SICROWBAR AC** is used to protect power semiconductors in converters (thyristors and diodes) against overvoltage that occurs between the phases of a three-phase network. The range of applications is not restricted to protecting DC drive converters, but also comprises infeed/regenerative feedback units of the AC drive technology that are equipped with thyristors.

Overvoltage that occurs on the AC side of converters is mainly caused by switching operations when disconnecting from the line supply at the transformer's primary side. This applies both to operational switching operations (shutdown at no-load) as well as in the case of a fault (shutdown under load).

The overvoltage protection is mainly used in the following configuration:

##### More information

- Catalog D 23.1
- Internet:  
[www.siemens.com/d23-1](http://www.siemens.com/d23-1)  
[sieportal.siemens.com](http://sieportal.siemens.com)

##### SICROWBAR DC

**SICROWBAR DC** protects coils and converters against overvoltage conditions when they are used to supply large inductances, for instance, the excitation coils of synchronous machine motors, DC machine motors or hoisting solenoids. An appropriate de-excitation/discharge resistor must be provided. A thermostatic switch can be ordered as an option for the resistor from the manufacturer.

The fast de-excitation option G11 (module 7VV3003-7FG00) makes it possible to initiate fast de-excitation, triggered by a higher-level signal, for the 7VV3003-5... units.

<sup>1)</sup> Fast de-excitation option, XEW1 and 3, 4 terminals are not available for 7VV3003-6...

Brochure "SIRIUS relays" see <https://support.industry.siemens.com/cs/ww/en/view/109766469>

#### SIRIUS relays – one range for every application

Our range of SIRIUS relays offers you everything you need for a motor feeder application. Easy and convenient – and all from one source. Whether you require compact timing relays or reliable monitoring relays, particularly narrow coupling relays, plug-in relays, low-noise power relays or signal converters – it will not be easy to find a more complete and comprehensive range of relays anywhere. Quite simply, there is one for every possible need. What is more: all SIRIUS relays are particularly easy to use. So take a closer look at our range and convince yourself – you will be surprised.

#### SIRIUS 3UG, 3RR, 3RN, 3RS monitoring relays – Reliable monitoring and protection

SIRIUS relays from Siemens offer maximum protection for machines and plants, and they communicate with the control level thanks to IO-Link. The SIRIUS relays for IO-Link reliably monitor network quality, power values, voltages, speeds and temperatures and at the same time they open up an even wider field of applications for you.

**3UG monitoring relays** are used to monitor electric and non-electric variables which cannot (or should not) be directly recorded by an automation system.

- Monitoring of networks for overvoltage or undervoltage, direction of rotation, frequency, or asymmetry
- Monitoring of loads using Cos-phi, power or current measurement
- Monitoring for insulation faults and fault currents
- Monitoring of levels or speeds of rotation

**The 3RR current monitoring relays** are suitable not only for monitoring motors or other loads, but are also well suited to monitoring multiphase currents of the entire plant or the driven process. In this way, for example, an idling pump or an overload is promptly detected and reported in good time. The 3RR2 monitoring relays can be set up individually or integrated directly into the load feeder.

**3RN thermistor motor protection devices** monitor the winding temperature of motors fitted with a PTC sensor.

- Compliance with the ATEX directive 2014/34/EC through conformity with EN 50495 and EN 60947-8 standards
- Compliance with the safety requirements for PL c according to ISO 13849-1 or SIL 1 according to IEC 62061
- Fast fault diagnostics through display of open-circuit and short-circuit
- Solid-state compatible output due to hard gold-plated contacts

The **3RS2 temperature monitoring relays** can be used to measure temperatures in solid, liquid and gas media. The temperature is acquired by means of sensors in the medium, evaluated by the device and monitored for overshoot, undershoot or location within a specified range (window function).

The family comprises an analog multi-function device which can be set using DIP switches and potentiometers, and digital devices which can be parameterized via an intuitive LCD display. The digital device is also available as a version with IO-Link.

All 3RS26 digital devices, including the 3RS28 versions with IO-Link, have safety certification according to IEC 62061 or ISO 13849-1 up to SIL 1/PL c as well as EN 14597 for heat generating systems and EN 50156 for burners.

Furthermore, the functionality of the 3RS26/3RS28 digital devices can be expanded using a 3RS29 sensor expansion module with two additional resistance sensors, e.g. for monitoring three-phase motors or transformers.

The 3RS29 sensor expansion module also features an additional relay for outputting the sensor status, and an additional analog input 4 to 20 mA. This analog input also allows ATEX applications to be implemented when using an appropriate temperature sensor. The 3RS29 is connected wirelessly via a SIL 1-certified infrared communication interface.

##### Notes:

The SIRIUS 3RS2 temperature monitoring relays fully replace the 3RS1 predecessor.

#### SIRIUS speaks IO-Link

With the SIRIUS monitoring relay for IO-Link you are opting for maximum flexibility: As well as the autonomous monitoring function that is still available, measured values and data can also be transferred directly to the controller via IO-Link. Parameters can also be assigned locally or via IO-Link. This means that the SIRIUS relays for IO-Link are fully integrated into Totally Integrated Automation, our open system architecture for integrated automation. You also profit from significantly simplified device replacement – thanks to data matching and automatic re-parameterization via a parameter server.

## Supplementary components

### Timing, coupling and monitoring relays

#### SIRIUS relays

##### Overview

##### **SIRIUS 3RP, 7PV timing relays**

Electronic timing relays are used for all delayed switching operations in open-loop control, starting, protection and closed-loop control circuits.

Thanks to their sophisticated and compact design, the 3RP timing relays are ideal timer modules for control cabinet, switchgear and controller manufacturers from the industry. Due to their narrower design, the 7PV timing relays are particularly suitable for use in heating, ventilation and air-conditioning systems and compressors.

##### **SIRIUS 3RA28 function modules and solid-state time-delayed auxiliary switch blocks**

The 3RA28.1. function modules permit the construction of starters and contactor combinations for direct and star-delta starting. They include the essential control functions that are needed for the respective feeder – for example, timing and electrical interlocking functions. Function modules that function as timing relays can easily and quickly be fitted to SIRIUS contactors – without any significant wiring effort. They permit both ON-delay and OFF-delay switching of contactors.

The 3RA28.3. solid-state time-delayed auxiliary switch blocks can be connected to contactors and are designed for contactor coil voltages in the 24 to 240 V AC/DC wide voltage range. Auxiliary switches for control and alarm signals are used specially for switching the smallest signals for electronics applications. They are used, for example, for allowing a pump or fan to run on, in a similar way to an OFF-delay time relay or for the delayed activation of a gate drive. Simply by snapping and locking it into place, both the electrical and mechanical connection is made. To attenuate switching overvoltages of the contactor coil, a varistor is integrated in the time-delayed auxiliary switch.

##### **SIRIUS 3RQ1, 3RQ2, 3RQ4, 3TG10 and LZS coupling relays**

The SIRIUS coupling relays are ideally suitable for coupling to and from controllers and are thus the perfect partner for SIMATIC controllers. They can be used for electrical isolation, for voltage conversion, for signal amplification and for overvoltage and EMC protection.

The force-guided **3RQ1 coupling relays** (up to SIL 3/PL e) are available in widths of 17.5 mm and 22.5 mm. Due to the forced guidance according to IEC 60947-5-1 (IEC 61810-3), the contacts of the installed relays are mechanically connected to each other in such a way that NO and NC contacts are never closed simultaneously. As a result, an opening failure can be reliably detected and maximum safety can be ensured. 3RQ1 coupling relays serve to reliably couple safe controllers, also for safety applications up to SIL 3/PL e.

The **3RQ2 coupling relays** for universal use set standards: With a wide voltage range from 24 V to 240 V AC/DC they are the star attraction on the coupler market. The reduced variety of components simplifies product selection and standardization. In this series, we offer you devices in the field-proven 22.5 mm industrial enclosure with one, two or three changeover contacts and with screw-type or spring-loaded connections (push-in technology). The versions with hard gold-plated contacts ensure an especially high contact reliability even at low currents. Thanks to the well-proven industrial enclosure, you can enjoy the benefits of user-friendly connection systems with permanent wiring, just the same as with our timing relays.

The new **3RQ4 coupling relays** set new standards when it comes to sustainability, innovation and quality. The design is based on SIMATIC controllers. The relays, measuring 6.2 mm in width, feature a fully sustainable design, are made from 80% bio-based plastic and are manufactured entirely in Germany. They are ideal for space-optimized use in control cabinets with tight spacing between tiers and in flat control boxes. All versions are available with screw or spring-loaded terminals (push-in technology). Wiring time is reduced because conductors are inserted and clamped from the front.

3RQ4 coupling relays are available as:

- Coupling relay with relay output
- Coupling relay with plug-in relay
- Coupling relay with semiconductor output

The right choice depends on your application.

The coupling relay with relay output include ATEX, railway and shipbuilding certification. The fixed connection of the relays make them more robust in harsh environments.

Coupling relays with plug-in relay are perfectly suited for standard applications and offer the great advantage that used relays can be replaced during the operating phase.

A highlight of the 3RQ4 portfolio are the semiconductor versions. Those can be the perfect choice for a range of applications. Thanks to their unlimited service life and ultrafast and reliable switching operations, they can significantly reduce maintenance costs. Even if a standard relay only needs to be replaced one single time, a semiconductor coupling relay is already cheaper in most cases.

**3TG10 power relays/miniatre contactors** prove their worth wherever small, low-noise relays or contactors are required at a reasonable price. This makes them ideal for simple controllers, especially for use in large-series manufactured devices and controllers. For applications that do not require an overload relay and need only one auxiliary switch – and which therefore need more switching power, higher switching voltage, and a longer service life.

**LZS coupling relays with plug-in relays** are available as complete devices or as individual modules for self-assembly or spare parts requirements, into designs RT and PT.

- Can be used for contact multiplication, adaptation of potential, or for switching small loads.
- Max. 4 changeover contacts in one device:
  - Wide-voltage versions with or without hard gold-plated contacts
  - With screw-type or push-in spring-loaded terminals

##### **SIRIUS 3RS70 signal converters**

The 3RS70 signal converters share the enclosure concept with the 3RQ4 coupling relays. They are used mainly for the electrical isolation and conversion of analog signals. Sensors/actuators and controllers usually have different potentials and therefore require electrical isolation in the signal circuit. This is done either in the controller or by means of signal converters.

The conversion of one signal into another is required if, for example, a voltage signal has to be converted into a current signal for transmission over a longer distance, or if the output of a sensor and the input of a controller do not match.

The implemented frequency outputs offer another application. The input signal is converted to a proportional frequency here. This means that analog signals can be processed with digital inputs.

This is important if a controller offers no possibility for an analog input, or if all analog inputs are already occupied, for example, in the case of retrofits.

Catalog	D 21.4							

Motion control encoders are optoelectronic built-on encoders that detect the traversing distances, angles of rotation, speeds or positions of machine axes. Motion control encoders are direct measuring systems that are built-on to shafts, axes or motors. They can be used in conjunction with numerical and programmable logic controllers, drives and position displays. Motion control encoders are system-tested, certified components that have been harmonized for use with the following systems:

- SINUMERIK CNC controls
- SIMOTION Motion Control Systems
- SIMATIC programmable logic controllers
- SINAMICS drive systems

Motion control encoders are used with machine tools and production machines as additional external measuring systems. They are available as incremental or absolute encoders.

- In the case of incremental encoders, the machine must travel to a reference point after each power-off state, as the position is not usually stored in the controller. Movements of the machine while the power is off are not recorded. Incremental encoders are suitable for use in simple machine concepts with mostly small dimensions.
- Absolute encoders, on the other hand, also record movements while the power is off and return the actual position after power on. Travel to a reference point is not necessary. Absolute encoders are suitable for complex machines or machines with large dimensions.

All motion control encoders are available as Synchro flange and clamp flange versions. The absolute encoders are also available with a hollow shaft and torque arm.

The motion control encoders are driven via a plug-in coupling or spring disk coupling. Alternatively, pulleys can also be used.

The motor control encoder supply voltage is 5 V DC or alternatively 10 V to 30 V DC. The 10 V to 30 V DC version supports longer cable lengths. Most control systems supply the voltage directly at the measuring circuit connector. With SINAMICS, the measuring systems are provided with power via the Sensor Modules.

For motion control encoders with cables, the cable length including the connector is 1 m.

The following bending radii must be observed for the cable to the built-on encoder:

- One-time bending: ≥ 20 mm
- Continuous bending: ≥ 75 mm

Automation systems

### SIMOTION Motion Control System

#### Overview

#### **SIMOTION system**

The well-proven, modular and scalable SIMOTION Motion Control System with high-end functions for motion control is the ideal solution for applications in mechanical engineering, in which modularity, maximum precision and speed are vital.

SIMOTION ensures a high level of flexibility at low engineering outlay with the modular technology object approach. Object-oriented programming and a programming model with units and libraries enable the creation of reusable software modules and the effective implementation of large quantity structures.

SIMOTION simplifies the development and integration of standard modules in an executable project with libraries for industry-specific applications and the SIMOTION easyProject project generator.

The SIMOTION system is made up of three components:

#### Engineering system

The SCOUT engineering system enables Motion Control, PLC and technology functions to be incorporated in one comprehensive, integrated system and provides all the necessary tools:

From programming and parameterization through testing and commissioning, to diagnostics.

SCOUT can be used in SIMATIC STEP 7, either with standardized data management and configuring procedures, or as a stand-alone engineering tool (SCOUT Stand-Alone). SCOUT TIA (SIMOTION in the TIA Portal) is available as an optional package for TIA Portal V13 and above and is included in the scope of supply of SCOUT.

The following options, for example, are available in the engineering system for programming:

- Graphic programming with Motion Control Chart (MCC)
- Ladder Diagram (LAD)/Function Block Diagram (FBD)
- High-level language Structured Text (ST), including object-oriented programming

#### Runtime system

The runtime system offers a high-performance execution system for cyclic and sequential tasks. The runtime software modules make the different PLC, Motion Control and technology functions available. By selecting the appropriate modules, the overall functionality of the system can be flexibly adapted to the machine.

#### Hardware platform SIMOTION D

The hardware platform SIMOTION D represents the basis for the SIMOTION Motion Control System. The scalable SIMOTION hardware supports centralized, distributed and mixed topologies for all machine designs with up to 128 axes per controller.

#### **SIMOTION D – Compact and integrated in the drive**

- The complete machine automation with drive control, PLC, Motion Control and technology functionality in one compact unit of SINAMICS S120 design.
- Particularly fast response
- Versatile networking options via PROFINET, PROFIBUS or Ethernet
- Scalable since multiple performance versions available
- SIMOTION D is available in two configurations:
  - As a single-axis system SIMOTION D410-2 with multi-axis option (blocksize configuration). The Control Units are available in D410-2 DP and D410-2 DP/PN versions and are snapped onto the SINAMICS S120 PM240-2 Power Modules in blocksize format.
  - As a multi-axis system SIMOTION D4x5-2 in four performance variants for as many as 128 axes (booksize format)
- Ideal for:
  - Compact machines
  - Distributed automation concepts, e.g. on machines with a large number of axes
  - Modular machines
  - Time-critical demands on the axis couplings

## Supplementary components

Automation systems

SINUMERIK CNC automation systems

### SINUMERIK 828D

#### Overview

#### SINUMERIK 828D – the powerhouse among the compact CNCs

With their unique CNC performance, SINUMERIK 828D CNCs set productivity benchmarks when it comes to milling and turning on standard machines as well as functions for easy automation of grinding machines. With new SINAMICS drives and SIMOTICS motion control motors SINUMERIK 828D is now even more productive.

#### Rugged and maintenance-free

Their die-cast magnesium operator panel fronts, the panel-based CNC design with minimal interfaces, as well as a high degree of protection on the front of the PPU, make SINUMERIK 828D CNCs reliable partners even in harsh environments.

Designed without a fan or hard disk, with NVRAM memory technology and no back-up battery, SINUMERIK 828D CNCs are completely maintenance-free.

#### User-friendly

The SINUMERIK 828D CNCs are very easy to operate thanks to a full QWERTY CNC keyboard with short-stroke keys and a high-resolution 12.1" TFT color display or 15.6" touch display.

CNC data are quickly and easily transferred via USB 3.1 interface on the operator panel front.

#### Optimum scalability

Based on the three CNC performance versions SW24x, SW26x and SW28x of the SINUMERIK 828D CNCs, favorably-priced compact as well as more complex machines with additional axes/spindles and up to 2 machining channels and 2 handling channels can be implemented.

#### Digital twin

With Create MyVirtualMachine and/or Run MyVirtualMachine, setup and run-in times are minimized, the risk of collisions is reduced, and program optimization is accelerated. More productivity and safety – even before the real machine starts.

## Supplementary components

Automation systems

SINUMERIK CNC automation systems

### SINUMERIK ONE

#### Overview

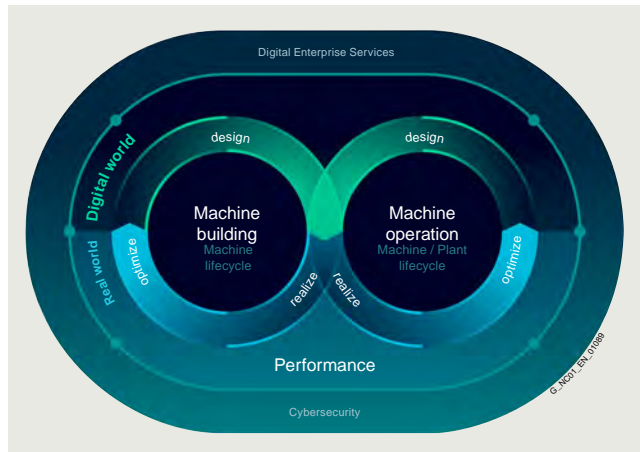

#### **SINUMERIK ONE: the next level CNC in the premium class**

SINUMERIK ONE – the digital native CNC with the pioneering CNC system for highly productive machine tools. Thanks to its digital twin, the key element in digital transformation, SINUMERIK ONE helps to simulate and test work processes completely virtually - saving time, resources and costs.

#### **Boosting productivity with SINUMERIK and digitalization solutions**

Shorter product introduction times and increasing individualization of products influence production with machine tools. High productivity is more important than ever for machine manufacturers and users. The key factor is optimum interaction of automation and CNC solutions and sophisticated technology – and the effective integration of digital solutions. This applies to all areas: from design and construction of a machine to operation and service. SINUMERIK connects automation, competence in technology, and digitalization to form a single solution offering for more productivity. SINUMERIK CNC systems are the optimum solution for the production of individual parts or series production, for simple or complex workpieces.

#### Benefits

Merging the real world with the virtual world

The new SINUMERIK ONE is specifically designed for smart manufacturing.

- The digital twin is an integral part of the CNC system; virtual and real CNC merge and complement each other
- Significant reduction in product development and market launch times thanks to the **digital first** strategy
- Improved networking and data communication capabilities
- Significant reduction in the duration of real commissioning thanks to virtual commissioning preparation
- Significantly increased CNC performance
- Significantly shorter downtimes and complete integration into the TIA Portal thanks to the integrated SIMATIC S7-1500F PLC

This means that the SINUMERIK ONE can be seamlessly integrated into digital solutions and workflows.

### System cabling

#### MOTION-CONNECT connection systems

##### Overview

MOTION-CONNECT includes connection systems and components which are optimally tailored to individual areas of application. MOTION-CONNECT cables feature state-of-the-art connection systems to ensure fast, reliable connection of different components, and offer maximum quality as well as system-tested reliability.

MOTION-CONNECT power cable and signal cable

MOTION-CONNECT cables are available as fully-assembled power and signal cables or sold by the meter. The pre-assembled cables can be ordered in length units of 10 cm (3.94 in) and can be extended, if necessary.

Whatever your machine requirements, MOTION-CONNECT offers the solution.

- **Robust, high-performance and easy to use** thanks to pre-assembled cables with a rugged metal connector in degree of protection IP67 and reliable SPEED-CONNECT quick-release lock
- **Outstanding and proven quality** achieved by consistent quality management and system-tested cables

Cables are available in two different qualities – MOTION-CONNECT 500 and MOTION-CONNECT 800PLUS.

MOTION-CONNECT 500	MOTION-CONNECT 800PLUS
<ul style="list-style-type: none"> <li>• Cost-effective solution for predominantly fixed installation</li> <li>• Suitable for low mechanical loading</li> <li>• Tested for travel distances up to 5 m (16.4 ft)</li> </ul>	<ul style="list-style-type: none"> <li>• Meets requirements for use in cable carriers</li> <li>• Suitable for high mechanical loading</li> <li>• Oil resistance</li> <li>• Tested for travel distances of up to 50 m (164 ft)</li> </ul>

### Training Services SITRAIN

#### Introduction

##### *Learn the way you like it – with SITRAIN*

SITRAIN imparts a wide range of technical knowledge for all industries and applications. Our offering is oriented toward the needs of learners and the demands of innovative companies. Get pleasure out of learning - thanks to innovative learning methods, personal support, and knowledge that will help you in your work and further development. For successful, flexible, and continuous learning.

##### *Education and training directly from the manufacturer*

SITRAIN provides you with training from the industrial product and solution portfolio from Siemens and benefits from 30 years of expertise in technical training. Take a look at the many options for expanding your knowledge with SITRAIN and find the course that meets your needs! The following training and further education units are available to you for your individual knowledge building:

#### Industrial Automation Systems SIMATIC

Training available for:  
SIMATIC S7-1200/S7-1500,  
TIA Portal,  
SIMATIC S7-300/400

#### Drive Technology

Training available for:  
SINAMICS S120, S210,  
SINAMICS G120, G220  
SINAMICS G130 / G150 /  
G180 / S150

#### SINUMERIK CNC automation system

Training available for:  
SINUMERIK 840D, SINUMERIK  
840D sl and SINUMERIK ONE

#### Process Control Systems

Training available for:  
SIMATIC PCS 7,  
SIMATIC PCS neo

#### Digital Enterprise

Training available for:  
Openness, SIMIT, OPC UA,  
Industrial Edge,  
virtual commissioning

#### Industrial Communications

Training available for:  
OPC UA, PROFINET, SCALANCE,  
RUGGEDCOM, Industrial Ethernet,  
fieldbus communication,  
Industrial Security,  
remote communication

#### Identification and Locating

Training available for:  
RFID, RTLS-Systems

#### Operator Control and Monitoring Systems

Training available for:  
SIMATIC WinCC Unified in TIA  
Portal, SIMATIC WinCC in TIA  
Portal, SIMATIC WinCC V7/8

#### Motion Control Systems

Training available for:  
SIMATIC Motion Control and  
SIMOTION (programming,  
commissioning, diagnostics,  
Service)

#### Smart Infrastructure

Training is available for  
industrial switching technology  
solutions and low voltage power  
distribution.

#### Process Analytics & Instrumentation

Training is available for process  
analytics and instrumentation,  
explosion protection, process  
gas chromatographs

#### Additional training offer

Battery manufacturing,  
Creativity LAB, SIMOVE with  
automated guided vehicles  
(AGV), cranes, guidelines and  
standards for control cabinets,  
Technological Basics

## Training Services

### SITRAIN

#### Introduction

#### Different learning formats and methods for maximum learning success

With our SITRAIN training formats, you learn in the way that best suits your preferences and routine. You decide whether you prefer learning in a virtual or real classroom.

It is also up to you whether you prefer to learn on demand or at fixed dates and times. With a learning consultant, in a team, or independently – you can explore all the possibilities.

Discover our three learning formats:

#### Learning Event

SITRAIN Learning Events are the perfect choice when you want to achieve a defined learning goal in the shortest possible time. You learn in a protected learning environment outside of the daily work routine under the guidance of a learning consultant - virtually, in the training center, or at your company.

#### Learning Membership SITRAIN access

With SITRAIN access, you enter a world of extensive and constantly expanding self-study units on our digital learning platform for industry. With SITRAIN access, you can implement a modern learning culture in your team or company with independent and continuous learning.

#### Learning Journey

The Learning Journey is the perfect combination of units taken live and self-study units for sustainable learning success. The modular approach enables simple integration into your daily work. This also includes one-year membership for using the SITRAIN access digital learning platform.

#### Live

Learn together with others, simultaneously and guided by a learning consultant. Online, in the SITRAIN training center or at your company.

#### Self-reliant

Expand your knowledge self-determined with industry learning and work on your learning units at your own pace and according to your own schedule.

#### On demand

Get the knowledge you need, exactly when you need it. Be it to answer a current question or to work on a special topic.

#### Individual

Talk directly with the learning consultant, clarify detailed questions and get personal coaching for transferring the learned topics to your own application.

#### Training cases catalog

### Additional documentation

#### SIMATIC Manual Collection

##### Overview

All manuals for SIMATIC offline in 5 languages

- Keyword search within PDF file
- Search across all manuals
- Electronic update service, free for 1 year
- Network-compatible, i.e. saving of PDFs on central server

##### Content

The SIMATIC Manual Collection comprises the electronic manuals as PDF file for:

- S7-1200
- S7-1500
- S7-200
- S7-300
- S7-400
- LOGO!
- SIMATIC DP
- SIMATIC PC
- SIMATIC PG
- STEP 7
- Engineering software
- Runtime software
- SIMATIC HMI
- SIMATIC NET
- SIMATIC IDENT

##### Ordering data

###### **SIMATIC Manual Collection download**

5 languages  
All manuals for S7-1200/1500/200/300/400, LOGO!, SIMATIC DP, PC, PG, STEP 7, engineering software, runtime software, SIMATIC HMI, SIMATIC NET, SIMATIC IDENT

Consignee email address required for delivery.

###### **SIMATIC Manual Collection Software Update Service (SUS) download**

5 languages  
Within the scope of this contract, you will receive all software versions as download for one year. The contract is automatically extended for 1 year unless canceled 3 months before expiration.  
Delivery and service period: 1 year from date of invoice

Consignee email address required for delivery.

##### Article No.

**6ES7998-8XE01-8YE0**

**6ES7998-8XE01-8YE2**

## Appendix

### Standards and approbations

## CE marking

### Overview

The electronic products described in this catalog comply with the requirements and protection objectives of the following EU directives insofar as they relate to the product concerned. They also comply with the corresponding harmonized European standards (EN) published for these products in the Official Journals of the European Community.

- 2014/35/EU "Electrical equipment designed for use within certain voltage limits" (Low Voltage Directive)
- 2014/30/EU "Electromagnetic Compatibility" (EMC Directive)
- 2014/34/EU "Equipment and protective systems intended for use in potentially explosive atmospheres" (Explosion Protection Directive)
- 2011/65/EU "Restriction of the use of certain hazardous substances in electrical and electronic equipment" (RoHS Directive)
- For F-modules, the following also applies: 2006/42/EC "Machinery Directive"

The originals of the declarations of conformity are kept available by us for the responsible supervisory authorities.

They are also available for download on the Siemens Industry Online Support website (<https://sieportal.siemens.com>), keyword "Declaration of Conformity".

#### Note on the EMC Directive:

In terms of their interference emissions, SIMATIC products are designed for industrial applications.

If individual products deviate from this specification, it is noted in the catalog with the products.

The installation instructions in the manuals must be adhered to when installing and operating the products described in this catalog. These contain, for example, important information on installation in cabinets and on the use of shielded cables.

### Notes for machine manufacturers

The SIMATIC automation system is not a machine within the context of the EU machine guidelines. Therefore a declaration of conformity with regard to the EU machine directive 89/392/EEC or 2006/42/EU (new edition, applicable from end of 2009) may not be provided for SIMATIC.

The EU machine directive regulates the requirements placed on a machine or a part thereof. A machine is understood for the purposes of this guideline to be a combination of interconnected parts or mechanisms (see also EN 292-1, Paragraph 3.1).

SIMATIC is part of the electrical equipment of a machine, and must therefore be integrated into the evaluation of the complete machine by the machine manufacturer.

As electrical equipment, SIMATIC is subject to the low-voltage directive which, as a "total safety directive", covers all dangers just like the machine directive.

The EN 60204-1 standard (safety of machines, general requirements for the electrical equipment of machines) is applicable to the electrical equipment of machines.

The following table will help you in the provision of your declaration of conformity, and shows which criteria according to EN 60204-1 (2006-06) apply to SIMATIC. You can obtain further information from the enclosed declaration of conformity according to the low-voltage and EMC directives (with list of included standards).

EN 60204-1	Topic/criterion	Notes
Paragraph 4	General requirements	The requirements are met when the equipment is assembled/ installed in accordance with the installation guidelines. Please note the relevant information in the manuals.
Paragraph 11.2	Digital input/output interfaces	The requirements are met
Paragraph 12.3	Programmable equipment	The requirements are met when the equipment is installed in lockable cabinets to protect against alteration of the memory contents by unauthorized persons
Paragraph 20.4	Voltage tests	The requirements are met

## Appendix

### Standards and approbations, quality management

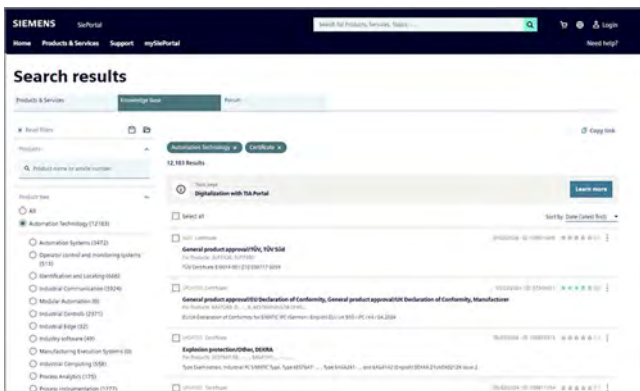

#### Certificates, authorizations, approbations, declarations of conformity

An overview of the certificates available for SIMATIC products (CE, UL, CSA, FM, shipping authorizations) can be found in the internet at

<http://www.siemens.com/simatic/certificates>

The lists are continuously updated. The data for products which have not yet been included in the overview is continuously collected and prepared for the subsequent edition.

You can also find certificates, approbations, verification certificates or characteristic curves under Product support "Entry list"

#### Quality management

The quality management system of the Siemens Operating Company Digital Industries, Business Unit Factory Automation, complies with the international standard ISO 9001.

The products and systems described in this catalog are sold under application of a quality management system certified by DQS in accordance with DIN EN ISO 9001.

The DQS certificate is recognized in all IQ Net countries.

#### **DQS Registered Certificate No.:**

Siemens AG

- DI FA  
Reg.-Nr.: 001323 QM15

## Appendix

### Siemens Automation Cooperates with Education (SCE)

#### Teaching made easy - Comprehensive support on the way to Industry 4.0

##### Knowledge & technology – the keystones to success in digitalization

**Digitalization is quickly and radically changing our world. What does this mean for education?**

In the world of Industry 4.0, companies can expect a host of new opportunities and challenges. New systems are verified on the spot through simulations. Automated mass production processes can make every product on the conveyor belt a unique product.

New products are now market-ready much faster. Siemens is shaping this transformation as a technology leader in the field of automation and process lifecycle management (PLM).

These new digitalization processes are changing the know-how requirements for employees. Many educational institutions are facing the challenge of conveying Industry 4.0 know-how as part of their teaching and training. The Siemens Automation Cooperates with Education (SCE) program is supporting educators on the way to Industry 4.0.

##### The SCE digitalization concept for educators

**The SCE digitalization concept presented here shows how digitalization can be implemented in educational institutions – from vocational schools to universities.**

Digitalization (or Industry 4.0) know-how is now introduced through computer aided technology, Industrial Edge and IIoT as well as Cloud technologies. It is founded on the basics of automation, such as digital technologies, PLC and information technologies, and on advanced automation and industrial communication technologies.

The level of digitalization knowledge can be weighted, depending on the vocational field or branch of study – e.g. mechanical engineering, automation engineering or computer science.

## Appendix

### Siemens Automation Cooperates with Education (SCE)

#### Teaching made easy - Comprehensive support on the way to Industry 4.0

##### The SCE digitalization concept for educators (continued)

As part of their project work, students at Vocational School 2 in Wolfsburg, Germany, have implemented the three levels of the SCE Industry 4.0 concept. A virtual twin created with the Siemens NX Mechatronics Designer (MCD) CAD software was used for the design and virtual commissioning. This enables fast and efficient assembly of the real automation system, e.g. with SIMATIC S7-1500/ET 200SP/RFID, for use in classes. Production data, such as the number of bottles filled, production date and system parameters, are uploaded to a cloud using SIMATIC IOT2000.

[new.siemens.com/global/en/company/sustainability/education/sce/iot2000.html](https://new.siemens.com/global/en/company/sustainability/education/sce/iot2000.html)

[siemens.com/nx](https://siemens.com/nx)

##### The SCE offers

##### Learning and training documents

More than 100 didactically prepared learning and training documents are available through SCE and incorporate the digitalization concept. They are designed for use in classes, but can also be customized or used for individual study. These documents are available for free download, most of them in 7 languages.

[siemens.com/sce/documents](https://siemens.com/sce/documents)

##### Educator courses

Excellent teaching content is needed to introduce students to digitalization. For this purpose, SCE holds educator courses in certain regions. Based on our learning and training documents and through practical exercises, educators acquire the latest Industry 4.0 know-how.

[siemens.com/sce/courses](https://siemens.com/sce/courses)

##### Trainer packages

The 90 SCE trainer packages help educators teaching and implementing the SCE digitalization concept. Trainer packages comprise specially compiled, genuine Siemens hardware and software products. The trainer packages are based on the learning and training documents and are offered to schools, colleges and universities at special terms.

[siemens.com/sce/tp](https://siemens.com/sce/tp)

##### Support for your projects / textbooks

We support you on selected projects with advice and assistance from SCE contact partners.

As a special service, we support textbook authors. We maintain a list of textbooks on the SCE website.

[siemens.com/sce/contact](https://siemens.com/sce/contact)

[siemens.com/sce/books](https://siemens.com/sce/books)

## Appendix

### Siemens Automation Cooperates with Education (SCE)

#### Teaching made easy - Comprehensive support on the way to Industry 4.0

##### Partnerships for proliferation of Industry 4.0 in education

##### **Partnership with WorldSkills**

As a technology powerhouse, we support vocational training of students around the world. Since 2010, we have partnered with WorldSkills as a Global Industry Partner in order to amplify this cause.

WorldSkills is an international organization whose mission is to raise the profile and recognition of skilled people, and show how important vocational skills are in achieving economic growth and personal success. Every two years, WorldSkills hosts the world championships of skills.

Siemens provides the competitors with automation products, such as SIMATIC S7-1500 and LOGO!, for the disciplines: industrial control, electrical installations, Polymechanics/Automation and manufacturing technology.

Additionally, we support selected continental and regional competitions.

[siemens.com/worldskills](https://www.siemens.com/worldskills)

##### **Partnerships with educators**

We provide support to educators and educational organizations in the form of one-on-one advice through SCE contact partners and Siemens experts as well as long-term cooperation.

[siemens.com/sce/contact](https://www.siemens.com/sce/contact)

##### **Partnerships with producers of learning systems**

For practical training in classrooms and labs, numerous producers of learning systems offer a wide range of complete didactic solutions based on SCE trainer packages.

[siemens.com/sce/learningsystems](https://www.siemens.com/sce/learningsystems)

##### Information portal

To facilitate your teaching assignment and/or for selfstudy, we offer educators and students a comprehensive SCE information portal. At this portal you have quick access to all SCE offers, e.g. learning and training documents including projects, Getting Started information, videos, manuals, trial software and newsletters.

[siemens.com/sce](https://www.siemens.com/sce)

### Overview

#### Siemens Solution and Approved Partner – Partners for your success

#### Highest competence in automation and drive technology

Siemens works closely together with selected partner companies around the world in order to ensure that customer requirements for all aspects of automation and drives are fulfilled as best as possible – wherever you are, and whatever the time.

We place great value on our customers acting in accordance with the same ideals which characterize Siemens as a whole: Competence, professionalism and quality. That is why continuous development through qualification and certification measures in line with global standards is a central aspect of our Partner Program. This means that with our partners, you benefit from the same high quality standards all over the world. The partner emblem is the symbol for tried and tested quality.

#### The partner network for industry

The Siemens Partner Program offers you expertise and experience close at hand.

Within our global network, we distinguish between Solution Partners and Approved Partners. We currently work with more than 1,500 Solution Partners around the world. Our network of over 150 Approved Partners continues to grow. In more than 80 countries worldwide.

#### Siemens Solution Partner – Automation Drives

At present we are working with more than 1,500 Solution Partners worldwide. They are characterized by extensive application, system and sector knowledge, as well as proven project experience, and are able to implement future-proof tailored solutions of the highest quality, based on our product and system portfolio.

#### Siemens Approved Partner – Value Added Reseller

With their detailed technical knowledge, Siemens Approved Partners – Value Added Resellers offer a combination of products and services that range from specialist technologies and customized modifications to the provision of high-quality system and product packages. They also provide qualified technical support and assistance.

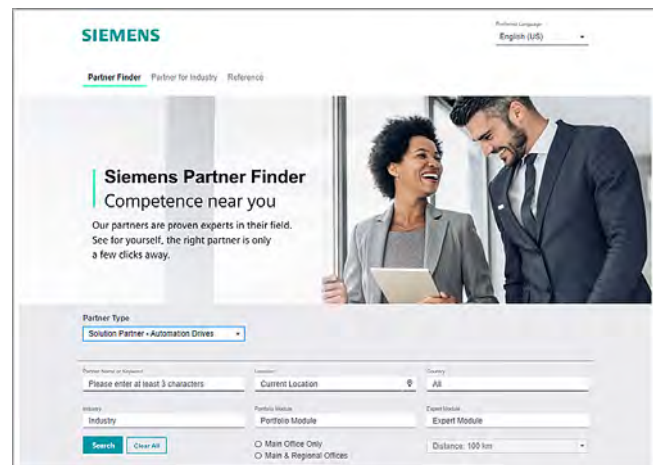

#### Siemens Approved Partner – Industry Services

Siemens Approved Partner – Industry Services put their unique expertise entirely at the service of enhancing your productivity and can be instrumental in ensuring the availability of your plants.

#### Partner Finder

The ideal partner for your task is just a mouse click away!

In the Siemens global Solution Partner Program, customers are certain to find the optimum partner for their specific requirements – with no great effort. The Partner Finder is basically a comprehensive database that showcases the profiles of all our partners.

#### Easy selection:

Set filters in the search screen form according to the criteria that are relevant to you. You can also directly enter the name of an existing partner.

#### Skills at a glance:

Gain a quick insight into the specific competencies of any particular partner with the reference reports.

#### Direct contact option:

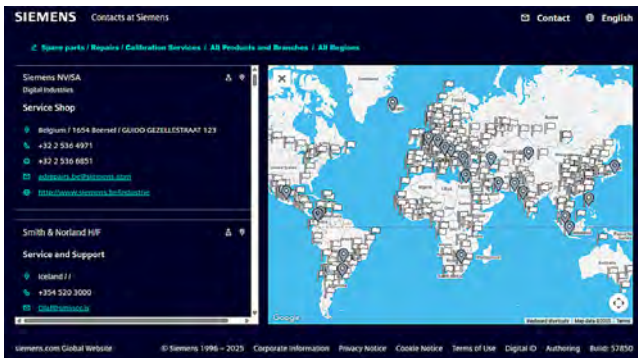

Use our electronic query form:

[www.siemens.com/partnerfinder](http://www.siemens.com/partnerfinder)

Additional information of the Siemens Partners for industry is available online at:

[www.siemens.com/partnerprogram](http://www.siemens.com/partnerprogram)

### Overview

At your service locally, around the globe for consulting, sales, training, service, support, spare parts on the entire portfolio of Siemens.

Your partner can be found in our Personal Contacts Database at: [www.siemens.com/automation-contact](http://www.siemens.com/automation-contact)

You start by selecting

- the required competence,
- products and branches,
- a country and a city

or by a location search or free text search.

## Appendix

### Digital Enterprise Services

#### Overview

At Digital Enterprise Services, we provide you with comprehensive services throughout the entire lifecycle. From a fully digital factory to a reliable spare parts supply and quick support in the event of outages, we work with our partners to ensure your plant operates optimally – improving availability, productivity, and efficiency.

Our services take industry to the next level and give you a competitive edge:

- **Services for Digital Transformation:**

Our innovative and scalable services streamline operations by optimizing your Overall Equipment Effectiveness (OEE), increasing productivity, preventing outages and improving business continuity – all while supporting IT/OT convergence.

- **Services for Sustainability:**

Our optimization and lifetime extension services help make your sustainability goals a reality by providing data-driven insights into energy use, enabling you to reduce your carbon footprint and costs. By enabling a circular economy and focusing on product safety, cybersecurity, and supply chain visibility, we extend asset life, save resources, and improve operational efficiency.

- **Lifecycle Services:**

Our innovative Lifecycle Services provide reliable support worldwide, offering tailored solutions throughout their entire lifecycle. By optimizing maintenance processes, we improve asset performance, efficiency, reliability, and productivity – from machines to entire plants or factories.

For more information, please visit us at:

[www.siemens.com/digital-enterprise-services](http://www.siemens.com/digital-enterprise-services)

[www.siemens.com/find-your-service](http://www.siemens.com/find-your-service)

## Appendix

### Software licenses

#### Overview

##### Software types

Software requiring a license is categorized into types. The following software types have been defined:

- Engineering software
- Runtime software

##### Engineering software

This includes all software products for creating (engineering) user software, e.g. for configuring, programming, parameterizing, testing, commissioning or servicing.

Data generated with engineering software and executable programs can be duplicated for your own use or for use by third-parties free-of-charge.

##### Runtime software

This includes all software products required for plant/machine operation, e.g. operating system, basic system, system expansions, drivers, etc.

The duplication of the runtime software and executable programs created with the runtime software for your own use or for use by third-parties is subject to a charge.

You can find information about license fees according to use in the ordering data (e.g. in the catalog). Examples of categories of use include per CPU, per installation, per channel, per instance, per axis, per control loop, per variable, etc.

Information about extended rights of use for parameterization/configuration tools supplied as integral components of the scope of supply can be found in the readme file supplied with the relevant product(s).

##### License types

Siemens Digital Industries and Smart Infrastructure offers various types of software license:

- Floating license
- Single license
- Rental license
- Rental floating license
- Trial license
- Demo license
- Demo floating license

##### Floating license

The software may be installed for internal use on any number of devices by the licensee. Only the concurrent user is licensed. The concurrent user is the person using the program. Use begins when the software is started. A license is required for each concurrent user.

##### Single license

Unlike the floating license, a single license permits only one installation of the software per license.

The type of use licensed is specified in the ordering data and in the Certificate of License (CoL). Types of use include for example per instance, per axis, per channel, etc.

One single license is required for each type of use defined.

##### Rental license

A rental license supports the "sporadic use" of engineering software. Once the license key has been installed, the software can be used for a specific period of time (the operating hours do not have to be consecutive).

One license is required for each installation of the software.

##### Rental floating license

The rental floating license corresponds to the rental license, except that a license is not required for each installation of the software. Rather, one license is required per object (for example, user or device).

##### Trial license

A trial license supports "short-term use" of the software in a non-productive context, e.g. for testing and evaluation purposes. It can be transferred to another license.

##### Demo license

The demo license support the "sporadic use" of engineering software in a non-productive context, for example, use for testing and evaluation purposes. It can be transferred to another license. After the installation of the license key, the software can be operated for a specific period of time, whereby usage can be interrupted as often as required.

One license is required per installation of the software.

##### Demo floating license

The demo floating license corresponds to the demo license, except that a license is not required for each installation of the software. Rather, one license is required per object (for example, user or device).

##### Certificate of License (CoL)

The CoL is the licensee's proof that the use of the software has been licensed by Siemens. A CoL is required for every type of use and must be kept in a safe place.

##### Downgrading

The licensee is permitted to use the software or an earlier version/release of the software, provided that the licensee owns such a version/release and its use is technically feasible.

##### Delivery versions

Software is constantly being updated. The following delivery versions

- PowerPack
- Upgrade

can be used to access updates.

Existing bug fixes are supplied with the ServicePack version.

##### PowerPack

PowerPacks can be used to upgrade to more powerful software. The licensee receives a new license agreement and CoL (Certificate of License) with the PowerPack. This CoL, together with the CoL for the original product, proves that the new software is licensed.

A separate PowerPack must be purchased for each original license of the software to be replaced.

##### Upgrade

An upgrade permits the use of a new version of the software on the condition that a license for a previous version of the product is already held.

The licensee receives a new license agreement and CoL with the upgrade. This CoL, together with the CoL for the previous product, proves that the new version is licensed.

A separate upgrade must be purchased for each original license of the software to be upgraded.

## Appendix

### Software licenses

#### Overview

##### **ServicePack**

ServicePacks are used to debug existing products. ServicePacks may be duplicated for use as prescribed according to the number of existing original licenses.

##### **License key**

Siemens Digital Industries and Smart Infrastructure supplies software products with and without license keys.

The license key serves as an electronic license stamp and is also the "switch" for activating the software (floating license, rental license, etc.).

The complete installation of software products requiring license keys includes the program to be licensed (the software) and the license key (which represents the license).

##### **Software Update Service (SUS)**

As part of the SUS contract, all software updates for the respective product are made available to you free of charge for a period of one year from the invoice date. The contract will automatically be extended for one year if it is not canceled three months before it expires.

The possession of the current version of the respective software is a basic condition for entering into an SUS contract.

You can download explanations concerning license conditions from [https://mall.industry.siemens.com/legal/ww/en/terms\\_of\\_trade\\_en.pdf](https://mall.industry.siemens.com/legal/ww/en/terms_of_trade_en.pdf)

## Appendix

### Conditions of sale and delivery

#### 1. General Provisions

By using this catalog you can purchase hard- and software products as well as services (together hereinafter referred to as "products") described therein from Siemens Aktiengesellschaft subject to the following Terms and Conditions of Sale and Delivery (hereinafter referred to as "T&C"). Note, for products purchased from any Siemens entity having a registered office outside of Germany, the respective terms and conditions of sale and delivery of the respective Siemens entity apply exclusively. The following T&C apply exclusively for orders placed with Siemens Aktiengesellschaft, Germany.

##### 1.1 For customers with a seat or registered office in European Union

For customers with a seat or registered office in European Union, the following terms and conditions apply subordinate to T&C:

- for products, which include specific terms and conditions in the text of the product description, these specific terms and conditions shall apply and subordinate thereto,,
- for stand-alone software products and software products forming a part of a product or project, the "General Conditions for Software Products for Infrastructure & Industry Business (German law)"<sup>1)</sup> and/or
- for consulting services the "Allgemeine Geschäftsbedingungen für Beratungsleistungen für Infrastructure & Industry Geschäft (Deutsches Recht)"<sup>1)</sup> (available only in German) and/or
- for other services, the „Supplementary Terms and Conditions for Services for Infrastructure & Industry Business (German Law) ("BL")"<sup>1)</sup> and/or
- for other products the "General Conditions for the Supply of Products and Services of the Electrical and Electronics Industry"<sup>1)</sup>.  
In case such products should contain Open Source Software, the conditions of which shall prevail over the "General Conditions for the Supply of Products and Services of the Electrical and Electronics Industry"<sup>1)</sup>, the Product will be given a note as to which special conditions apply to this open source software. This shall apply mutatis mutandis for notices referring to other third-party software components.

##### 1.2 For customers with a seat or registered office outside European Union

For customers with a seat or registered office outside European Union, the following terms and conditions apply subordinate to T&C:

- for products, which include specific terms and conditions in the description text, these specific terms and conditions shall apply and subordinate thereto,
- for consulting services the "Standard Terms and Conditions for Consulting Services for Infrastructure & Industry Business (Swiss Law)"<sup>1)</sup> and/or
- for other services the "International Terms & Conditions for Services"<sup>1)</sup> supplemented by "Software Licensing Conditions"<sup>1)</sup> and/or
- for other products the "International Terms & Conditions for Products"<sup>1)</sup> supplemented by "Software Licensing Conditions"<sup>1)</sup>

##### 1.3 For customers with master or framework agreement

To the extent products offered are covered by an existing master or framework agreement, the terms and conditions of that agreement shall apply instead of T&C.

#### 2. Prices

The prices are in € (Euro) ex point of delivery, exclusive of packaging.

The sales tax (value added tax) is not included in the prices. It shall be charged separately at the respective rate according to the applicable statutory legal regulations.

Prices are subject to change without prior notice. We will charge the prices valid at the time of delivery.

To compensate for variations in the price of raw materials (e.g. silver, copper, aluminum, lead, gold, dysprosium and neodym), surcharges are calculated on a daily basis using the so-called metal factor for products containing these raw materials.

A surcharge for the respective raw material is calculated as a supplement to the price of a product if the basic official price of the raw material in question is exceeded.

The metal factor of a product indicates the basic official price (for those raw materials concerned) as of which the surcharges on the price of the product are applied, and with what method of calculation. The metal factor, provided it is relevant, can be found in the respective product description.

An exact explanation of the metal factor can be downloaded at: [https://mall.industry.siemens.com/legal/ww/en/terms\\_of\\_trade\\_en.pdf](https://mall.industry.siemens.com/legal/ww/en/terms_of_trade_en.pdf)

To calculate the surcharge (except in the cases of copper, dysprosium and neodym), the official price from the day prior to that on which the order was received or the release order was effected is used.

To calculate the surcharge applicable to copper, the official price from two days prior to that on which the order was received or the release order was effected is used.

To calculate the surcharge applicable to dysprosium and neodym ("rare earths"), the corresponding three-month basic average price in the quarter prior to that in which the order was received or the release order was effected is used with a one-month buffer (details on the calculation can be found in the explanation of the metal factor).

#### 3. Additional Terms and Conditions

The dimensions are in mm. In Germany, according to the German law on units in measuring technology, data in inches apply only to devices for export.

Illustrations are not binding.

Insofar as there are no remarks on the individual pages of this catalog – especially with regard to data, dimensions and weights given – these are subject to change without prior notice.

<sup>1)</sup> The text of the Terms and Conditions of Siemens AG can be downloaded at [https://mall.industry.siemens.com/legal/ww/en/terms\\_of\\_trade\\_en.pdf](https://mall.industry.siemens.com/legal/ww/en/terms_of_trade_en.pdf)

## Appendix

### Conditions of sale and delivery

#### 4. Export Control and Sanctions Compliance

##### 4.1 General

Customer shall comply with all applicable sanctions, embargoes and (re-)export control laws and regulations, and, in any event, with those of the European Union, the United States of America and any locally applicable jurisdiction (collectively "Export Regulations").

##### 4.2 Checks for Products

Prior to any transaction by customer concerning products (including hardware, documentation and technology) delivered by Siemens, or products (including maintenance and technical support) performed by Siemens with a third party, customer shall check and certify by appropriate measures that

- (i) the customer's use, transfer, or distribution of such products, the brokering of contracts or the provision of other economic resources in connection with products will not be in violation of any Export Regulations, also taking into account any prohibitions to circumvent these (e.g., by undue diversion)
- (ii) the products are not intended or provided for prohibited or unauthorized non-civilian purposes (e.g. armaments, nuclear technology, weapons, or any other usage in the field of defense and military);
- (iii) customer has screened all direct and indirect parties involved in the receipt, use, transfer, or distribution of the products against all applicable restricted party lists of the Export Regulations concerning trading with entities, persons and organizations listed therein and
- (iv) products within the scope of items-related restrictions, as specified in the respective annexes to the Export Regulations, will not, unless permitted by the Export Regulations, be
  - (a) exported, directly or indirectly (e.g., via Eurasian Economic Union (EAEU) countries), to Russia or Belarus, or
  - (b) resold to any third party business partner that does not take a prior commitment not to export such products to Russia or Belarus.

##### 4.3 Non-Acceptable Use of Software and Cloud Services

Customer shall not, unless permitted by the Export Regulations or respective governmental licenses or approvals,

- (i) download, install, access or use the products from or in any location prohibited by or subject to comprehensive sanctions or subject or to license requirements according to the Export Regulations;
  - (ii) grant access to, transfer, (re-)export (including any "deemed (re-)exports"), or otherwise make available the products to any entity, person, or organization identified on a restricted party list of the Export Regulations;
  - (iii) use the products for any purpose prohibited by the Export Regulations (e.g. use in connection with armaments, nuclear technology or weapons);
  - (iv) upload to a products platform any customer content unless it is non-controlled (e.g. in the EU: AL = N; in the U.S.: ECCN = N or EAR99);
  - (v) facilitate any of the afore mentioned activities by any user.
- Customer shall provide all users with all information necessary to ensure compliance with the Export Regulations.

#### 4.4 Semiconductor Development

Customer will not, without advance written authorization from Siemens, use offerings for the development or production of integrated circuits at any semiconductor fabrication facility located in China meeting the criteria specified in the U.S. Export Administration Regulations, 15 C.F.R. 744.23.

#### 4.5 Information

Upon request by Siemens, customer shall promptly provide Siemens with all information pertaining to users, the intended use and the location of use or the final destination (in the case of hardware, documentation and technology) of the products. Customer will notify Siemens prior to customer disclosing any information to Siemens that is defense-related or requires controlled or special data handling pursuant to applicable government regulations, and will use the disclosure tools and methods specified by Siemens.

#### 4.6 Reservation

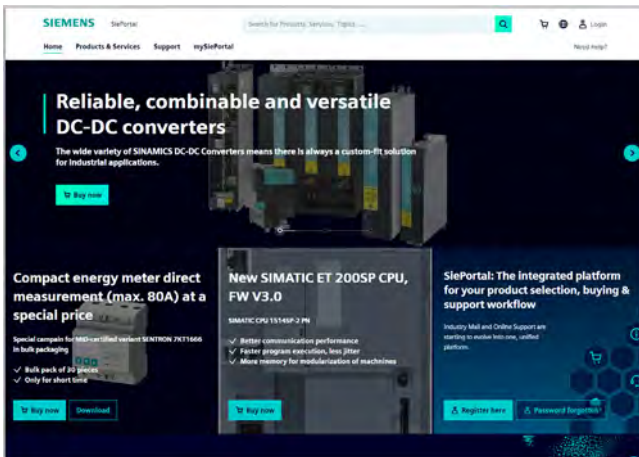

Siemens shall not be obligated to fulfill this agreement if such fulfillment is prevented by any impediments arising out of national or international foreign trade or customs requirements or any embargoes or other sanctions. Customer acknowledges that Siemens may be obliged under the Export Regulations to limit or suspend access by customer and/or users to products.

#### 5. Miscellaneous

Errors excepted and subject to change without prior notice.

## Selection and ordering at Siemens

SiePortal – Ordering products and downloading catalogs

### Easy product selection and ordering with SiePortal

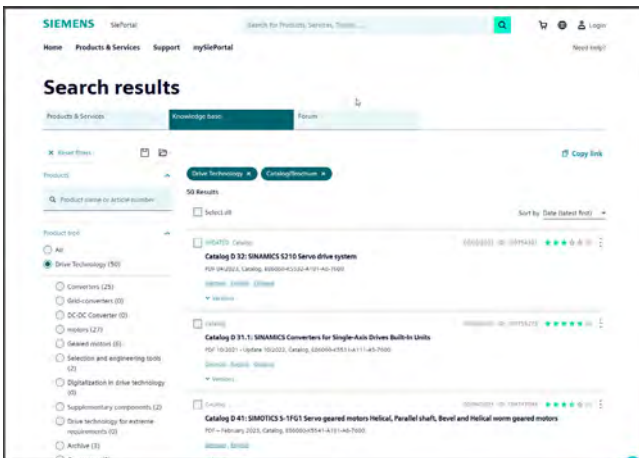

SiePortal > Products & Services

The internet ordering platform of Siemens AG is located in SiePortal. It provides you with online access to a comprehensive product spectrum that is presented in an informative, well-organized way.

Powerful search functions help you select the required products, while configurators enable you to configure complex product and system components quickly and easily. CAX data are also available for you to use.

Data transfer allows the entire procedure, from selection through ordering to tracking and tracing, to be carried out online. Availability checks, individual customer discounting, and quotation preparation are also possible.

<https://sieportal.siemens.com>

### Downloading catalogs

SiePortal > Support > Knowledge base

You can download catalogs and brochures in PDF format from Siemens Industry Online Support without having to register.

The filter box makes it possible to perform targeted searches.

## Cybersecurity information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks.

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept.

Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place.

For additional information on industrial cybersecurity measures that may be implemented, please visit [www.siemens.com/cybersecurity-industry](http://www.siemens.com/cybersecurity-industry)

Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats.

To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under [www.siemens.com/cert](http://www.siemens.com/cert)
